THE LIBRARY  
OF  
SIR WILLIAM OSLER, BART.  
OXFORD

3571

A HISTORY OF  
MODERN MEDICINE

SCHEME  
OF  
A SYSTEM OF  
MODERN MEDICINE.

TO BE EDITED BY  
WILLIAM OSLER, M.D.

TO BE PUBLISHED BY  
LEA BROTHERS & COMPANY,  
PHILADELPHIA.

### NOTE.

*This work is planned to appear in seven octavo volumes, averaging 800 pages each, with about 540 words to the page. It is essential that articles should deal with their topics as concisely as possible without sacrifice of completeness.*

*Especial attention should be given to the adoption and maintenance of a clear and simple subdivision of material in the manuscript, for which the following order is suggested: Etiology, Special Pathology, Symptoms, Diagnosis, Prognosis, Treatment and Sequelæ.*

*Illustrations are desired where necessary for the elucidation of the text and are to be included in the number of pages allotted. They should be allowed for as occupying one-third of a page each upon the average. Text references should be made by footnotes.*

BALTIMORE, May 18 - 08

Dear Dr. Osler. Here is something to straighten out.  
I enclose the Dea's letter.

When you wrote me that you had arranged with  
Gordon Holmes to do that section, I wrote asking for  
his address. It was sent <sup>from you</sup> as Oakley House, Oakley  
Green, London. I sent this address on to the Dea,  
and also sent copies of the agreement on to him  
at this <sup>Oakley House</sup> address. I have never received any word  
whatsoever from him. Let us have come recently  
from Gordon Holmes from the National Hospital.

You said to me once "It is curious that Holmes  
says he has never received any word from either of  
us and knew nothing about the article". As you  
had told me you had arranged with him to do the  
article, it seemed funny at the time and we  
commented on it.

I presume it will be well to straighten the  
thing out at once.

You said to me that you would give Dea the  
compensation for the article on the Polycythaemia  
which he wrote - as did Cabot also - and you  
thought the latter's should be accepted - His  
section would have amounted to between five  
and six pages. He <sup>Dea</sup> said that you withdrew

BALTIMORE, May 12, 1898

Dear Sir,  
I have the honor to acknowledge the receipt of your letter of the 10th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.  
I am, Sir, very respectfully,  
Your obedient servant,  
J. H. [Name]

I am, Sir, very respectfully,

3-5 P. M.

BALTIMORE,

him to do that subject. If you did, I did not get  
any note of it.

All that remains to do on vol IV, is to revise the  
part of the index.

We are busy with exams which finish up  
this week - There are prospects for a second  
p.g. class in June.

I go up to the Ontario Medical meeting  
next week and am reading on the Aetiology  
of the lerts. We have quite a good series of  
cases. They began suddenly some years ago - the  
diagnosis was hardly ever made in the earlier  
days I find.

I hope you are all very well. Doris Reid tells  
me that she has not heard for a long time from the  
faithless Reverend. I hope he has got well over  
the measles.

You have probably heard from some of the  
plans. Best to you all  
Yours  
Thomas McCrae.

We all enjoyed your letter in the 10<sup>th</sup> M. A. very  
much, regarding Vienna.

BALTIMORE,

I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the proposed purchase of the land for the proposed extension of the Baltimore and Annapolis Railroad. I have the honor to inform you that the Board of Commissioners has decided to purchase the land for the proposed extension of the Baltimore and Annapolis Railroad.

I have the honor to inform you that the Board of Commissioners has decided to purchase the land for the proposed extension of the Baltimore and Annapolis Railroad. I have the honor to inform you that the Board of Commissioners has decided to purchase the land for the proposed extension of the Baltimore and Annapolis Railroad.

I have the honor to inform you that the Board of Commissioners has decided to purchase the land for the proposed extension of the Baltimore and Annapolis Railroad. I have the honor to inform you that the Board of Commissioners has decided to purchase the land for the proposed extension of the Baltimore and Annapolis Railroad.

I have the honor to inform you that the Board of Commissioners has decided to purchase the land for the proposed extension of the Baltimore and Annapolis Railroad. I have the honor to inform you that the Board of Commissioners has decided to purchase the land for the proposed extension of the Baltimore and Annapolis Railroad.

Copy.

Dear Dr. McCrae:

You and Professor Osler accused me of having forgotten some earlier correspondence I had with you, on the articles I am to write for the System of Medicine. I believe I have now solved the matter. I wrote some time ago to the publishers asking them to send me the authorship copies of the volumes which have already appeared, and have just had a reply to say they had already sent them to Dr. W. Gordon Holmes, Oakley House, Oakley Crescent, London. This is not me but I now presume that it was with him that you were in communication. My work has been delayed by a slight illness, but it is now practically finished; I have found it difficult to get "Diseases of the Peripheral Nervous System" into 50 pages - very little more than is devoted to Lead Poisoning in Vol. I, and write with the fullness of the articles which have already appeared.

I am yours sincerely,

Gordon Holmes.

BALTIMORE

Green Square,  
Bloomington, W. C.  
London.

Copy.

Dear Dr. Moore:

You and Professor Gairdner advised me of having forgotten some earlier correspondence I had with you, on the article I am to write for the System of Medicine. I believe I have now solved the matter. I wrote some time ago to the publishers asking them to send me the authorship copies of the volumes which have already appeared, and have just had a reply to say they had already sent them to Dr. W. Gordon Holmes, Oakley House, Oakley Crescent, London. This is not me but I now presume that it was with him that you were in communication. My work has been delayed by a slight illness, but it is now practically finished; I have found it difficult to get "Diseases of the Peripheral Nervous System" into 50 pages - very little more than is devoted to lead poisoning in Vol. 1, and write with the balance of the articles which have already appeared.

I am yours sincerely,  
Gordon Holmes.

National Hospital  
Queen Square  
London W.C.  
1.7.07.

Dear Dr Osler,

I was surprised to-day, on  
turning from a holiday abroad,  
see my name among the list of  
contributors to your "System of Medicine," and  
find myself made responsible for  
articles on "Diseases of the Peripheral  
nerves &c."

To be included in your list is  
an honour which I fully appreciate,

but my surprise was due to the fact that it was from the advertisement of the "System" that I received the first intimation that you wished confer this honor upon me. The matter had not been previously mentioned to me either by word or by letter by Dr. McCrae or yourself.

Evidently there has been an oversight, either in placing my name on the ~~list~~ prospectus at all, or in having done so without having previously communicated with me but I can understand that mistakes might easily occur in

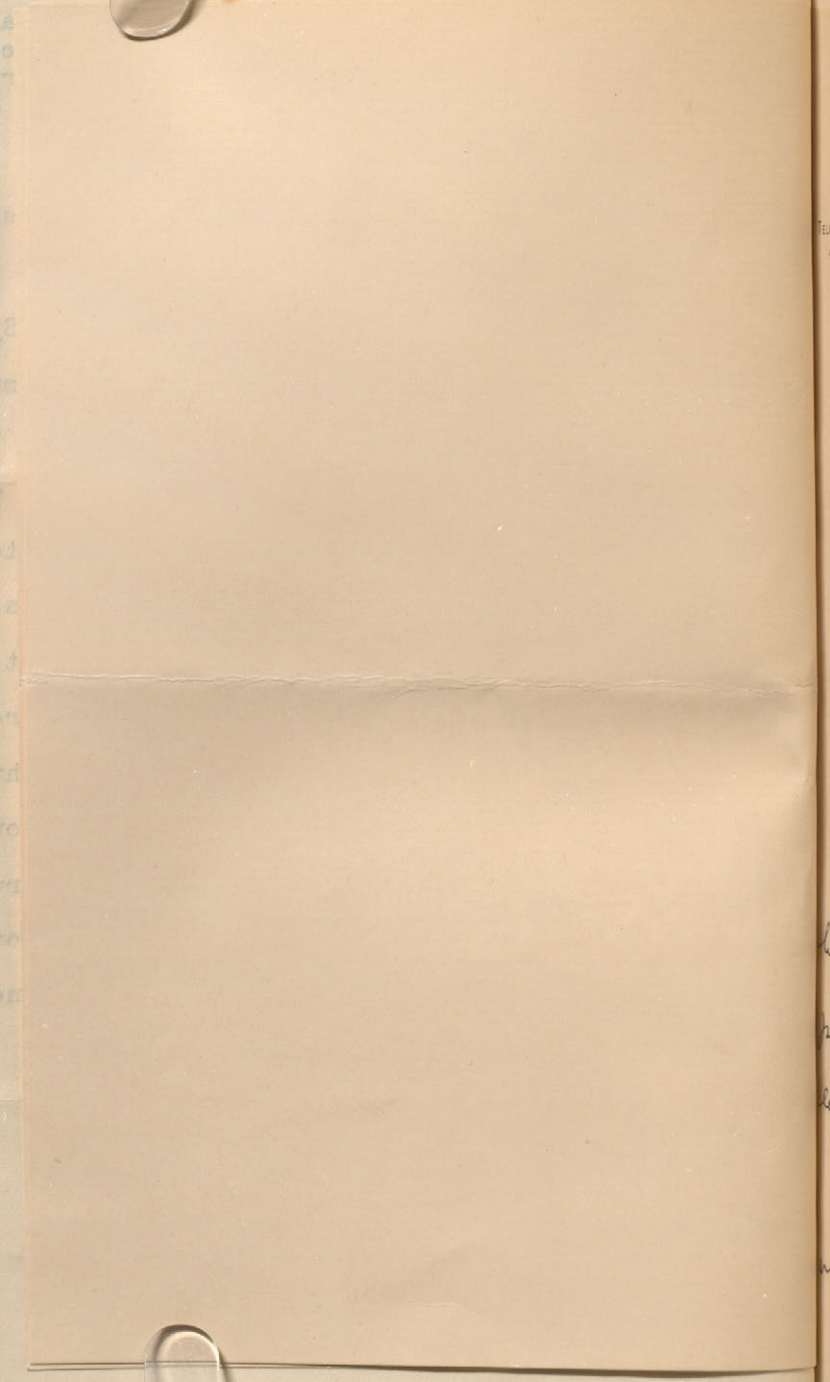

Stress of work your undertaking must mean.

