# Getting Up Nights Nervousness Backache or Leg Pains

## Often Caused by Kidney and Bladder Troubles

Does your back ache so bad at times that you find it difficult to keep going?

Is your sleep disturbed and rest broken by having to get up three or more times every night? Do you suffer from burning, scanty or frequent passages?

Are you so nervous at times that you feel like you are going to fly into pieces? Do you feel tired, run-down, worn out and older than you are?

Do you suffer from pains in legs, and rheumatic twinges? Do you frequently suffer from headaches?

The above, and many other distressing symptoms may often be caused by kidney and bladder troubles. This is easy to understand when you realize the vitally important task performed by the kidneys in helping the body maintain health, energy and vitality.

### Kidneys Must Clean Out Acids

The kidneys are provided by nature to clean and purify your blood, and to remove excess acids, poisons and wastes which tend to accumulate and cause many troubles if the kidneys slow down in their work, which frequently may happen. This is easy to understand because excessive eating or drinking, frequent colds, working too hard, late hours and worry have a tendency to create an excess of acids, and perhaps over-work the kidneys. The kidneys work every hour of the day or night, and never get a real rest, so it is only natural that they may get tired and slow down as you grow older.

You can appreciate the tremendous amount of work that the kidneys do when you know that your heart pumps blood through your kidneys about three times a minute, or two hundred times an hour—this action must keep up every hour of the day and night as long as you live. Each delicate kidney is just about the size of your clenched fist, and

in these small compact organs nature packs about nine million tiny tubes or filters to carry on the vital and all important work of cleaning out and removing excess acids, poisons and wastes which become poisonous and undermine health and vitality unless properly and systematically removed in accordance with the laws of nature.

### Helps Kidneys This Easy Way

Fourteen years ago a scientific formula called **Cystex** was made available to the public through drug stores, thus making it easy and inexpensive to help kidney and bladder troubles in these three ways:

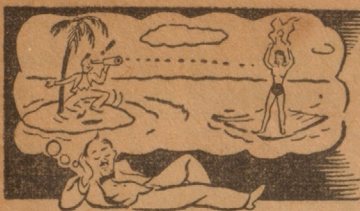

1. Its diuretic action helps the kidneys remove excess acids which may become poisoning and highly irritating unless properly eliminated.
2. Its palliative action aids in alleviating backache, burning and smarting of the urinary passages, and bladder irritation.
3. By helping the kidneys clean out wastes which may become poisonous if allowed to accumulate.

### Money-Back Trial Offer

Usually in kidney and bladder disorders, the very first dose of **Cystex** goes right to work helping the kidneys clean out excess acids, poisons and wastes. And in just a day or so this cleaning kidney action may easily make you feel stronger, better than in years. In fact, we are so confident of the power of **Cystex** in most cases such as this that we will refund every penny of the money you pay your druggist for a package of **Cystex** upon return of empty package unless **Cystex** is entirely satisfactory to you. Luckily last Fall I saw an advertisement of **Chinaroid** in your book. Again I decided to try. Imagine my joy when I found it gave me joyous relief. I certainly cannot praise **Chinaroid** too highly, and certainly do advise it to all pile sufferers, as it surely worked for me." 75c for Economy Tube with Applicator.

## \* Your Future in the Stars \*

ARIES: March 21st to April 19th

If you were born while the Sun is in Aries you are endowed with much mental energy and are a natural leader. Arians are nearly always more or less headstrong or impulsive, ambitious, full of enterprise and new ideas. You prefer to be independent and to govern yourself. In nature you are persistent and determined, somewhat inclined to be fiery, or quick-tempered, and quick to resent abuse or imposition, but forgive easily and do not hold a grudge for any length of time. You are quick witted and possess extreme love of justice and freedom. Physically you should have excellent vitality and a strong constitution, not giving in to sickness easily and recover quickly from disease.

# OMENS SIGNIFY FUTURE

**D**OWN through the ages, surviving generation after generation, have come many customs and beliefs, that might be taken as signposts to the future. Following is a list of the popular omens and superstitions that may at some time or other indicate future events. No proof exists that each sign will accurately predict the future, but they are presented for your entertainment as they reflect common beliefs of various peoples throughout the world.

## WEDDING SUPERSTITIONS

It is lucky for the bridesmaids to throw away a pin on the wedding day, and unlucky to be stuck with one.

It is considered unlucky for a pair to be married in church if there is an open grave in the churchyard.

If a younger daughter chances to get married before her older sisters, the older girls should dance at her wedding.

If the bride accidentally breaks a dish at the wedding feast it is a bad sign.

It is unlucky for a woman to read the marriage service entirely through. She will never get a husband.

## ENGAGEMENT AND WEDDING RINGS

To lose a stone out of an engagement ring foretells bad luck, unless it is replaced before the wedding takes place.

The ring is a symbol of never-ending love and affection that should continue to flow uninterrupted.

The wedding ring is worn on the fourth finger of the left hand.

It was formerly believed that a special artery led from the heart to the fourth finger.

A wedding ring should be turned around three times if you want your wish to come true.

It is unlucky to take off your wedding ring except in cases of necessity.

## SIGNS OF GOOD OR BAD LUCK

To leave home and be compelled to come back for some article which was forgotten, is unlucky, unless you sit down for a moment before going out a second time.

Carrying a crust of bread in one's pocket is considered lucky and brings prosperity.

To count your gains is supposed to bring bad luck. To reckon on money you are to receive and lay out plans of spending it, is considered unlucky. One should never count one's chickens before they are hatched.

Finding a four-leaf clover is a sure sign of good luck. It should be worn in the lapel or pinned to one's coat.

It is bad luck to shake hands with any one across the table.

It is a sign of ill luck to find money and not spend it. It should be spent in a good cause, or given in charity.

To sit crosslegged is considered a sign of good luck. To cross one's fingers is another way of averting evil.

## Did You Know That . . .

The longest fight within a regulation boxing ring, was placed on the records April 6, 1893, in New Orleans.

The opponents, Andy Bowen and Jack Burke, fought savagely for 110 rounds, the fight lasting 7 hours and 19 minutes.

The unfortunate part of it all was the fact that the referee, (undoubtedly more tired than either gladiator), stopped the fight and called the bout "no contest." And so we have the longest bout on record and no winner.

## LUCKY AND UNLUCKY OMENS

Four persons shaking hands in crosswise fashion, foretell a coming marriage.

Two bells ringing in the house at one time foretell a parting. So also does a hollow cavity in a fresh-cut cake and a loaf that breaks in two while being cut.

