

PAIN-KILLER

ALMANAC &

FAMILY RECEIPTS

BOOK

1867.  
PERRY DAVIS & SON,  
MONTREAL, C. E.

Spare moments are the gold dust of time.

## TO THE PUBLIC.

IN presenting you with our first issue of the Pain-Killer Almanac and Receipt Book, which we hope to continue for many years, we ask, for whatever excellences it may possess, your favor; and for its faults, your kind indulgence: and while we have attempted, by the correctness of the calendars, astronomical calculations, and useful tables, to win your confidence, we have endeavored by the introduction of many receipts, and other valuable and interesting information, to make it so acceptable to you that it shall find a place in every well-regulated household, and be preserved there for its intrinsic worth.

In selecting letters, certificates, &c., of our long and well-known popular medicine, the PAIN KILLER, from the mass of matter we have on file, we have endeavored to use only such as would, in a simple and concise manner, exhibit its peculiar properties, and show its adaptedness to the wants of the people. Most of these documents are from intelligent, well-educated, and Christian men and women. Among them many clergymen and missionaries, who, from a sense of duty or a desire to benefit, have given their experience in the use of the Pain Killer. To many of them it has been a "family medicine" for more than twenty years; and it is noteworthy, that they who have known it longest express the strongest confidence in its virtues.

We have many certificates of its excellence which we are not permitted to publish, and some from physicians which we have not used; knowing that so jealously are their interests guarded, that a member of any of the numerous medical associations who should be known to use or to recommend the use of any medicine whose formula was withheld from the association would thereby incur the liability of expulsion. There are nevertheless some noble men, who, with more love for mankind than dread of medical societies, have dared to prescribe, and after long use to recommend, the PAIN KILLER to the public as a valuable and reliable family medicine. The Pain Killer is not confined in its range of use to any climate or country, but is universal in its adaptation to the wants of man; being as effectual in curing disease in India, China, or South America as in the United States and Europe. As, in curing Cholera it shows itself master of all the minor forms of that disease,—such as Cholera Morbus, Dysentery, Summer Complaint, Diarrhoea, &c.,—so in controlling Yellow Fever, Diphtheria, and other malignant diseases,—which it has repeatedly cured,—it asserts its power over all the milder and more common forms of these complaints.

We have long used it in our families and recommended it to our friends, and it has never deceived us, nor failed to meet our most sanguine expectations. Hence in commending it again to the public favor, we do so without fear, confident that the result of a fair trial will fully sustain all we have said in its favor.

Respectfully,

PERRY DAVIS & SON.

PROVIDENCE, R.I., Jan. 1, 1867.

Pain Killer— a blessing to the rich, friend to the poor, and within reach of all.

The future destiny of the child is the work of the mother.

He is unwise and unhappy who never forgets the injuries he receives.

A friend to everybody is nobody's friend.

THE ZODIAC.

The Zodiac [from ζῳδιον, diminutive of ζῳον, an animal] is an Imaginary belt in the heavens, 16° or 18° broad, in the middle of which is the ecliptic, or sun's path. It contains the twelve constellations, which once constituted the "twelve signs of the zodiac," and from which they are named. The zodiacal circle is supposed to be of very ancient origin, though it is first mentioned by Aristotle. About a century later, Autoleus speaks of it. Aratus, in his astronomical forms, names the zodiacal circle, and enumerates its twelve signs, and states, moreover, that six of them rise and six set every night.

It was anciently believed that the heavenly bodies exerted a powerful influence over the feelings and actions of all the animal creation, and especially over the destinies of mankind; that the relative position of these at the hour of the birth of the child, gave cast to his character, and through life influenced his fortunes, brought him health and success, or misfortune, disease, and even death. The influence of the position of the sun and moon in the signs of the zodiac was believed to be especially powerful over the success or failure of enterprises commenced or carried on at such times, as well as over the health of the particular parts of the body, which each particular sign was supposed to represent, which is shown in

THE ANATOMY OF MAN'S BODY,

As supposed to be governed by the Twelve Constellations, according to Ancient Astrology.

To find where the sign is: First find the day of the month, and against it is the sign or place of the moon. Then, by reference to this cut, you will see what part of the body this sign is supposed to govern.

NAMES AND CHARACTERS OF THE SIGNS OF THE ZODIAC.

1 ♈ Aries, the Ram.	5 ♌ Leo, the Lion.	9 ♐ Sagittarius, the Archer.
2 ♉ Taurus, the Bull.	6 ♍ Virgo, the Virgin.	10 ♑ Capricornus, the Goat.
3 ♊ Gemini, the Twins.	7 ♎ Libra, the Balance.	11 ♒ Aquarius, the Waterman.
4 ♋ Cancer, the Crab.	8 ♏ Scorpio, the Scorpion.	12 ♓ Pisces, the Fishes.

EXPLANATION OF ASTRONOMICAL CHARACTERS.

☉ Sun. ☾ Moon. ☿ Mercury. ♀ Venus. ⊕ Earth. ♂ Mars. ♃ Jupiter. ♄ Saturn. ♅ Uranus. ♆ Neptune. ♁ Vesta. ♃ Juno. ♀ Pallas. ♁ Ceres. ☾ New Moon. ☽ First Quarter. ☾ Full Moon. ☽ Last Quarter. ☉ Dragon's Head, ascending node. ☊ Dragon's Tail, descending node. ☉ ☽ Conjunction, or in the same degree. ☉ ☽ Opposition, or 180 degrees apart. \* Sextile, 60 degrees apart. □ Quartile, 90 degrees apart. △ Trine, 120 degrees apart.

SHORTEST AND LONGEST DAYS.

At Berlin, London, and Paris, the longest day is 16½ hours, and the shortest 7½; at Stockholm and Upsal, 19½ and 14½; Hamburg and Dantzic, 17 and 7; St. Petersburg and Tobolsk, 21½ and 2½; Archangel, 22½ and 1½; at Tornco, 23 and 1; at Wardchus, in Norway, and at the North Cape, daylight lasts from the 21st of May to the 21st of July, without interruption; and at Spitzbergen the longest period of day lasts 3½ months.

A good book is a most excellent companion.

A proverb is the wisdom of many expressed by the wit of one.

Pain Killer is the cheapest of family physicians, and one of the best of friends.

## THE WEATHER.

There are few subjects on which so much is said, and about which so little is known, as the weather; and yet, to any attentive observer, the appearance of the sky at particular times affords wonderfully accurate signs of changes. The clouds are full of meaning, and each season of the year has its peculiar character, differing from all other seasons. The character and degree of moisture in the atmosphere, together with the altitude of the sun, is the principal cause of the ever-varying colors of the sky, which may by the careful observer be read as an open book.

One of the signs of foul weather upon which reliance may be placed is the gradual change of a blue sky to a dull gray, becoming more dense. If the condensation is sufficient to take shape at nightfall, and show a bank in the west, it is an indication of a storm. This has no reference to thunder-clouds. All condensations and indications derived from it must be looked for in the west. From that quarter come all storms. Cloud-banks in the south-west in the Fall and Winter indicate snow. Banks in the north-west indicate rain at all seasons. It may, indeed, snow, but, if so, in large flakes turning to rain. A red sun, with smoky air, indicates continued dry weather. A red appearance of the sky, when no clouds exist, indicates a fair day following. If there is no condensation to the east of us in the morning, to reflect the sun, the sky is gray; if there be such condensation, the sky is red, and indicative of foul weather; it is the eastern edge of an approaching storm.

Whether clear or cloudy, a rosy sky at sunset presages fine weather; a red sky in the morning, bad weather, or much wind; a gray sky in the morning, fine weather; a high dawn, wind; a low dawn, fair weather. Soft-looking or delicate clouds foretell fine weather, with moderate or light breezes; hard-edged, oily-looking clouds, wind. A dark, gloomy sky is windy; a light, bright-blue sky indicates fair weather. Generally, the softer clouds look, the less wind, but perhaps more rain may be expected; and the harder, more greasy, rolled, tufted, or ragged, they appear, the stronger the coming wind will prove. A bright-yellow sky at sunset presages wind; a pale-yellow, wet; and thus, by the prevalence of red, yellow, or gray tints, the coming weather may be foretold very nearly. Small, inky-looking clouds foretell rain; light scud driving across heavy masses show wind and rain, but, if alone, may indicate wind only. High upper clouds, crossing in a direction different from the wind felt below, foretell a change of wind. After fine weather, the first signs in the sky of a coming change are usually light streaks, curled, or mottled patches of white distant cloud, which increase, and are followed by an overcasting of misty vapour that grows into cloudiness. This appearance, more or less oily or watery as wind or rain will prevail, is an infallible sign. Misty clouds, forming or hanging on heights, if they remain or increase, show wind and rain coming. If they rise or disperse, the weather will improve.

Dew and fog are indications of fine weather; for neither form under a cloudy or over-cast sky, or when there is much wind. Remarkable clearness of the atmosphere near the horizon, or a good-hearing day, indicates rain, if not wind.

If you have Chillsblains, use the Pain Killer. It will cure them.

The Pain Killer is invaluable for Coughs and Colds. — Rome Citizen.