I would be, therefore, obliged if you would kindly let me know at your earliest convenience if you wish to refer me the task; and if you do in what extent my subject may be treated, and by what date you would require the M.S. I could then

let you know definitely if I can accept the offer if you make it, and ask you for further particulars if I can see my way to do so.

Excuse a hurried note & believe me yours sincerely

Gordon Holmes.

BALTIMORE, Feb. 26 07

Dear Mr. Dils - Nothing much to report. I hope your introduction is on the way. They must be ready to go on with the printing. Vol II is about all in type and the Mass. of vol III is going to them. I hope your article on Syphilis will be ready soon.

It might be well if you sent or your note as to the title page, especially how you wish your name put in. They will probably be at that very soon.

I hope you have written to Thayer. He will require a good deal of prodding.

Everyone here much as usual. I hope your household as all well.

And with kind regards

Yours Sincerely,

Thomas McCrae

BALTIMORE, Feb 22 07

Dear Sir - Having read to what I  
hope your intention is on this way. The  
in reply to you with the first part of  
about the other way the first part of  
found to them. I hope you will be  
with the ready way.

It might be well if you want to  
to the first part, especially from the  
you want to be in the first part of  
that way.

I hope you have written to  
respect, upon each of the  
because the first part of the

your intention is all well.

Yours truly,  
Thomas Morris

R. THOMAS MCCRAE,  
307 ST. PAUL STREET,  
CONSULTATION HOURS  
3-5 P. M.

BALTIMORE, June 7, 1907.

Dear Dr. Osler:

As Novy did not discuss the matter of treatment in his article on food poisons in Vol. 1, I have suggested that he give us a short <sup>ad</sup>dition for the next printing. There is nearly a page available, on which I should think he could get in all that is necessary. I hope this meets with your approval.

In regard to the question of tumors of the membranes of the ~~ch~~ord, might it not be a good plan for you to write Buzzard and Branwell about it? Buzzard takes the disease of the ~~ch~~ord and Branwell of the meninges. You will remember that we have not any section on the surgery of the ~~ch~~ord.

In regard to the discussion of arthritis deformans at the British Medical, I wrote to Luff, who opened the discussion, as to any suggestion in reference to any special phase of the subject that he might wish me to deal with, but his answer does not give any suggestion. Do you think of any special feature that it might be well for me to lay to lay special stress on?

*I hope the Syphilis article progresses well.*

*Best wishes to all the household*

*Yours sincerely,  
Thomas McCrae*

BALTIMORE, June 7, 1907.

Dear Dr. Galt:

As Novy did not discuss the matter of  
treatment in his article on food poisons in Vol. 1,  
I have suggested that he give an account of it in  
the next printing. There is nearly a page available,  
on which I should think he could get in all that is  
necessary. I hope this meets with your approval.  
In regard to the question of terms of  
the publication of the *Journal*, might it not be a good plan

for you to write Buzzard and Brannell about it?  
Buzzard takes the absence of the *Journal* and Brannell of  
the *Journal*. You will remember that we have not any  
section on the surgery of the *Journal*.

In regard to the discussion of arthritis  
before the British Society, I wrote to HULL, who  
opened the discussion, as an suggestion in reference  
to any special phase of the subject that he might wish to  
deal with, but his answer does not give any suggestion.  
Do you think of any special feature that he might be well  
for me to lay to lay special stress on?

Thank you for the *Journal* articles  
Best wishes to all the family  
Sincerely,

BALTIMORE, June 10 - 07

Dear Doctor

I have just heard from Palleuigo who says he has to give up the article. He writes as if he was badly used up and spoke of having talked to you in Washington about it. So I expect that can be considered as called off.

In answer to your letter of the 21<sup>st</sup> - I have assigned the Syphilitic of the nervous system to Sachs along with G.P. and Tabes. I must be very stupid but I am unable to make out this sentence "I suppose young Henry, will give his remarkable group of cases of which there have been at least three or four at the hospital of fatal vomiting" - I cannot make out who "young Henry" is and the connection.

bold and wet here again. It keeps the grass green but does not do much else.

We have a very good lot of p. q. who are busy and interested.

I hope you are all very well Best

Regards as ever

Yours

Thomas McCrae.

BALTIMORE, June 21 - 07

Dear Mr. Allen

Nothing very much to report. I am busy at Brown's article on Tuberculosis. He has made it terribly long and there must be a good deal of cutting - I hope to be over the *Mos. of Vol.* III before leaving and some of IV.

Babcock writes that he has not heard from you. I suggested his sending in the *Illustr.* now and that if you had any suggestions they could be added in the galley.

We are getting well through with the *pa.* who are a good lot. But energy is less in evidence at this time of year. I shall be glad of the steamer.

I hope you have written as to how you think I had better put in the note regarding the section on military tuberculosis. It is a poor thing. I have had cerebral sterility.

Best wishes to all the household. And  
as ever

Yours sincerely,  
Thomas McCrae

BALTIMORE, June 21 - 07

Dear Mr. [Name]

I have been very much interested in your report. I have  
been at home, and I have been very busy with my  
work. I have been very busy with my work, and I  
have been very busy with my work.

I have been very busy with my work, and I  
have been very busy with my work. I have been  
very busy with my work, and I have been very  
busy with my work. I have been very busy with  
my work, and I have been very busy with my  
work. I have been very busy with my work, and  
I have been very busy with my work.

I hope you have been very busy with your  
work. I have been very busy with my work, and  
I have been very busy with my work. I have  
been very busy with my work, and I have been  
very busy with my work. I have been very busy  
with my work, and I have been very busy with  
my work.

BALTIMORE

June 27<sup>th</sup> 1900

Dear Sir,

I have the honor to acknowledge the receipt of your letter of the 18<sup>th</sup> inst. in regard to the matter of the proposed extension of the Baltimore and Annapolis Electric Railway. It would be a pleasure to take the various subjects of business of the company into consideration. Of course we have no objection to the proposed extension of the line to Annapolis, but we have no objection to the proposed extension of the line to the other side of the river. It is a matter of business and we are willing to take the same into consideration. We have no objection to the proposed extension of the line to the other side of the river. It is a matter of business and we are willing to take the same into consideration. We have no objection to the proposed extension of the line to the other side of the river. It is a matter of business and we are willing to take the same into consideration.

BALTIMORE, June 27<sup>th</sup> - 07

Dear Dr. Fla.

Yours of the 18<sup>th</sup> in to day  
should think it would be a good thing to try and  
get bushing to take the tumors of the cord and  
meninges. Of course we have written Bizzozzi  
to take the medical aspects of tumors of the cord,  
diagnosis etc. It should do that very well.

Brown's article on Tuberculosis is enormous.  
I have cut a good deal and sent the Mrs. a part  
an estimate of the length. It has all sorts  
of diagrams and a long section on sanitation  
which we have no room for. Then he has  
not considered Tuberculosis of the peritoneum,  
pleura or peritoneum. We will have to get  
the other men to take those up. Brown has  
included so much of other news work and  
I have written him often to try and cut out  
that, unless very important.

Poor Emerson has the mumps and a  
severe attack. He is terribly downcast over the  
possibility of his "orchids" being trivalved.  
Halsted said "I hope it will not affect Emers-  
on's voice". It should be a lesson to the Pathologic  
Dept. as all this infection in the hospital  
started with MacCallum's typewriter.

DR. THOMAS MCCRAE,

CONSULTATION HOURS  
3-5 P. M.

BALTIMORE, June 23<sup>rd</sup> 09

Dear Dr. Osler -

Yours of the 14<sup>th</sup> is to day.

Churchman says his part will be done in a few days and I will try and put them together. Sachs takes the syphilis of the nervous system with Taker and G.S.

The circular of the English edition arrived and looks well. It is very good of you to put my name in with yours and the 'System' is a great improvement in my eyes. I wish they had done it here.

I am busy with Brown's Tuberculosis article. He has written an Encyclopedia and has made a very long article. I am cutting but I fear it will be far over length. He has done things that I have been at him for months not to. He has sent me all kinds of tables and plans that we can hardly have room for.

Not enough here now - the old time might be

Best wishes to you all as ever

Chicago

Nov. 30<sup>th</sup> 1904

Dear Dr. Osler,

It will be a pleasure to undertake the introductory chapter to the section on the nervous system. Yes - "like one of Comheim's chapters" would be fine - but that can't be. Will you please let me know how many words the introductory chapter should and may contain,

melancholia, periodic insanity (including manic and depressive states), & paranoia with perhaps notes on idiocy and imbecility, the general practitioners would be pleased and helped.

I have thought, too, that a chapter on "Insomnia" in view of the difficulties practitioners have with the system, might be welcomed. In my edition (4th), I find no reference to neuralgia parosethica; it might be included under the neuralgias; you remember Newcomb's leg. - But perhaps this is in the

5th edition.

to amount to 2 or 3 forenoon  
of the St. Paul Cord, at present

I spend 2 or 3 forenoon each week at  
the Wesleyan Hospital and am getting  
my hand in again.

Stewart is having his own troubles  
here. I hope that he may gradually adapt  
himself to the situation. There is really no  
reason why he shouldn't, I think.

We are on the average bench still in this  
apartment but unless all signs fail this should  
be relief before long.

My wife joins me in greetings to Mrs. Bly  
and yourself. Very faithfully  
Lowell F. Barker

when you wish it in your  
hands, and any particular  
phases of the subject you would  
like especially emphasized.

I have looked over the  
classification of nervous diseases  
in your book and it seems  
to me hard to suggest any  
change of importance. Perhaps  
if you would include a  
chapter on "The More Common  
Insanities" giving in a few  
pages the salient features of

BALTIMORE, July 5, 1907.

Dear Dr. Osler.

The question of some of the sections of tuberculosis comes up, as Brown has really done nothing but pulmonary <sup>and intestinal</sup> tuberculosis. I have arranged with Lord to take tuberculosis of the pleura, and I suppose later on we can get Young to deal with the kidney. My impression is that ~~supposing~~ <sup>expecting</sup> Brown ~~would~~ <sup>to</sup> discuss tuberculous peritonitis we notified Rolleston that he would not require to discuss the tuberculous peritonitis. I cannot lay my hand on the memorandum about it, although it is here somewhere. It might be well if you could find out from Rolleston if he has done anything on it, and if not try and get him to write a short section. I am sorry to be so indefinite, and I may be able to lay my hand on that before I go. Churchman has practically finished the <sup>Syphilitic</sup> article and promises it tomorrow morning.