To enter a house with the left foot first brings back luck to the occupants.

## YAWNING

Among many peoples, yawning is considered a sign of possession or obsession by an evil spirit.

There is an old belief that when one yawns the devil may leap into the open mouth; hence the necessity of holding a hand over the mouth.

To yawn in the midst of saying one's prayers, is a bad omen. It is better to say the prayer from the beginning again.

## TINGLING AND ITCHING

It is a common superstition that when one's ear's tingle some one is talking about him.

The tingling of the right ear is taken to mean that good is spoken, while, that of the left ear is a token of the fact that evil is spoken.

The itching of the palm is considered an indication that the person will get some unexpected money. If continued for any length of time, a fortune will come to him.

The itching of the thumb or nose denotes a visitor sometimes an unwelcome intruder.

## STUMBLING OR FALLING

To fall while going upstairs is a sure sign that the victim will not marry within a year.

The falling of a picture from the wall is universally regarded as a bad omen.

The fall of a knife or fork to the floor is usually considered a good omen and foretells a visit from a friend; a female in the case of a knife, or a male in the case of a fork.

To stumble in the morning on coming down stairs is a sign of ill luck during the day.

If you stumble over a stick or stone, turn back and kick it out of the way to avert trouble.

TAURUS: April 20th to May 20th

If you were born while the Sun is in Taurus you are self-reliant, determined, persistent, having the quality of stability and firmness. You are careful, cautious and patient. You can work and wait a long time for your plans to mature, hopes and aspirations to materialize. Unprovoked Taurians are gentle, but furious when really angered, and then likely to be headstrong and unyielding; more or less secretive or reserved. Mentally you have a great deal of power and latent energy, delight in being practical; a great love of nature, music, art and literature. Usually strong and healthy but likely to chronic diseases which are mostly caused by allowing oneself to become gloomy or pessimistic; stubborn and hard to convince; fixed in views which sometimes incline to the dark side of things.

# Women Suffer

## Bladder Weakness

Which Often Causes  
**Backache, Headache,  
Burning, Smarting  
Passages**

A high percentage of women seem to be troubled by frequent or scanty passages which burn and smart, and many of them often have to get up to go to the bathroom several times a night. Other women are troubled by severe backaches, nervousness and leg pains.

Probably the functional upsets attending childbirth represent one reason why women suffer these ailments, however, housework, financial worries, taking care of the family, frequent colds and nervous strain may prove a burden to women.

### Help Kidneys Remove Acids

Women, and men too, will be surprised and delighted to see how quickly and easily they can relieve backache, getting-up nights, burning passages and other kidney and bladder troubles by simply aiding the kidneys and bladder to filter and clean out excess acids and poisonous wastes.

As we grow older our kidneys at times may slow down in their work of filtering and purifying the blood. And when this happens poisons

have a tendency to accumulate in the system, making you feel older, worn-out and suffer from many aches, pains and troubles. But by simply helping the kidneys and bladder to perform their work more normally thousands of men and women in Canada and throughout the British Empire have discovered joyous relief and new energy.

Fourteen years ago a scientific formula called **Cystex** was made available to the public through drug stores, making it easy and inexpensive to help thousands suffering from kidney and bladder troubles in these three simple ways: (1) Help the Kidneys remove excess acids, which may become poisonous and irritating. (2) To palliate burning and smarting of the urinary passages, and bladder irritation. (3) Help the kidneys remove wastes which may become poisonous, thus aiding nature.

### HOUSEHOLD BELIEFS

If the keys of a careful housewife get rusty in spite of her care, it means that some one is saving money for her.

Do not sweep the dust out the front door. It indicates that your good luck will be swept out with it.

If your tea-kettle sings, it is a sign of contentment in the home.

In sweeping, beware not to sweep the dirt over a girl's feet, as it will prevent her from marrying that year.

To throw away a piece of bread is an indication of carelessness and brings bad luck.

### SPILLING OF SALT

To spill salt at the table is considered unlucky. To change the spell, however, it is only necessary to take a pinch of the salt and throw it over the left shoulder.

To put too much salt into the food when cooking is supposed to be proof that the cook is in love.

### CONCERNING LADDERS

To walk under a ladder when it is leaning against a wall is a sign of bad luck.

# Teeth Loose Gums Bleed

Bleeding gums, sore mouth and loose teeth may mean that you are a victim of Gingivitis that may sooner or later cause you to lose many of your teeth and have to wear false teeth before your time. **Amosan** eases gum bleeding the first day, relieves sore mouth and helps nature. **Amosan** should promptly and effectively relieve sore mouth, curb bleeding gums and help nature or money back on return of empty carton. To pass under a ladder that is hung horizontally does not influence your luck for good or evil.

To climb a ladder with an odd number of rungs is a good sign and leads to success.

To be on a ladder with a pretty girl is a good sign and foretells matrimony.

To fall from a ladder is an omen of ill luck and foretells a loss of money.

## CARD PLAYERS' SUPERSTITIONS

A green cover is the most fortunate to play on.

To lend money to an adversary with which to play is unlucky. To borrow money during a game is lucky.

In gambling places there is a belief that after a suicide of any unlucky player, all those playing against the bank will win. When the news of a suicide becomes known, therefore, the card rooms at once fill with eager players.

To drop a card on the floor during a game is a bad sign, and means the loss of that game.

To have another person look over your shoulder while playing, or put his foot on the rung of your chair, is a forerunner of bad luck.

To lose your temper or get into a passion over the game is a sign of a loss.

The four of clubs is an unlucky card to get. It is called the devil's bedstead.

It helps your luck to keep the chips carefully stacked up before you.

Turning one's chair around three times is often resorted to to change one's luck.

Playing with a fresh deck of cards is another way of forcing the goddess of fortune to be propitious.

If you dream that you see an empty cage from which a bird has flown, it is a sign that your love will desert you for another love. If you dream that someone is letting a bird out of a cage, it indicates an approaching elopement.

**CAKE**—To dream of a birthday cake is a very fortunate sign. If the candles are lighted it means health and prosperity all your life long. If you dream that you are cutting the cake, it is a sign that your luck will temporarily desert you.

## Did You Know That . . .

Fish can become victims of seasickness? It's hard to believe, but it is true.

Scientists doing research have found that fish are just as likely to become seasick as any human. They proved that man-made "storms" creating waves in a fish bowl have made goldfish seasick.

During sea voyages these scientists discovered that fish kept on board the vessel became just as seasick from the motion of the waves as any human aboard ship.

