# MCGILL COLLEGE CALENDAR 1870.

## ADDENDA ET CORRIGENDA.

Since the first part of the Calendar was printed a Scholarship of \$120 yearly value has been founded by Charles Alexander Esq. ; T. M. Taylor Esq. has offered \$100 yearly for another Scholarship; and T. M. Thomson Esq., who in the past session gave \$250 for prizes, has offered a sum of \$300 to furnish next session, two Exhibitions of \$125 each and \$50 for the encouragement of the study of German. As a consequence the following changes are to be noted :

Pages 9, 10, 11 — There are now SIXTEEN Scholarships and Exhibitions (instead of twelve) distributed as follows:—

*First Year.*— Three Exhibitions of \$125 each and one of \$100

*Second Year.*— Four Exhibitions of \$125 each.

*Third Year.*— Four Scholarships (two for Science and two for Classics & Modern Languages) viz:— two of \$125 each yearly : one of \$120 yearly : and one of \$100 to \$120 yearly.

*Fourth Year.*— Three Exhibitions of \$125 each and one of \$100.

The Exhibition \$100 in the Fourth Year will be given on an Examination in the following Course in Logic, Moral and Mental Philosophy:—

Mansel's Prolegomena Logica.

Aristotle's Ethics.

Butler's Sermons on Human Nature, with the Preface and Dissertation on Virtue.

Reid's Essays VI. Ch. 4, 5, 6, 7, 8.

## McGill University, Montreal.

The Thirty-Eighth Session of this University, being the Eighteenth under the amended charter, will commence in the Autumn of 1870.

By virtue of the Royal Charter, granted in 1821 and amended in 1852, the Governors, Principal and Fellows of McGill College, constitute the Corporation of the University; and, under the statutes framed by the Board of Governors with approval of the Visitor, have the power of granting degrees in all the Arts and Faculties, in McGill College, and in Colleges affiliated thereto.

The Statutes and Regulations of the University have been framed on the most liberal principles, with the view of affording to all classes of persons the greatest possible facilities for the attainment of mental culture and professional training. In its religious character the University is Protestant, but not denominational; and while all possible attention will be given to the character and conduct of students, no interference with their peculiar religious views will be sanctioned.

### I. MCGILL COLLEGE.

**THE FACULTY OF ARTS.**—The complete course of study for the Degree of B. A. extends over four Sessions, of eight months each; and includes Classics and Mathematics, Experimental Physics, English Literature, Logic, Mental and Moral Science, Natural Science, and one Modern Language, or Hebrew; all of which subjects are imperative in the first three years of the Course; but in the fourth year options are allowed in favour of the Honour Courses in Classics, Mathematics, Mental and Moral Science, Natural Science, and English Literature. Certain exemptions are also allowed to Professional Students. There are also Special and Partial courses, and facilities are afforded for the practice of Meteorological observations.

**THE FACULTY OF MEDICINE.**—The complete course of study in Medicine extends over four Sessions, of six months each, and leads to the degree of M. D., C. M.

**THE FACULTY OF LAW.**—The complete course in Law extends over three Sessions, of six months each, and leads to the degrees of B. C. L. and D. C. L.

[Details of the above courses of study, with the fees and the dates of commencement of the classes, will be found in subsequent pages.]

### II. AFFILIATED COLLEGES.

Students of these Colleges are matriculated in the University, and may pursue their course of study wholly in the Affiliated College, or

in part therein and in part in McGill College, and may come up to the University Examinations on the same terms with the Students of McGill College.

MORRIN COLLEGE, *Quebec*.—Is affiliated in so far as regards degrees in Arts and Law. The ordinary Course in Arts includes Classics, Mathematics, English Literature, Mental and Moral Philosophy and Logic. There are Honour Courses in Classics and in Mental and Moral Philosophy.

### § I. MATRICULATION AND ADMISSION.

Candidates for Matriculation as Undergraduates, are required to present themselves to the Dean of the Faculty, on the 14th of September, for examination; they may, however, enter after the commencement of the Session, if, on examination, found qualified to join the classes.

The subjects of examination for entrance into the First Year, are Classics, Mathematics, and English.

*In Classics.*—Latin Grammar, Greek Grammar, and one easy Latin and one easy Greek author. The authors recommended are Cæsar; Sallust; Virgil (*Æneid*, B. I.); Xenophon (*Anabasis*, B. I.); Homer (*Iliad*, B. I.)

*In Mathematics.*—Arithmetic; Algebra, to Simple Equations inclusive; Euclid's Elements, Books, I., II., III.

*In English.*—Writing from Dictation.

Candidates may be admitted to the standing of students of the Second Year, provided that they pass the Sessional Examination of the First Year, or an examination in the following subjects, at the beginning of the Second Year:—

*In Classics.*  
*Greek.*—Homer, Book VI.; Xenophon, *Anabasis*, Book I.; Grammar and Prose Composition.

*Latin.*—Virgil, *Æneid*, Book VI.; Cicero, Orations against Catiline; Grammar and Prose Composition.

*In Mathematics.*

*Euclid.*—Books I., II., III., IV., VI., with Defs. of Book V. (omitting propositions 27, 28, 29 of Book VI.)

*Algebra.*—To end of Quadratic Equations (Colenso's Alg.).

*Trigonometry.*—Galbraith & Haughton's Trigonometry, Chaps. 1, 2, 3, 4, 6, to beginning of numerical solution of plane triangles.

*Arithmetic.*—Ordinary Rules.—Proportion, Interest, Discount, &c., Vulgar and Decimal Fractions, Square Root.

*In English Literature.*—English Grammar and Composition.

*In French or German.*—Grammar and easy Translation.

