CAUTION.

Always notice the wrapper well,
and see that you find the signature
of E. J. Johnson & Co., on each box.

"I labor for the good time coming, when sickness and disease, except congenital, or from accident, will be regarded as the result of ignorance or animalism, and will degrade the individual, in the estimation of the good, as much as drunkenness now does."

**JOHNSON'S
MOUNTAIN HERB PILLS,
Put up in boxes containing
PILLS, and sold for 25 cts. per Box.**

A SHORT ACCOUNT:

Showing to whom the world is indebted for this Wonderful Medicine, and how it was brought into use—Containing a memoir of Dr. CUNARD, who discovered this marvelous Herb among the Red Men of the mountains. The above cut represents the Doctor in the act of saving from the torture, the only daughter of the Great Indian Chief, Tezuco, an account of which, you will find in this narrative.

The father of Dr. Cunard was a skillful physician and surgeon; a gentleman of wealth and education. He inherited a large fortune, to which he added, by his skill, so largely, that it grew to be enormous. It is, however, a well known fact, that he expends nearly his entire income in charity and doing good to his fellows; and that too, when the interest on his property amounts each year to a sum that would be a fortune in itself to any man.

His son, the subject of this memoir, was thoroughly educated, being now able to speak over thirty different languages: of these, he acquired at college, the Hebrew, Greek, Latin, Spanish and French; all the others, which it would be too tedious to enumerate, he has learned among the different nations and tribes all over the world, among whom he has traveled. Among them, we include some ten or twelve different tongues, spoken by the Indians of this country and South America. Dr. Cunard chose as his profession to become a doctor, and after learning all that could be taught him in both this country and Europe, and having traveled over Europe and Asia, both, for some years, determined, at the suggestion of his father, to spend some years among the Indians, to learn from them their simple and natural plan of curing disease by *Plants and Herbs alone*.

He bade good-by to his father, whose locks were then of silvery whiteness, and hardly expecting to ever behold him again, wended his way to the far West, there to encounter unheard of perils and hardships, hoping only to benefit his race. How sublime is the spectacle of a young man with money, unlimited, at his command, surrounded by friends and relatives and all the attractions of home, sacrificing all, and exposing himself to all perils, undergoing every hardship for the sake of science. Truly, it will be long ere the

"World shall look upon his likeness again."

ECLIPSES FOR 1861.

There will be four Eclipses this year; as follows:

- I. An Annular Eclipse of the Sun, January 29th, invisible.
- II. An Annular Eclipse of the Sun, July 7th, invisible.
- III. A Partial Eclipse of the Moon, December 17th, in the morning, visible. Size only about one-fifth of the moon. Begins at New York at 2h. 31m.; middle at 3h. 22m.; ends at 4h. 13m. At Boston, 12m. later.
- IV. A Total Eclipse of the Sun, but partial in the United States, December 31st. The Sun rises eclipsed. Size about 6 digits, and ends at 8h. 36m., at Washington, and about 8h. 48m., at New York, and 9h. at Boston.

NOTE.—There will be a transit of Mercury across the Sun's disc, November 12th, invisible in America.

At St. Louis, which was at that time the great depot of the fur trade, where all the trappers and hunters assembled to dispose of their spoil, he became acquainted with an old trapper or mountain man, as they were called, whose real name was Dubois, but who was called by the Indians, "Omata, or Hawk Eye."

Hawk Eye proposed that he should accompany him in one of his trading expeditions to the Rocky Mountains, which he did, and soon became acquainted with many of the chiefs and tribes of that remote region. When Hawk Eye went to St. Louis, to dispose of his furs, the Doctor always remained behind, stopping with whatever tribe he happened to be, and prosecuting his search for plants. Being a SKILLFUL BOTANIST, he, in this way, soon collected and classified correctly, under their scientific botanical names, over ten thousand different plants.

He had been among the Indians over six years, and in that time had traveled over the whole extent of the West, from Fraser's River to the Isthmus, two or three times. He was known and beloved by nearly every chief, and whenever he happened to be with a tribe, he was always appealed to, to decide any question about which they might disagree. Trappers and hunters in that region at the time, if any are still living, will well remember the "*Benisontan, or Great Judge,*" as he was called by the Red Men—and now we come to the

Sarah Keen Walpole
RESCUE OF THE BEAUTIFUL INDIAN PRINCESS.

Hawk Eye was absent at St. Louis, the Doctor was staying with a small band of the large tribe of Indians called Navajoes, within the borders of Mexico. He had, as was his custom, been for over a week searching among the mountains for plants and herbs to add to his collection, his rifle supplying him with food, and sleeping at night in the shadow of some tree, or in any cave he might happen to find.