With kind regards,

Yours very truly

Thomas McCrae

Isn't July 12<sup>th</sup> your birth day. This arrives a little late to wish you many more of them. I hope to be around your locality about the 20<sup>th</sup>.

Iller

THOMAS MOORHEAD,

TO BE EDITED BY

WILLIAM OSLER, M.D.

TO BE PUBLISHED BY

LEA BROTHERS & COMPANY,  
PHILADELPHIA.

~~Forecast~~ The evolution of the scene

- 2 Forecast
  - 1 The need of a book in this field is
  - 2 The general practice of the surgeon

The object of this work is to present to the practitioner a picture of the ~~present state~~ <sup>present state</sup> of medicine in such detail that the practitioner may be able to help his patients better more successfully and make him a better student of surgery

NOTE.

This work is planned to appear in seven octavo volumes, averaging 800 pages each, with about 540 words to the page. It is essential that articles should deal with their topics as concisely as possible without sacrifice of completeness.

Special attention should be given to the adoption and maintenance of a clear and simple subdivision of material in the manuscript, for which the following order is suggested: Etiology, Special Pathology, Symptoms, Diagnosis, Prognosis, Treatment and Sequelæ.

Illustrations are desired where necessary for the elucidation of the text and are to be included in the number of pages allotted. They should be allowed for as occupying one-third of a page each upon the average. Text references should be made by footnotes.

DR. THOMAS MCCRAE,  
807 ST. PAUL STREET,  
CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE.

Much like November. J. Hutchin is smiling  
constantly at the prospect of getting away so soon.  
I began the post-graduate work on Saturday

lay 28. The coldness of the morning may be inferred  
from the fact that Yehemirath W. W. Welch got  
up somewhere round 7 am. He said it was too  
cold to stay in bed.

I saw Thayer yesterday. It is very evident  
that we might not have got anything from him  
for two years. He has had Tancypill workers  
at the statistics from the hospital material. If  
they have anything ready, would it not be a  
good thing if you could use some of these?

I hope the house is all settled. My  
best to you all. And as ever

Yours sincerely,  
Thomas McCrae

DR. THOMAS MORRIS, BALTIMORE, MD.

I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the case of Mrs. J. M. ... I am sorry to hear that you are unable to attend to your duties at the present time. I will be glad to see you when you are able to do so. I am, Sir, very respectfully,  
Your obedient servant,  
T. Morris

I

Calab.

I am sorry to hear that you are unable to attend to your duties at the present time. I will be glad to see you when you are able to do so. I am, Sir, very respectfully,  
Your obedient servant,  
T. Morris

D

Thomas Morris

BALTIMORE, May. 27 - 07

Dear Dr. Osler -

I have to produce some sort of an article on Miliary Tuberculosis. It will not be enough to make a chapter and I suppose had better go in for some article. How should it be

marked? With a footnote giving my name or merely saying the Junior Editor? I should rather incline to the former - I do not feel

like having my name go under the heading at the top of the page.

James sent his article on Pneumothorax the other day. I hope to have all of Vol. III read before sailing if possible. So I hope that your part of Syphilis will be over very soon.

Here the pages for the articles on the vascular system - you had 125 for Diseases of the arteries and aneurism and we had allowed Thayer 150 for Endocarditis, and Dilatation, Hypertrophy and Valvular Disease. That is a nice slice to go through with.

It keeps very cold. We have had very few comfortable days. The last two or three have been

BALTIMORE, Maryland, 27-07

Dear Doctor

I have to trouble you with a  
letter in relation to the  
subject which I enclose and  
which I have written.

I have written you  
in regard to the  
letter which I have  
sent you.

I have written you  
in regard to the  
letter which I have  
sent you.

I have written you  
in regard to the  
letter which I have  
sent you.

I have written you  
in regard to the  
letter which I have  
sent you.

I have written you  
in regard to the  
letter which I have  
sent you.

I have written you  
in regard to the  
letter which I have  
sent you.

BALTIMORE, June 2<sup>nd</sup> 07

Dear D<sup>r</sup> Ogle -

Rollistar writes - that you say

that "my great uncle Humphrey Davy was at Edinburgh -  
it really was his brother John Davy. M.D. F.R.S."  
Do you want any change made in this?

I enclose a page of extracts from the Third  
Year papers - They may interest Fitcher if he is  
still with you in Oxford.

I have finished the idea of vol II. They are  
probably going on with the printing of it. I hope  
the Diphiles article is well along. If you have  
not heard from him - I wish you would jog him  
again - He maintains a very discreet silence to my  
friends - Churchman has disappeared and I must  
try and get after him.

June 3 - Churchman has turned up. He has his part  
ready and says he will get at the treatment. I  
hope your section is nearly ready.

Best wishes to you all. We got gay  
letters from Fitcher going down the bay but as  
there was a heavy north east storm yesterday he  
may have been skinned up outside.

And as ever  
Yours  
Thomas McCrae

BALTIMORE, June 1<sup>st</sup> 07

The amusements of an examiner or Culling  
from the wisdom of the Third Year.

Traumatic arthritis = "Milkmaid's knee or weavers  
Ridges Bottom" (!)

arthritis deformans - is metatarsal form. [Is this the  
same as siliabismus of the organ? Yes]

Acute rheumatic fever. Hagar's nodes.

"Gout - migratory route is often characteristic".  
Vet. - [What do you think of that?]

Gonorrhoeal arthritis often comes on sudden and often  
in the night. (I suppose the original cause is  
frequently a nocturnal acquisition)

"Canvassers law"

Chronic nephritis - "Sugar may be found if  
mechanism of control is deficient." (What the  
Dickens does that mean?)

arthritis deformans - "a history of some previous  
infection". (If he had given that under  
gonorrhoeal - I should have given a high mark)

Hogarth's nodosities. This with gonorrhoeal  
arthritis might have some reference to  
"The Rake's Progress".

BALTIMORE, June 1st 1887

The announcement of our examination in Baltimore  
from the wisdom of the Board  
The committee's action = "The Board's action" in Baltimore  
The Board's action

Committee's action - as follows: -  
same as the action of the Board, June 1st

The Board's action

That the Board's action is after the Board's action  
[What is the Board's action?]

The Board's action is after the Board's action  
in the report. (The Board's action is after the Board's action)  
The Board's action is after the Board's action

The Board's action

The Board's action is after the Board's action  
The Board's action is after the Board's action  
The Board's action is after the Board's action

The Board's action is after the Board's action  
The Board's action is after the Board's action  
The Board's action is after the Board's action

The Board's action is after the Board's action  
The Board's action is after the Board's action  
The Board's action is after the Board's action

# Osler's System of Medicine

**M**EDICINE has become cosmopolitan. Modern means of communication have made the whole world a single country in the diffusion of knowledge, investigations and discoveries being disseminated among advanced thinkers without regard to the former obstacles of time, distance and difference of language. It is greatly for the benefit of the profession at large that the body of knowledge possessed by the leaders in the world of medicine should now be made available for all, as it will be in the pages of Professor Osler's "System of Medicine." The whole field of Medical practice in all parts of the world will be covered.

Professor Osler's "System of Medicine" is undoubtedly one of the most important works ever undertaken in the literature of medicine. With well recognised qualifications the Editors unite a wide literary knowledge and an acquaintance with the thinkers and writers of the present day. They have thus been able to collect an exceptional group of contributors who have dealt with the subject assigned to them in a manner specially suited to the needs of the Practitioner.

Of the seven volumes constituting the work, the first will be issued immediately and the others at intervals of about three months. Intending purchasers will facilitate their early receipt of the work by filling in the Reservation Order Form printed below.

# OSLER'S SYSTEM OF MEDICINE

## VOLUME I

*Introduction—History and Forecast of Medicine.*

By WILLIAM OSLER, M.D., Regius Professor of Medicine in the University of Oxford.

CHAPTER

### Part I—Predisposition and Immunity

*I—Inheritance and Disease.*

By J. GEORGE ADAMI, M.D., F.R.S., Professor of Pathology in McGill University, Montreal.

### Part II—Diseases caused by Physical Agents

*II—Light. X-Rays. Electricity. III—Air. IV—Heat and Cold.*

By ALFRED GORDON, M.D., Associate in Mental and Nervous Diseases in the Jefferson Medical College, Philadelphia.

### Part III—Diseases Caused by Chemical Agents

*V—Chronic Lead Poisoning.*

*VI—Chronic Arsenic Poisoning.*

*VII—Other Metallic Poisons, etc.*

*VIII—Poisoning from Carbon Monoxide, Illuminating-Gas, Combustion Products, Carbon Bisulphide.*

By DAVID L. EDSALL, M.D., Assistant Professor of Medicine, University of Pennsylvania, Medical Department, Philadelphia.

### Part IV—Diseases Caused by Organic Agents

*IX—Alcohol.*

*X—Opium, Morphinism, Cocaine.*

By ALEXANDER LAMBERT, M.D., Professor of Clinical Medicine, Cornell University Medical College, New York.

*XI—Foods, Milk, Fish, Meat, etc.*

By FREDERICK G. NOVY, M.D., Professor of Bacteriology in the University of Michigan, Ann Arbor.

*XII—Snake Venoms.*

By DR. HIDEYO NOGUCHI, Assistant of the Rockefeller Institute for Medical Research, New York.

*XIII—Auto-Intoxications.*

*XIV—Intoxications—Protein, Purin, Carbohydrate and Fat Metabolism.*

By ALONZO ENGELBERT TAYLOR, M.D., Prof. of Pathology, Univ. of California, Med. Dep., San Francisco.

### Part V—Diseases Caused by Vegetable Parasites

*XV—Actinomyces.*

*XVI—Aspergillus.*

By JAMES HOMER WRIGHT, M.D., Assistant Professor of Pathology in the Medical School of Harvard University, Boston.

### Part VI—Diseases Caused by Protozoa

*XVII—Protozoa.*

By GARY N. CALKINS, PH.D., Professor of Protozoölogy in the Columbia University, New York City.

*XVIII—Mosquitoes.*

By L. O. HOWARD, PH.D., Chief, Bureau of Entomology of the United States Department of Agriculture.