# FIRST AID HINTS...

**O**CCASIONS will arise in the home, when it is necessary to carry out some emergency treatment before the arrival of the physician. The following instructions will be most useful, but in all cases **CONSULT A PHYSICIAN**—do not take chances.

## BLISTERS

Blood or water blisters may be caused by pinching, chafing or some local irritation of the skin. (The following paragraph does not apply to blisters due to burns.)

**Treatment.**—Apply a small amount of mild tincture of iodine to the point at the edge of the blister where it is to be opened. Sterilize a needle in an open flame. Be careful not to touch the end of the needle after it is sterilized. Puncture the blister at its edge and apply gentle pressure to its outside margins, gently pressing out the water or blood. Apply a sterile dressing.

If the blister is very extensive or if there is evidence of inflammation or infection, a doctor should be consulted.

## BOILS

A boil is an infection of a skin gland. The germs come from the outside. Irritation and rubbing of the skin, by dirty clothing, or when there is old pus on the skin, let the germs get a foothold. This accounts for the fact that boils are most frequently seen on the back of the neck, in the armpit, on the buttocks, and around the waist—points where clothing is apt to rub considerably.

**Treatment.**—Do not squeeze. Hot salt solution may be applied to relieve the pain and hasten the formation of pus. It is always best to consult a physician.

## CORNS

Corns are hard or soft, according to their location on the foot. Those on exposed surfaces are hard, while those between the toes, as the result of the moisture, are soft and moist to the touch.

Corns are caused by the pressure or rubbing, or both, of poorly fitted shoes or stocking. A shoe that fits too loose is just as liable to cause trouble as a shoe that fits too tight.

**Prevention.**—The adoption of broad-toed "form foot" shoes made of a soft pliable leather is the best prevention.

**Treatment.**—Proper shoes must be secured before any treatment is of value, and this alone will in a short time care for many corns. There are several satisfactory corn plasters and remedies on the market which give fair results when used according to directions. But the corn will always return unless the poorly fitting shoes that originally caused the trouble are replaced by shoes that fit properly. Lamb's wool as a pad between the toes is of great value for a "soft" corn.

Cutting a corn is not recommended, due to the danger of letting the knife or razor blade slip, thus causing a wound. There is also danger of cutting too deep. Any cut on the foot must be very carefully cared for, as these cuts are particularly liable to infection. Even though the feet are carefully washed each day, so much dirt is kicked over the tops of the shoes in walking that there is great danger of infection. Many cases of "blood poisoning" and death have resulted from these small cuts.

## EARACHE

Any earache that persists for even a short time should be seen by a doctor. Infection often spreads from the nose and throat up the tube that leads to the middle ear. The hard blowing of the nose, especially with one nostril held shut, sometimes causes the spread of infection and is therefore to be avoided.

The pain can often be relieved by applying an ice bag or a hot water bottle to the painful ear. Cold will probably give relief in more cases than will heat.

Hot or cold compresses may be used in the same way. A bag of hot salt makes an excellent way of applying heat.

Even though the pain is relieved, any severe earache always demands the services of a doctor.

## HIVES

This is a skin disease characterized by the sudden appearance of smooth slightly elevated patches, which are usually whiter than the surrounding skin, and which itch intensely. An eruption rarely lasts longer than two days.

**Cause.**—Most cases are due to eating some food to which the individual is sensitive. Certain persons can not eat oyster or other shell fish; others can not eat strawberries or cherries. Frequently hives occur in a period varying from a few minutes to several days following a serum injection.

**Treatment.**—If there is reason to believe the food causing the trouble is still in the stomach, give an emetic and then a cathartic—Epsom salts is good. A doctor should always be consulted. Also try Nixoderm for relief.

## FOREIGN BODIES IN THE EAR

Solid objects, such as beans, peas, buttons, or small seeds are often introduced into the ears by children. Such things as seeds absorb moisture and swell, making their removal difficult. Do not use pins or pieces of wire to try to dislodge these as there is great danger of seriously injuring the ears.

Insects such as flies or bugs frequently crawl into the ear. They can be killed and the buzzing stopped by dropping a little olive oil or mineral oil into the ear.

In every case, the object should be removed by a physician.

## FOREIGN BODIES IN THE NOSE

If an insect or a foreign body like a grain of corn or bean that is likely to swell has lodged in the nose, a few drops of olive oil or mineral oil may be dropped in to relieve the irritation and help prevent the swelling.

There is usually no immediate danger from these. Take the patient to a physician as soon as it can be done. The nose should not be blown violently; nor should it ever be blown with one nostril held shut.

## FIRST AID HINTS—Continued

### FOREIGN BODIES IN THE STOMACH

Children frequently swallow such objects as coins, pins, tacks and safety pins. Do not give these cases a laxative. Consult a physician at once.

### INSECT BITES

Many insect bites or stings cause irritation, swelling and inflammation, and may be quite painful and poisonous. Infection frequently occurs from scratching.

**Treatment.**—Remove the "sting" if still present. A paste made of baking soda or a compress moistened with ammonia water gives relief in stings and bites, but many people find **Nixoderm** better.

### MARINE LIFE CAUSING IRRITATION

Along the seacoast many cases of very severe skin irritation and poisoning have been caused by bathers coming in contact with the trailing tentacles of the "Portugese Man of War", large jelly fish, "sea nettles," et cetera. This may cause such pain and irritation as to almost render a person helpless and may be followed by extreme shock.

**Treatment.**—First rub the affected part of the body with clean wet sand to remove the slime and parts of tentacles, then bathe the part with ammonia water, full strength, followed by a paste of bicarbonate of soda, or a good ointment.

### PAIN IN THE ABDOMEN

This is due to such a variety of causes—many of which may be serious—that the first aider can only be cautioned to secure the services of a physician whenever there is persistent abdominal pain, tenderness, or nausea or vomiting. To attempt to do other than this, carries too great an element of danger.

Diarrhea is most likely to be due to Nature's efforts to remove the substances which do not agree with one, after they have passed from the stomach into the intestines. In case of persistent diarrhea, or if there is any indication of appendicitis or other serious trouble, a physician should be consulted at once.

In any case, be careful not to stop diarrhea too quickly, as it is Nature's way of getting rid of these

poisonous elements. Withhold food for a day. Drink plenty of water.

Be careful, however, not to give a purgative if there is any symptom of appendicitis, such as abdominal pain or tenderness.

### TOOTHACHE

Toothache is usually caused by food entering the cavity of a decayed tooth, although it may often be due to an infection around the root of the tooth or some other condition.