About one o'clock, of a beautiful day, you might have seen him standing on a crag that almost overhung a little valley, and almost beneath his feet arose the smoke of the Indian encampment—but a sight was before him, as awful as it was unexpected. On a little plain at one side of the lodges were gathered all their inmates, collected around one object. An Indian girl, with her long hair floating in the wind was bound to a stake, and around her was piled the fuel, soon to be lighted for her torture. Strange as was the sight, the Doctor for a moment stood motionless, enchained by her extreme beauty. The chisel of Praxiteles never formed a lovelier shape, her face and form were of faultless beauty; but the crowning beauty was her eye; before its lightning glance, her tormentors (soon to be) stood abashed, and the chief, with the torch already in his hand to light the pile, thus addressed the red maiden:

"Daughter of a great chief," said he, "Chichemeque's heart is sad; he has no squaw. Be my squaw, and live the queen of all my tribe; refuse, and die." Then was seen the proud blood of the Aztecs. Starting from the almost hopeless posture in which she stood, she drew herself up straight as an arrow, and fixing her eyes steadily on the chief, "Dog of a Navajoe," said she, "I defy thee. I am the daughter of an Aztec Chief. The Eagle mates not with the thieving Hawk."

At the sound of her voice, the Doctor started from his trance; he saw the chief applying the torch to the pile; already the flames had commenced to rise. Casting aside his collection of plants, he bounded from the cliff, and rushing down the rugged side of the mountain, in a moment he was in the midst of the throng; scattering them on either side, he reached the pile of light wood already blazing; regardless of all but the girl, he hurled the faggots aside, and with his hunting knife, cut the thongs that bound her; catching her in his arms, he ran with her to the lodge of the Ichapotan, or Medicine Man of the tribe, and placing her within the entrance, he turned to confront the astounded Navajoes.

44646-2465

HE CONFRONTS THE INDIANS.

It was time he did so. So perfectly confounded and astonished were the Indians at his audacity, that they had not only stood quietly looking on while he carried the girl from their midst, but had given way to him in silence; but now, they had recovered from their surprise, and as he turned, he saw that the chief had moved a few steps in advance of his warriors, and was already, having fitted an arrow to his bow, raising it to shoot the audacious white man. At a glance, the Doctor saw his peril, and boldly resolved to meet the danger. Dropping his knife, he took a few steps towards the chief, with his arms folded on his breast. At this, the Navajo chief paused and lowered his weapon; the Doctor seized the propitious moment, and addressing himself to the tribe, he said:

HE ADDRESSES THEM.

"For shame! oh, Navajoes, what would you do!—Kill an unarmed man and a brother? Am I not a friend? and where is one of you can say I ever refused to bind up his wounds, or succor him in distress? Hear me, then, my brothers, and consider well before you act. You would murder a defenceless girl, the daughter of a great chief; I ask of you, her life."

Then seeing that they still appeared unsatisfied, and fearing they would deny him the request, he continued: "I ask it not as a favor, but as a right. I demand her for my squaw. The Great Spirit has said it, and I say to you, that if you dare refuse, to-morrow you shall see sudden darkness come at noon-day, and the sun shall change to blood—nay, for a sign that I speak truly, the great sun shall be darkened to-morrow, whether you consent or not. Then keep the girl but twenty-four hours unharmed, and if it does not happen as I say, commit us both to the flames; but if it does so come about, know ye me as the "Benisontan," the Great Judge of the pale faces, over whom the "Manitou" spreads his wing, and whom you cannot harm."

Such an address was suited exactly to the superstitious minds of this people; without a dissenting voice, all agreed to keep the Princess till next day.

The prediction of the Doctor was founded entirely on an almanac, Hawk Eye had brought to him from St. Louis, some months before, and in which was predicted an eclipse of the sun on the following day. He waited with anxiety the result. The Princess was well treated in the meantime, but all depended on the event.

It occurred as the Doctor wished. The eclipse was almost total. Great was the terror of the tribe, and loud their promises to the Doctor, if he would "drive away the demon (or spirit of evil) from the Sun." After waiting until he knew it was nearly time for the eclipse to pass off, the Doctor made all sorts of motions and mutterings in view of all the tribe, twisting himself into all sorts of contortions with great and solemn gravity.

After a short time the reflection commenced passing from the face of the sun, and soon was entirely gone.

The limits of this narrative will not allow us to recount in detail all the ceremonies and observances gone through with by these simple people to testify their reverence for the "Benisontan;" but the Doctor wished only for the life of the lovely Tula, it was granted of course, and soon after, Hawk Eye returning, the two set off together with the Princess for the village of the Tezucan's, whose chief was the father of Tula.

THEY REACH THE VILLAGE.