*XIX—The Malarial Fevers.*

By CHARLES F. CRAIG, M.D., First Lieutenant and Assistant Surgeon in the United States Army.

*XX—Black-water Fever.*

By J. W. W. STEPHENS, M.D., Walter Myers Lecturer on Tropical Medicine in the University of Liverpool.

*XXI—Trypanosomiasis.*

By DAVID BRUCE, C.B., F.R.S., D.Sc., Colonel, R.A.M.C.

*XXII—Amæbic Dysentery.*

By RICHARD P. STRONG, M.D., Director of the Biological Laboratory, Manila, P.I.

### Part VII—Diseases Caused by Animal Parasites

*XXIII—General Discussion.*

*XXIV—Tetramode or Fluke Infection.*

*XXV—Taeniasis—Cestode Infection.*

*XXVI—Round-Worm Infection—Nemathelminthes.*

*XXVII—Leeches. Acariasis. Tongue Worm Infections. Myriapoda. Etc.*

By CHARLES WARDELL STILES, PH.D., D.Sc., Chief of the Division of Zoölogy in the Hygienic Laboratory, United States Public Health and Marine Hospital Service, Washington, D.C.

# OSLER'S SYSTEM OF MEDICINE

CHAPTER

## Part VIII—Nutrition

### XXVIII—General Considerations of Metabolism, Normal and in Disease.

By RUSSELL H. CHITTENDEN, PH.D., LL.D., Professor of Physiological Chemistry in the Sheffield Scientific School of Yale University, New Haven, Conn., and LAFAYETTE B. MENDEL, PH.D., Professor of Physiological Chemistry in the Sheffield Scientific School, Yale University.

## Part IX—Constitutional Diseases

### XXIX—Diabetes Mellitus.

### XXX—Diabetes Insipidus.

### XXXI—Gout.

By THOMAS B. FUTCHER, M.B., Associate Professor of Medicine, Johns Hopkins University, Baltimore.

### XXXII—Obesity.

By JAMES M. ANDERS, M.D., Professor of Theory and Practice of Medicine and Clinical Medicine in the Medico-Chirurgical College, Philadelphia.

### XXXIII—Rickets.

By GEORGE FREDERIC STILL, M.A., M.D. (CANTAB.), F.R.C.P. (LOND.), Professor of Diseases of Children in King's College, London.

### XXXIV—Scurvy.

By ROBERT HUTCHISON, M.D., F.R.C.P. (LOND.), Assistant Physician to the London Hospital and to the Hospital for Sick Children, Great Ormond Street, London.

## VOLUME II

## Infectious Diseases

### I—Introduction.

By LUDVIG HEKTOEN, M.D., Professor of Pathology in the University of Chicago and the Rush Medical College, Chicago.

### II—Typhoid Fever. History and Etiology.

### III—Pathology of Typhoid Fever.

### IV—The Symptoms of Typhoid Fever.

### V—The Diagnosis and Prognosis of Typhoid Fever.

### VI—The Prophylaxis and Treatment of Typhoid Fever.

### VII—Typhus Fever.

### VIII—Relapsing Fever.

By THOMAS McCRAE, M.D., M.R.C.P. (LOND.), Associate Professor of Medicine and Clinical Therapeutics in the Johns Hopkins University, Baltimore.

### IX—Smallpox.

By WILLIAM T. COUNCILMAN, M.D., Professor of Pathology in the Medical School of Harvard Univ., Boston.

### X—Vaccination.

By GEORGE DOCK, M.D., Professor of Theory and Practice of Medicine and Clinical Medicine in the University of Michigan, Department of Medicine, Ann Arbor.

### XI—Varicella.

By WILLIAM T. COUNCILMAN, M.D., Professor of Pathology in the Medical School of Harvard Univ., Boston.

### XII—Scarlet Fever.

### XIII—Diphtheria.

By JOHN H. MCCOLLOM, M.D., Assistant Professor of Contagious Diseases in the Medical Department of Harvard University, Boston.

### XIV—Measles and Rubella; The Fourth Disease; Erythema Infection.

### XV—Whooping Cough.

### XVI—Mumps.

By JOHN RUHRAH, M.D., Professor of the Diseases of Children and Therapeutics in the College of Physicians and Surgeons, Baltimore.

### XVII—Influenza.

By FREDERICK T. LORD, M.D., Assistant in Clinical Medicine in the Medical School of Harvard University, Boston.

### XVIII—Dengue.

By THOMAS D. COLEMAN, M.D., Professor of the Principles and Practice of Medicine in the University of Georgia, Medical Department, Augusta.

### XIX—Cerebro-Spinal Fever.

By HENRY KOPLIK, M.D., Attending Pediatricist to the Mt. Sinai Hospital, New York.

### XX—Erysipelas.

By JAMES M. ANDERS, M.D., Professor of the Theory and Practice of Medicine and Clinical Medicine in the Medico-Chirurgical College, Philadelphia.

### XXI—Lobar Pneumonia. Etiology and Pathology.

### XXII—The Symptoms, Diagnosis and Prognosis of Lobar Pneumonia.

### XXIII—The Treatment of Lobar Pneumonia.

By JOHN H. MUSSER, M.D., Professor of Clinical Medicine in the University of Pennsylvania, Medical Department, Philadelphia, and GEORGE WILLIAM NORRIS, M.D., Instructor in Medicine in the University of Pennsylvania, Medical Department, Philadelphia.

BALTIMORE,

returning guy. I am trying to keep it touch with  
as many of the men as possible.

I wish they knew how things were going as  
I should like to be able to arrange my vacation.  
As things here seem at present, I may get away  
for August. I should like to run over the coast  
but it hardly seems worth while for two weeks over  
there. What date do you sail to come out  
for the B. M. A.? I do not feel like staying  
the whole summer here.

We have all the men we can handle for  
our June course and rather more - which is  
qualifying as many of them have been sent by  
men who were here last year.

I hope you are all very well and having  
good weather. We have had rain after a long time  
of dry weather. And with best regards

Yours sincerely,  
Thomas McCrae

BALTIMORE, May 29<sup>th</sup> 1906

Dear Dr. Allen. Yours of the 17<sup>th</sup> in yesterday. I have much relief in your haven's written to the men about the remaining neurological subjects. I heard from Billings this morning - He is very glad to take that section. Burr writes asking for particulars, which I am sending, and speaks as if he would do it. But does not speak positively. As to Sachs, he wrote "I have written so frequently on children's diseases that I think it might be well to leave these chapters to others - I should prefer to work up the subject of syphilis of the nervous system, including tabes and general paralysis. If you would also wish to include anaesthetic family idiocy to me, it would be easy enough for me to work it up in addition to the other chapters."

That is the only word from him which I have and my impression is that you fell in with his idea of taking the syphilis etc with at the hemiplegia. I am writing <sup>him</sup> about it to night.

There is no word from the Deas about the printing. I am sitting tight and not worrying over it. Otherwise my hair would

5-31-06.

Dr. William Osler,  
7- Norham Gardens,  
Oxford, England.

My dear Dr. Osler:-

I decided some time ago that I would never again write any articles for any book of composite authorship. I did not suspect at that time that you were going to inflict on the public a new "System of Medicine". Under the circumstances therefore, I will break my rule and shall be very glad to write the Section on "Neurasthenia and the Traumatic Neuroses".

Very sincerely yours,

*Charles W. Burr.*

THE UNIVERSITY OF MICHIGAN LIBRARY

I am not a doctor, but I have seen a great deal of medicine  
and I know that a good deal of it is wasted in the  
hands of the ignorant and the unskilled.

BALTIMORE, May 25<sup>th</sup> 1916

He had a severe attack but has pulled through.  
It is certainly again to the dispensary to have him  
away.

We are having rather hot dry weather and  
rain is much needed - The town is very dusty -  
In the country even the trees show the need of  
moisture -

We have been much interested in the comments  
on the portrait - The American had a reproduction  
of it which was not very good but gave some idea  
of the general effect. We shall look for it here  
with much interest.

The summer exodus will soon begin - The  
Cushnigs go shortly. Barker expects to leave some  
time in June for the Georgian Bay. I saw  
Mr Tuff in Washington the other day and he said  
he was going to Munay Bay this summer. Gamae  
also goes here -

I hope you are all well - My best to Mr & Mrs  
and to Mrs Revue and Mrs Chapin if they are  
there - They auch - And with kindest  
regards

Yours very sincerely  
Thomas McCrae

BALTIMORE

The first day of the conference was devoted to the  
discussion of the general principles of the  
movement. The speaker stressed the fact that  
the movement is not a sect, but a broad  
movement which is open to all who are  
interested in the welfare of the human race.

The speaker stressed the fact that the

BALTIMORE, May 25<sup>th</sup> 1906

Dear Mother -

Nothing much to report. There is no word from the bees as to when they will begin printing. I have had several of the Mas. of vols. returned to the men for additions - The bees would suggest that I do it but that seems out of the question - especially such things as Chittenden's article. I saw a good many of the men at Washington and went over things with them. I wish they knew where they <sup>-the bees-</sup> were to be for the summer so that I could plan a vacation. I do not want to be tied down for the summer again - especially as it seems likely to be very hot and dry.

The Washington meeting was very interesting and I enjoyed it thoroughly. There are two rather interesting seniles or preseniles - who talked on many things to small purpose. Heaven deliver us from that fate.

Teaching ended this week and we have the exams on hand - I wish they were over and done with. They grow very tiresome. The Dispensary has had a period of unwanted calm as Joe Hopkins has been laid up with pneumonia.

Nov. 21, 1895.

My dear Dr. McCrae:

I am in receipt of your letter calling attention to the articles for Dr. Osler's new system of medicine. After deliberation, I am disposed to ask you to relieve me from writing the article on the spleen. The introduction to the diseases of the digestive system, I shall be glad to prepare for you. I have written to Dr. Osler stating that I felt that some one else could do the spleen better than I can, and I now make the same statement to you. If I supposed that this would cause you any special embarrassment, I would reconsider my decision. If it should so happen that you would like to have our medical school represented by another article, I have no doubt that I could suggest a Buffalo substitute.

With many kind regards, I am,

Yours very truly,

*Chas. G. Stockton*

Dr. Thomas McCrae,  
Johns Hopkins Hospital,  
Baltimore, Md.