JANUARY (♈ Aquarius). — In his regulation of the Roman year, Numa Pompilius, the second king of Rome, called the first month *Januarius*, after Janus, the highest divinity, god of the sun and the year, who presided over the beginning of all things, and to whom this month was sacred. Hence on New Year's Day, which was the principal festival of that god, people took care that all they thought, said, and did, was pure and favorable, since everything was ominous of the occurrences of the whole year. They wore festive garments, abstained from cursing and quarrelling, saluted every one they met with words of a favorable import, gave presents to one another, and endeavored during the day to perform some part of what they intended to do in the course of the year. Janus was represented with two faces, looking in opposite directions. His temple at Rome was never closed, except in time of universal peace.

An ounce of prevention is worth a pound of cure.

Pain Killer is an excellent remedy for Rheumatism.

Without temperance there is no health; without health no pleasure.

One foolish act may undo a man, and a timely one make his fortune.

6

PAIN-KILLER ALMANAC.

MILWAUKEE, Wis., Dec. 15, 1848.

DEAR SIR, — I am at some loss in my own mind what to say to you, in relation to Davis' Pain Killer. It really seems to be possessed of the power of magic, beyond the comprehension of the human mind. After a thorough trial, I am able to say that it relieves almost EVERY pain that the human flesh is heir to, and in many cases effects an instant cure.

I became your agent without feeling any interest in the medicine, but on trial I soon became very much interested, upon seeing the happy effect it had upon many persons. The increased sales in this State are truly astonishing. I might have collected any number of certificates of its great power in relieving pain if I had attended to it at the time the cures came under my observation. The least I can say for the Pain Killer is that it fully answers the purpose for which it is recommended.

A. W. HATCH, Druggist.

CINCINNATI, O. July 4, 1857.

GENTLEMEN, — Having used, and witnessed the beneficial effects of, Perry Davis' Pain Killer, I take great pleasure in recommending it to the public as the best family medicine with which I am acquainted. In this establishment are employed nearly one-hundred persons, and your Pain Killer has been used with the most astonishing results. For FOUR YEARS not a single severe case of colic, summer complaint, or dysentery has occurred that has not yielded to the magic-like curative powers of the "Killer;" and for cuts, bruises, &c., it is in almost daily use, and with like good results.

JOHN TANNER,

Foreman Wrightson & Co's Printing Establishment.

FRANKFORT, N.Y. Jan. 1, 1848.

GENTLEMEN, — Last fall I had the misfortune to be thrown from my boat into the canal, and took a violent cold, which settled in my head, producing excruciating pain. After having tried various remedies, I obtained a pamphlet from Foster & Dickinson advertising your Pain Killer, and was induced to try it. On applying it once, the pain was entirely removed; and I have had no return of it since. I would cheerfully recommend it as truly a Pain Killer, believing it will remove pain wherever it exists.

Very respectfully yours,

JAMES E. AUSTIN.

*Johnny Cake.* — One quart of sour buttermilk, a little salt, a piece of butter half the size of an egg, corn meal enough for a stiff batter, one teaspoonful of soda, — if a rich cake is desired add two well-beaten eggs, — bake three-quarters of an hour.

*Corn Meal Cakes.* — One quart of meal, one pint of boiling milk, a teaspoonful of salt, a large spoonful of soda; set it to rise in a warm place; when risen, add as much flour and corn meal as will make a stiff batter, then let it stand half an hour, then pour into the tins. Bake two hours. This requires beating until very light.

*Dr. Rush* used to say the reason why Germans never die of consumption is they are always singing.

Pain Killer is a sure cure for a sudden Cold.

A man must ask his wife how to thrive.

FEBRUARY (♋ Pisces) (Lat. *Februarius*), the second month of our year, derives its name from *februus*, which originally, in the Sabine language, signified to cleanse, to purify. It was popularly called the *month of expiation*, because on the fifteenth day of this month the great feast of expiation was held. During this month occurred the festival in honor of *Eupereus*, or the *Lucaean Pan*, the god of fertility, when the priests of this divinity, with painted faces, and only a girdle about their loins, ran about the city, striking the women whom they met, who were supposed, in consequence, to be rendered fruitful. Our Saxon ancestors called it *Sol Month*, because in it the sun's meridian altitude visibly increases. February was not in the calendar of *Romulus*, but was added to the year by *Numa*, who gave it the twelfth place in the calendar, and assigned it twenty-eight days, in order that the sum of the days of the year might be an uneven number, according to a Pythagorean fancy. But in the bissextile or leap year (any year divisible by 4), one day is added to this month, which is an excess that amounts in a century to about three fourths of a day, and is corrected by omitting one bissextile in each century divisible by 4. February was transferred by the *Decemviri* to the place in the calendar it now occupies.

Fortune knocks once at every man's door.

Pain-killer cures coughs and colds, frost-bites and chilblains; no family should be without it.

The sum of our being is to live wisely, soberly, and righteously.

*Potatoes, How to boil.* — The correct way to cook a potato in any country, provided boiling is the determination, is to clean firstly; let it lie in clean, cold water two hours, ten is all the better; place it in cold water in the pot, without paring, — potatoes should never be pared before boiling, — boil moderately until the test-fork goes smoothly through the potato without encountering a mite of core. Then drain off the water, set the pot over the fire, uncovered, for five minutes, after which whip off Mr. Potato's jacket in a hurry, and send him to the table in a close cover, piping hot; or, if you are not over-fashionable and fastidious, it is preferable to serve "murphy" in his coat. For at least two-thirds of all the starch the potato contains is deposited so near the surface, that, however carefully the tuber may be pared in the raw state, the greater portion of the starch is sure to be thrown away.

Any thoroughly potato-bred Irishwoman would as soon think of committing regicide, as boiling her potatoes undressed. And there are no better potatoes, or potato cooks, anywhere in this world than there are in Ireland.

Read the following unsolicited testimonial from Rev. W. B. Jacobs: —

NEWARK, N. J., June 6, 1860.

Messrs. PERRY DAVIS & SON — *Gentlemen,* — Allow me unsolicited to send you a word of commendation for your Pain Killer. I have used it in my family these several years, and found it all it claims to be. For Rheumatism, Coughs, Colds, Burns, Cholera tendencies and difficulties, as well as diseases generally that prevail in families, I regard the Pain Killer as beyond all price, and as efficacious beyond any medicine within my knowledge. We keep it as our chief family medicine, and find its use in ordinary cases worth more than any doctor. The testimony of others among my acquaintances and friends is equally favorable. Many clergymen have spoken of it in the highest terms as a family medicine. Missionaries in repeated instances have said to me in person and in their letters, that the Pain Killer was by far the best medicine used in heathen lands; and they use it for themselves and families, and administer it to others around them. Thus much I am inclined to say as an act of justice to yourselves, and as a benefit to others. You are at liberty to use this testimonial, if of any service.

Yours, &c.,

REV. W. B. JACOBS.

CRAMP IN THE STOMACH is one of the results of imperfect digestion, and may be always immediately relieved by the Pain Killer. Often a single dose will be sufficient. Its action is almost magic-like, for the reason that it reaches at once the source of the trouble. It may be relied on in cases of sea-sickness, or diseases incident to change of diet or water. No traveller should be without it.

Rev. J. S. Beccher, writing from Bassin, Burmah, July 26, 1858, says, "your valuable Pain Killer has gained a high reputation among all classes in this province, and there is a great demand for it here."

Rev. J. Phillips, formerly of the Orissa Mission, India, writes, "My wife is using your celebrated Pain Killer for a rheumatic affection, from which she has suffered for years, and with better effect than any other of the various remedies she has tried; I am using it for dyspepsia and kidney complaints with good success."

Your chilblains may be easily cured by the Pain Killer.

"If a man," says Franklin, "empties his purse into his head, no man can take it from him."

A distinguished teacher deifies genius to be the power of making efforts.

A beautiful face is a silent commendation.

----	---	--	---------------------	----	------	------	------	---	------	------	------

MARCH (♁♂♄ Aries), the third month of the year according to modern computation, was originally the first month of the Roman year, and was, in fact, so considered in England before the alteration of the style in 1752, the legal year commencing on the 25th of March. The name of the month is said to be derived from Mars, the Roman god of war. The Anglo-Saxons called it *Hyld Monath*, loud or stormy month. There is an old proverb which represents March as borrowing certain days from April. These are called by the rustics, both in England and Scotland, the "Borrowed Days." Ray has in his collection a proverb relating to this month, that "A bushel of March dust is worth a king's ransom;" showing the importance of dry weather at this season of the year.

It is easier to keep the devil out than turn him out.

If you play with a fool at home, he will play with you abroad.

Stick headache is speedily relieved by a small dose of Pain Killer.

## IMPORTANT TO SHIPMASTERS AND SEAMEN.

Read the following testimony of an old shipmaster: —

*Dear Sir,* — Some twenty years since, I was very seriously injured in one of my hips, by coming in contact with the anchor of the ship of which I was second mate. The bruise was so bad that my hip has given me great trouble most of the time since, until a year ago last April, when I heard of Davis' Pain Killer, and immediately procured a bottle, and, by using it according to the directions, was entirely cured in about ten days, and have not experienced the least trouble from my hip since.

Fearing the importance of having this valuable medicine constantly by me, before starting for Europe in March last, in the ship *Louvre*, from New York, I purchased some to take with me. While at Antwerp, one of my crew was attacked with a very severe dysentery; I gave him the Pain Killer, and it relieved him at once.