Most toothache can be prevented by brushing the teeth twice daily and visiting a dentist twice a year so that he may repair any small cavities or treat any diseased condition of the gums.

**Treatment.**—If the ache occurs during the day, see a dentist at once. At night or away from a dentist first aid may have to be given.

If there is a cavity in the tooth, clean it out with a very small bit of cotton around the end of a toothpick.

Aches in teeth that have no cavities are often relieved by the application of heat or cold on the outside of the jaw. This is particularly valuable where the pain is due to infection. Sometimes heat gives relief; in other cases cold is more effective. Previous to trying, one can not say which treatment will be the more helpful.

### HICCOUGH

(Also spelled Hiccup). A spasmodic contraction of the diaphragm draws air in through the upper part of the windpipe, which is also in spasm, and produces the peculiar noise known as "hiccough". Often

### *Thankful Mother writes:*

"About a year ago my children caught a terrible thing. I hadn't any idea what it was until a nurse told me it was impetigo. I tried ever so many remedies advertised for that thing but without success. I was almost frantic, as their finger and toenails were badly affected, and it was spreading over their bodies, and was even in their hair. At last I saw Nixoderm advertised, so I tried it.

"I can truly say that I was never more thankful in my life, because in less than a week the sores were healing and in ten days their skin was clear and smooth.

"I tell all my friends about it and you may use this letter in any way you wish because I want every mother to know what it has done for my children."—(Signed) MRS. JOHN A. O'BRIEN.

### *Relieved Woman writes:*

"I was a great sufferer with terrible cracked feet. I tried so many different remedies but to no relief. I went to a foot man and he said he never saw such terrible feet.

"One day a friend espied an advertisement for Nixoderm and got me a package—before it was half gone I began to see and feel a difference in my feet. Today, they are as free from cracks as a baby's feet. Thanks to Nixoderm. I would not want to be without it in the house—it is good for so many uses too."—(Signed) MRS. L. WINEGARDEN.

### *School Boy writes:*

"While I was a school boy yet twelve years old, I had prairie itch so bad that my body was all scabby. Four spots were left on different parts of my body. Two of them were the size of silver dollars and the other two still larger. And those spots were thick and hard. Oh boy, how itchy. Lots of times I was scratching those spots so much and so hard that my clothes were just as if they had been smeared with blood. I tried years without any results. But at last I saw an ad in the paper about Nixoderm so I went to a drug store and bought a package of Nixoderm. After applying Nixoderm three times I felt big relief; by the time I used out the full package my skin got to be natural again. It's over a year ago and itch never returned and my life is worth living now."—(Signed) M. LETOWSKY.

### *Married Couple writes:*

"Skin blemishes embarrassed me and my husband also. We must say we are delighted to tell you that only Nixoderm could do it. Previous to our knowledge of Nixoderm our faces were all blemished. It wasn't only irritating—we tried to stay home as much as possible, we felt so embarrassed among our friends.

"Nothing helped till one day a lady came to visit and told us about Nixoderm—our splendid medicine. That very day my husband went to the drug store and got some. We both put Nixoderm on that very night, and in a short time the irritation ceased. And, I must say in a couple of weeks our faces were as clear as ever—a 'new skin' we both said. Shaving, I must say was no more painful for him. We both must say thanks ever so much to the work of Nixoderm."—(Signed) MR. and MRS. LEO WALERIUS.

# WAYS TO READ FORTUNES

**P** EOPLE seeking to unravel the mysteries of the occult sciences, have resorted to many ways of foretelling the future. Listed below are a few of the most popular forms of fortune telling, which will probably prove to be both interesting and helpful:

## HANDWRITING

In analyzing handwriting, apply a few simple rules. For example, let us take a word from a letter written by a friend. First, draw a straight line under the word, parallel to the top of the page on which it is written. If the word follows the line closely, the friend is level-headed and even-tempered. If, however the words run up and away from the line, your friend has great strength of character and is able to succeed in many things better than the average person. But, if the word runs down and across the line, or even dips into the line, your friend is one who often misses good chances for success.

Now, let us analyze this more closely to uncover more hidden characteristics:

1. Downstroke thicker than upstrokes: Worry over little things.
2. Capital separated from word: Easygoing and generous. Capital joined to word: practical. If all letters are separated from each other: takes life easy and has some artistic interests, possibly some talent.
3. Loops of letter are pointed: Practical and broad-minded.
4. Letters rounded: Pleasant and affectionate.
5. Each letter properly formed: Tidy and methodical.
6. Loops joining letters come down to line: Sound judgment. If the loops are at the top of the letter, poor judgment.
7. Letters slope backhand: Much artistic feeling.
8. Many flourishes: Kindly, one who makes you feel at home.
9. Bottom of word blacker than top: Scientifically inclined, talent for inventing things.
10. Line under signature: May be conceited.

## DICE

To make predictions from dice use three dice, shake them. As the dice are tossed out they will fall with certain meaningful faces up. After each throw, add the numbers on each face together. The total will have meaning for you.

- THREE—A pleasant surprise.
- FOUR—Something is about to happen for which you have been hoping.
- FIVE—You will soon meet a stranger who will prove a good friend.
- SIX—You might experience a loss of property.
- SEVEN—Scandal.
- EIGHT—Reproach for something you have not done.
- NINE—A wedding.
- TEN—A christening. Something important may happen to you.
- ELEVEN—You may receive an inheritance.
- TWELVE—You will receive a letter.
- THIRTEEN—Signs are in store for you.
- FOURTEEN—A new admirer who may fall in love with you.
- FIFTEEN—Be careful, you might be drawn into a plot or some trouble.
- SIXTEEN—A pleasant journey.
- SEVENTEEN—Deals with those who are on the water will be to your advantage.
- EIGHTEEN—Something exciting happening to you.

## TABLE TIPPING

Table tipping or table turning was for many years an evening diversion at many parties or gatherings of people of all ages.

To accomplish this unusual phenomenon, a group of people would gather about a small, light table and rest the tips of the fingers of both hands on the table. Usually the fingers would be spread out with the

thumbs touching and the little fingers of each hand touching the little fingers of those on both sides of each person participating. This "completes the circuit."

Then everyone would remain quiet exerting no force to move the table. If the experiment was successful, the table would begin to move more or less violently about the room so that the group would have to follow it.

This phenomenon has been investigated by a great many people since it was used for a long time by mediums and others claiming that the movement was caused by the spirits of the dead and that certain movements were messages from the dead. Under strong concentration people will tend, purely unconsciously, to push the table. Since they are all concentrating on the same thing and each trying not to push the table, it is usual that they will all push in the same direction or someone who is more "heavy handed" than the others will unconsciously push the table even though the others do not co-operate.