It is the duty of every citizen to support the Government in its efforts to maintain the peace and stability of the Nation. I am proud to have served my country in the United States Army and to have been a member of the United States Marine Corps. I am also proud to have been a member of the United States Navy and to have been a member of the United States Air Force. I am proud to have been a member of the United States Coast Guard and to have been a member of the United States Marine Corps. I am proud to have been a member of the United States Army and to have been a member of the United States Marine Corps. I am proud to have been a member of the United States Navy and to have been a member of the United States Air Force. My dear Dr. [Name]:

Yours truly,  
[Signature]

BALTIMORE, May 1<sup>st</sup> 1908

Dear Dr. Osler -

I should think that Billings  
would be a very good man for that article - Heilbrunn,  
you may remember - rather demurred about the one  
he did write - Still you might be able to persuade  
him - But Billings would probably do it very well.

Regarding the remaining neurological articles, I  
still feel that it would be much better for you to  
write them. You have said nothing of them  
when you were going to ask to do the 'neuritis'.

I hope you have had a good trip to the continent  
and found Campbell fairly moral and well behaved.  
We go along here much as usual. I had a letter from  
George Blumer to-day. He lost everything, books etc  
and the ms. of his article. But he goes to work on  
it again. Hamped he says by the burning of the  
library. It does seem very hard luck. We have  
not had anything of the same other than fared,

I enclose a note of the tumor in the second  
150 cases of stomach cancer. I hope they are what  
you wanted -

Hot spring weather here and every thing coming  
out rapidly. It becomes hard to work. I miss  
the summer house at 1 W. Franklin St. and the good  
brews that Morris used to make.

Best to you all as ever

Yours  
Thomas McCrae

R. THOMAS MCCRAE,  
807 ST. PAUL STREET,  
CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE, April 24<sup>th</sup> 1906

Dear W<sup>o</sup>bbles. Yours of the 13<sup>th</sup> arrived yesterday. I am glad to hear that you have settled the house question at last. It must be a great relief.

The Interurban Peripatetics had a very good meeting in Philadelphia. Your cable was received with much applause. I was much interested in the library of the College of Physicians which W<sup>o</sup> Henry showed us on Saturday afternoon. I had to stay over that evening to address the James M Anders Medical Society and had rather a good time. The next morning was marred by having to catch an early train for Havre de Grace where I had a consultation.

### Re System.

1. Councilman's article is in. I have not been able to go over it very carefully as yet. Would you like it sent over to you?
- 2) I had a talk with Boggs some little time ago and will see him again after your letter.
- 3) I do not think that I ought to take the responsibility of writing<sup>to</sup> and editing the remainder's neurological contributors. I do not know any of them, and a letter from you is a very different thing to one from me. I sent you the list of the articles as yet not assigned. I have no idea as to what should be given to any one man.

BALTIMORE. April 22 1862

Dear Mother  
I am glad to hear that you have left the house  
at last. It must be a great relief.  
The doctor says you had better not  
in the morning. I am much interested in the  
the history of the nation. I have read about the  
I think that is the best of the country.  
I believe in James M. Smith's doctrine, and  
take a part in it. The great business of the  
of having to take an early train for  
when this is possible.

The System

I have not been able to  
I hope you will like it. I  
If you can't get it, let it  
I do not think that I  
of making a good system  
I do not know how to  
I have not been able to  
I hope you will like it.

4). A letter from the Deas a few days ago said that they were still held up by the State. They did not give any idea as to when they could get on. They seem determined to have your article before beginning printing.

5). re Braig's illustrations. As I wrote, Broedel did not think it advisable to do anything with Braig's drawings especially as the Deas thought they could improve them.

The question is - should we put in the old plate (of Broedel's drawings) as well as Braig's? Deas have the old plate - of course it has been published a good many times.

I wrote you that the article which was represented to me to be for the B. M. J. was really for that journal of Youngs in Toronto - with which I shall have nothing to do.

I shall try to let you have the note as to the number of cases of humor in the second series of cancer of the stomach as soon as possible.

Barker is around again working very well. He got through without any cardiac complications luckily. Every one else is in good form. I am hoping to have my brother down for a week very soon.

Best to you all as ever

Yours very sincerely,  
Thomas McCrae

Apr. 6<sup>th</sup> 1906

Dear Dr. Wiles,

That double dyed scoundrel Lambert at last reports his article finished and says, it is being typewritten. I thought to be along very soon and I shall hurry over it. His alcohol paper was a hard job, lots of it had to be rewritten and he had no kind of arrangement into paragraphs.

I wrote you last week regarding an article under a misapprehension. They gave me to understand from Toronto, that they wished to get as many articles as possible <sup>from Canadian</sup> for a special number of the British Medical Journal in July. But from a letter yesterday it seems that it is a special British Medical number of the Canadian Journal of Medicine and Surgery. That is a horse of quite another color and I do not intend to have anything to do with that. They said you were going to contribute.

They have asked me to give a paper or open the discussion on the Mechanism of Therapeutics at the meeting, which I have accepted.

Matters seem to be along quietly. Barker is round again and looks very well. He seems a good deal dimmer his illness, in weight

BALTIMORE

Apr 2 1888

Dear Mr. [Name]

I have the great pleasure to receive  
your letter of the 27th inst. and am  
glad to hear that you are  
interested in the [subject].

I have the pleasure to inform you  
that the [subject] is now  
being [action] and you will  
be [action] in the [subject].

I am, Sir, very respectfully,  
Your obedient servant,  
Thomas McCrae

I hope you have given consideration to the points about which I have written you.

1. Remaining subjects for the neurological volume.
2. Illustrations for Craig's article.
3. Boggs - Regarding his taking the small subjects. Technicals etc.

W. A. Macbain has just been in. He has received a telegram from Hewlett saying that John is much worse and advising his coming at once. So he leaves to-day. A letter from Hewlett a few days ago said that his symptoms had suddenly become worse - dyspnoea, rapid heart action, diarrhoea and rapid loss of weight and strength. It sounds very ominous.

I hope you are all over your cold and quite yourself again. My best wishes to the household. And as ever

Yours sincerely,  
Thomas McCrae

BALTIMORE.

I have given considerable thought to the  
points about which I have written you.  
Accordingly I have prepared for the  
illustrations for your notes.  
I hope to return to you in a few  
days with the material.

With reference to the first point, I have  
received a response from the  
instructive and interesting  
letter from the  
from the  
practice  
I believe the

# THE JOHNS HOPKINS HOSPITAL,

NORTH BROADWAY.

HENRY M. HURD, M. D.  
Superintendent

Baltimore, February 9, 1906. 190

Dear Dr. Osler.

Lambert has sent on the section on cocaine and promises that the one on morphia will follow very shortly. I shall send them on to the Leas at once.

I hope you will consider the remaining sections in the neurological volume as soon as possible in order that we may get them settled. I rather hesitate to send out the agreements with the definite number of pages stated until we are exactly sure of what is to go in. I do not know whether you have thought it well to have in some of the extra articles, such as one on ophthalmology *in relation to neurological conditions*.

I got your letter from the steamer; thank you for your inquiry about my health. I got over the attack very well. Many of the men have had a long siege of it; our Dispensary staff especially has been much crippled.

I hope things are going well, and with kindest regards to the household and yourself,