[Candidates who are unable to pass the entrance Examination of the Second Year in Modern Languages, may be allowed to enter, but will be required to take additional lectures in one Modern Language in the Second Year, or to take the subject in both the Second and Third Years.]

Students of other Universities may be admitted, on the production of certificates, to a like standing in this University, after examination by the Faculty.

Candidates for Matriculation as Partial Students taking three or more Courses of Lectures, or as Students in any Special Course, will be examined in the subjects necessary thereto, as may from time to time be determined by the Faculty.

Persons desirous of taking one or two Courses of Lectures as Occasional Students, may apply to the Dean for entry in his Register, and may procure from the Secretary, tickets for the Lectures they desire to attend.

Every Student is expected to present, on his entrance, a written intimation from his parent or guardian, of the name of the minister of religion, under whose care and instruction it is desired that the Student shall be placed, who will thereupon be invited to place himself in communication with the Faculty on the subject. Failing such intimation from the parent or guardian, the Faculty will endeavour to establish such relations.

*Latin*.—Virgil, bk. IV.; Horace, Satt. bk. I.; Juvenal, Satt. III. and VIII.; Terence, Adelphi; Plautus, Aulularia; Livy, bk. XXII.; Tacitus, Hist. bk. I. Greek and Latin Prose Composition. *Text-Books*.—Wilkins's Manuals. Grammar.—*Text-Books*.—Hadley's Greek Grammar; Smith's Student's Latin Grammar; Max Müller's Lectures on the Science of Language, First Series. Ancient History. *Text-Book*.—Rawlinson's Manual of Ancient History.

One will be given on an Examination in Mathematics and Natural Philosophy, as follows:—

The Mathematical Physics (Ordinary and Honour) of third year. Lloyd's Wave Theory of Light. Salmon's Geometry of Three Dimensions, (first six chapters.)

One will be given on an Examination in Natural Science, as follows:—

1. Detailed Anatomy of the Stem, Pericarp and Seed, (Gray's Text Book.)
2. The Natural Families *Ranunculaceæ*, *Orchidaceæ* and *Filices*, as represented in Canada, (Gray's Manual.)
3. Classification of *Anthozoa*, *Brachiopoda* and *Crustacea*, with Canadian examples, (Dawson's Handbook.)
4. Anatomy of a Gray-fish or Lobster and of a Bivalve Shell Fish, (Owen's Invertebrata.)
5. Physical and Dynamical Geology, as in Dana's Manual, Pts. 1st and 4th.

#### 2. EXEMPTIONS FROM FEES UNDER PRESENTATION SCHOLARSHIPS, &c.

These entitle the Students holding them to Exemption from the Sessional Fees in the Faculty of Arts.

Sixteen of these have been placed by the Governors at the disposal of His Excellency the Governor General. Candidates must pass the usual Matriculation Examination.

By command of His Excellency four of these Exemptions will be offered for competition in the Matriculation Examination of the ensuing session. Students of the First and Second Years are eligible. The examination will be a special one, in the subjects of the First and Second Years.

Eight Exemptions from fees may be granted by the Board of Governors, from time to time, to the most successful Students who may present themselves as candidates. By order of the Board one of these is given annually to the *Dux* of the High School.

In the event of any Academy or High School in the Province of Quebec offering for competition among its pupils an annual Bursary in the Faculty of Arts, of not less than \$80, the Governors will add the amount of the fees of tuition thereto.

Any Academy, or High School, sending up in one year three or more candidates competent to pass creditably the Matriculation Examination, will be entitled to an Exemption from fees for the most deserving of such candidates.

An Exemption from fees may be given annually to any teacher holding the Model School or Academy Diploma of the McGill Normal School, recommended by the Principal and Professors of the School, and passing creditably the Matriculation Examination in Arts.

## § III. COURSE OF STUDY.

## ORDINARY COURSE FOR THE DEGREE OF B. A.

*First Year.*—Classics; French or German; English Literature; Pure Mathematics; History; Elementary Chemistry.

*Second Year.*—Classics; French or German; English Literature; Logic; Pure Mathematics; Botany.

*Third Year.*—Classics; English Literature; Mental and Moral Philosophy and Rhetoric; Mixed Mathematics; Experimental Physics; Zoology.

*Fourth Year.*—Classics; Mental and Moral Philosophy; Mixed Mathematics; Experimental Physics; Mineralogy and Geology.

Undergraduates are required to study either French or German for two years, (viz., in the First and Second Years) taking the same language in each year. Any student failing to pass the Examination at the end of the Second Year, will be required to pass a Supplemental Examination, or to take an additional Session in the Language in which he has failed. In addition to the obligatory, there are other Lectures, attendance on which is optional.

The Lectures in Modern Languages will be so arranged that Students competent and desirous to take in the same year the Lectures in French and in German may do so.

Students who intend to join any Theological school, on giving written notice to that effect at the beginning of the First Year, may take Hebrew instead of French or German.

The Faculty may permit any student to take Spanish instead of French or German.

Undergraduates are arranged according to their standing, as Students of the First, Second, Third, and Fourth Years; and are required to attend all the Courses of Lectures appointed for their several years, under the regulations as to attendance and conduct stated in § VII. The only exceptions are those in favour of Honour and Professional Students stated below.

## HONOUR COURSES.

At the examination for the Degree of B. A., Honours are given in the following subjects, for which special Honour Courses are provided:—(For details see under § X.)

1. *Classics.*
2. *Mathematics and Physics.*
3. *Logic and Mental and Moral Philosophy.*
4. *English Language, Literature and History.*
5. *Natural Science.*

Students taking B. A. Honours in any of the above Courses may omit two of the ordinary subjects in the Degree Examination, under the conditions stated in § IV. 4.

In Mathematics and Physics, Honours are also given in the First, Second, and Third Years, and in Classics in the Third Year.