On my passage home, with one hundred and sixty-four passengers, I administered this medicine to all who were sick; and none took it without getting immediate relief. One lady passenger, in particular, was afflicted with a severe headache, for which she said there was no cure, having been troubled with it most of the time for years. I told her I had a sure remedy, and gave her the Pain Killer, which, to her surprise, did effect the cure she had long sought for in vain. I had as good a medicine chest as ever was put on board a ship, but did not open it, there being no necessity for it; the Pain Killer answering all purposes. And I do most sincerely recommend to every shipmaster to always take a good supply of this valuable medicine with him on going to sea. It is safe, convenient, and reliable, — a real PAIN KILLER.

CHRISTOPHER ALLYN,

*Late Master of the Ship Louvre.*

NEW LONDON, Feb. 17, 1848.

LA PORT, Ind., Nov. 13, 1848.

*Dear Sir,* — A few weeks since, I had a distressing cough; my throat was very sore and inflamed. I procured a bottle of Perry Davis' Pain Killer, using it according to the directions; and it has entirely cured me. I have also seen it used in cases of toothache and ague in the face with the most beneficial effects. I believe it to be an indispensable medicine, and recommend it to all my acquaintance.

Yours, &c.,

CHARLES W. BANKS.

PERRYSBURG, Ohio, Nov. 15, 1848.

This may certify that my wife was for some time very much afflicted with a violent cough, which reduced her so much that she was unable to enjoy a moment's rest, day or night, and by the use of one bottle of Perry Davis' Pain Killer she was entirely relieved, and now enjoys good health. I consider it one of the best family medicines in use.

F. K. BELANGER.

Always have the Pain Killer at hand in case of accident.

Says Feiltham, "I never yet found pride in a noble nature, nor humility in an unworthy mind."

Always have the Pain Killer at hand in case of accident.

Always have the Pain Killer at hand in case of accident.

Every man is a lion in his own cause.

APRIL (♈ Taurus) (Lat. Aprilis, cont. of Aprilis), the fourth month of our year, held in the original Alban calendar the first station. Its name is derived from *aperire*, to open; either from the opening of the buds, or the bosom of the earth in producing vegetation. The Anglo-Saxons called it *Ooster* or *Easter Month*, from *Ostara*, the goddess of light or spring, in honor of whom they celebrated a festival in April. Easter, a church festival, commemorating Christ's resurrection, and corresponding with the passover of the Jews, occurs on Sunday, the second day after Good Friday, being the first Sunday after full moon, which happens upon or next after the 21st day of March. The custom of making fools on the 1st of April, well known throughout Europe, is believed to be connected with an immemorial custom of the Hindoos, during the Huli Festival, held about this time in India, when mirth and festivity reign among the inhabitants of every class, and people are sent upon fruitless errands and expeditions.

Pain Killer is the best remedy for scalds and burns.

For Asthma or Catarrh use the genuine Pain Killer.

Search others for their virtues, and thysself for thy vices. Virtue is her own reward.

The best medicine for a bruise or burn is Pain Killer.

12

PAIN-KILLER ALMANAC.

*Jenny Lind Cake for Breakfast.* — Take one egg, half cup of sugar, two cups sweet milk, four cups flour, two teaspoonfuls cream-tartar, one teaspoonful soda, and half teaspoonful salt. Rub the cream-tartar, sugar, and salt into the flour; break the egg on it, and stir in the milk gradually till it is a smooth batter; then add the soda dissolved in hot water, and bake in a quick oven.

*Corn-Meal Muffins.* — Three cups of corn meal, one half cup of sifted wheat flour, three eggs well beaten, two large spoonfuls of butter, and one teaspoonful of soda dissolved in one pint of buttermilk, and a little salt. Beat these well together, pour into rings, and bake a nice brown in the oven.

*Rye Cake.* — Three cups of rye-meal, three of corn-meal, a little salt, one small teaspoonful of soda dissolved in a cup of milk, a teaspoonful of grated nutmeg and ground cinnamon, mixed; then add as much milk as will make a thin batter; bake on the griddle. Serve hot.

**WORTH KNOWING.** — *Transplanting Trees.* — If the commissioner of the Central Park would give strict orders to mark the north side of trees with red chalk before they are taken up, and when set out to have the tree put in the ground with its north side to the north in its natural position, a large proportion would live. Ignoring this law of nature is the cause of so many transplanted trees dying. If the north side is exposed to the south, the heat of the sun is too great for that side of the tree to bear, and therefore it dries up and decays.

UTICA, June 1, 1849.

*Gentlemen,* — This is to certify, that my wife had a violent cough of some weeks' standing, when I bought a bottle of your Pain Killer of Foster & Dickinson, and she commenced using it according to directions. After taking the first dose, her cough was evidently better; and after taking it three or four times, her cough and soreness in the throat were entirely removed, and she has had no return of the cough or soreness of the lungs since. And from using it in my family, I have no doubt that your Pain Killer is the best family medicine in use, adapted to a larger class of diseases than any other medicine in the world.

I am respectfully yours, &c.,

WILLIAM LENT.

BOWLING GREEN, Ky., Nov. 14, 1853.

This may certify that I have been afflicted for two years and a half with a severe pain in the stomach and chest, and found no relief until I tried Davis' Pain Killer, which has entirely relieved me. I further certify that I have been selling this medicine to a considerable extent, and it proves to be the most successful medicine for curing ague and chill fever, and miasmatic diseases, that has ever been sold in this section of country.

I consider it the most valuable medicine of the age, and can fully recommend it for the above diseases.

THENAN PIKE.

Pain Killer is an excellent spring medicine.

The pleasantest things in the world are pleasant thoughts; and the greatest art in life is to have as many of them as possible.

I can't never accomplish anything, but I'll try has done wonders.

Neuralgia in the face or head, and toothache, are easily cured by the use of Pain Killer.

He who knows not when to be silent knows not when to speak.

MAY (♊ Gemini), the fifth month of our present year, was the second in the old Alban calendar, the third in that of Romulus, and the fifth in the calendar of Numa Pompilius. The name is supposed to be derived from Maia, a Roman divinity, also called Majesta. She was the daughter of Atlas, and the mother of Mercury by Jupiter. (*Maia*, in the Greek, signifies *mother*.) By some she was regarded as the wife of Vulcan, because it was the custom for a priest of Vulcan to offer a sacrifice to her on the 1st of May. Smith thinks it more probable that Maia was the ancient name of Ops, the Roman female divinity of plenty and fertility, who was regarded as the wife of Saturnus, and accordingly as the protectress of everything connected with agriculture. Our modern May-day celebrations, with may-pole and flower-decked queen, are all suggestive of the ancient worship of this goddess.

A soft answer turneth away wrath.

A lazy man takes a hundred steps, because he would not take one in time.

**CHOLERA.** — *How to cure it.* — At the commencement of the diarrhoea, which always precedes an attack of the cholera, take a teaspoonful of the Pain Killer in sugar and water (warm if convenient), and then bathe freely the stomach and bowels with the Pain Killer clear. Should the diarrhoea or cramps continue, repeat the dose every ten or fifteen minutes till the patient is relieved. In extreme cases, two or more teaspoonfuls may be given at a dose.

The following letter, from the well-known Capt. Broadwell, of the steamer "Atlantic," endorsed by Mr. Boffinger, clerk of same steamer, speaks for itself.

ST. LOUIS, Mo., June 14, 1849.

Dear Sir, — I feel it a duty I owe to the public, to make known the value of Davis' Pain Killer, and my experience in using it for some of the complaints for which it is recommended. In April last, on your recommendation, I purchased a one-dollar bottle for pains with which I have long been afflicted, and used it on my trip down to New Orleans with the most gratifying and beneficial effects. On my return trip to this city, the cholera made its appearance among my passengers. I made use of the Pain Killer, having no other remedy on board, and, to my surprise and gratification, found it gave immediate relief. On my arrival in St. Louis I got four large bottles, having entire confidence in it as a cholera remedy, and feeling that I needed no other medicine on my boat. I used the four bottles on my trip to New Orleans and back, for cholera and other complaints, and met with the most astonishing success. Since then I have made two more trips to New Orleans and back; and on the one previous to my last up had more than seventy cases of cholera on board, using the Pain Killer only with the most astonishing results. In all cases where it was used in time, it gave almost immediate relief; and I can with confidence say to you and the public, that in all the early stages of cholera, it is in my opinion an *infallible remedy*, and no consideration whatever would induce me to leave port without a good supply of it on board, believing it to be a medicine that no officer of a boat, or any family, should be without a single day.

J. M. BROADWELL, Capt. Steamer "Atlantic."

I most cordially unite with Capt. Broadwell in recommending Perry Davis' Pain Killer to the public, having myself been severely attacked with the cholera, and relieved in a few hours by using it; and having myself administered it to more than fifty persons attacked with the cholera, and in every case, when used in season, effecting a cure in a few hours. I take great pleasure in recommending it to the public as an invaluable medicine, and one that no individual should be without a single hour.

J. N. BOFFINGER, Clerk Steamer "Atlantic."

**DAVIS' PAIN KILLER.** — The above certificates from the captain and clerk of the steamer "Atlantic," respecting the Pain Killer as an infallible remedy for cholera, we know to be genuine. The facts were stated verbally by them sometime since in our office. — *St. Louis Union.*

The Pain Killer has real merit. — *Newport News.*

The most exalted worth is stripped of its glory whenever it glories in itself.

We have used the Pain Killer and found it valuable. — *Chickasaw Commercials.*

Pain killer is a sure cure for cholera. See directions on bottle.

In matters of conscience first thoughts are best.

Words sometimes would more than words. Define not your month with impure words.

Pain killer is a sure cure for cholera. See directions on bottle.