The village was situated in a lovely and secluded valley, far up among the mountains, and the Doctor and Hawk Eye were the only white men that ever had entered therein; the passes to this valley are so difficult and so blind, that no one, not even an Indian unacquainted with them, could ever find it. The Princess had very imprudently wandered beyond the bounds, and so been seen and captured by the Navajoes. Under her guidance, the party toiled safely through the passes of the mountain, and at length, stood gazing upon the "village and the vale;" truly it looked a lovely spot, the happy valley of

THE MANOCHAN OF THE AZTECS TRIUMPHANT!

"Judson's Pills cure Fever and Ague."

"READ THE TESTIMONY."

FAYETTE, C. H., ALA., September 4, 1859.

MR. B. L. JUDSON—Dear Sir: I speak thus for suffering humanity! Three of my friends, Major Nosely, Samuel Jones, and S. P. Morrow, having suffered for 18 months severely with CHILLS AND FEVER, have been totally cured by a few Boxes of your celebrated Pills, after having exhausted the skill of the celebrated Dr. E. McCracken, and two other Physicians, besides many other hopeful though vain efforts.

If you think this declaration will relieve a single sufferer, please publish it to the world.

Yours truly,

T. J. THORNTON.

Rasselas reproduced. You may imagine how well they were received by the chief, how many presents were heaped upon them, and so pleasant was the life they passed, that nearly a year had elapsed before they once thought of quitting this terrestrial paradise.

STRANGE CUSTOM OF THE TRIBE.

During this long stay, however, the Doctor had been very busy in searching for plants, and he found very many new and strange herbs and plants that he had never seen before, and so *added greatly to his collection.*

Since he had been there, however, he had seen no serious sickness among the tribe, and he noticed one very strange custom. If one were sick or felt badly, in any way, he went immediately to the house of the chief, and received something from his hands, after eating which, *he always recovered*, and this was the *only "doctoring"* they had. Among them were no conjurors or medicine men, as in all other tribes. They seemed to *depend entirely on this wonderful plant.*

What it was, the Doctor often enquired, but the Indians would only say that the chief alone knew, and it was death to be overheard talking of it. At last, the Doctor determined to try and ascertain of the chief the name of this wonderful medicine. Going to the venerable old Sachem he said to him that he had one request to make of him, and if he granted it, it would more than repay him for all he had done: the Doctor then begged him to reveal to him the secret of the "MANOCHAN" OR GREAT MEDICINE; urging him by his daughter's life, spared to him by the Doctor's exertions, to comply with his request.

The chief heard him through in grave silence, and rising to his feet, with the dignity of a Roman Senator, he drew his blanket round his noble form, unbent by age, though ninety winters had whitened his locks, and thus *he said*: "my brother is a brave man, his hand saved from the sneaking Navajoes, Tula, the blossom of our tribe, without whose smiles the heart of Tezucó would be sad. If an Indian had asked me this, by the law of our nation, for asking merely, he must have died; but the heart of my brother is strong; his hand drew from the fire a princess of our nation; listen then and hear

The History of this Marvelous Herb.

"Many moons ago, ere the white man trod the soil of the land, away to the south, on sunny plains and in deep valleys, dwelt the forefathers of the Tezucans. Then they were a great and mighty nation, and they had towns and cities before which those of the white man sink into insignificance; * they lived in peace and plenty, cultivating their lands in quiet, and feeding their flocks and herds, or when called to battle for their rights, rose in strength and conquered all; and so they lived, until the white man came with his accursed arms, so new and so terrible to them, and his more accursed fire water. He overcame our ancestors; they faded from the earth, leaving nothing but gigantic piles of ruins to mark where once their cities stood.

"My tribe alone are left. Piloted to this valley hundreds of years ago, by one of their number, who had discovered it by accident, here we have lived since, our religion and our customs still unchanged; no stranger's foot has pressed the sod, *except you two*; but one of you will leave it. You are my brother; you can go; your hand saved my Tula from the fire; but Ometa must remain, or die.

"In but one thing were we, and still we are, superior to the pale faces: WE KNOW THE PLANTS AND HERBS that compose the *wonderful medicine*; guarded jealously by its possessor, that secret never has been revealed, and now, you, one of that hated race, ask it of me; but were it not for you, my Tula would be far hence; then listen and hear well.

"Some distance from this village lives the aged mother of this tribe, descended as she is

Daniel Deane

A HINT ON DIET.—Both the quantity and the quality of our food should be proportioned to our habits of bodily exercise. When we have active exercise in the open air we may with impunity eat a hearty dinner, taking care, even then, to leave off before the appetite is palled; but on days when persons of weak digestion do not go out of doors, and especially when the mind has not been energetically occupied, it would be well to abstain altogether from solid animal food and satisfy themselves with simple farinaceous matters, in the composition of which care should be taken that eggs are as sparingly used as possible, for nothing is a grosser blunder than that eggs are eligible for weak digestion, and for the diet of the sick.

from the great prophet of our nation ; to her and her descendants is the secret given to keep and guard, and it will be at peril of both our lives if we attempt to get it from her. I am chieftain of our nation, and to me she gives it prepared ; but I know not what it is. Great as is my power over my braves, hers is still greater, because they look upon her as the guardian of this precious secret ; and were she to receive the visit coldly, or make but alarm enough to call her guards, you would be sacrificed—I could not save you ; choose, then, my brother, if still you say *go on*. Tezucó's heart and hand go with you."