## § IV. EXAMINATIONS.

## COLLEGE EXAMINATIONS.

There are two Examinations in each year; one at Christmas, and the other at the end of the Session. In both of these, Students will be arranged according to their answering, as 1st Class, 2nd Class, and 3rd Class.

Students who fail in any subject in the Christmas Examination, are required to pass a Supplemental Examination in that subject before admission to the Sessional Examination.

Students who fail in one subject in the Sessional Examination, are required to pass a Supplemental Examination in that subject. Should they fail in this, they will be required in the following Session to take the Lectures and pass the Examination in the subject in which they have failed, in addition to those of the ordinary Course, or to pass the Examination alone without attending Lectures, at the discretion of the Faculty.

Failure in two or more subjects at the Sessional Examination involves the loss of the Session. The Faculty may permit the Student to recover his standing by passing a Supplemental Examination at the beginning of the ensuing Session. For the purposes of this regulation, Classics and Mathematics are each regarded as two subjects.

The time for the Supplemental Examinations will be fixed by the Faculty; and such Examination will not be granted at any other time, except by special permission of the Faculty, and on payment of a fee of \$5.

## UNIVERSITY EXAMINATIONS.

## I. FOR THE DEGREE OF B. A.

There are three University Examinations; the *Matriculation*, at Entrance; the *Intermediate*, at the end of the Second Year; and the *Final*, at the end of the Fourth Year.

1. The subjects of the Matriculation Examination are stated in Section I.

2. In the Intermediate Examination, the subjects are Classics and Pure Mathematics, Logic, and the English language, with one other Modern language, or Botany. Theological Students are allowed to take Hebrew instead of a Modern language. The subjects for the Examination of 1871, are as follows:—

*Classics*.—Greek.—Lysias.—In Eratosthenem. Isocrates.—Ad Demonicum.

Latin.—Valerius Maximus.—Book III.

Latin Prose Composition.

*Mathematics*.—Arithmetic.

Euclid, Books I., II., III., IV., VI. and def. of Book V.

Algebra to Quadratic Equations, inclusive.

Trigonometry, including use of Logarithms.

*Logic*.—Bowen's Treatise.

*English*.—Spalding's History of English Literature.

An English Essay.

With one of the following:—

1. *Botany and Vegetable Physiology*.—Structural and Systematic Botany, as in Gray's Text-book, omitting the Descriptions of the Orders.

2. *French*.—Moliere, —Misanthrope; Racine, —Britannicus, Athalie, Phedre; Boileau, Art Poetique, History of the French Literature of 17th and 18th centuries; Translation and Retranslation.
3. *German*.—Schmidt's German Guide. Adler's Reader. Translation into German.
4. *Hebrew*.—Grammar to the end of the Irregular Verbs. Translation from the Book of Genesis. Exercises,—Hebrew into English and English into Hebrew.

3. For the Final Examination six subjects are appointed; namely (1) Classics, (2) Mixed Mathematics, (3) Mental and Moral Philosophy, (4) Natural Science, (5) Experimental Physics, (6) One Modern Language and Literature (or Hebrew) with History.

Every Candidate must pass in four of these, namely, Classics and Mixed Mathematics, which are obligatory, and any two of the remaining subjects at his option. The subjects for 1871, are as follows:

1. *Classics*.—Greek.—Demosthenes.—The Olynthiacs.  
Eschylus.—The Prometheus Vincetus.  
Latin.—Tacitus.—Annals, Book II.  
Plautus.—The Aulularia.  
Latin Prose Composition.  
General Paper in Grammar and History.
2. *Mathematics*.—Mechanics  
Hydrostatics  
Optics  
Astronomy } As treated in Galbraith and Haughton's Manuals.

[Except in the case of Exemptions to Professional Students as stated in § V.]

With any two of the following:—

3. *Mental and Moral Philosophy*.—Mansel's Metaphysics,—Part I.—Psychology; Schwegler's History of Philosophy; Whewell's Elements of Morality.
4. *Natural Science*.—Geology and Mineralogy, as in Dana's Geology and Manual of Mineralogy.—The Zoology, Botany and Chemistry necessary to the study of the books above named: or as in Dawson's Handbook of Zoology, Gray's Structural and Systematic Botany, and Wilson's Inorganic Chemistry.
5. *Experimental Physics*.—Electricity.—Frictional and Voltaic, Magnetism.—Acoustics.—Theory of Undulations, Production and Propagation of Sound.—Vibrations of Rods and Plates.—Vibrations of Fluids.—Musical Sounds.—Text-book—Ganot's Physics, translated by Atkinson.
6. *History and English Literature*.—Smith's Student's Gibbon—Smith's Student's Hume—Marsh's Handbook of the English Language and Collyer's History of English Literature.

Or instead of History and English, Candidates may take one of the following:—

- (a) *History and French*.—History as above. The course of French for the Fourth Year.—Bossuet—Discours sur l'Histoire Universelle; Boileau—Art Poetique. Translation into French, and French Composition.
- (b) *History and German*.—History as above. Schiller—Geschichte des 30 jährigen Krieges; Goethe—Iphigenie auf Tauris. General paper on Grammar, Translation into German, and German prose Composition.
- (c) *History and Hebrew*.—(Theological Students only). History as above. Hebrew Grammar; Translations from first four chapters of Isaiah; any three of the Psalms; the Chaldaic portions of the Scriptures; Targum of Onkelos on Genesis I. Modern Hebrew Poetry, Halevi or Gabirol.

4. Candidates for B. A. Honours who at the Third Year Sessional Examination, have been placed in the 1st or 2nd Class in any two of the six subjects appointed for the Final Examination, are entitled to the following privileges:—

(1). They may claim to have the Third Year Examination, in these two subjects, regarded as a B.A. Examination in the same. (This amounts to exemption at the ordinary B. A. Examination from two of the subjects required. § IV. 3.)