To get the most fun out of this, usually the group agrees that movement in one direction will mean "Yes" and in another will mean "No." Then they agree upon a question to be answered, arrange themselves, and begin to concentrate. All questions asked should be answerable with a simple "Yes" or "No."

## CRYSTAL-GAZING

Crystal-gazing is both ancient and widely practiced. Through its use many strange things have happened. Lost articles have been found, hidden facts in the lives of people uncovered, and hidden aspects of one's relationships with others brought to light.

The first requirement for successful crystal-gazing is for the person to be sensitive and receptive. Many people are not at all receptive and no amount of effort will make them competent in this art. Others differ in degrees of receptivity. A small few have the gift necessary for success in this art.

Necessary to success, is the ability to concentrate so that everything is completely shut out of your mind. Without perfect concentration one will be unable to discover anything in a crystal.

The gazer should seat himself so that light comes from his back. Never sit looking into the light. Hold the crystal in the hand or rest it on a table in a suitable cup or stand about two inches high. It is best to

cover the table with black cloth and to have a black curtain a foot or two behind the crystal.

As he gazes in the crystal and his concentration becomes complete, after a period he will see the clear crystal becoming cloudy. This is the sign that the spell is operating. Then this cloud will begin to change colour. It usually becomes red, and then green, and finally will become completely black as his concentration is complete.

The final stage is when the black cloud rolls away as if a curtain were lifted. Then he will see in the crystal what he is looking for. He may see people, houses, places where he has never been, words or sentences, symbols or other objects which have a meaning for him.

Practice in crystal-gazing will give you a talent which can bring a great deal of entertainment to any group in which you happen to be.

# Bladder Weakness and Kidney Trouble may Ruin Health for Thousands

There are few ailments that can make you feel older more worn-out and unable to keep going than bladder weakness and kidney trouble. And the reason for this is that when your kidneys and bladder slow down in their work poisons gradually accumulate in your system and frequently cause backache, getting up nights, leg pains, nervousness, rheumatic pains, frequent colds and loss of energy.

## Help Kidneys Remove Acids

Women, and men too, will be surprised and delighted to see how quickly and easily they can relieve backache, getting up nights, burning passages and other kidney and bladder troubles by simply aiding the kidneys and bladder to filter and clean out excess acids and poisonous wastes.

As we grow older our kidneys at times may slow down in their work of filtering and purifying the blood. And when this happens poisons have a tendency to accumulate in the system, making you feel older, worn-out and suffer from many aches, pains and troubles. But by simply helping the kidneys and bladder to perform their work more normally thousands of men and women in Canada and throughout the British Empire have discovered joyous relief and new energy.

Nearly twenty years ago a scientific formula called **Cystex** was made available to the public through drug stores, making it easy and inexpensive to help thousands suffering from kidney and bladder troubles in these three simple ways: 1. Help the kidneys remove excess acids, which may become poisonous and irritating. 2. To palliate burning and smarting of the urinary passages, and bladder irritation. 3. Help the kidneys clean out wastes which may become poisonous.

# CARD TRICKS

**M**ANY of the mystifying card tricks you have seen performed by magicians are really not too difficult to do. Following are several card tricks from which you and your friends can find fun and entertainment.

## REVEALING CARDS

Certain cards in any standard pack are sometimes referred to as "Revealing Cards." Each "Revealer" has a certain characteristic:

**SEVEN OF SPADES**—Five of the seven spots point in one direction.

**NINE OF HEARTS**—Five of the nine spots point in one direction.

**SEVEN OF DIAMONDS**—One point is above the center.

**ACES OF SPADES, HEARTS, CLUBS** are "pointers".

In order to perform a trick with these "revealer cards," remove them from the pack and arrange them with the "revealers" facing the same direction. Put them in the pack and riffle the cards so that when they are offered for selection, one of the "revealer" cards will be picked. Reverse the pack and insert the card anywhere. Have someone in the audience shuffle the cards. After this has been done a glance through them will show the chosen card pointing the other direction from the remaining "revealers."

## MYSTIFYING COLOUR CARD

This is a trick that will entrance the audience. Before the performance, select from the pack one red card. The next step will be to match this card from either of the two black suits. Place both cards on the top of the pack.

Now turn the top card face up and show, for example, that it is the Jack of Spades. Place the top card face up on top of the pack and drop the cards on the floor. Just before dropping the cards, slide the two top cards over the side of the pack about three-quarters of an inch. Drop the cards squarely on the floor and without too much force or the cards will scatter. The air pressure when the cards are falling will turn the Jack of Spades face down, while the Jack of Hearts, turning face up will give an effect of having changed from one colour to another in some mystical way.

## POCKET MAGIC

Have someone shuffle a pack of cards. While the cards are being shuffled, call attention to the fact that the inside pocket of your coat is empty. Put the pack of cards in that pocket and tell your audience that you can reach in your pocket and pull out the Aces one by one, with the use of your "magical touch." After you have brought out all the Aces you may have the pack examined to show they are just ordinary cards.

**Procedure:** Before the pack is shuffled, remove the Aces from the pack and put them in the vest pocket nearest the inside coat pocket. While the pack is being shuffled, no one will notice you have removed the Aces, as you are then showing that your coat pocket is empty. Each time your hand appears to be entering the pocket of your coat, reach into your vest pocket and pull out an Ace. Hold the coat over your hand so no one can tell which pocket you are entering.

## THE JOKER'S JOKE

The performer fans the pack so that the backs of the cards may be seen to be all of one colour. Next he turns the pack face up and fans the pack again looking for the Joker.

Not finding the Joker, he holds the pack face up and deals the cards one by one until he comes upon

the Joker. Turning the Joker over he shows it to be of contrasting colour!

**Method:** Using the Joker from a pack of cards having a contrasting colour, trim the ends, taking care to round the corners. When the Joker is inserted in the regular pack and the cards are fanned, it will not be seen, for having been cut short it falls with one of the other cards. This applies whether the pack is face up or down.

## THE PEEK-HOLE CARD CASE

The trickster takes a pack of cards from the case. He holds the case behind his back and invites anyone to insert a card, face down, in the case, closing the flap of the case so that the card will be entirely concealed.

The trickster then holds the cardcase to his forehead and instantly names the card that is in the case, although no one has seen it!

**Method:** A small hole is cut in the lower right corner of the back of the card case. The case is held back downwards, behind the back with the thumb always covering the tiny opening.