THE DOCTOR RESOLVES TO SEE THE AGED SORCERESS.

The Doctor replied to this, thanking the chief sincerely, and telling him, that with his help, he would most certainly try to discover this wonderful thing which seemed to keep the whole tribe always in health, by a few doses being taken as it were at random : he could not, as he said, satisfy his conscience should he leave any means untried to discover this wonder of the world, as *by it he could do much good to his fellow men*. After making an appointment with the chief, he left him.

THEY SEE THE INDIAN SORCERESS.

It was on a beautiful night, shortly after the interview we have described, that the Doctor and Tezucó might have been seen standing in front of what appeared to be an enormous pile of rocks resting against the mountain side. The moon, pouring over everything a silvery radiance, brought out the two figures as they stood in bold relief against the dark back ground.

The chief had just given the signal, and now awaited the appearance of the guide to conduct them to the Sorceress. In a moment, he came, seeming to spring from the rock itself, and at a motion from the chief, he disappeared again, but followed now by the Doctor and the Sachem. He led them through a small opening in the rock into a large cave, in which were some thirty savages, standing or laying at length, but each grasped his arms in his hands ready for use. Passing this, their guide pressed upon a portion of the rock, and it seemed to open, disclosing an aperture, barely large enough for one person to pass through at a time. On passing this, they came to a large cave, in which were many strange objects ; the Doctor could not tell what was their use—following the guide through numberless windings and intricate passages, they came, at length, to the chamber of the great *Omeemasha* herself.

Boldly confronting her, the Doctor stated briefly the object of his visit, and then pausing, the chief himself set forth his wishes in the matter. They waited a reply :—

Omeemasha, without moving from her seat, said : "Young Eagle of the pale faces, your heart is brave, and your hand is ready, that I know—for it was your hand that rescued the daughter of our chief from the torture of the Navajoes. You, it was, who spared to our tribe a daughter of the Sun,* worthy to succeed me in my charge ; therefore, to you, with all due ceremony, will I impart the secret of our race ; a secret given to us, alone, by the ruler of the Universe."

"And a secret," cried the Doctor, "that once in my possession, shall bring healing and strength upon its wings to all the world."

"Then have it as you will," said the Omeemasha ; yet stay : "you must swear upon an oath as you dare not break, never to reveal to mortal the whereabouts of this valley. Ages have our people lived here undisturbed, and we wish not to be discovered now."

To this, the Doctor readily consented, and the Omeemasha rising, bade them follow. Farther and farther into the mighty mountain they proceeded, and came at last, to a gloomy cavern, in which, against one side, was a kind of altar of a strange and curious form, having directly above it what appeared to be a golden image of the Sun and a familiar looking plant, also formed of solid gold. (Both these objects looked like relics saved from some temple of the Sun, such as Pizarro found in his conquest of Peru.) ; on this altar were many symbols of Heathen worship.

—*The ancient Aztecs worshipped the Sun.

READ WHAT PHYSICIANS SAY OF THE
"MOUNTAIN HERB PILLS" AT HOME.

MESSES. E. L. JUDSON & Co.,

NEW YORK CITY, January 6, 1860.

Dear Sirs: As you desired, I have made a thorough trial of your "MOUNTAIN HERB PILLS," and I must say, that I, as well as many of my friends, have been greatly surprised at the many cures they have performed. In a practice of over 30 years, I have never before found any combination of medicines that was a specific cure for so many different diseases. I am confident that these Pills, taken at the first symptoms of illness, will prevent more disease and sickness, than any medicine ever known. I have found the most perfect cures performed by the JUDSONS' PILLS of all *Bilious Diseases, Lung and Liver Complaints*, and all other diseases arising from an impure state of the blood; indeed, they render the blood so pure, that disease cannot exist. You are at liberty to publish this if you choose.

Yours truly,

H. Z. PARKER, M. D.

THE DOCTOR TAKES THE OATH.

The Omeemasha caused the Doctor to stand near it, and with one hand upon it, and the other raised, he took an awful oath administered by her, never to reveal the situation of the valley.

Then leaving the chief, the Doctor and the Omeemasha proceeded on to a cave literally filled with dried herbs and plants; on examination the Doctor found there were six different and distinct plants and herbs arranged carefully in separate piles. He knew each at a glance, and carefully noted their names.