JUNE (♋ Cancer) (Lat. Junius), the sixth month of our year, was the fourth month of the old Latin or Alban calendar. It derives its name from, and, according to Ovid, was given in honor of, the goddess Juno, sister and wife of Jupiter, styled also the Queen of Heaven, the main feature of whose character is, that she bore the same relation to the female sex that Jupiter did to the male. She was, consequently, regarded as the protectress of everything connected with marriage. Hence June, which was held sacred to her, was considered the most favorable month for marrying. But the general festival, which was celebrated by all women in honor of Juno, and was called *Matronalia*, always took place on the first of March. In this month occurs the summer solstice, when the sun enters the sign Cancer.

One dose of Pain Killer will often cure diarrhoea.

*Indian Bread.* — One quart sour milk, one cup molasses, one teaspoonful soda, three cups Indian meal, two cups flour, — baked in loaf not less than two hours, four if desirable, — slow oven.

*Corn Cakes.* — Two pounds of sifted meal; pour on this one pint of sour milk or cream; cut up one spoonful of good butter; beat three eggs, and stir in a little salt, with one teaspoonful of soda dissolved in a little milk. This must be very lightly beaten; then pour into tins, and bake quickly.

*Buttermilk Muffins.* — Stir into one quart of buttermilk one teaspoonful of soda, and into one quart of flour one teaspoonful of cream of tartar; add them, and beat them well together, and pour into the muffin rings, and bake on a griddle. Serve hot.

*Corn Muffins.* — One quart of Indian meal, sifted, heaping spoonful of butter, one quart of milk, salt-spoon of salt, two tablespoonfuls of distillery yeast, one of molasses. Let it rise four or five hours. Bake in muffin-rings, or shallow pans.

*Indian Meal Fried Cakes.* — One pint of sour milk, a small teaspoonful of saleratus, a little salt, two and a half coffee cups of fine Indian meal. Mix all together, then drop from a spoon into hot lard, and then let them boil until a nice brown.

ST. LOUIS, Mo., June, 1855.

Dear Sir, — I feel that it is a duty I owe to suffering humanity to give a relation of the great benefits I have derived from the use of Perry Davis' Pain Killer. Last summer I had the misfortune to lose two of my children by that dreadful scourge, the cholera; and, in all human probability, should have fallen a victim to the pestilence myself, if a kind Providence had not provided me help in the hour of need. I first became acquainted with the Pain Killer while travelling on the river with my husband. A gentleman passenger had some with him, which he recommended in the highest terms as a remedy for cholera. I thought no more of it at the time, but the same night was attacked by the cholera in its worst form. I resorted to the various remedies used to arrest its progress, but all in vain. I was soon seized with violent cramps, and my discharges began to assume the same character as did my dear children's previous to their death. I was looked upon as lost, but all at once thought of the Pain Killer. My husband obtained the bottle from the passenger, and gave me a dose. I experienced almost immediately a cessation of pain. The dose was repeated at intervals of fifteen minutes, four or five times, and the result was my complete recovery. I feel confident that I owe my life to the Pain Killer, and only regret that I had not earlier known of its extraordinary virtues; I then might have saved the lives of my dear children. Since that time, I have used the Pain Killer in my family constantly; and the more I use it the better I like it. As a family medicine it has no equal.

SARAH SANDERBERRY.

I wish to corroborate the above statement of my wife in every particular, and would further say, that, after a long experience on the Western waters, I have never met with a medicine so well adapted for steamboat men and steamboat passengers as the Pain Killer, and can confidently recommend it to all as a compound of inestimable value.

T. G. SANDERBERRY.

For Summer Complaint or Diarrhoea, use the Pain Killer.

He will please most, who aims rather to give pleasure than to please.

Even Cholera yields to the magic influence of the Pain Killer. — Montreal Transcript.

Read the following from Mr. Woodward, of St. Louis, to J. N. Harris, Esq., New London, Conn. Mr. Woodward is a resident of St. Louis, a gentleman of high respectability, and, during the prevalence of the cholera in that city, watched the result of the use of the Pain Killer for this disease; and his testimony can be relied upon with the utmost confidence:

St. Louis, May 31, 1849.

*Dear Sir,*—You recollect, when I saw you in New London last January, I expressed to you my most sanguine expectations that *Davis' Pain Killer* would have a very large sale in the West this season; and my anticipations have been more than realized; and the testimony of thousands who have used it has been that they would not be willing to go to bed at night without it in the house.

On the appearance of the cholera in this city, such was the confidence in the Pain Killer as a remedy, that many who purchased it remarked to me that they "*had no fears or dread of the cholera as long as they had the Pain Killer by them;*" and many took it daily as a preventive: for no persons can long have a derangement of the bowels, or diarrhoea, if they use this medicine. It has the entire confidence of hundreds who use it themselves and administer it to their friends. And in every case where it has been taken in the first stages of the disease, it has proved successful.

I consider it an infallible remedy, and have not heard of an individual in any family, who used the Pain Killer when attacked, that did not speedily recover.

The clerk of the steamer "Atlantic" told me that he had administered it to persons when cold and in the cramps, and it gave immediate relief; but still it should be given early, for when the "rice-water" discharges have begun, the hope of recovery is very small. Should this disease visit your city, as in all probability it will, be not alarmed: you have the remedy; and I am confident, if the Pain Killer is used, not a death by cholera need occur in your city.

Respectfully yours,

A. T. WOODWARD.

*Tomatoes Stewed.*—Pour boiling water on as many tomatoes as are required to be cooked; skin them and put them, sliced, into a tinned or porcelain saucepan, containing about a pint of cold water to a half peck of tomatoes, and cook slowly about twenty minutes. Thicken with bread-crumbs, cracker-grated, or flour. Season to the taste with salt and pepper. Boil five minutes, and dish up with a piece of butter the size of a walnut. Most people like them sweetened a little.

*Another Method.*—Scald and skin as above; then take out the seeds, put the pulp and juice into a tinned or porcelain saucepan, with a little salt, and set them in a hot place to cook slowly for three hours; when nearly done, stir in butter, and a very little grated cracker or bread-crumbs (some persons like them better without either). When very acid, a little sugar is an improvement, but nothing else, as it is important to retain the tomato flavor.

*Tomatoes Baked.*—Prepare as for the stew, and slice them in a yellow stone nappy. Season well with salt, pepper, and sugar if liked, adding a small piece of butter. Cover the whole with grated cracker or bread-crumbs, and bake three-quarters of an hour.

The Pain Killer was introduced into India by missionaries.

"A handsome woman pleases the eye, but a good woman pleases the heart; the one is a jewel, the other a treasure."—Napoleon.

If taken in season, the Pain Killer will effectually check Cholera.—Pres. Glass, *Herald*.

Knowledge of our duties is the most useful part of philosophy.

AUGUST (♍ Virgo) was originally called *Septilis*, it being the sixth month in the Alban or Latin calendar. Numa's reform gave it its present position; and Augustus Cæsar, who gave it its present name, extended the number of days to thirty-one. It was originally intended that September, in which month Augustus was born, should bear his name; but he preferred *Septilis*, as it stood next to July, which had recently been named after his predecessor, *Julius*, as well as for the reasons which influenced the decree of the Senate in confirming the name,—that, since it was the month in which the Emperor had entered upon his first consulship,—had celebrated three triumphs in the city,—had subdued Egypt, and put an end to civil war, it appeared that it was and had been propitious to the empire. The word *August* has been adopted by the Germans, Dutch, French, and Spanish, to signify harvest, or harvesting.

Indulgence and ease are the rust of the mind.

There is no humbug about Pain Killer but its counterfeits. It is a sure cure for Cholera.

No entertainment is so cheap as reading, and no pleasure so lasting. — Lady Montagu.

*Tomato Soup.* — Take two or three pounds of good lean beef, and put in sufficient cold water to cook, and add a dozen tomatoes skinned, and boil together three hours. Then add ten ears green corn, cut from the cob, and four good sized potatoes cut in slices, two onions, and boil two hours, putting in as much more hot water as is necessary, and season with salt and pepper to taste; serve with split water crackers, in the tureen. The onions may be omitted.

*Roast Lamb.* — This requires much attention in the roasting. All young meats should be well cooked. For a sauce, wash clean a handful of fresh green mint, remove the leaves from the stems, mince it very fine, and put it into a sauce-boat, and stir in one teaspoonful of brown sugar and four tablespoonfuls of good wine vinegar. Green peas are the vegetables eaten with lamb.

*Roast Veal.* — Veal requires particular care to roast a nice brown. Let the fire be the same as for beef. Put it some distance from the fire at first, to let it roast thoroughly, as it must be well done, but not dried; then draw it near to finish it brown, basting well. For sauce, remove the juices of the meat from the bottom of the roaster, and skim all the fat off; mix in a little flour, salt, and pepper; then simmer, and serve hot.