(2). They are required to attend the Ordinary Lectures of the Fourth Year in two subjects only. These must be the subjects in which they are to pass the Ordinary B. A. Examination, if Lectures are delivered in them; if not, the choice is left to the Candidate.

No Student shall be entitled to the above privileges, unless his attendance on Lectures in the Fourth Year, and progress in the subject in which he is a Candidate for Honours, shall be satisfactory to the Professor, nor unless he shall have obtained a Certificate of creditable answering in the Honour Examinations.

## II. FOR THE DEGREE OF M. A.

Bachelors of Arts, of at least three years' standing, are entitled to the degree of Master of Arts, after such examination and exercises as may be prescribed by the Corporation. The exercise at present appointed is the preparation of a Thesis on any literary, scientific, or professional subject to be selected by the candidate, and approved by the Faculty. The Thesis to be submitted to the Faculty and reported on to the Corporation.

## § V. SPECIAL PROVISIONS FOR PROFESSIONAL STUDENTS.

### I. LAW AND MEDICAL STUDENTS.

Students of the Third and Fourth Years matriculated in the Faculties of Law or Medicine of this University, are entitled to the following exemptions:—

In the Third Year they may omit the Lectures and Examinations in any one of the following subjects:—Zoology, Experimental Physics, or Rhetoric.

In the Lectures of the Fourth Year, they may omit Greek; and also Geology or Experimental Physics. At the Christmas Examination of the Fourth Year, they may omit Astronomy and Optics.

In the Ordinary B. A. Examination, they may, in Classics pass in Latin alone; and in Mixed Mathematics, in Mechanics and Hydrostatics alone.

To be allowed these privileges in either year, they must give notice at the commencement of the Session to the Dean of the Faculty, of their intention to claim exemptions as Professional Students, and must produce at the end of the Session, certificates of attendance on a full course of Professional Lectures in the year for which the exemptions are claimed.

## II. STUDENTS OF AFFILIATED THEOLOGICAL COLLEGES.

Such Students, whether entered as Matriculated or Occasional, are subject to the regulations of the Faculty of Arts in the same manner as other students.

The Faculty will make formal reports to the Governing body of the Theological College, to which any such Student may belong, as to:—(1) his conduct and attendance on the classes of the Faculty; and (2) his standing in the several examinations; such reports to be furnished after the Christmas and Sessional Examinations, severally, if called for.

Matriculated Students are allowed no exemptions in the course for the degree of B. A., till they have passed the Intermediate Examination; but they may take Hebrew in the First and Second Years, instead of Modern languages.

In the Third and Fourth Years they are allowed exemptions from the following subjects:—

In the Third Year they may omit Astronomy and Optics, Experimental Physics, and Rhetoric.

In the Fourth Year they may omit Experimental Physics and English Literature.

Certificates of attendance on the full course of lectures in the Theological College, must be produced by Students who avail themselves of these exemptions, before presenting themselves for Examination.

[No Student will be allowed in the same session both Professional and Honour exemptions.]

## § VI. MEDALS, HONOURS, PRIZES AND CLASSING.

1. GOLD MEDALS will be awarded in the B. A. Honour Examinations, to Students taking the highest Honours of the First Rank in the subjects stated below, and who shall have passed creditably the Ordinary Examinations for the degree of B. A.

The *Chapman Gold Medal*, for the Classical Languages and Literature.

The *Prince of Wales Gold Medal*, for Logic and Mental and Moral Philosophy.

The *Anne Molson Gold Medal*, for Mathematics and Natural Philosophy.

The *Shakespeare Gold Medal*, for the English Language, Literature and History.

The *Logan Gold Medal*, for Geology and other Natural Sciences.

In the event of there being no candidates for any Medal, or of none of the candidates fulfilling the required conditions, the Medal will be withheld, and the proceeds of its endowment for the year may be devoted to prizes in the subject for which the Medal was intended. (Under this regulation, the Anne Molson Prize in Mathematics, will be offered at the

end of the session of 1870-71.) For details see announcements of the several subjects below.

2. HONOURS, of First or Second Rank, will be awarded to those Matriculated Students who have successfully passed the Examinations in any Honour course established by the Faculty, and have also passed creditably the ordinary Examinations in all the subjects proper to their year.

3. CERTIFICATES of High General Standing will be granted to those Matriculated Students who are placed in the First Class in the aggregate of the studies proper to their year.

4. PRIZES OR CERTIFICATES, to those Matriculated Students who may have distinguished themselves in the studies of a particular class, and have attended all the other classes proper to their year.

Students taking B. A. Honours will be placed at the head of the Degree list: and Students who pass the Ordinary Degree Examinations will be arranged as 1st Class, 2nd Class, or 3rd Class, according to their answering.

5. THE STEWART PRIZE of \$20, established by the Rev. Colin C. Stewart, B.A., is open to all Undergraduates, and also to Graduates of this or any other University studying Theology in any college affiliated to this University.

1. The Prize will not be given for less than a thorough examination in Hebrew Grammar passed in the First Class, in reading and translating the Pentateuch and such poetic portions of the Scriptures as may be determined.

2. In case competitors should fail to attain the above standard, the prize will be withheld and a prize of forty dollars will be offered in the following year for the same.

[Course for the present year:—Hebrew Grammar (Gesenius); Translation and analysis of the first ten chapters of Genesis; the Prophet Habakkuk (the whole book); and the first five Psalms.]

3. There will be two Examinations of three hours each, one in Grammar, and the other in Translation and Analysis.

The names of those who have taken Honours, Certificates, or Prizes, will be published, in the order of merit; and with mention, in the case of Students of the First and Second Years of the Schools in which their preliminary education has been received.