Yours truly

*Thomas McCrae*

*The dates for the Mss. of your articles are now set as follows.*

*Syphilis - vol. III. May. 15<sup>th</sup>*

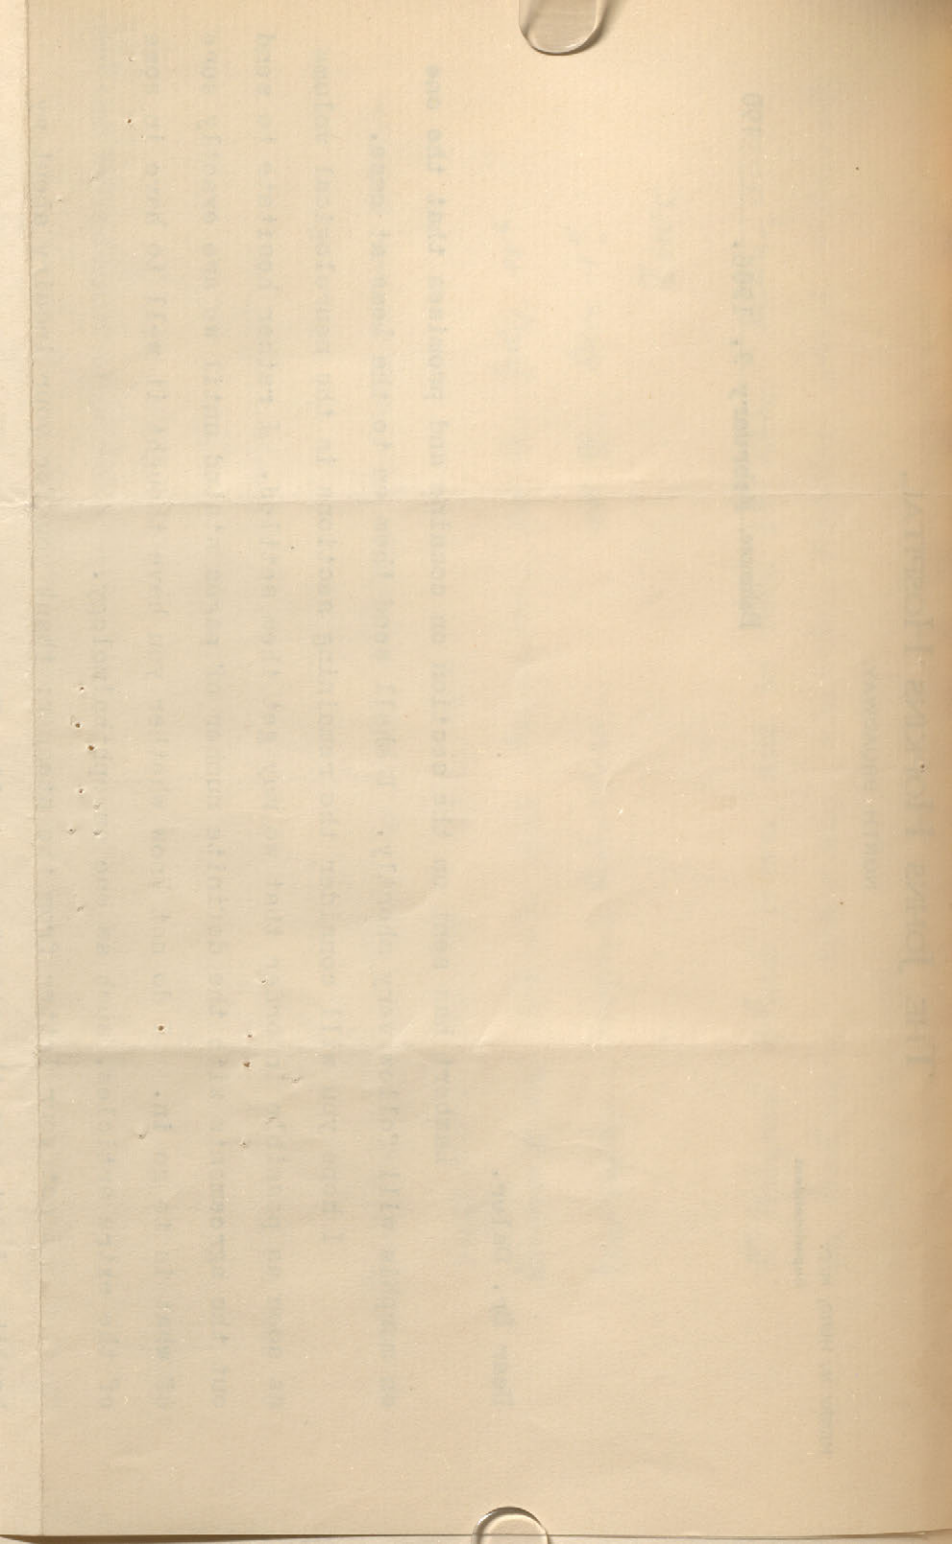

*Diseases of the Arteries and Anæmia - vol. IV. July 15<sup>th</sup>*

*Vasomotor & Trophic Disorders - vol. V. Decr 1<sup>st</sup>*

*T McC*

*Dr. Magnin of Paris is over and in town for today. He was seeing the Washington authorities about his hospital, which apparently is going through.*

# The Johns Hopkins Hospital,

NORTH BROADWAY.

#1

BALTIMORE, February 14, 1906 190

Dear Dr. Osler.

I have a letter from the Leas in regard to Craig's illustrations for his article on malarial fever. You may remember that in May last I drew your attention to them and questioned their being good enough. At the time you thought they would be all right to go ahead with. The Leas write asking if it might not be as well to use the old plates from the Hospital Reports. The only difference is that Craig writes describing two varieties of caes-tivo-autumnal parasites.

I have spoken to Froedel about having Craig's drawings improved by one of his assistants. He is willing to oversee the matter, but the difficulty seems to me, and he feels the same, that considering the way the drawings are done, it is not going to be possible to make much out of them, although of course the general shapes could be shown in a better way.

Mr. Lea writes me that they will not go to

CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE February 16, 1906.

My dear Dr. Osler.

I am sending you with this a note of the articles in Volume VII. which have still to be arranged for. I have put them in in the order in which they are in the text-book. I feel that we ought to try and straighten out this section as soon as possible.

You did not say whether or not you had been able to see Dr. Biggs in New York and interview him regarding his article. If he will not take it is there any one else whom you have in mind or shall we just let that drop?

I hope you have gotten back into harness again, which you will probably find easier than a holiday in this country.

With kindest regards, *to the whole household.*

Yours truly

*Thomas McCrae*

*I have written to Biggs today asking him about the section - and letting him know when the MS. would be required.*

*I wish you would write to Boogor about his taking the Febriola, Glandular Fever - U.S.W. The names you had for the neurological articles were E.W. Taylor, & J.J. Thomas of Boston. Pierce Clark of N.Y. Burr of Phila. Russell & Jelliffe - T.M.C*

THOMAS MORRIS  
107 ST PAUL STREET  
CONSULTATION HOURS  
9-5 P. M.

BALTIMORE, FEBRUARY 16, 1908.

Dear Dr. Carter,

I am sending you with this a note of the ar-  
rangement in Volume VII. which have still to be arranged for. I  
have put them in the order in which they are in the text-  
book. I feel that we ought to try and straighten out this  
arrangement as soon as possible.

You did not say whether or not you had been able to see Dr.  
Carter in New York and interview him regarding his article. If  
I will not take it is there any one else whom you have in mind  
whom I shall we just let that drop.

I hope you have gotten back into harness again, which you  
I probably find easier than a holiday in this country.

With kindest regards, to the best of my ability,

Yours truly,

Thomas Morris

I have written to you a long letter about the article in the book. I have put them in the order in which they are in the text-book. I feel that we ought to try and straighten out this arrangement as soon as possible. You did not say whether or not you had been able to see Dr. Carter in New York and interview him regarding his article. If I will not take it is there any one else whom you have in mind whom I shall we just let that drop. I hope you have gotten back into harness again, which you I probably find easier than a holiday in this country. With kindest regards, to the best of my ability, Yours truly, Thomas Morris

DR. THOMAS MCCRAE,  
807 ST. PAUL STREET.  
CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE, March 2, 1906.

Dear Dr. Osler.

I have a letter from Lambert a day or two ago saying that his manuscript was just about finished and that he expected to have it in this week, but it has not arrived as yet. As regards Magrath I received a letter from Dr. Councilman last week in which he advised sending an ultimatum by registered letter to Magrath, saying that if the manuscript was not to hand this month <sup>(Feb.)</sup> the matter would be taken out of his hands. I did this, received a receipt for the registered letter but have heard nothing thus far from him. Councilman says that he himself will write the articles if Magrath does not come up in time. I gave him until March first and will wait a day yet. If no word comes then I shall write to Councilman. It is a great nuisance but perhaps in the end we may be better off with Councilman's article. I hope your introductory section is on the way, as I think I told you the Leas felt they could not begin printing until they had that. The notes regarding the articles on the nervous system probably reached you safely; I feel that we ought to try and get those going as soon as possible. I shall hope to hear from you in a few days. I hope you will approve of my action regarding Magrath, but if there is no word from him tomorrow I shall accept Dr. Councilman's offer.

Matters here are going on about as usual. I trust everything is well at Oxford, and with kind regards,

Yours truly

Thomas McCrae

BALTIMORE, March 2, 1908.

Dear Dr. Osher,

I have a letter from Lambert a day or two ago saying that his manuscript was just about finished and that he expected to have it in this week, but it has not arrived yet. As regards Hagarth I received a letter from Dr. Councilman last week in which he stated something or other but by registered letter to Hagarth, saying that if the manuscript was not to hand this month the matter would be taken out of his hands. I did this, received a receipt for the registered letter but have heard nothing thus far from him. Councilman says that he himself will write the articles if Hagarth does not show up in time. I gave him until March first and will wait a day yet. If no word comes then I shall write to Councilman. It is a great nuisance but perhaps in the end we may be better off with Councilman's article. I hope your introductory section is on the way, as I think I told you the less left they could not begin printing until they had that. The notes regarding the articles on the nervous system probably reached you already; I feel that we ought to try and get those notes as soon as possible. I shall hope to hear from you in a few days. BALTIMORE, March 6, 1906. 190

Dear Dr. Osler.

I wrote you a few days ago in regard to Dr. Magrath. As I received no further word from him of any kind and gave him some days longer than the time mentioned, I thought there was no use of bothering any more and I took Dr. Councilman's advice, notifying Magrath that the article had been put in other hands and writing Dr. Councilman that we would accept his offer. <sup>to take it</sup> I hope you approve of this. The time is short and I did not like to delay until I had heard from you. I have notified the Leas regarding it.

Do you remember a man named Fagan who came from North Adams <sup>Mass.</sup> about a year ago? He had an osteomyelitis of the spine and you got me to see him. You may remember he behaved in a very curious way at that time and we rather commented on it. He turned up the other day and is out at St. Agnes on

account of "G. O. M." He says that he has only been taking it a short time but I rather have my doubts, and it would explain his actions of a year ago. He looks well and I have a note from him saying he was doing very well.

With kindest regards to you and all the household,

Yours very truly

*Thomas Moran*

I hope you have kept in mind especially the following points about which I wrote:- the settling of the case for the remaining subjects of the neurological disease and that you have given me the notes regarding the sections that you thought of and sent me to take. There is one matter that perhaps you might have something more about and that is a section on the brain and spinal cord. You once spoke of leaving that for your volume, as there might be a great deal to be said on that point. You may have thought otherwise of it.

The Johns Hopkins Hospital,

NORTH BROADWAY.

Dear Dr. Osler.

The copy of Bayle's Medical Biography arrived safely; very many thanks for your kindness in sending it. I did not have it and am delighted to possess it. It was exceedingly good of you to think of it and keep me in mind.

I have just received a letter from Dr. Councilman in which he asks if there would be any objection to his changing the order which we laid out to be observed in the arrangement of subjects. He suggests the following:- historical, general characteristics of epidemics, symptoms, complications and sequelae, types of the disease, treatment, pathological anatomy and histology, parasitology, small-pox in animals and experimental work. He says that his method is to consider the pathology after the patient has died and not before. I do not know what view you will take but I expect we <sup>had</sup> better let Councilman <sup>"</sup>gang his ain gait<sup>"</sup> and do as he wishes. I am simply saying to him that I am writing you and in the mean time he had better go ahead with the arrangement which he suggests.

I hope you have kept in mind specially the following points about which I wrote:- the settling of the men for the remaining subjects of the neurological volume and that you have also written to Boggs regarding the section that you thought it was well for him to take. There is one matter that perhaps we ought to do something more about and that is a section on the Leishman-Donovan bodies. You once spoke of leaving that off until the sixth volume, as there might be a good deal more work done by then. You may have thought otherwise of it since.

THOMAS MCCRAE,  
107 ST. PAUL STREET,

BALTIMORE MARCH 12, 1906.

Dear Dr. Cairer.

The copy of Bayle's Medical Biography arrived

very many thanks for your kindness in sending it. I

did not have it and am delighted to possess it. It was exceed-

ingly good of you to think of it and keep me in mind.