The Omeemasha then told him that *these were the plants and herbs that composed the great Manochan or Healer*, and that the symbol he had seen above the altar was meant to represent the principal plant in the combination, without which, the others would be useless, and that for the reason of its great efficacy and value, the tribe worshiped it as a child of the Sun, born by its heat and nourished by its light.

SHE TELLS THE SECRET TO THE DOCTOR.

Then with many strange ceremonies the Omeemasha *communicated to the Doctor the great secret*—the proportions of each herb and plant, to produce this marvelous medicine; after which they rejoined the chief, and he and the Doctor with their guide were soon once more in the open air.

HE LEAVES THE VALLEY.

Some time after this, the Doctor left the valley, but, greatly to his regret, was obliged to leave Hawk Eye behind him. The Indians conducted him on his way till they saw the smoke of a camp, and then left him. On the Doctor's reconnoitering this camp, he found it was the encampment of a band of trappers, four in number, all of whom he knew, on their way to St. Louis with their furs; and on presenting himself to them was immediately recognized, and joining their party, he went with them to St. Louis, where he arrived just seven years from the day he left it.

Hail! Double Benefactor; saving life—
From torture lingering, in death by slow degrees:
A maiden rescued! from the lighted fire,
And thousands from the fangs of fell disease!

In his Great Pills, of Mountain Herbs combined,
Thousands in house-holds now, throughout our land,
A remedy, that never fails, can find,
To save their loved ones from death's ruthless hand!

All orders and letters must be directed to

B. L. JUDSON & CO.,
SOLE PROPRIETORS,
50 LEONARD STREET,
NEW YORK.

N. B.—You will always find the Signature and Name of **B. L. JUDSON & CO.**, on the wrapper of each box of the true and genuine "Mountain Herb Pills."

FACTS FOR THE CURIOUS.—THOMAS JEFFERSON and JOHN ADAMS both died on the 4th of July, 1826. JOHN ADAMS died in his 91st year, and was eight years older than THOMAS JEFFERSON. THOMAS JEFFERSON was eight years older than JAMES MADISON; JAMES MADISON was eight years older than JAMES MONROE; JAMES MONROE was eight years older than JOHN QUINCY ADAMS. The first five of our Presidents—all Revolutionary men—ended their terms of service in the 66th year of their age. WASHINGTON, born February 22, 1732; inaugurated 1789; term of service expired in the 66th year of his age. JOHN ADAMS, born October 19th, 1735; inaugurated 1797; term of service expired in the 66th year of his age. THOMAS JEFFERSON, born April 21st, 1743; inaugurated 1801; term of service expired in the 66th year of his age. JAMES MADISON, born March 4th, 1751; inaugurated

LETTER FROM PAUL ROMAIN—A TRAPPER.

ST. LOUIS, Mo., June 8th, 1858.

DEAR SIR:—You will, no doubt, well recollect the time that you joined our party on your return from the strange tribe you told us of. How pleasant were those days! Alas! we must all bow to age. I am not the man now that I was then; you know how quick was my eye, how true my aim. Many a redskin has received his allowance of cold lead from me; but always, yes, always in self defence. I am yet, I know, a rough; and my acquaintances here say, a fearless man, and I do feel as if I would give anything once more to meet and “raise the hair” of the sneaking Kiowas or blood thirsty Blackfeet; but I hope the precepts of religion will keep such thoughts from my mind, for I am, I hope, a changed man. But I must to the object of my letter; it is to thank you for the medicine you gave me. You recollect on our journey you gave me a quantity of strange herbs, telling me how to use them in any case. I have used them ever since, and they have saved the lives of hundreds on the endless plains west of the Missouri; in the pathless wilderness of the “Lanos Estacado,” the staked plains of Texas, time after time have I found and relieved the sick trappers and hunters. You wrote me that the medicine would be very soon prepared and placed in the reach of all, under the name of *Judson's Mountain Herb Pills*. I hope you will so prepare it in some way that every one can get it. I know (for you and I have often “roughed” it together on the plains.) that you have spent your life in trying to benefit our countrymen, and a greater blessing you cannot confer than to place the “*Mountain Herb Pills*” so all may be able to get them. I could tell you instances without number, where this medicine has raised my friends almost from the grave, but you know its power as well as I do; it can't do more than it did for “Carson” when you and I were together; poor fellow, he thought he was going, and so did all of us. You would have hard work to persuade him that he is sick now; his lungs are as sound as a dollar. Many a close hug have I seen him have since with some bloody Indian.

If we were but young again, Doctor! oh, the memory of those days, how it clings to me! How nicely you fooled that old Navajo rascal. If the eclipse had not come, though! what would you have done? I have to laugh every time I think of it. I suppose you have at last concluded to settle down and enjoy, some portion at least, of your endless wealth: I can see very well why we poor trappers wear out our lives on the plains and mountains of the west; but had I been in your place, the rocky mountains would have been as an unknown land to me now.