## § VII. ATTENDANCE AND CONDUCT.

All Students shall be subject to the following regulations for attendance and conduct:—

1. A Class-book shall be kept by each Professor and Lecturer in which the presence or absence of Students shall be carefully noted; and the said Class-book shall be submitted to the Faculty at all their ordinary Meetings during the Session.

2. Professors shall note the attendance immediately on the commencement of their Lectures, and shall omit the names of Students entering thereafter, unless satisfactory reasons are assigned. Absence or tardiness, without sufficient excuse, or inattention or disorder in the Class-room, if

persisted in after admonition by the Professor, shall be reported to the Dean of Faculty, who may reprimand the student, or refer to the Faculty, as he may think proper. He may also suspend from classes until the next meeting of the Faculty.

3. The number of times of absence, from necessity or duty, that shall disqualify for the keeping of a Session, shall in each case be determined by the Faculty.

4. While in the College, or going to and from it, Students are expected to conduct themselves in the same orderly manner as in the Class-rooms. Any Professor observing improper conduct in the College building or grounds, may admonish the student, and if necessary report him to the Dean.

5. Every student is required to attend regularly the religious services of the denomination to which he belongs, and to maintain without, as well as within the walls of the College a good moral character.

6. When Students are brought before the Faculty under the above rules, the Faculty may reprimand, report to parents or guardians, disqualify from competing for prizes and honours, suspend from Classes, or report to the Corporation for expulsion.

7. Any Student injuring the furniture or building, will be required to repair the same at his own expense, and will in addition, be subject to such other penalty as the Faculty may see fit to inflict.

8. All cases of discipline involving the interests of more than one Faculty, or of the University in general, shall be immediately reported to the Principal, or, in his absence, to the Vice-Principal.

### § VIII. LIBRARY AND MUSEUM.

1. The books in the Library consist of two divisions:—1st, those which may be lent: 2nd, those designated by the general term "Books of Reference," which may not, under any circumstances, be removed from the Library.

2. Students may borrow books from the Library, on depositing the sum of four dollars with the Librarian, and signing a receipt for the books: such deposit to be returned to the Student on his returning the books uninjured.

3. Students may borrow not more than three volumes at one time except on special recommendation of a Professor, and must return them within two weeks, on penalty of a fine of one shilling for the first week of detention, and two shillings and six-pence for each subsequent week.

4. A Student incurring a fine will be debarred the use of the Library, until the fine has been paid.

5. Any volume or volumes lost or damaged by a student, shall be paid for by him, at such rates as the Faculty may direct, having reference to the value of the book and of the set to which it may belong.

6. Students may read in the Library at such hours as may be determined by the Faculty.

7. Professors and Lecturers may borrow any books required by them for their duties in the College, not exceeding ten volumes at any one time. Books so borrowed must be returned at or before the end of each Session.

8. Graduates in any of the Faculties, on making a deposit of four dollars, are entitled to the use of the Library, subject to the same rules and conditions as students, but they are not required to pay the Annual Library Fee.

9. Members of the McGill College Book Club are, by a regulation of Corporation, entitled to the use of the Library on the same conditions as Graduates.

10. Persons not connected with the College may consult books in the Library, on obtaining an order from any of the Governors, or from the Principal, the Dean of Faculty or any of the Professors; and donors of books or money to the amount of Fifty Dollars, may at any time consult books on application to the Librarian.

11. The Library will be open from 10 a.m. to 4 p.m., daily, except Saturdays, during the Session, and in the months of May and June. On Saturday it will be open from 1 to 4 p.m.

12. No one is allowed to enter the alcoves or to take down books from the shelves, except the Governors, Members of Corporation, Professors, the Librarian and his assistants, or those whom any of the above may accompany personally.

13. A person desiring to read or to borrow a book, which he has ascertained from the Catalogue to be in the Library, will fill up one of the blank forms provided for Readers and Borrowers respectively, and hand it to the Librarian, who will thereupon procure him the book.

14. Readers must return the books they have obtained to the Librarian before leaving the Library.

15. No conversation that can disturb Readers is permitted in the Library.

16. The times and conditions of study in the Museum will be arranged by the Professor of Natural History.

#### § IX. FEES AND RESIDENCE.

<i>Matriculation Fee</i> (To be paid in the Year of Entrance only),	\$4
<i>Sessional Fee</i>	\$20
<i>Library Fee</i>	\$2
<i>Gymnasium Fee</i>	\$2

*Undergraduates and Students in Special Courses* are required to pay all the above Fees.

*Partial Students* are required to pay the Matriculation, Library and Gymnasium Fees, and \$5 for each Class which they attend, or \$20 for all the courses.

*Occasional Students*, or those taking one or two courses of Lectures only, and not Matriculated, are required to pay \$5 per Session for each course.

The Matriculation, Library, and Gymnasium Fees are exigible from Students, holding exemptions from Sessional Fees.

*Graduates in Arts* are allowed to attend without payment of fees all lectures except those noted as requiring a special fee.

The fees must be paid within a fortnight after the commencement of attendance in each session. In case of default, the Student's name will be removed from the College books, and can be replaced thereon only by permission of the Faculty and on payment of a fine of \$2.

Graduation Fee for the Degree of B.A. - - - - \$5

Do. do. for the Degree of M.A. - - - - \$10

The Graduation Fees must be paid before the Examinations.

Students in Arts are permitted to board in the City; but arrangements have been made for receiving Students who may desire to reside as boarders in the College, and for placing such Students under the immediate superintendence of the Rev. Prof. Cornish, to whom application may be made.

## § X. COURSES OF LECTURES.

### 1. ORDINARY COURSE.

#### 1.—CLASSICAL LITERATURE AND HISTORY,

Professor, Rev. G. CORNISH, M. A.