I have just received a letter from Dr. Councilman in which

he says it there would be any objection to his changing the or-

-der in which we laid out to be observed in the management of sub-

-jects. He suggests the following: - historical, general charac-

-teristics of epidemics, symptoms, complications and sequelae,

and the disease, treatment, pathological anatomy and his-

-tory, parasitology, small-pox in animals and experimental work.

He says that his method is to consider the pathology after the

patient has died and not before. I do not know what view you

take but I expect we better let Councilman have his say

and do as he wishes. I am simply saying to him that I am

glad you and in the mean time he had better go ahead with the

arrangement which he suggests.

I hope you have kept in mind especially the following points

out which I wrote: - the settling of the man for the remaining

subjects of the neurological volume and that you have also written

pages regarding the section that you thought it was well for

to take. There is one matter that perhaps we ought to dis-

-cuss more about and that is a section on the leishman-dog-

-e disease. You once spoke of leaving that off until the sixth

issue, as there might be a good deal more work done by then.

I may have thought otherwise of it since.

#2

I have been quite busy and was up in Hamilton the other day, seeing a typhoid patient with Glassco. I also saw Olmstead's brother in consultation with Dr. Malloch and was very much impressed by the hard-headed sense that he has. Olmstead's brother had a severe septicaemia but was rather better when I left.

I hope that matters are going well with you, and with kindest regards,

Yours truly

Thomas McCrae

Lambert has not yet sent in his section on  
'Morphine' - Damn him - I am sending  
letters and telegrams frequently, but he  
takes no notice - I should like to be  
behind him with a hypodermic of  
strychnia and a very blunt needle as  
it too - T.M.C.

Barker is laid up with some form of acute  
arthritis - I do not know how Thayer regards  
it as to nature - I hope he soon gets about.

There is much ailment over the mild  
tuberculosis bills before the Annapolis house - Thayer  
and Jacobs are rather pitted against each other.

DR. THOMAS MCCRAE,  
807 ST. PAUL STREET.  
CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE, March 27, 1906.

Dear Dr. Osler.

I received your letter of the sixteenth yesterday. I had already written Dr. Councilman suggesting that he might have some one to help him with the clinical part of his article, but his reply rather suggested that he was going to do it himself. I had a letter from Mr. Lea a few days ago in which he says they are still having trouble with the strike but that they expect to be able to go ahead all right very shortly. Lambert promises the remaining section of his positively this week. Mr. Lea wrote me that he did not feel like starting anything until they had your introduction, which does not seem to be necessary.

You do not say anything in regard to the question of illustrations for Craig's article, about which I wrote you some time ago. I hope the letter did not go astray. If you should find that you had not answered it will you do as soon as convenient, please.

I was sorry to hear that you had had so much trouble with a cold. Nearly every one here has been in the same boat. I do not think we have ever had a winter with tonsillitis and influenza so prevalent as this year. Barker is still in bed, <sup>but improved</sup> and I think Thayer has decided that the arthritis is rheumatic. He looks better and I think the effusion is pretty well gone. We are having the most infernal weather and the spirits of all the patients are very low.

My kindest regards to all the household. With best wishes

Yours truly

Thomas McCrae

*Tell Mrs Osler she may be very thankful  
to have escaped Baltimore weather  
this March. BALTIMORE, March 30, 1906.  
It has been bad, in fact — bad <sup>time</sup>*

Dear Dr. Osler.

*The Intertubercular Clinical Club meets in  
Phila. April 20 & 21 — You might  
like to send your blessing.*

I have received a letter from Lusk in Toronto asking me to contribute an article for a special number of the British Medical Journal in July. He said they wished articles from as many Canadians as possible and said that you had promised to contribute. I have written that I have so much on hand that I do not care to tackle a new article, but I have gotten on fairly well with the carcinoma of the stomach material, having extracted all the hundred and fifty extra cases, and I thought perhaps we might send that in together. You may however think it better to keep all that material for the second edition of the monograph.

There is one matter that we have perhaps let escape our attention, that is, the short section on blackwater fever which you were going to write to add to Craig's article. You may have done it before this. If not I have not said anything to the Leas about it and I should think it could be easily sent in a little later.

I hope you have kept the question of the remaining assignments for the neurological volume in mind and have also written Boggs regarding his writing a section on a number of the minor infections, febricula, etc. I sent you a note a few days ago regarding the question of deciding about the illustrations for Craig's article.

I trust you are feeling quite well again, and with kind regards,

Yours very truly

There is one matter that we have perhaps let escape our  
attention, that is, the short section on Jackwater fever which  
you were going to write to add to Graef's article. You may have  
one if before this. If not I have not said anything to the  
editor about it and I should think it could be easily sent in a  
little later.

I hope you have kept the question of the remaining ar-  
ticles for the neurological volume in mind and have also  
written Graef regarding his writing a section on a number of  
the minor infections, febricula, etc. I sent you a note a few  
days ago regarding the question of deciding about the illustra-  
tions for Graef's article.

I trust you are feeling quite well again, and with kind  
Yours very truly

BALTIMORE, Aug 3<sup>rd</sup> 1905.

Dear Dr. Osler - I am just back from home - I went up to see Mrs Mackenzie in Guelph - the doctor's wife. She died of anaemia, which may have been renal but was curious. I ran up to Muskegon and saw John Macbalem. He seems to me decidedly better - The lung condition has improved greatly but the albumenuria still continues. In the way I saw Mr Woodward of Birmingham. He had some kind of an attack in June and was filled full of the worst lot of drugs hypodermically - among others Hoffmann's anodyne. As a consequence he still nurses his legs. But his general condition is excellent.

As to the spleen. Fletcher still has his Gout section to hand in - but it is nearly ready - Lambert is still to hear from -

re tuberculosis - Brown wanted someone to do the section on pathology and I have got Macbalem persuaded - Brown thought it was page but I thought

40 <sup>more</sup> nearly correct for MacC. Do you not agree?

Then Baldwin who had part of the net has thrown up the sponge - does not think he can do it for lack of time. All curses be on men who

give up like a in the game - I have written

Brown to ask if he thinks there is any use in trying to persuade Baldwin to go on. I am

afraid he may quit like an and leave us in a worse hole.

DR. THOMAS MCCRAE,  
935 ST. PAUL STREET,  
CONSULTATION HOURS,

BALTIMORE, Aug. 8<sup>th</sup> 05.

Dear D<sup>r</sup> Wles. Your two letters to hand. D<sup>r</sup> Dunbar's article arrived safely - and I shall have it translated. I think I wrote you that D<sup>r</sup> Mueser wrote that he would have his ready about the beginning of October. Brown had tried to get ~~an~~ Christiani to do the section on the pathology of tuberculosis. but he could not do it. I think we are lucky to get MacCallum. As to Blackwater fever. a section from you would be splendid.

Have you decided anything as to Relapsing Fever? of course we can put it at the end of the Infectious Diseases in vol III - which would give long a tome. You once spoke of putting it in vol I.

I have written to all the men for the neurological volume about whom you had decided - giving the approximate length of their articles and saying they would have at least a year.

Fletcher's article on Diabetes are very good. His 'gout' is yet uncoer. But he should be along in a few days.

DR. THOMAS MCCRAE,  
935 ST. PAUL STREET.  
CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE,

Practice has been quite busy with me and some old consultations round the town coming in. The hospital is well filled. Dr. Hurd goes in a few days and has asked me to look after things - which I am far from keen on doing - but almost have to as there seems no one else available for him to get.

From Mrs. Osler's letter you seem to be having a good time generally. I hope that social duties may not grow too exacting.

In view of the delay of Lambert, I think of sending in all the rest of the illus. to the sea - of vol. I. They can get at it - as Lambert's article can be pruned if it be too long.

Best wishes to Mrs. Osler and Rev. St. It's blooming lonely in town with everyone away. But there is lots of work.

And with kin's regards

Yours sincerely,

Thomas McCrae

BALTIMORE

For the last few days I have been quite busy with the  
work of a consultation. Tomorrow the same thing  
is. The hospital is well filled. I have  
done in a few days and have not had the  
after thought which I had for four days.  
I am going but almost sure to be there soon.  
I am the same as for the last few days.

From the other side of the river to the  
town of a good many people. I hope that  
I shall be able to give you a satisfactory  
answer to the question of the value of the  
work of the hospital. I think of writing you  
in the future. I am sure that you will  
be interested in the work of the hospital.

Best wishes to the other side of the river.  
I am sure that you will be interested in  
the work of the hospital. I am sure that  
you will be interested in the work of the  
hospital. I am sure that you will be  
interested in the work of the hospital.

BALTIMORE, Aug. 29<sup>th</sup> 05

Dear Dr. Osler -

As things are behind hand with the system had I not better write to the men on Vol III - due Oct 1<sup>st</sup> - and say that they may have longer or do you think it is better to let things go - some of them will be late enough anyway! In case I notify them how much longer had I better say? Six weeks or two months?

Had the title of Weall's paper on the chemical poisons better not be put 'Diseases caused by chemical agents'? He has it "Diseases due to Chemical substances".

We are having a very good summer. The hospital is busy and there are a good many typhoids in. The disease this year is of a severe type but so far we have had a low mortality. There is a considerable increase in the cases in Baltimore and the - walk department

BALTIMORE, Aug 22<sup>nd</sup> 02

Dear O'Brien -

The things in which I have  
with the doctor has to be better written  
the more on that - our doctor's  
that they may have longer or so  
think of it better let things go -  
of them - will be late enough  
In case of anything later, I'll  
proceeding to better way? Or  
two months?  
that the title of "Social Reform"  
the character of the book, but  
but "Disarm course of  
"disarm" the name of  
"Disarm course of"  
We are having many  
The hospital is busy and  
day many appointments -  
this year is of a severe type

BALTIMORE,

is making the same old statement that none of them are from the water.

I heard from D<sup>o</sup> Hurd that D<sup>o</sup> Welch's brother in law is seriously ill. I hope it will not cut his trip short. They are busy getting his books in order and binding it a slow task.

Everyone away at present and the town rather lonely if there was any time to think of it. I have had a surprising amount of consultation work and realize how too much of it plays the mischief with one's work. However as soon as the others get back my share will diminish.