Please write me. The young lady you sent me some medicine for is entirely well; the doctors here cannot understand it. Dr. Gray has written you about it; he gave her up, and he says the pills saved her life and that he will have them for his other patients.

Yours truly, PAUL ROMAIN.

Letter from Vienna, Austria—From a Member of the Royal College of Medicine.

Royal College of Medicine, Vienna, January 4th, 1858.

DEAR DOCTOR,—I have been so much engaged in my professional duties since your departure, that you will, I know, excuse my seeming negligence in writing you. I trust the classic shades of Athens, or the mighty memories meeting you at every step, among the palaces and ruins of Rome, have not detained you. You ought, Doctor, to carry out your oft-expressed intention of bringing what your untutored sons of the forest so truly called the “Manochan, or great Medicine” in a cheap form, within the reach of all; and I address this to you at New York, hoping you are even now engaged in doing so.

You said you would call it “*Mountain Herb Pills*”; the name is good, for it really expresses what it is, entirely vegetable.

You can do much more good by having it prepared thus, so all can get it at any time at a small price, than to reveal its composition to our colleges. You know, as well as I, the jealousy of the profession. Not one in a hundred would take the trouble to prepare and use it; and if they did, would charge a tremendous fee on the strength of the wonders it would perform.

As for its success here, I own I am surprised: I expected much from it, but I did not suppose it in the power of medicine to perform such cures as it has done since you left. It makes no difference what the disease is, it reaches and cures it. Envyng you the happiness of discovering such an assuager of the pains of illness, and trusting I may yet see you again,

I remain yours, very truly,

LEONARDO DELVECHIO, M. D.

1809; term of service expired in the 66th year of his age. JAMES MONROE, born April 2d, 1759; inaugurated 1817; term of service expired in the 66th year of his age.

The difference between rising every morning at six, and eight, in the course of forty years, amount to 29,200 hours, or three years, one hundred and twenty one days, and sixteen hours, which are equal to eight hours a day for exactly ten years: so that rising at six will be the same as if ten years of life were added, where we may command eight hours every day for the cultivation of our minds and the dispatch of business.

Next to "twenty-four grains," there is nothing like a mean man's pocket to make a penny wait.

Diseases of the Liver.

You may always know when your liver is out of order, or when you are what is called bilious, by any of the following symptoms: pain in the side and back, dizziness, dull headache, a bad taste in the mouth in the morning, sallow colored complexion, yellowish tint in the eyes, costiveness, or diarrhoea of slimy dark color, low spirits and dismal forebodings. It is acknowledged by all physicians and others who have seen their action, that

JUDSON'S MOUNTAIN HERB PILLS,

are a perfect cure for all bilious affections. So pleasantly do they search out and drive away the seeds of disease, that all persons living in a country where *Fever and Ague*, and all other bilious diseases are prevalent, will find they should never be without them. From to two four pills each night, on going to bed, will in a short time drive away the sickly yellow look of bilious persons, and bring to their cheeks a beautiful glow of perfect health.

Diseases of the Chest and Lungs.

These diseases are too well known to require any description. How many thousands are every year carried to the silent grave by that dreadful scourge *Consumption*, which always commences with a slight cough. *Keep the blood pure and healthy by taking a few doses of these pills each week*, and disease of any kind is impossible. Consumption and lung difficulties always arise from particles of corrupt matter deposited in the air-cells by bad blood. *Purify that stream of life and it will very soon carry off and destroy the poisonous matter*; and like a crystal river flowing through a desert, will bring with it and leave throughout the body the elements of health and strength. As the river leaving the elements of fertility in its course, causes the before barren waste to bloom with flowers and fruit, so pure blood causes the frame to rejoice in strength and health, and bloom with un fading beauty.

Diseases of the Bowels and Stomach

are always caused by large deposits of hurtful matter, left by *bad or impure* blood in those important organs, and the poisonous material in this vitiated blood, acting on the system, makes it too weak to throw off this matter by the natural channels, or if any is carried off, it is a very small portion. So arise *diarrhoea and dysentery, colic, costiveness, bad breath, indigestion, nausea, loss of appetite, belching of wind off the stomach, &c.* To cure all these "the blood is the life" and must be perfectly pure and clean, then you cannot be sick. A short use of these pills will delight you. You will feel with surprise their mighty power, and be willing to say with the red men of the west, truly they are the "mighty healer."

Dyspepsia.

This is a very distressing complaint, and gives the patient more suffering than almost any other disease; in fact, it is a combination of many complaints in one. The symptoms are numerous, and are of the nature of almost all other complaints combined. From this fact arises the very many cases where this disease is mistaken for some other, and so improperly treated. *The first symptoms—indigestion, flatulency, loss of appetite, heart-burn, Headache, &c.*, if neglected, almost always awaken some dormant disease, and send the poor sufferer to a premature grave. What you must first do, is cleanse the blood and regulate the bowels; do this with the "Mountain Herb Pills," and you can bid defiance to dyspepsia.