In raising the case to his forehead, the trickster moves his thumb aside and thus catches a glimpse of the index corner of the card inside the case.

## COLOR-CHANGING PACK

Exhibit a pack of cards with the joker on the face (the bottom). Riffle the end of the pack, and show that it contains red cards only. Blow on the pack and riffle it again. This time the cards are all black! Blow on the pack once more, and this time the cards become both red and black. The pack may be thoroughly examined.

**Method:** Separate the reds from the black, and dovetail the two portions very carefully, so that every odd card is red, and every even card black. Push the two sections together, but stop before the ends are quite flush. Then put the joker on the bottom of the pack. The result is this: When one end of the pack is riffled, only red cards will be seen. In blowing on the cards, and transferring them from one hand to the other, they are turned around, and when the other end is riffled, only blacks will appear. In blowing on the cards again, the fingers push the two sections flush together; so when the cards are riffled the third, both colors will be in evidence.

The pack must be held quite firmly during the trick.

## THE THREE JACKS

The majority of tricks do not bear repetition, but here is one that becomes more and more perplexing as it is repeated. It should not be overdone, however.

Take the pack and deal two heaps of three cards each, dealing the cards one at a time. Turn up the first hand dealt and show that it contains three jacks. Gather up the cards and repeat the deal; again the first hand receives the three jacks. The deal is repeated several times, yet every time the three jacks fall in the first hand.

This is apparently a feat of skillful dealing, but really, no dexterity is required. Four jacks actually figure in the trick. On the top of the pack are three jacks, then an indifferent card and then the fourth jack. The cards are dealt one at a time, in two heaps of three each; but when the sixth card is dealt, it must be slid under the second heap, being used as a lever to pick up that heap and put it back on the pack. Then the first heap is shown to contain three jacks, which are replaced on the pack. The cards are then set to repeat the trick.

For the first month they had a comparatively easy time. One rowed; the other slept. In fact, they took turns at doing all the necessary things.

You are taller in the morning than at night?

This oddity is due to the relaxation of the fibro-cartilage pads between the vertebrae of the spinal column. These pads are really the shock-absorbers of the body and are exposed to not only the weight of the body, but also to all different kinds of strains from walking, running, bending; in fact, all sorts of physical movements. Therefore, it can be understood that after a long day of use, the pads are somewhat contracted and dense. When sleep comes and the body is physically impassive, they expand to their former size.

Worry, Colds, working too hard, or over-eating or drinking may create an excess of Acids and overload your Kidneys so that they need help to clean out poisonous wastes that might otherwise undermine your health.

## Help Kidneys Remove Acids

Nature provides the Kidneys to clean and purify your blood and to remove excess Acids. The Kidneys contain about nine million tiny tubes or filters through which the heart pumps blood about 200 times an hour, night and day, so it's easy to see that they may get tired and slow down when overloaded.

Nearly twenty years ago a scientific formula called Cystex was made available to the public through drug stores, making it easy and inexpensive to help thousands suffering from Kidney and Bladder troubles in these three simple ways: 1. Help the Kidneys remove excess acids which may become poisoning and irritating. 2. To palliate burning and smarting of the

urinary passages, and bladder irritation. 3. Help the Kidneys clean out wastes which may become poisonous if allowed to accumulate.

## Money Back Agreement

Usually, in Kidney and Bladder disorders the very first dose of Cystex goes right to work helping the Kidneys clean out excess Acids, poisons and wastes. And this cleaning Kidney action, in just a day or so, may easily make you feel stronger and better than in years. The iron clad money-back agreement on Cystex insures an immediate refund of all your money unless you are satisfied. Get Cystex from your druggist today.

**KNOCKING ON WOOD**

One of the most prevalent customs, indulged in by men of science as well as the illiterate man is by touching or knocking on wood to ward off evil or prevent disappointment. Its origin is very much in doubt. Some attribute it to the ancient religious rite of touching a crucifix when taking an oath. It is also ascribed to the beads of a rosary touched in prayer. Among the peasants of Europe it may have had its beginning in the habit of knocking loudly to keep out evil spirits. It has become well-nigh universal.

**CHARMS AND AMULETS**

Some charms are engraved with peculiar figures called "talisman," which are supposed to have the power to prevent loss or illness. They are often engraved on some seal or precious stone, and worn on the finger or on a chain about the neck.

The practice of wearing charms or amulets is very ancient, and many of the objects found in Egyptian tombs are amulets, intended to serve the spirits of the dead. Many charms have obtained historic importance, as for instance the famous Spanish opal in the British museum.

Oriental wrestlers will not go into the prize ring without wearing a charm about their necks. Many folks wear some sort of amulet or carry a charm in their pockets, but they do it secretly. They may not actually believe in its efficacy but want to get the benefit of it in case it should have some hidden virtue.

Horseshoe-shaped pins, or charms, are considered

**Did You Know That . . .**

The author of the famous ballad, "Home Sweet Home", never had a home? The author, John Howard Payne, wrote his masterpiece when he was stranded without funds in France. For his entire life he was a rover all over the face of the earth.

Years after writing his tune about the delights of home, he died in Tunis. His body has since been disinterred and brought back to America.

And so, the man who caused many people to cherish the meaning of his song, found the only home he ever had in his final resting place in Oak Hill Cemetery, Washington.

very lucky, so is four-leaved clover. Lucky pennies or other coins are to be found in many pockets. In business operations they must be turned over in one's pocket at the time of the transaction.

Amulets to insure victory are frequent, and many a soldier goes into battle in the firm belief that the amulet he wears about his neck or on his arm will see him safely through. Bibles carried about the person are supposed to be the most efficacious of these, and in point of fact many a bullet has been stopped by a Bible placed near the heart.

**MASCOTS**

Ships often take a mascot on board before they sail. This is usually a dog, monkey or goat, and insures a pleasant voyage. *(Continued on page 31)*

Regiments of soldiers usually adopt a mascot, an animal that accompanies them on their marches.

Baseball and football teams take a mascot with them to insure victory.

Mascots frequently take the shape of a horseshoe, charm four-leaf clover or amulet to be worn on the person.

The popularity of mascots and in fact all objects that are supposed to bring luck is best explained by the fact that they suggest luck, and the owner acts on the suggestion. A person believing that some object is going to bring him fortune, will act with great faith and assurance, thus bringing about the condition which he desires.

### SNEEZING

The custom of muttering a prayer or a pious wish after sneezing is as old as history. It was accounted very ancient in the time of Aristotle, who in his "Problems" endeavoured to account for it, but knew nothing of its origin. According to him the ancients believed that the head was the seat of the soul and that sneezing in some way affected the spirit. Hence the necessity of uttering an invocation to preserve the soul from harm.