I hope you are having a good summer and are all well. Best wishes to Mrs. Oble and Rev. And with kindest regards as ever

Yours sincerely,

Thomas McCrae.

DR. THOMAS MCCRAE,  
807 ST. PAUL STREET,  
CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE, Oct 6<sup>th</sup> 05

Dear Dr. Osler,

Nothing very special to report on  
System matters. Do you think with this delay  
that I should notify the contributors of volumes  
after the 1<sup>st</sup> ed - which is done? Or is it better to  
wait for a short time yet before doing so?

Regarding my own article - would you have  
any objection to my quoting a saying of  
yours at the head of one section? I have  
picked out some things - such as Harker  
Smith's remarks re treatment to head that  
section - and thought of one of yours about  
the extent to which the history can be  
written from American sources - to put at  
the head of the historical section. If you  
think it all right and have no objection.

Under treatment - should I give a para-  
graph to Thistle and his treatment? I should  
be glad of your opinion on this.

I had a hurried visit home and got  
a couple of days in Montreal - seeing a  
good many of the men. My brother is in  
good shape and has lots of work.

BALTIMORE, Oct 14 1882

Dear Sir,

I have your report of the 10th inst. and am glad to hear that you have been successful in your search for the cause of the trouble. I am sure that your report will be of great value to the company.

I have also your report of the 12th inst. and am glad to hear that you have been successful in your search for the cause of the trouble. I am sure that your report will be of great value to the company.

I have also your report of the 14th inst. and am glad to hear that you have been successful in your search for the cause of the trouble. I am sure that your report will be of great value to the company.

BALTIMORE, Feb. 5<sup>th</sup> 08,

Dear D<sup>r</sup> Osler - Aeto your notes regarding the  
illustrations - I have not been able to find the  
Fischer article - Deut. Med. Wochen - I have  
finally tracked down Boshimis article but it is not in  
Richard's Festschrift. I do not know that I am  
sure which of Van Schwelck's figures you wish -  
(Nothnagel). You said you were forwarding  
a photograph of a healed aneurism - but it has  
not arrived.

An English mail came this morning but there  
was no sign of your Endocarditis proof. I hope it  
has not gone astray. I also hope you have the  
section in Diseases of the Arteries -

Spicked out some photographs for the aneurism  
section. They should come out well.

We are all much the same here. D<sup>r</sup> Welch off to  
Chicago for a few days. Everybody is much as usual.  
Best to all the family. and with kindest regards

Yours very sincerely,  
Thomas McCrae

Please ask Miss Nichols not to use any of  
that thin typewriter paper. The ink blebs and it is very  
hard to read - But do not let her delay to copy anything  
that is already on it. T. McC.

807 ST. PAUL STREET,  
CONSULTATION HOURS  
3-5 P. M.

BALTIMORE, February 11, 1908.

Dear Dr. Osler:

Yours of the 31st. arrived yesterday, and I hope that you will be able to get the manuscript off as you expected. I hope that you have not lost sight of the section on the "Diseases of the Arteries". I have sent in several aneurism pictures and am trying to get a couple of x-ray plates from Baetjer.

Dr. Garrod sent his manuscript on but writes that he has not done the sections on "Malformations" and "Circulatory Disturbances". He evidently thinks that he let me know of this before, but I can not find that I have any word of it. I shall have to try and see if I can get one of the men here to do it. I suppose if the worst comes I can do it myself. I should think that we ought to be able to get out the volumes quicker than you suggest. With your manuscript on hand we can manage Vol. IV very quickly, and Vol. V is about one-half in galley. I suppose that you remember that you have sections in Vol. VI on the "Trophic Conditions".

Everything here goes on as usual. With kind regards to you all,

Yours truly,

Thomas McCrae

BALTIMORE, Feb. 21-08

Dear Dr. Blake.

The deers are raising the devil about things. I hope for everybody's sake that all your nos. is away before this reaches you. I hope you have sent the endocarditis part some time ago. Did you note my query as to the description you wished given about these figures from Thomas - (Veicher, Arch III), Borboen, and von Schröder. (Nothnagel)? I want to be sure that they are given as you wish.

The vol. I. work is going along and I hope that we will have the rest of it before long.

The deers ask if I am at you for you des. for vol. I. They are evidently suspicious but I fancy that you will have little trouble in clearing off these sections. They are specially sulphuric in some comments in Thayer and his actions.

DR. THOMAS MCCRAE,  
807 ST. PAUL STREET,  
CONSULTATION HOURS  
3-5 P. M.

BALTIMORE,

Amy got down on Tuesday and is at the  
Jacobs. She is very well and I think hasn't  
a good time. There is lots going on and she  
is meeting lots of people. I am doing  
pretty well in the way of getting work done.  
but perhaps not having as much sleep as  
might be.

Campbell Howard has been down for the  
week. He looks very well and everyone has  
been so glad to see him.

I hope Alice is blowing in and getting on  
famously at school. My best to you  
all and with prayers that all your  
material is in the way.

Yours truly

Thomas McCrae

BALTIMORE, Feb. 28<sup>th</sup> - 08.

Dear Dr. Osler -

The news are getting much stirred up  
over the non-arrival of your des. I hope it is away  
before this. In any case the gally of the Endocarditis  
section should be - I do not like to send that on  
without your corrections - I hope you notes to send.

1. The designations you wish put on the illustrations  
from the German works and how fully you wish  
them described.

2. The section on diseases of the arteries.

The vol. II. material seems to be well forward and I  
hope we can get it out very soon after vol. II.

Anna is now at the Thayers and I think  
enjoying her visit. Thayer has had a long time  
over Ridge Trumble's illness - His death was very  
sad - You have probably heard of it. He died of  
septicæmia following an infection at an operation.

I hope you are all very well and quite over the  
the colds - Best wishes to the household - and  
with prayers for the speedy arrival of material

Yours very sincerely  
Thomas McCrae

THE JOHNS HOPKINS HOSPITAL,

NORTH BROADWAY.

BALTIMORE, Oct 13<sup>th</sup> 1905

Dear Dr. Cole,

A hurried note to catch  
the mail - I have just had a letter  
from Biggs saying he expected to have  
done his article during the summer but  
was unable to do so and does not think  
he has time now. He wants to write  
an extra article on "The Means of  
Prevention of Infectious Diseases".  
I do not know whether it is worth  
while to try and persuade him -  
otherwise have you any other in mind  
or would you let it go?

Best wishes as always

Yours

Thomas McCrea

DR. THOMAS MCCRAE,

807 ST. PAUL STREET,

CONSULTATION HOURS,  
3-5 P. M.

BALTIMORE,

The Van Sleds baby is a nearly perfect specimen  
and seems to be thriving.

Poor Tom Beale, came to a sad ending - hanged  
himself. You remember he came down to J.H.H.  
a year ago. He had seemed much better and  
had been at business with every prospect of  
recovery. One day he went to the funeral of a  
friend - came home and made away with himself.  
My brother had looked after him for a time but  
luckily was not in charge for some months past.

The session has begun. The large number of  
men in the South Year is a problem but things  
will soon get into shape. I go on the Dispensary  
a Thayer's days. Barker seems to be talking  
to clinical things. No chemical dominos have  
begun as yet.

I hope that the days go well. I was glad  
to see that you were going to deliver courses of  
lectures over there. But do not let them put too  
much on you. Things may soon get as bad  
as they were here.

And with best wishes as ever

Yours Sincerely,

Thomas McCrae

Oct 6<sup>th</sup>

over.

The autograph copy of your treatise <sup>was</sup> received - for which many thanks.

Dr Hare wrote saying you had sent him word of some article on 'Bronchiectasis' - Dr McPhedran has that section - Hare only having the lungs: Y. H. C.

DR. THOMAS MCCRAE,  
807 ST. PAUL STREET,  
CONSULTATION HOURS,

BALTIMORE, Nov. 23<sup>rd</sup> 05

Dear Dr. Welsch. Your letter is to-day. It is good to think of seeing you before long. I wish we could stir Lambert up. I had a very unsatisfactory letter from him two days ago - nothing definite and I fear he is going slow. The devil and his dam take hold on him. I am writing him every few days -

I enclose a letter from Stockholm - I wrote him saying that it would be a great disappointment to you if he threw up the article on the spleen, and asking him to postpone any final action until you wrote him. - I should feel very sorry if he persists. As you notice he will do the introductory Israel article.

Mr. Lee wrote me the other day that he had not got your idea of the introduction yet. I said that I thought they could be sure of that on short notice at any time.

Best to you all - and with best wishes

Yours Sincerely,  
Thomas McCrae.

Dr. Welch got your letter to the Graduate today. He is very well despite the fact that he now gets up early - usually by 8 am - 'mirabile dictu'.

BALTIMORE, MD. 21202

Dear Sir,  
I have the honor to acknowledge the receipt of your letter of the 15th inst. in relation to the case of the above named patient. The patient has been under my care since the 1st of July, 1902, and has since that time been treated with the most careful attention. The patient is now in a fair state of health and is able to take his usual diet and exercise.

I am sorry to hear that the patient has been unable to attend to his business for some time. It is my hope that the patient will be able to resume his usual activities in the near future. I will continue to keep you advised of the patient's progress.

I am, Sir, very respectfully,  
Your obedient servant,  
Thomas Morris, M.D.

Yours truly,  
Thomas Morris

Enclosed for you are the reports of the patient's progress since the last report. I am, Sir, very respectfully,  
Your obedient servant,  
Thomas Morris, M.D.

Based on <sup>Applied</sup> Sciences which have revolutionized the world within  
a century it is small wonder that medicine has become  
a most progressive of the art which minister to human  
welfare. <sup>Reflecting</sup> In every age the profession has reflected in its  
thought and in its practice the dominant views on life  
and <sup>the</sup> profession has not <sup>only</sup> kept <sup>pace</sup> but <sup>has</sup>  
outward march of the race but it has often, and ably  
set the pace, which has not infrequently improved  
rapid for nothing human effort <sup>would follow</sup> could we today  
make effective the knowledge we possess!

The study of disease with a view to prevention the study  
of disease with a view to cure these are the alpha & omega  
of our Art. The study of life in all its manifestations  
{ the study of life processes in all their modifications - these  
are the alpha & omega of our Science