TO EXCURSIONISTS. — It is important that those who go on excursions for pleasure or health should make some provision against diseases of the bowels, to which change of diet and water render them especially liable, and which are not only very inconvenient at such times, but are often fatal. Persons "doing" the St. Lawrence — especially in Montreal and Quebec — are liable to be attacked with a kind of diarrhoea called in that section, "*Montreal cholera*," for which we have found Perry Davis' Pain Killer a sure cure. A bottle of Pain Killer is the best physician a traveller can have. We speak from our own experience. — *Hamilton Spectator.*

FROM THE OLD GRANITE STATE. — A friend who is spending the summer in the State that proudly boasts of having given to the world some of the noblest and best men of the age, writes, "No man here allows his neighbor to think for him, neither in religion, law, nor medicine. With his old family Bible, the consolidated statutes, and *Davis' Pain Killer*, he has no use for D.D.'s, LL.D.'s; nor M.D.'s, except as missionaries to some benighted land, without the borders of his State. — *Boston Traveller.*

The "*Montreal Pilot*" says, "We are glad to notice the increasing demand for Perry Davis' Pain Killer in our city; for we look upon it as one of the most valuable medicines of its class. We speak from experience when we say it is a *good medicine*; and it is not a little in its favor that by its cheapness it is placed within the reach of the poorest who may need it. No family should be without it.

The "*Christian Advocate*" says, "It is a real pleasure to us to speak favorably of Perry Davis' Pain Killer, known almost universally to be a good and safe remedy for burns and other wounds. It is valuable not only for colds in winter, but for fevers and the various summer complaints; and it should always be kept near at hand, for accidents that most require it always occur without notice."

Pain Killer is a preventive, as well as cure, for all bowel diseases.

A good word is as easily spoken as a bad one.

SEPTEMBER (♏ Libra), the ninth month in our calendar, was, in the Roman, the seventh, from which it derives its name. The English names of the months, which are all Latin terms, appear to have been given them by the lawyers, whose writings were formerly in Latin, based on the supposition that the year commenced in March. Most other nations of Europe use the same or a similar name for this month. The commencement of the legal year in England was changed from March to January in 1752, when the style was changed. September bore various names at different periods, given it by the Roman emperors. The Saxons called it *Gerst Monath*, "barley month," it being the month in which gerst, or barley, the principal grain cultivated by them, was harvested. In Switzerland it is called *Herbstmonat*, "harvest month."

Beware the fury of a patient man. — Dryden.

An excellent remedy for liver complaint and fever and ague is Pain Killer.

He who waits to do a great deal of good at once, will never do any.

MANHATTAN, Kansas, April 17, 1866.

Gentlemen,— I want to say a little more about the Pain Killer. I consider it a *very valuable medicine*, and always keep it on hand. I have travelled a good deal since I have been in Kansas, and never without taking it with me. In my practice I used it freely for the Asiatic Cholera in 1849, and with better success than any other medicine. I also used it here for cholera in 1855 with the same good results. Truly yours,  
A. HUNTING, M.D.

SWATOW, China, Sept. 22, 1864.

MESSRS. PERRY DAVIS &amp; SON, PROVIDENCE, R. I.

Gentlemen,— I ought to have acknowledged long ago the box of Pain Killer you had the goodness to send us last year. Its coming was most providential. I believe hundreds of lives were saved, under God, by it. The cholera appeared here soon after we received it. We resorted at once to the "Pain Killer," using as directed for cholera. A list of the cases was kept, and our native assistants assure us *that eight out of every ten to whom it was administered recovered*. In other diseases, also, it has been very useful and has proved an incalculable blessing to multitudes of poor people throughout all this region. Our native preachers are never willing to go out on their circuits without a supply of the "Pain Killer," for it gives them favor in the eyes of the people, and access to families and localities where they would otherwise be very indifferently received.

Believe me, faithfully yours, &amp;c.,

J. M. JOHNSON.

MR. PERRY DAVIS. *Sir*,— Although personally a stranger to you, yet the benefits I have received from the use of your invaluable medicine, the Pain Killer, induce me to pen a word of praise for it. Experience has convinced me that for Headache, Indigestion, Pain in the Stomach, or any other part of the system, severe Chills, Weariness, common Colds, Hoarseness, Cholera, Cholera Morbus, Diarrhoea, and Dysentery, *there is nothing better than the Pain Killer*. I have this hour recovered from a severe attack of the Sick Headache, by using two teaspoonfuls, taken at thirty minutes' interval, in a wine-glass full of hot water.

I am confident, through the blessing of God, it saved me from the Cholera during the summer of 1849. Travelling amid heat, dust, change of diet, and constant exposure to an infected atmosphere, my system was daily predisposed to dysentery attacks, accompanied with severe pain, for which I found the Pain Killer *a sovereign remedy*;— one teaspoonful curing the worst attack in an hour, or at most half a day. Gratitude, and a desire for its more general use, has drawn from me this unsolicited testimonial in its favor.

D. T. TAYLOR, JR., *Minister of the Gospel*.

**Buckwheat Cakes.**— Take two quarts of good buckwheat flour, and in the same amount of sweet milk dissolve two teaspoonfuls and a half of soda and salt equally mixed. Then add to the flour one pint of good yeast, and mix all the ingredients together, and beat the batter about ten minutes to make it rise well. Let it stand ten or eleven hours, and bake in moderately hot buttered griddles, and as quickly as possible. Send to the table smoking hot, and serve with honey or golden syrup.

A stitch in time saves nine.

Difficulties dissolve before a cheerful spirit, like snow-drifts before the sun.

Those who have known the Pain Killer longest have the most confidence in it.

Modesty has more charms than beauty.

OCTOBER (♏ Scorpio) was, in the calendar of Romulus, the eighth month, whence its name. Domitian, who was born in this month, gave it the name *Domitianus*, which it retained only during his lifetime. Antoninus Pius caused it to be called *Fastivus*, in honor of his wife, Faustina; and the flatterers of Commodus assigned to it one of their patron's epithets, *Invictus*. But, in spite of all these attempts, it still retains its original name. Our Anglo-Saxon ancestors gave it the name *Winter-fæstlic*; — "the winter full moon," or "winter beginning," — as they reckoned time by winters, instead of years. They also called it *Teutha Month*, the tenth month, from its position in the calendar. Among the Romans, this month was sacred to Mars; and a horse, called the *October Equus*, was annually sacrificed to this deity. Previous to the sacrifice, a race was run with chariots, and the fleetest horse was made the victim.

Of earthly goods, the best is a good wife. — *Simonides*.

To tell our own secrets is folly; to divulge the secrets of others is treachery.

Use Pain Killer for aches in the month and stomach.

*Buckwheat Griddle Cakes.*—Take a clean crock, and put into it a quart of clean tepid water in which a tablespoonful of salt has been dissolved. Then stir in the meal, gradually sifting it through the fingers as in making Indian hasty pudding. Having acquired a stiff batter, stir in as much fresh yeast as you would use for a loaf of bread; cover the crock close; lay some woollen cloth over it, and set it behind the stove to keep warm. If the crock is prepared thus half full, at nine o'clock in the evening, it will probably be risen full by the time you are ready to begin cooking cakes in the morning. If so, dissolve in a half pint of warm water, a teaspoonful of saleratus; stir down the batter vigorously, have the griddle hissing hot, keep it well greased, drop on only a large spoonful in a cake, fry to a bright brown on both sides, and serve immediately. Buckwheats should never be buttered till they come into the hands of the consumer.

Leave always in the crock, say half a pint of the batter as the foundation for the ensuing batch, to be stirred up and set by every night in the same manner. After the first batch no yeast is required, but don't forget the saleratus every morning. Once in about five days, empty, scald out, and thoroughly cleanse your crock; put back the reserve batter, and go on as usual.

### Read the Following.

NEW BEDFORD, MASS., 1848.

FRIEND DAVIS, — By a fall of several feet from a pair of stairs, I received an injury in my shoulder, so that I could not take off my coat without help for eight or ten months; tried every remedy without any benefit; had a bottle of thy Pain Killer sent to me, but did not try it until it had stood several days; but growing worse, was induced to try it, and, by using it two or three times, could put on my coat and take it off without help, and in two or three weeks was entirely well, and have remained so since, about two years. I have also sold five or six bottles, which have given entire satisfaction; in cases of broken breasts, it has astonished every one who has used it or seen it used. I shall now keep it for sale, and recommend it to every one who may wish to try it with confidence. For burns and scalds, it is superior to any thing I ever used. A friend of mine, W. Thomas, had his hand badly scalded, and expected it would be useless for some time; but, by immediately applying the Pain Killer, it scarcely blistered.

Thy friend, ALLEN KELLY.

### PIE OF A RATTLESNAKE CURED IN FIVE MINUTES.

MESSRS. PERRY DAVIS & SON. *Gentlemen,* — A merchant of Linnoens, in this State, informs me that recently one of his sons was severely bitten on the leg by a rattlesnake, from the effects of which he suffered most dreadfully. The family chancing to have some of Perry Davis' Pain Killer in the house, immediately commenced bathing the bitten place without knowing whether it would or not afford the least relief; but, surprising as it may seem, the poison was soon observed to exude from the wound, and in five or ten minutes the young man fell asleep, entirely free from pain, or any effect from the bite except the flesh wound, which healed very soon.

Yours respectfully, H. BLAKSLEY.

St. Louis, Mo., 1852.

Try Allen's Lung Balsam for a Cough. It is a sure cure.

*Tomatoes, how to Can.* — Take any quantity of full, ripe tomatoes; wash them, and pour boiling water on them in order to remove the skins; then place them over the fire in a preserving kettle, and cook them slightly; have your cans ready, and fill them and seal or solder, as directed for peaches.

*Lemon Pudding.* — Stir to a cream one pound of butter and one pound of sugar; grate in the oily rind of three fresh lemons, and squeeze in the juice; mix this in with the butter and sugar; beat very lightly the yolks of eleven eggs; add to the butter and sugar one wine-glass of wine and brandy mixed, with one wine-glass of rose-water; beat these in well; lastly, stir in the eggs. Line the dishes with puff paste, and bake half an hour. It is most economical to make lemon and cocanutt puddings on the same day, as the yolks can be used for the lemon pudding, and they will keep for several days if kept in a cool, dry place.