Fevers.

Fever, like all other forms of disease, is caused by impure humors: these impurities in its essence cause a quicker circulation of the blood in struggling with nature, trying to cast out of the body the corrupt matter.

JUDSON'S MOUNTAIN HERB PILLS

are acknowledged to be a delightful, cooling and strengthening medicine for all kinds of fever. *Resort to them at the first symptoms.*

Female Complaints.

Every sensible woman will never suffer again with those distressing afflictions peculiar to her sex, when the cure by the "Mountain Herb Pills" is so sure and certain. Females of pale sallow complexion, are restored by a few boxes of these pills to vigor and beauty, changing the skin to the clear and healthy "white and red" so beautiful to behold.

WHAT A PHYSICIAN SAYS!
 "It Never has Failed."

LUMPKIN, GA., March 20, 1860.

Messrs. B. L. Judson & Co.,

Gentlemen—I am now sole proprietor of the Drug Establishment of Wm. K. Abbott, and am in want of a large amount of your very valuable WORM TEA—the lot you sent to Abbott is now out. I will account to you for all you sent to Abbott, and would be pleased to have a large amount of the Tea sent immediately. IT NEVER HAS FAILED TO PLEASE all who have tried it, and my customers are asking for it every day, although I have all other Worm medicines on hand. Send me a good lot of it, I care not how much, I can sell it, it is the very specific for Worms.

Respectfully, B. MCGHEE, M. D.

W O R M T E A .

ABOVE, we present you with a good likeness of Tezucó the Sachem of the Tezucos, and you will find a similar portrait on each package of the Tea. We hope you will read the very interesting narrative, contained in this book, of the adventures of the Doctor among these Indians. It was from them that he procured the "Manochan, or Mighty Healer," and which we now prepare under the name of

"JUDSON'S MOUNTAIN HERB PILLS."

This WORM TEA is made entirely of simple plants and herbs; nothing else is used in making it. It derives its uncommon efficacy and miraculous power almost altogether from an herb discovered by the Doctor in his travels among the red men. This herb, combined with other well known plants, composes this Tea.

How gratifying it is to us to be able to supply you with such a medicine, and doubly pleasant that we can assure you that no calomel or other mineral is put in it. No, nothing but plants and herbs, and these plants undoubtedly those intended by nature for the destruction of those pests of humanity—WORMS.

Symptoms which cannot be mistaken.

The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure semi-circle runs along the lower eyelid; the nose is irritated; a swelling of the upper lip; occasional headache, with humming of the ears; an unusual secretion of saliva; furred tongue; breath very foul; appetite sometimes voracious, with a "crawing sensation at

"Planters Look to your Negroes."

The Mountain Herb Medicines will save your Doctor's Bills.

BRUNSWICK, GA., March 19, 1860.

Messrs. B. L. Judson & Co.,

Gentlemen—Enclosed, please find receipt for your medicines turned over to me by Messrs. Massey, Hillsman & Co.

Your preparations are taking a run in this city, and I am now entirely out of your "Mountain Herb Worm Tea." Please send me a supply immediately, and oblige

Your Ob't Servant,

JAMES S. BLAIN.

the stomach, at others, entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urine turbid; respiration occasionally difficult, and accompanied by hiccough; and uneasy and disturbed sleep, with grinding of the teeth; temper generally irritable, etc.

This WORM TEA is beneficial at all times, whether worms exist or not. If you see your child suffering under even the slightest of these symptoms, give this WORM TEA; if worms exist, it will kill them; if not, it will only act as a gentle purgative, moving the bowels gently, and benefiting the child in either case.

JUDSON'S MOUNTAIN HERB WORM TEA NEVER FAILS!

The Doctor has given us one particular case, which yielded entirely to its wonderful effects:

It was a child of Col. Henry Howard of Maryland; she was three years of age, and a daughter deeply beloved by her parents and friends.

They saw her gradually sinking, day by day, and could obtain nothing that would relieve the little sufferer, or inspire them with a hope that she might recover. The well-known symptoms, as described above, told truly the nature of her disease. Medical aid was procured, and consultations held among the most learned physicians, but all in vain. And as each day went by, her afflicted parents noticed that there was no change for the better. She was no longer the light and graceful fairy that made her mother's heart bound at her approach, or filled her father's soul with love and pride. Disease, by slow but sure progress, was fast exhausting the feeble frame of the sufferer.

Col. Howard, was well acquainted with my family, and as a last hope wrote to me, imploring me to come and express my opinion of her condition before it would be too late to save his child. What money failed to lead me to perform, my strong feelings of friendship for him could not resist. I went, although my presence was very necessary elsewhere, and once more grasped my old friend by the hand.