##### GREEK.

*First Year.*—HOMER.—ILIAD, BOOK X.

ARBIAN.—BOOK III.

*Greek Prose Composition.*

*Second Year.*—LYSIAS.—IN ERATOSTHENEM.

ISOCRATES.—AD DEMONICUM.

EURIPIDES.—MEDEA.

*Greek Prose Composition.*

*Third Year.*—DEMOSTHENES.—THE OLYNTIACS.

SOPHOCLES.—ELECTRA.

*Fourth Year.*—ÆSCHYLUS.—PROMETHEUS VINCTUS.

##### LATIN.

*First Year.*—VIRGIL.—ÆNEID, BOOK VI.

CICERO.—EPISTOLÆ SELECTÆ.

*Latin Prose Composition.*

*Second Year.*—HORACE.—EPISTLES, BOOK I.

VALERIUS MAXIMUS.—BOOK III.

*Latin Prose Composition.*

*Third Year.*—JUVENAL.—SATIRES III., VIII., & X.

PLAUTUS.—AULULARIA.

*Latin Prose Composition.*

*Fourth Year.*—TACITUS.—ANNALS, BOOK II.

*Latin Prose Composition.*

In the work of the Class the attention of the Student is directed to the collateral subjects of History, Antiquities and Geography; also to the Grammatical structure and affinities of the Greek and Latin Languages; and to Prosody and Accentuation.

#### 2.—ENGLISH LITERATURE.—(MOLSON PROFESSORSHIP). LOGIC, MENTAL AND MORAL PHILOSOPHY.

Professor VEN. ARCHDEACON LEACH, D.C.L., LL.D.

*First Year.*—English Language and Literature. Text-books—Bain's English Grammar; Spalding's History of English Literature. Logic. Text-book—Thompson's Outlines of the Laws of Thought.

- Second Year.*—English Literature and Anglo-Saxon Grammar; Text-books Klipstein's Anglo-Saxon Grammar; Spalding's English Literature. Logic. Text-book—Thompson's Outlines.
- Third Year.*—Mental and Moral Philosophy. Text-book—Whewell's Elements of Morality, Book I., Introduction; II. Jus; III. Morality; IV. chap. 14; Oaths, V. VI. Stewart's Outlines of Moral Philosophy. Rhetoric. Text-book—Whately's Rhetoric, I., II., III.
- Fourth Year.*—Mental and Moral Philosophy. Text-books—Mansel's Metaphysics, Schwegler's History of Philosophy. English Literature. Text-book—Marsh's Hand-book.

### 3.—FRENCH LANGUAGE AND LITERATURE.

Professor, P. J. DAREY, M.A., B.C.L.

- First Year.*—DEFIVAS, Grammaire des Grammaires, MOLIERE, l'Avare, les Femmes savantes, le Misanthrope. Dictation. Colloquial exercises.
- Second Year.*—*Ordinary Course:*—DEFIVAS, Grammaire des Grammaires. RACINE, Andromaque, Britannicus, Iphigénie. Translation into French:—DR. JOHNSON'S Rasselas. DEMOGEOT—Littérature Française. Dictation, Parsing, Etymology. Colloquial exercises. *Advanced Course:*—POITEVIN, Grammaire Élémentaire. RACINE, Phèdre, Athalie, les Plaideurs. Parsing, Etymology, Dictation. Translation into French:—GOLDSMITH, She stoops to conquer.
- Third Year.*—POITEVIN, Grammaire Élémentaire. CORNELLE, Le Cid, Cinna, Horace. Translation into French:—GOLDSMITH, Vicar of Wakefield. French Composition, Dictation. History of the French Literature of the 19th century.
- Fourth Year.*—BOILEAU, Art Poétique. Lectures on the French Literature. GERUZEZ, Littérature Française. Translation into French. French Composition.
- The Lectures in the Advanced Class in the 2nd Year, and in the 3rd and 4th Years, are given in French.

### 4.—GERMAN LANGUAGE AND LITERATURE.

Professor, C. F. A. MARKGRAF, M.A.

*First and Second Year.*—*Ordinary Course:*—This Course comprises Grammar, Reading and Analysis, translations oral and written, and Dictation. Special regard is had to the affinities of the German with the English. Text Book; Schmidt's German Guide (1st and 2nd Course); Schmidt's Reading Book, and Adler's Progressive German Reader.

*Third and Fourth Years.*—*Ordinary Course:*—The Students following this Course have the same Studies and exercises as are prescribed for the Advanced Course of the Second and Third Years.

*First Year.*—*Advanced Course:*—Text Books:—Schmidt's German Guide (1st and 2nd Course); Adler's Progressive German Reader.

*Second and Third Years.*—*Advanced Course:*—Text Books:—Schmidt's German Guide (3rd Course); Peissner's German Grammar (Parts III. & IV.); Adler's Hand Book of German Literature. The exercises comprise select readings in German Prose and Poetry; translations from English writers, and Composition.

During this Course a series of Lectures will be delivered on the History of German Literature, from the earliest periods down to the classical age of Goethe and Schiller; closing with a brief notice of the state of German Literature at the present day.

## 5. HEBREW AND ORIENTAL LITERATURE.

Professor, REV. A. DE SOLA, LL.D.

*Elementary Course.*—(For Students of the First and Second Years.)—Grammar:—Text-Book:—Gesenius' Hebrew Grammar, with exercises in Orthography and Etymology. Reading:—Translation and Grammatical Analysis of Historical Portions of the Scriptures—Syntax—Mishlé Shualin—Fables, &c.