*Almond Pudding.* — Blanch by pouring hot water on half a pound of best almonds; rub them in a mortar with rose-water to prevent their oiling; they must be rubbed to a smooth paste; cream half a pound of good butter and half a pound of white sugar; when quite smooth and light, stir in the almond; then add one wine-glass of wine and brandy mixed, and one wine-glass of rose-water; then beat separately the whites from the yolks of seven eggs; first stir in the yolks, and then the whites, beat all well together, line the dishes with puff paste, and bake as long as a custard only.

The following extract explains itself. The Rev. Charles Harding is a well-known missionary in India: —

I regret to say that the cholera has prevailed here of late to a fearful extent. For the last three weeks, from ten to fifty or sixty fatal cases each day have been reported. I should add that the PAIN KILLER sent recently from the Mission House, has been used with considerable success during this epidemic. If taken in season, it is generally effectual in checking the disease.

REV. CHARLES HARDING, *Sholapore, India.*

Dubuque, Iowa, May 5, 1855.

*Gentlemen,* — I feel under obligations to you for the benefit I have received from your invaluable Pain Killer.

We have had some cholera here on the Mississippi thus early in the season. A few days since, I assisted in laying out and burying one of our citizens who was supposed to have died with the disease. The next morning I was taken with severe vomiting, accompanied with coldness of the extremities. Warm covering and hot applications failed to restore warmth. My wife's family, who had used the Pain Killer with success during the cholera season in Buffalo in 1849, advised me to take it. I took two doses at intervals of fifteen minutes; a fine perspiration ensued, and the next day, barring a little weakness, I was well, and have been ever since.

I find that several of our citizens have used the Pain Killer as a remedy for cholera, and pronounce it good. I take pleasure in recommending it to a still more extensive notice.

Yours truly,

W. M. CROZIER, *Attorney at Law.*

It is unsafe to travel without the Pain Killer.

A good life keeps off wrinkles and disease.

True greatness consists in being great in little things.

Rain Water is a sure cure for chilblains.

DECEMBER (♏ Capricornus) still retains the name which its position in the ancient Roman calendar gave it. Commodus gave it the name *Amazonius*, in honor of his mistress, whom he delighted to see clothed in the Amazonian habit. This month was anciently consecrated to Saturn, one of the principal divinities of the ancient Italians, the protector of agriculture, and of all civilization arising from it. He was said to have established a settlement on the Capitoline Hill, which, from this circumstance, was called the Saturnian Hill, and the settlement itself Saturnia. His rule was so just and mild that the age in which he reigned was afterwards called the Golden Age of Italy. His wife, Ops, was, in after times, worshipped as the goddess of plenty.

A beautiful ring — the home circle.

*Old English Plum Pudding.*—To make what is termed a pound pudding, take of raisins well stoned, currants thoroughly washed, one pound each; chop a pound of suet very finely, and mix with them; add a quarter of a pound of flour, or bread very finely crumbled, three ounces of sugar, one ounce and a half of grated lemon-peel, a blade of mace, half a small nutmeg, half a dozen eggs well beaten; work it well together, put it into a cloth, tie it firmly, — allowing room to swell, — and boil not less than five hours. It should not be suffered to stop boiling.

*American Pudding.*—Put on a pint of new milk to scald; while this is heating, stir three large spoonfuls of rice flour into a cup of milk; when quite smooth, stir it into the boiling milk; add a little salt and a large spoonful of butter; grate in the oily part of the rind of a lemon, and add also some nutmeg, and one wine-glassful of brandy; beat these all together, add three large spoonfuls of good brown sugar, beat five eggs very light, and stir in; butter a dish, and pour it in; bake as long as custard.

FEVER AND AGUE CURED BY THE PAIN KILLER.—*To all who suffer from fever and ague.*—It is with great pleasure that I am enabled to bear testimony to this invaluable medicine—Davis' Vegetable Killer—for the cure of fever and ague. I had this disease in its worst form, and have been cured by this medicine. Indeed, so immediate was the relief that the disease left me, as it were, by magic. I had but one chill after beginning with this medicine, and that a few moments after taking the first dose. I contracted the disease last fall in Columbia, Loren County, O., and this spring, being very much debilitated, returned [to this my native town. I have paid out lots of money to physicians, and for various kinds of medicine, from all of which I got no relief until I tried the Pain Killer. That did the work in a hurry. In three days from the time I took the first dose, my system was entirely free from all appearance of the disease, with the exception of my skeleton-like body. My appetite returned, and in two weeks I had gained ten pounds of flesh. For the sake of suffering humanity, I would in all kindness recommend the Pain Killer to those who have suffered as I have.

NEW LONDON, June 10, 1848.

GEO. JEFFREY, JUN.

GALENA, ILL., June 10, 1850.

I have used the medicine known as Perry Davis' Pain Killer in my family for the last twelve months, and have great pleasure in testifying in favor of its very valuable properties. I would not on any account be without it. During the existence of cholera last year, I used no medicine of any sort but the Pain Killer, although myself and several members of my family were attacked by it severely; and I am happy to say that the Pain Killer was equal to every emergency, — it was both a preventive and a certain cure. I consider I should not be doing my duty to the community did I not say this much. If I were attacked by the cholera to-day, the Pain Killer should be the only remedy I would use. I have thoroughly tested it, and I know it can be relied on.

F. E. BERGINCEND.

Rev. A. Webster, Editor of the "Christian Era," says, "I have used your Pain Killer for many years, in my family, with much satisfaction."

The best remedy for Fever and Ague is the Pain Killer.

*Evil Company.* — The following beautiful allegory is from the German. Sophronius, a wise teacher, would not suffer his grown-up sons and daughters to associate with those whose conduct was not pure and upright. "Dear father," said the gentle Eulalia to him one day, when he had forbidden her visiting in company with her brother the indiscreet Lucinda, "you must think us very childish, if you imagine that we should be exposed to danger by it." The father took in silence a dead coal from the hearth, and reached it to his daughter. "Take it, my child: it will not burn you." Eulalia did so, and, behold! her beautiful white hand was soiled and blackened. And, as it charred her white dress also, "We cannot be too careful in handling coals," said Eulalia in vexation. "Yes, truly," said the father. "You see, my child, that coals, even if they do not burn, blacken: so it is with the company of the vicious.

## DIRGE.

Softly!  
She is lying  
With her lips apart.  
Softly!  
She is dying  
Of a broken heart.

Whisper!  
She is going  
To her final rest.  
Whisper!  
Life is growing  
Dim within her breast.

Gently!  
She is sleeping;  
She has breathed her last.  
Gently!  
While you're weeping,  
She to heaven has past!

**THE EYE OF THE NEEDLE.**—The Scriptural simile, that it is harder for a rich man to enter the kingdom of heaven than for a camel to go through the eye of a needle, which has puzzled many a learned and unlearned head, is clearly explained by a modern traveller.

In the East, all walled cities have a small gate along side of the great gate, which is called, in the figurative language of that region, "the eye of the needle." When it is understood that the large gates are closed at night, and that a traveller arrived afterwards, must enter through the "eye of the needle," through which he can take his camel, if he desires to do so, only by divesting him of his burden, and causing him to kneel down, the metaphor is clear, simple, and beautiful.

**DIPHTHERIA.**—For the cure of that dreaded disease, *Davis' Pain Killer* is a specific, if resorted to in time.

It should be used, mixed with water, as a gargle, and the throat bathed with *Pain Killer* freely. Read what Dr. Walton writes us, from Coshocton, O.:—

"I am happy to inform you that the *Pain Killer* cures this new disease, *Diphtheria*, or *Sore Throat*, that is prevailing to so alarming an extent in this section of the country. On Walnut Creek, Holmes County, they use scarcely any other remedy; and it has never been known to fail in a single instance when used in time. This fact you can make known to the world."

WOOSTER, O., May 20, 1863.

SIRS,—Having had occasion to use *Perry Davis' Pain Killer* in my family for the last five years, I am pleased to acknowledge its beneficial effects in every instance. Feeling confident that it was this medicine that saved my child's life, when attacked with cramp colic, it is a pleasure to me to recommend it as a good family medicine, and one which every family ought to have in their house.

In cases of emergency, there can be nothing better; at least, I have always found it so: and I find it to be generally known and esteemed.

Yours respectfully,

H. P. McKEENAN.

Physicians' faults and mistakes are covered deep with earth.

Thoughts, not hours, are the measure of life.

We increase our wealth by lessening our desires.

*From Columbus, Ohio.*

Notwithstanding our repugnance to the use of quack medicines, we are induced to say a word in favor of Perry Davis' Pain Killer; not so much that we think the medicine needs it, as that our readers need to know more of the medicine. We heard to-day of its having cured several cases of neuralgia. Dr. Robert A. Ware, one of our oldest physicians and druggists, used it in a severe case of neuralgia in the back, after having tried unsuccessfully all the ordinary modes of treating that disease, and found that it gave entire relief in a few hours. He has since used and prescribed it in several similar cases, and in every case with the same result. Now any medicine that will cure neuralgia is a benefaction to any community. — *Columbus Journal.*

*Testimonials from Foreign Countries.*

Thomas S. Ranney, writing from Rangoon, Burmah, Dec. 19, 1856, says: "It is becoming more popular; and in several instances I am assured that the cholera has been arrested and life preserved by its use. The late prevalence of cholera here has swept off about all the Pain Killer I had; and purchasers looking to me for it will be disappointed. Please send me a supply by the first opportunity."