He led me at once to the couch where the poor child lay, and I shall never forget the expression of his face as he watched my lips to hear the opinion I might give. When I told him she would yet recover, he almost fainted with delight at the unexpected result. The child was almost killed with worms.

I immediately prepared the MOUNTAIN HERB WORM TEA, and commenced its use. The next morning after the first dose had been administered, she passed over *two hundred* worms; and before a week not less than eight hundred worms of all descriptions were expelled from her bowels, by this wonderful medicine.

From this time her recovery began, and I am positive that had she used the Worm Tea when she was first taken sick, she would never have been brought so low.

Now, when I can present to you such wonderful results as these, can you blame me for departing from the strict rules of the profession, and recommending to all the use of this wonderful remedy.

How much better and safer would it be to have it always in the house; a little delay when a child is taken ill may often be the cause of its death, while acting without delay, and (if it has any one of the symptoms mentioned) by giving the Mountain Herb Tea immediately, you will not only save the child a long and tedious illness, and yourself much expense, but also feel happier in knowing that you have done your duty, and perchance saved its life.

OBSERVE.—Always find the Name and Signature of B. L. JUDSON & CO., and the portrait of Tezucó, on each package of this Worm Tea.

B. L. JUDSON & CO.,
SOLE PROPRIETORS,
50 Leonard Street, New York.

GREAT MEN.

Homer was a beggar; Plantus turned a mill; Terence was a slave; Boethius died in jail; Paul Borghese had fourteen trades, yet starved with them all; Tasso was often distressed for a few shillings; Cervantes died of hunger; Camcens, the writer of the "Lusiad," ended his days in an almshouse; and Vangelas left his body to the surgeons to help pay his debts. In England, Bacon lived a life of meanness and distress; Sir Walter Raleigh died on the scaffold; Spencer died in want; Milton sold his copyright of "Paradise Lost" for £15, and died in obscurity; Dryden lived in poverty and distress; Otway perished of hunger; Lee died in the streets; Steele was in perpetual warfare with the bailiffs; Goldsmith's "Vicar of Wakefield" was sold for a trifle, to save him from the grasp of the law.

"The People will Have It."

NIVEN, WYOMING Co., PA., March 24, 1860.

Messrs. B. L. Judson & Co.,

Dear Sirs—I am in the mercantile business, and my customers are desirous that I should write you to send me a quantity of your "Mountain Herb Worm Tea." I have sent to Nicholson a number of times, and obtained the Tea for them, and it is valued very highly by them. Now they ask me to get it from you. I could sell a large quantity of it if I had it. Please send me some, and also some of your Pills.

Yours truly

ABNER MITCHELL.

CARLTON'S

CONDITION POWDERS, The Greatest Medicine FOR HORSES, COWS, SHEEP, AND HOGS.

The recipe for CARLTON'S CONDITION POWDERS was obtained by us at a great expense many years since. They are the Original and Genuine Articles; and although countless scurvy imitators have tried to counterfeit them, the name, "CONDITION POWDER," is all they can imitate. BE NOT DECEIVED—shun all other so-called Condition Powders, and get the

GENUINE CARLTON'S,

And your Stock will show you the difference by their improved appearance, the glossiness of their coats, their renewed appetite, health, and vigor. Nothing can equal these Powders as a general Condition Medicine.

The CARLTON'S CONDITION POWDERS, given according to directions, are the best thing in the world to strengthen a horse, and to restore him to health and vigor after severe exposure or hard driving.

These Powders cause a healthy action of the digestive organs, and purify the blood of animals, thereby equalizing the circulation of the blood, and imparting vigor to the whole frame. This soon demonstrates itself by an improvement in the appearance of the coat, for it is a certain fact, that no animal can be in perfect health if the coat be rough and unthrifty.

CARLTON'S CONDITION POWDERS

Will be found a perfect TONIC AND RESTORER after attacks of any acute diseases, such as Influenza, Strangles, Inflammation of the Lungs, Nasal Gleet, etc.

Every one who owns Stock of any kind should use this Medicine; it is always beneficial, and is so harmless that it can always be given without fear.

Farmers who are fattening their Stock, should use these CONDITION POWDERS. They will keep all kinds of Stock healthy and in good heart, and make them fatten much easier and quicker than they otherwise would.

Remember this Caution.

Find the Signature thus:—

In full on the wrapper of each package. This is the only test of the TRUE CARLTON'S CONDITION POWDERS.

Take no "Condition Powders" without this Signature.

N. B.—The above cut is a fac-simile of the wrapper in which the GENUINE CARLTON'S CONDITION POWDERS are now put up. The package is three times as large as the old yellow label packages, and retails for 25 cents. Always get the Condition Powders in the above wrapper.