*Advanced Course.*—(For Students of the Second, Third and Fourth Years.)—Introduction to the study of Hebrew Poetry—is spirit and characteristics. Lowth and Sarchi as Text Books. Translation from the Psalms, Lamentations and Isaiah. Ancient compared with Modern Hebrew Poetry; the productions of Halevi, Gabirol, &c. Grammar, Exercises, &c., continued.

*The Chaldee Language:*—Grammar, *Mbo Halashon Aramith* of J. Jeitteles. The Chaldee portions of Scripture. Targum of Onkelos and T. Yerushalmi.

*The Syriac Language:*—Grammar, (Uilemann's) and Translations.

The course comprises lectures on the above Languages and their Literature in particular, with a general notice of the other Oriental Languages, their genius and peculiarities. Comparative Philology, affinity of roots &c., also receive due attention, while the portions selected for translation will be illustrated and explained by reference to Oriental manners, custom, history, &c.

## 6. SPANISH LANGUAGE AND LITERATURE.

REV. PROFESSOR DE SOLA.

(Extra Fee for this Class, \$5.00).

The Study of the Spanish Language on this continent, being generally pursued with special reference to commercial purposes, it will be sought to impart in this course, a practical knowledge of the Castilian, the richest and most harmonious of the Peninsular languages—as well as an acquaintance with its Literature.

Ollendorf's Spanish Grammar by Vdazquez and Simone, and the Reader of Velazquez, are the Text-books employed in the Junior Class, who will also be exercised in composition by both written and oral exercises. In the Senior Class, Fernandes' Exercises, continuation of Grammar and Composition, Cervantes Don Quixote, Quintana Vida del Cid, and Mariana's Historia will be the subjects of study. Besides a special comparison with the Portuguese Language, a general notice, literary and historical, of the Basconce and other dialects, will be given.

## 7. MATHEMATICS AND NATURAL PHILOSOPHY.

Professor, ALEXANDER JOHNSON, LL.D.

**MATHEMATICS.**—(First Year)—Arithmetic.—Euclid, Books 1, 2, 3, 4, 6, with Definitions of Book 5 (omitting proposition 7, 28, 29, of Book 6). Todhunter's Edition.—Colenso's Algebra, part 1 to end of Quadratic Equations.—Galbraith and Haughton's Plane Trigonometry to end of Solution of Plane Triangles.—Nature and use of Logarithms.

**MATHEMATICS.**—(Second Year)—Arithmetic, Euclid, Algebra, and Trigonometry as before.—Remainder of Galbraith and Haughton's Plane Trigonometry.—Conic Sections treated Geometrically. (The Parabola as in Drew's Conic Sections, the definitions of the Ellipse and Hyperbola, with the fundamental properties of their tangents.) Euclid, Book XI., Props. 1 to 21; Book XII., Props. 1, 2.

The course for the Intermediate University Examination consists of the Mathematics for the first two years, except Conic Sections and Solid Geometry.

**MATHEMATICAL PHYSICS AND ASTRONOMY.**—(Third Year)—Galbraith and Haughton's Mechanics (omitting chap. 5, of Statics, Hydrostatics, Optics and Astronomy).

At the Ordinary Examinations, answers to questions in Mechanics, on the Chapters on Friction, Collision of Bodies and Projectiles, will be taken into account only in de-

termining the relative positions of those whose other answers shall entitle them to be placed in the First Class.

EXPERIMENTAL PHYSICS.—(*Third and Fourth Years*)—1.—*Light*.—Theories.—Reflection.—Refraction.—Dispersion.—Interference and Diffraction.—Double Refraction.—Polarisation. 2.—*Heat*.—Dilatation of Solids, Liquids and Gases.—Specific and latent Heat.—Radiation and Conduction.—Mechanical Theory of Heat. 3.—*Electricity*.—Static and Dynamical; including Electro-Magnetism.—Magneto-Electricity.—Thermo-Electricity.—Diamagnetism.—Electric Measurements.—Practical Applications to Telegraphy, &c. 4.—*Magnetism*. 5.—*Acoustics*.—Theory of Undulations.—Production and Propagation of Sound.—Vibrations of Rods and Plates.—Vibrations of Fluids.—Musical Sounds. Text-Books—Ganot's Treatise translated by Atkinson, and Tyndal on Heat. This Course extends over two years.

The Subjects for the Session 1871-72 are Electricity and Acoustics.

The Lectures in Mathematical and Experimental Physics will be illustrated by Apparatus.

## 8. NATURAL HISTORY.

Professor, J. W. DAWSON, LL.D., F.R.S., F.G.S.

### I. CHEMISTRY.—(First Year.)

An Elementary Course of Inorganic Chemistry, accompanied by Experiments.

*Text-Book*—Roscoe's Lessons in Elementary Chemistry.

### II. BOTANY.—(Second Year.)

(1) *Histology, Morphology and Physiology of the Plant*, or description of its elementary tissues and organs, and investigation of its functions of nutrition and reproduction.

(2) *Systematic and Descriptive Botany*, with special notices of the Flora of Canada, and instructions for collecting and determining Plants, and for the use of the Microscope. (3) *Geographical Botany*.

*Text Book*—Gray's Structural and Systematic Botany.

A Prize of \$20, will be given for the best collection of Plants, and the greatest proficiency in their determination. The prize collections or duplicates of them to remain in the College Museum. Candidates must be Students in Botany of the previous session.

### III. ZOOLOGY AND COMPARATIVE PHYSIOLOGY. (Third Year.)

(1) *General Zoology*, including the Elements of the Histology, and Comparative Anatomy and Physiology of Animals, with the Principles of Classification and the division of the Animal Kingdom into Provinces or Sub-Kingdoms.

(2) *Descriptive Zoology*, including the characters of the Classes and Orders of the Animal Kingdom, illustrated by typical examples, and as far as possible by Canadian species.

*Text Book*—Dawson's Hand-book of Zoology, with books of reference.