The Greeks and Romans had a number of formulas for sneezing, such as, "Long may you live!" "May you enjoy good health!" "Jupiter preserve you!"

Sneezing was often considered a lucky omen among the ancients. Their history is full of events of importance which were ushered in by a sneeze. The "Odyssey" tells of the "lucky sneeze of Telemachus." History tells of the soldiers' sneezing in adoration of a god that rose before them in the ranks, an event which Xenophon regarded as a favourable omen.

All nations have some formula for sneezing. The English say, "God bless you!" The French say, "A vos souhaits."

If some one sneezes after you have made a statement, it places a seal of truth upon it and the statement may not be doubted.

### ON ARISING

To get out of bed with the left foot is considered a forecast of bad luck. When a person is cross or irritable, we often say, "He got out of bed with the wrong foot."

To put your foot on a soft carpet or rug, on arising, foretells a successful day.

To stumble on getting up, is bad. You should go back to bed and try it again.

To say "Good luck" on arising, will insure success during the day.

It is considered unlucky to sing before breakfast. You may cry before supper.

It is unlucky to relate a bad dream before breakfast. It may come true.

To find a coin early in the morning is a sign for you to beware lest you lose money before the day is spent.

### LOOKING GLASS

Mirrors have always been regarded as divine instruments and used as objects of divination, hence a certain amount of superstition attaches to them. It is wonderful, indeed that by nature's law of reflection, one can see the image of that which is outside of the glass, and it has been considered unlucky to destroy in anyway that power to reflect.

To break a looking-glass is considered unlucky, and the person breaking one may have bad fortune for seven years.

### PREDICTIONS OF WEALTH

To have lots of hair on your arms and fingers is a sign of coming wealth.

## Do You Know Where Flies Go in Winter?

The U. S. Department of Agriculture states that no fly has been known to live the year around. Health authorities, after three years' investigation, did not find a single house fly that lived through winter.

Experimentation has shown that a low temperature is invariably fatal to the older flies.

The life expectancy of a house fly is naturally of brief duration, even during the warm period of the year. House flies generally survive for only a few weeks. However, several specimens have been known to live for as long as ninety days under favorable conditions.

or tea, the number of bubbles that arise are an indication of your future wealth.

Many moles over your body indicate that you will be wealthy.

To be born with a caul indicates that you will have luck and amass wealth.

A birthmark in the middle of the back indicates a wealthy marriage.

### INSECTS

It is unlucky to kill a spider. If you wish to thrive, let the spider stay alive.

A spider's web, encountered on the road should not be disturbed.

A little red ant, if it crawls into the pocket, brings money.

Crickets are considered harbingers of luck; but in some countries the contrary holds good.

To kill a red ant, brings rain.

Bees swarming on a house means that some one may die there.

If you see a black snail, throw it over your head for luck.

those digits are veritable "sign posts" of one's character. The editors do not necessarily agree, but offer the following for your consideration.

### SHAPE OF FINGERS

There are four types of fingers, classified chiefly according to the shape of their tips. These types are: rectangular, wedge-shaped, pointed, and tapering.

1—*The Rectangular Finger.* The tip and the nail are practically square. The finger itself is substantial and almost appears to have four sides rather than to be rounded.

This indicates an individual whose sincerity and honesty will never be questioned. A conventional, law-abiding citizen, who will always command the respect of his acquaintances, he will, nevertheless, have to be on his guard against a lack of imagination which may lead him to overlook the truth in new ideas because he is too satisfied with his own knowledge. He would do well to remember the warning against being "the last to lay the old aside," for he will tend to forget that the world is constantly changing. Thirty years ago he probably never would have thought that the automobile would replace the horse, and today he will have to beware lest he fail to see the advantages in new inventions and new and untried ways of doing things.

2—*The Wedge-Shaped Finger.* The tip is wider at the end than it is at the first joint.

A sign that the individual is to have a life filled with activity and accomplishment. Marked creative ability will make itself evident here, though not along artistic lines. The owner may become a research chemist, a designer of bridges and buildings, or an engineer—he will be connected with something that has to do with the practical aspects of science. He will not hesitate to pursue aggressively whatever

goal is before him, and since he has a pioneering strain, no obstacles will be too overwhelming for him. A problem he will have to contend with is a tendency to grow impatient, not only with others who may be less capable than he, but also with himself when he feels he is not progressing as rapidly as he should. This trait may make him restless and disagreeable at times, for all his life he will be driven by the relentless ambition of the go-getter, and unless he understands his own nature he may be lacking in consideration for the feelings of others.

3—*The Pointed Finger.* The tip alone—above the first joint—is pointed or rounded. The rest of the finger, below the first joint, is uniform in size throughout its length.

When a hand bears fingers of this type, together with a slender thumb and a palm that is not overly large, we have the sign of the artist, with all the characteristics of the sensitive temperament. This person will have to face throughout his life the problems of the tempest-and-sunshine disposition, which knows its moments of exultation and also its depths of despair. Whether the sensitive nature will express itself in artistic creation will depend on other signs in the hand, but there will always be here the warm, sympathetic feeling which will make for deep friendships and devoted love. However, there is also indicated the danger of too much self-interest which might even sacrifice the welfare of friends and loved ones on occasion. If accompanied by a fleshy palm, this indicates an extreme delight in the pleasures of the five senses which will have to be carefully controlled if the individual wishes to make the best use of his talents.

4—*The Tapering Finger.* This is slender and completely smooth—with no knot at the joints—and tapers from the base clear to the tip.

Here we have a sign of a dreamy, mystical temperament which can never be counted on to take much constructive action of any sort. There is almost a complete lack of the positive traits which are found with the other three types, and judged on the basis of the finger alone, the personality is a negative one. Other signs in the hand may modify this judgment, which is to be hoped for. Yet whatever favourable traits are found, it must be remembered that this passive, colourless factor will have its influence and must be guarded against.

### FINGERS AS A GROUP

*The Spaces.* The presence of a space between the first and second fingers indicates a person who is not going to have anybody make up his mind for him except himself, although this does not mean that he is necessarily stubborn or wilful. He will be well fitted for an executive position which requires prompt decision.

Between the second and third fingers a space signifies that the owner of the hand may encounter some bitter obstacles but he will never allow himself to be defeated and in the end he will be amply rewarded for his courage.