CAPE TOWN, AFRICA, Jan. 29, 1856.

Messrs. P. DAVIS & SON. *Dear Sirs,*—The Pain Killer, we are happy to say, is getting in good repute here; and its good qualities are being appreciated. Lately, we have a great demand for the article, and confidently anticipate a large trade in it.

BORRODAILE, THOMPSON, HALL, & CO.

Rev. T. Allen, writing from Tavoy, Burmah, Jan. 5, 1857, says, "Within the past four years I have used and disposed of above five hundred bottles, but am now out. Please send a fresh supply (through the Mission Rooms) as soon as you can, say two hundred bottles. I dare not be without it myself; and there are endless calls for it, both by Burmans and Karens. I always take it with me into the jungles, and have frequent occasions to use it, both on myself and others. One night, while sleeping in an open Zayat, I was awoken by a most excruciating pain in my foot. On my examination, I found I had been bitten by a centipede. I immediately applied the Pain Killer, and found instant relief. In less than one hour I was again asleep."

Rev. Mr. Hibbard, writing from Burmah to his father, says, "I have used Perry Davis' Pain Killer for coughs, colds, summer complaints, burns, and for the sting of scorpions, with uniform success. We always keep it where we can put our hand on it in the dark, if need be."

*Good Loaf Bread.*—Take three cups of water blood warm, one teaspoonful salt, one-third cup yeast, one tablespoonful shortening; stir in flour till stiff enough to knead. Then knead thoroughly, and set in a warm place to rise; when well risen take it out on a bread board and knead again, using as little flour as possible; divide in two loaves, and place in buttered baking pans, and let it stand till thoroughly light, and bake in an even oven an hour.

A friend in need is a friend indeed — Pain Killer.

When Dr. FRANKLIN was agent in England, in 1774, one of the ministry inquired of him what would satisfy the Colonies. He answered that it might be comprised in a few *Res* (the latin for *things*, — Ed.), and sat down, and wrote as follows: *Re-call* your troops, *re-store* Castle William, *re-pair* the damage done to Boston, *re-peal* your unconstitutional acts, *re-nounce* your pretensions to taxation; and *re-fund* the duties you have extorted. Afterwards, *re-quire* and *re-ceive* pay for tea destroyed; and then *re-joice* in a happy *re-conciliation*.

*Hints to Young Men.* — Have always a good book within your reach, which you may catch up at your odd minutes: a single thought made your own may be an invaluable treasure to you, and give color to your whole life. Fifteen minutes a day saved in this way will give you, in one year, a fund of valuable information, which no young man of enterprise can afford to spare; and how much may thus be accomplished in a lifetime who can tell?

PORTUGUESE COLONY, July 1, 1857.

Messrs. PERRY DAVIS & SON, *Gentlemen*, — Allow me, as an eye-witness of the great good which your excellent medicine, the Pain Killer, has done amongst us the exiles of Madeira, to state for the good of others, that it is now, and has been for five years, the great family medicine. We have found it excellent in fever and ague, in coughs, colds, dyspepsia, chronic and inflammatory rheumatism, croup, worms, piles, nervous headache, gravel, &c., &c. The introduction of the Pain Killer has been a great blessing to the whole colony.

MANUEL J. GONSALVES,

Minister of the Gospel, and one of the Maderians.

*More testimony from the Clergy.*

This certifies that I have used Perry Davis' Vegetable Pain Killer with great success in cases of cholera infantum, common bowel complaint, bronchitis, coughs, colds, &c., and would cheerfully recommend it as a valuable family medicine.

REV. JAMES C. BOOMER.

Messrs. P. DAVIS & SON, *Dear Sirs*, — Having witnessed the beneficial effects of your Pain Killer in several cases of dysentery and cholera morbus, within a few months past, and, deeming it an act of benevolence to the suffering, I would most cheerfully recommend its use to such as may be suffering from the aforementioned or similar diseases, as a safe and effectual remedy.

REV. EDWARD K. FULLER.

This certifies that I have for several years used Davis' Vegetable Pain Killer in my family, in several of those cases for which it is recommended, and find it a very useful family medicine.

REV. A. BRONSON, *Fall River*.

The Rev. D. Whitaker, writing from Toung-oo, Burmah, says, "My duties as a missionary prevent my noticing particular cases; but your Pain Killer has been used with peculiar success in diseases of the stomach, bowel complaints, and in severe cases of burns. One of the Christian villages near us was burnt down, and several persons were represented as near a dying condition from the severity of their injuries. I sent them the Pain Killer at once, with directions for its use. All but one were saved."

See that your supply of Pain Killer is not out.

*Short-Cake.* — Sift, say one and a half pounds of flour. Make a funnel of the middle of the pan or bowl of flour, pour into it a quart of sour milk, warmed, but not heated. Dissolve a tablespoonful of salt in a little water, stir it into a pint of rich, sweet cream, if you are in a cream country, and have it in plenty; if not, use clean, fat drippings that have been cooked. *Never* put raw lard or butter into a short-cake. Pour the shortening, warmed, into the funnel, and stir the whole together until thoroughly incorporated in a very stiff batter. Then dissolve a dessert spoonful of refined saleratus in a few spoonfuls of water, and stir it in till it pervades the entire mass equally.

Put the batter into well-greased pans, an inch thick; bake in a moderately hot oven thirty to forty minutes, and the result will be a genuine, good, old-fashioned Yankee short-cake, a very good one too.

*Doughnuts.* — Take one pint of warm milk, cut into it one-fourth of a pound of butter; four eggs well beaten; one pound and a half of brown sugar. Stir the sugar into the eggs; grate half a nutmeg, add the rind of a lemon grated in. Mix these all together well; thicken this into a good soft batter with sifted flour; add a little flour; beat this well; then add a wine-glass half full of good brewer's yeast. When quite light, have ready some boiling lard, and drop in the doughnuts. Fry a nice, light brown; put them into a cullender while hot to drain; then sift sugar over them.

*Another Method.* — Take one cup of milk, one teacupful of shortening, two of sugar, one of yeast, three eggs, well beaten, two teaspoonfuls of cinnamon, one of salt, and put flour enough to make it stiff; then roll out, and cut according to fancy, and fry in hot fat.

*Apple Pie.* — Fill a pudding-dish with pared and cored apples, — the tart baking apple; fill each hole of the apple with good brown sugar; cut very thinly the oily part of the rind of two lemons; then cut it into narrow strips, and lay on the top of the apples; squeeze the juice of the lemons into a cup, and add a little cold water; pour this over the apples, and sprinkle over more sugar, quite thickly; then cover the whole with a nice puff paste, and bake it rather slowly one hour; serve hot. Peaches are very nice done in the same way, with the stones left in and only pared, but no lemon, and very little water as they make their own juice.

*Extracts from Letters of Druggists and Dealers.*

A. N. Williams, Parkersburg, Va., one of the oldest, most respectable, and reliable druggists of Western Virginia, writes, "I can say of Perry Davis' Pain Killer, what I could not say of many of the medicines of the day. In my trade, it is a leading article. I sell largely of it, and it gives entire satisfaction to all. I would on no account be without it."

John Parkins, Druggist, at Athens, O., writes, "I sell considerable of Davis' Pain Killer in this place, and it is well liked and highly commended by all who use it."

George Williams, Druggist, at Hockingsport, O., writes, "Perry Davis' Pain Killer is quite generally used by the inhabitants of our town, and is much extolled. I think it the best medicine I have for the uses for which it is recommended."

*Minced Fowl.* — Take the remains of a cold roast fowl, and cut off all the white meat, which mince finely, without any skin or bone; but put the bone, skin, and ceteras into a stew-pan, with an onion, a blade of mace, and a handful of sweet herbs tied up; add nearly a pint of water; let it stew for an hour, and then strain, and pour off the gravy, putting in a teaspoonful of Lea and Perrin's Worcestershire sauce. Take two hard-boiled eggs, and chop them small; mix them with the fowl; add salt, pepper, and mace, according to taste; put in the gravy; also half a tablespoonful of very finely minced lemon-peel, and one tablespoonful of lemon-juice, two teaspoonfuls of flour, made into a smooth paste with a little cold water, and let the whole just boil. Serve with sippets of toasted bread. Some persons prefer cayenne to common white pepper.

*Old Fowls.* — Fowls of doubtful age may safely be converted into a pudding. The fowls should be trussed as for broiling, and enveloped in a crust roly-poly fashion,—that is, the pudding cloth tied at both ends. Doil for five-hours, by which time an old fowl acquires a degree of tenderness which it would never attain by ever so careful boiling or roasting. The flavor of the dish is considerably increased by stuffing the fowl with veal stuffing or forcemeat of any kind. Sausage meat is good.

BUCYRUS, O., June 27, 1864.

Messrs. J. N. HARRIS & Co., CINCINNATI, O.

Gentlemen, — I have used Allen's Lung Balsam, and found it does all it promises to do. I know it has done me a great deal of good. I want more of it, and wish that you could send me some without delay. I can conscientiously recommend it to my friends, and such as are afflicted as I have been.

Respectfully yours, EMILY QUAINANCE.