If there is a space between the third and last finger, the individual may expect an attractive business offer, possibly a partnership in some going concern where his special capacity for direct action is particularly desired.

\* Your Future in the Stars \*  
PISCES: February 19th—March 20th

Persons born while the Sun is in Pisces are generally kind and loving, trustful, confiding, honest and amiable, with an abundance of sympathy. They are idealistic and generally gifted in some art. Although you have self-esteem, you are modest and timid and through lack of confidence often hesitate about putting yourself forward, thus miss opportunities. Yours is a character which is singularly precise and orderly. You dislike confusion and very much object to leave things in an unfinished state. Having set about to accomplish anything, you insist on its entire completion. Pisceans possess a peculiar understanding not acquired from books, are rarely at a loss to explain things.

## OMENS—Continued

If the fingers are very long, almost the reverse is true. Here the individual spends entirely too much time fretting about matters of no consequence, and if he doesn't look out, he may bring on misfortune entirely through his own worrying. The best advice to him is: Take it easy; things aren't half as bad as you think they are.

When the fingers bend backward readily, watch out for a nosy, prying disposition, or extravagance with money.

### THE NAILS

White or black specks or markings frequently appear on the nails. If they lie generally on the side of the nail which is toward the thumb, they are favourable and indicate that a wish is coming true or that a gift may be expected.

However, if one of these spots occurs on that half of the nail which is farther away from the thumb, it may mean one of several things as follows:

**Black Spots.** On the little finger—you are going to fail in some undertaking.

**On the Ring Finger.**—You are in danger of doing something dishonorable.

**On the Middle Finger.**—Something you value is going to be wrecked or destroyed.

**On the Index Finger.**—You are going to mislay something; possibly you will never find it again.

**White Spots.** On the Little Finger.—You are going to have a success in some business transaction that you had not anticipated.

**On the Ring Finger.**—You are going to receive some money.

**On the Middle Finger.**—You will make a journey soon, possibly by air.

**On the Index Finger.**—Your ship will come in within the next year.

### THE THUMB

**Small.** If the thumb is small in relation to the rest of the hand, we may expect a person who may arrive at his goal largely through the efforts of others. In moments of crisis he will not be very reliable, since his emotions and not his intellect will dominate him.

**Large.** If the thumb is large, there is an indication of unsuspected coolness in the face of danger, hence we may have here someone who will perform some heroic deed some day that will win the attention of the entire nation.

**Rigid.** If the thumb bends back only with difficulty, the owner will have to be on guard against a stubborn streak. It will help him at times to win his point in the face of considerable opposition, but it will also lose him friends and alienate many persons who might otherwise become very dear to him and very helpful.

**Movable.** If the thumb is bent back without much trouble, the individual need not worry very much about what the future will bring; for whatever happens to him, he will be able to take it in his stride. He will accommodate himself to strangers with ease, and will be able to make the best of things wherever he goes. One point, though, he must not overlook: He inclines to exaggerate things too much, both in thought and in action; and if he is not careful he may be led to undertake some rather foolish and silly projects.

## Did You Know That . . .

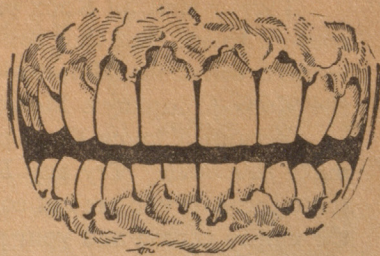

A billion dollars in England is actually a thousand times as much as a billion dollars in America? How can that be? If you will consult any dictionary you will find that in the country of England the sum of one billion dollars is defined as being a million million; whereas, in the United States of America, a billion dollars is defined as being a thousand million. Hence, a billionaire in England is one thousand times as rich as a billionaire in America.

A few weeks ago a friend sent me a package of the prescription **Romind**. I had tried so many things that I didn't think it could help

but in desperation I decided to give it a trial. To my delight, my pains quickly began subsiding and by the end of the first day I felt at ease. The second day I saw a big improvement in my backache. At the end of the first week I was again able to do all my housework. I will recommend **Romind** to all my friends."

# Kidneys Must Clean Out Excess Acid

*Or You May Suffer from*  
**Backache, Nervousness, Getting Up  
Nights, Feel Old Before Your Time**  
Because of  
**Kidney and Bladder Troubles**

Does your back ache so bad at times that you find it difficult to keep going?

Is your sleep disturbed and rest broken by having to get up three or more times every night? Do you suffer from burning, scanty or frequent passages?

Are you so nervous at times that you feel like you are going to fly into pieces? Do you feel tired, run-down, worn out and older than you are?

Do you suffer from pains in legs, and rheumatic twinges? Do you frequently suffer from headaches?

The above, and many other distressing symptoms may often be caused by kidney and bladder troubles. This is easy to understand when you realize the vitally important task performed by the kidneys in helping the body maintain health, energy and vitality.

## Kidneys Must Clean Out Acids

The kidneys are provided by nature to clean and purify your blood, and to remove excess acids, poisons and wastes which tend to accumulate and cause many troubles if the kidneys slow down in their work, which frequently may happen. This is easy to understand because excessive eating or drinking, frequent colds, working too hard, late hours and worry have a tendency to create an excess of acids, and perhaps over-work the kidneys. The kidneys work every hour of the day or night, and never get a real rest, so it is only natural that they may get tired and slow down as you grow older.

You can appreciate the tremendous amount of work that the kidneys do when you know that your heart pumps blood through your kidneys about three times a minute, or two hundred times an hour—this action must keep up every hour of the day and night as long as you live. Each delicate kidney is just about the size of your clenched fist, and in these small compact

organs nature packs about nine million tiny tubes or filters to carry on the vital and all important work of cleaning out and removing excess acids, poisons and wastes which become poisonous and undermine health and vitality unless properly and systematically removed in accordance with the laws of nature.

## Help Kidneys This Way

Fourteen years ago a scientific formula called **Cystex** was made available to the public through drug stores, thus making it easy and inexpensive to help kidney and bladder troubles in these three ways:

1. Its diuretic action helps the kidneys remove excess acids which may become poisoning and highly irritating unless properly eliminated.
2. Its palliative action aids in alleviating backache, burning and smarting of the urinary passages, and bladder irritation.
3. By helping the kidneys clean out wastes which may become poisonous if allowed to accumulate.

## Money-Back Trial Offer

Usually in kidney and bladder disorders, the very first dose of **Cystex** goes right to work helping the kidneys clean out excess acids, poisons and wastes. And in just a day or so this cleaning kidney action may easily make you feel stronger, better than in years.