We sent some of Allen's Lung Balsam to Bucyrus, as called for by the above letter, and, in September, Mrs. Quainance, accompanied by her husband, called at our office in Cincinnati, and gave us the following letter: —

BUCYRUS, O., Sept. 17, 1864.

Messrs. J. N. HARRIS & Co.

Gentlemen, — I take pleasure in informing you of the great benefit I have received in the use of Allen's Lung Balsam. About three years since, I was attacked with a cold, or hacking cough, which finally affected my lungs. I followed the advice of several physicians, and used all kinds of cough and lung remedies, but kept getting worse, and was confined to my bed for nearly one year, during which time I suffered intolerably, with bleeding of the lungs, and pains in my back and side. My husband, finding one of your Almanacs, where the Balsam is so highly recommended, I was induced to give it a trial, although I had been given up to die by four physicians. After using the first bottle, I was able to get up and go about the house; and, after using two and a half bottles, I was entirely cured, and am now enjoying the best of health; and all this I owe to the merits of Allen's Lung Balsam; and I most cheerfully recommend and urge all who may be similarly afflicted to use it without delay.

Very respectfully, your friend, EMILY QUAINANCE.

For Scalds and Burns, use the Pain-Killer. It will give immediate relief.

It is easier to do much mischief than accomplish a little good.

Do not despair because other remedies fail, but try the Lung-Balsam.

Testimony from Druggists.

Daniel Zimmerman, Druggist, of Lynneville, Ind., has the past year sold many dozens of Allen's Lung Balsam. He says he has "many remedies good for an ordinary cold; but for all obstinate cases of cough or lung fever, Allen's Lung Balsam is the remedy, and the sure one."

Joseph Brotherson, Druggist, writes from Sharon, Henry County, Ill., and says, "Allen's Lung Balsam takes well; and in no case have I known it to fail of the cure that it is recommended for."

Mr. W. A. Peterson, Ovid, Clinton County, Mich., informs us, May 3, 1866, that he had been attended by physicians, without much relief. They pronounced his case consumption. Getting no permanent relief, he commenced using Allen's Lung Balsam, and in two weeks was entirely relieved. This is only one of the many cases of consumption which baffled the skill of the doctors, but yielded to the intrinsic merits of Allen's Lung Balsam.

WORTHINGTON, FRANKLIN Co., O., May 25, 1866.

MESSRS. J. N. HARRIS & Co., CINCINNATI, O.

Gents,—Inclosed I hand you Mr. Taylor's letter,—his willing testimony to the great merits of Allen's Lung Balsam. It has proved beneficial in every case where I have sold it. It has a reputation in this vicinity beyond all other cough medicines, and large increasing demand for it.

Respectfully, WM. T. SNOW, Druggist.

WORTHINGTON, OHIO, May 22, 1866.

Mr. Wm. T. Snow.

Dear Sir,—I bear willing testimony to the sterling merits of Allen's Lung Balsam for all Pulmonary troubles. I have had a very distressing cough, and it gave me immediate relief and permanent benefit. I have had a severe attack of Pleurisy, and by its aid was relieved and cured. I am satisfied that all that is necessary to convince any one of its merits, would only be to make a trial of it; and I cheerfully recommend it to all whose condition demands any thing of this nature, asking for it an impartial trial, and believing they will, and hoping they may be benefited as much as I was myself.

*Delicious Bread*—One tumblerful of good rice flour, one teacupful of wheat flour, one teaspoonful and a half of cream of tartar stirred in, one large spoonful of butter cut up very finely, a little salt, one egg well beaten, and one teaspoonful of soda dissolved in a large teacup of new milk; mix these well together, and bake in a pan like pound cake. Serve hot for tea or breakfast.

*Receipt for Corn Bread*.—One quart of coarse corn meal, one quart sweet milk, one even teaspoon soda, two even teaspoons cream of tartar, four eggs well beaten (two will do), a piece of butter the size of a walnut, and a little salt; bake with a quick heat, and it will be as light as sponge cake. But remember you cannot make good light corn bread with fine meal; it must be ground coarse.

The Pain Killer is a sure cure for Fever and Ague, of all types.

Hurry is the mark of a weak mind; despatch of a strong one.

Don't trust your genius young man, if you would rise. Work! work! — *Darwin*.

#826774692

The best remedy for frost-bites or chilblains is the Pain Killer.

Read this letter from Mr. John F. Blair, who was supposed to be incurable, other medicines doing him but little good; but by the first bottle of Allen's Lung Balsam, he receives great benefit and encouragement.

YELLOW SPRINGS, GREENE Co., O., Dec. 27, 1864.

MESSRS. J. N. HARRIS & Co.

*Dear Sirs,*—I take this opportunity to say that I am taking the Lung Balsam, and am receiving great benefit from it. My disease is very obstinate, and the weather has been very unfavorable; but still I think the medicine will cure me. I have Lung Balsam enough to last me a week. My Cough is now quite loose, and does not trouble me half as much as it did. What I raise is a thick yellow matter. I thank you a thousand times for the medicine you sent me. May God's blessings rest with you is my prayer and the prayer of my family. I subscribe myself ever your obedient servant, JOHN F. BLAIR.

EXTRACTS FROM DRUGGISTS' LETTERS.

LEXINGTON, Miss., May 23, 1866.

MESSRS. J. N. HARRIS & Co.

*Dear Sirs,*—I have made Allen's Lung Balsam pretty well known in our city and county, and have sold about all the four dozen bottles sent me in March last; and I find that persons who try the Balsam once come back again for more, as it gives them satisfaction; and I recommend it in preference to any other medicine for Coughs or Colds. Please send me six dozen bottles as soon as possible. I am, yours, &c., THOMAS J. FLETCHER, *Druggist*.

L. B. Bowie, Druggist, Uniontown, Fayette County, Penn., writes, April 4, 1866, "Allen's Lung Balsam has performed some remarkable cures about here. I recommend it with confidence in all diseases of the Throat and Lungs."

Sterling Bros., Druggists, writes, from Carrollton, Carroll County, Ohio, January 28, 1866: "Send us six dozen Allen's Lung Balsam. We are entirely out of it. It gives more general satisfaction than any other medicine we sell."

*To preserve Potatoes till Spring.*—Put a quantity of powdered charcoal in the bottom of the potato bin; it will preserve their flavor, and prevent the sprouts from shooting out so early as they otherwise would.

*Watery Potatoes.*—Put into the pot a piece of lime as large as a hen's egg; and, however watery the potatoes may be when the water is poured off, they will be perfectly dry and mealy.

*Potato Muffins.*—Boil three good-sized potatoes, skin and mash them, beat in a teaspoonful of salt, and a piece of good butter the size of an egg; make this perfectly smooth, and about the consistency of starch, by adding a little warm water; beat up two eggs, dissolve one teaspoonful of soda in a little water, with a teacup of yeast; then add three pints of sifted flour; mix these well together, and add one pint of milk-warm water; stir in the soda, and set it to rise over night for breakfast. Bake in rings on the griddle.

Allen's Lung Balsam is the best remedy for Pulmonary Affections.

Life is made up of little things, as drops make the Ocean.

A kind "no" is often more agreeable than a rough "yes."

## PERRY DAVIS' VEGETABLE PAIN KILLER.

This long-tested and unrivalled *Family Medicine* has been favorably known for nearly thirty years, during which time we have received *thousands* of testimonials, proving it to be an almost never-failing remedy for diseases caused by or attendant upon Colds, Coughs, Fever and Ague, Headache, Bilious Fever, Pains in the Side, Back, Loins, Joints, Limbs; *Neuralgic and Rheumatic Pains*, Toothache, Pains in the Head and Face, Dyspepsia, Indigestion, Liver Complaint, Acid Stomach, Heartburn, Kidney complaints, *Sick Headache*, *General Debility* of the *System*, Piles, Asthma or Phthisic, Cramp and Pain in Stomach, Painters' Colic, *Diarrhœa*, Dysentery, *Summer Complaint*, CHOLERA, Cholera Morbus, Cholera Infantum, Scalds, Burns, Sprains, Bruises, Ringworms, Boils, Felons, Whitlows, Swelled Joints, Old Sores, Frost Bites, Chilblains, also the Bites or Stings of Insects, Scorpions, Centipedes, and Venomous Reptiles.

It has been tested in every variety of climate, and by almost *every nation known* to Americans. It is the almost constant companion and inestimable friend of the *Missionary*, and no *traveller* should be without it.

### COUNTERFEITS.

The Pain Killer, like every other good thing, has been extensively counterfeited; which, while it is an acknowledgment on the part of the counterfeiters of its real worth, is a serious hinderance to its usefulness, the deceived purchaser estimating the value of the *Pain Killer* by the base compound he has purchased for the genuine article. We have spared no pains nor expense to protect the public against these imitations, having changed the style of our bottle, from a plain octagon to a finely moulded panel bottle, with the words "DAVIS' VEGETABLE PAIN KILLER," blown in three of the panels, the other being left plain to receive our finely engraved note, signed by "Perry Davis & Son," to counterfeit which is a high crime in every civilized country. Under the word "DAVIS," is an excellent likeness of Perry Davis, the inventor of the Pain Killer, finely engraved on steel. These plates were obtained at a cost of several thousand dollars, and this is but a small part of the expense of protecting the public and ourselves against unprincipled counterfeiters and contemptible imitators. Be careful in purchasing to see that you get the *Pain Killer*, and by a careful examination of the bottle and label, especially the note, that you do not buy a counterfeit.