A Prize of about \$20 will be given for the best named collection of Canadian Fossils, Insects, or Marine Invertebrates: conditions as stated above under Botany.\*

### IV. MINERALOGY AND GEOLOGY. (Fourth Year.)

(1) *Mineralogy*.—Chemical and Physical characters of Minerals, including Crystallography, the methods of determining species, and Descriptive Mineralogy; with special reference to those species most important to Geology, or useful in the Arts.

(2) *Physical Geology*.—Composition of Rocks and their structure on the small scale. Origin of Rocks, considered as Aqueous, Igneous, or Metamorphic. Arrangement of Rocks on the large scale; stratification, elevation and disturbances, denudation.

(3) *Chronological Geology and Palaeontology*.—Data for determining the relative ages of formations. Classification according to age. Fauna and Flora of the successive periods. Geology of British America.

*Text-Books*—Dana's Manuals of Mineralogy and Geology, with Lyell's Elements.

The Lectures in Natural History will be accompanied with demonstrations in the Museum. Students in Natural History are also entitled to tickets of admission to the Museum of the Natural History Society of Montreal.

\* From the Surplus income of the Logan Medal Fund.

## 9. APPLIED CHEMISTRY.

Professor, T. STERRY HUNT, LL.D., F.R.S., &c.

Dr. Hunt will deliver a short Course of Lectures on some selected topics of Technical Chemistry; of which due notice will be given.

## 10. METEOROLOGY.

Professor, CHARLES SMALLWOOD, M.D., LL.D.

Instruction in Meteorological Observations will be given in the Observatory at hours to suit the convenience of the senior students.

## 11. ELOCUTION

MR. JOHN ANDREW, Instructor.

Students are recommended by the Faculty, to avail themselves of the instructions of Mr. Andrew, who will make arrangements for evening classes to meet during the Session.

## 2. HONOUR COURSES.

## I. CLASSICS.

## B. A. HONOURS, BEING THE HONOUR COURSE FOR STUDENTS OF THE THIRD AND FOURTH YEARS.

Candidates for B. A. Honours in Classics will be examined in the following subjects:—

## I. GREEK.

I.—*Greek Philosophy.*

Plato.—Republic, Books I. & II.

Aristotle.—Nicomachean Ethics, I. & II.

II.—*Greek History.*

Herodotus.—Books VIII. & IX.

Thucydides.—Book I.

Xenophon.—Hellenics, Books I. & II.

III.—*Greek Poetry.*

a. *Epic.*—Homer.—Odyssey, Books I., II. & III.

Hesiod.—Works and Days.

b. *Dramatic.*—Æschylus.—Prometheus Vinculus.  
Seven against Thebes

Sophocles.—Antigone.

Euripides.—Hippolytus.

Aristophanes.—The Frogs.

c. *Lyric and Bucolic.*—Pindar.—Olympic Odes.  
Theocritus.—Idyls I. to VI.

IV.—*Greek Oratory.*

Demosthenes.—De Corona.

Æschines.—Contra Ctesiphontem.

## II. LATIN.

I.—*Roman History.*

Livy.—Books XXI., XXII. & XXIII.

Tacitus.—Annals, Books I. & II.

Histories, Book I.

II.—*Roman Poetry.*

a. *Epic.*—Virgil.—Æneid, I. to IV.

- b. *Dramatic*.—Plautus.—*Anulularia*.  
Terence.—*Adelphi*.  
c. *Satiric*.—Horace.—*Satires*, Book I.  
Juvenal.—*Satt.* VIII. & X.  
Persius.—*Satt.* V. & VI.
- III.—*Roman Oratory and Philosophy*.  
Cicero.—*De Imperio Cn. Pompeii*.  
*De Inventione*.  
*De Officiis*.

## III. HISTORY OF GREECE AND ROME.

*Text-Books* :—

1. Grote's History of Greece, Vols. III. to VIII.
2. Arnold's History of Rome.
3. Mommsen's History of Rome.

## IV. COMPOSITION.

1. Composition in Greek and Latin Prose.
2. General Paper on Grammar, History and Antiquities.

The Examination for B. A. Honours will extend over four days, in the morning from 9 to 12, and the afternoon from 2 to 5.

2. LOGIC, MORAL PHILOSOPHY, AND MENTAL PHILOSOPHY.  
B. A. HONOUR COURSE.

I. *Logic*.

Sir William Hamilton's Lectures on Logic; with Appendix, V. § 3.  
Mill's Logic, I., III., & V.  
Whately's Logic, Book III.  
Mansel's Prolegomena Logica.  
Introduction to Mansel's edition of Aldrich's Logic.

II. *Moral Philosophy*.

Ritter's History of Ancient Philosophy, Book VII. 2, 3, 4; VIII. 5; IX. 5;  
X. 2; XI. 5; XII. 3.  
Mackintosh's Dissertation on the Progress of Ethical Philosophy.  
Schwegler's History of Philosophy, p. 252-261.  
Morell's History of Speculative Philosophy, &c., chap. iv., sec. 1. B.

One of the following ancient Ethical Treatises, at the option of the Student :—  
Plato's Republic, Books I.-IV. (in English.)  
Aristotle's Ethics. (in English.)  
Epicteti Manuale, et Senecæ Dialog. Lib. I., II., VII., XII.

One of the following Modern Ethical Treatises, at the option of the Student :—  
Butler's Three Sermons on Human Nature, with the Preface and the Dissertation on the nature of Virtue.  
Stewart's Philosophy of the Active and Moral Powers, Books I., II., IV.

III. *Mental Philosophy*.

Reid's Essays, VI. ch. 4, 5, 6, 7, 8.  
Supplementary Dissertation, Note A.  
Schwegler's History of Philosophy.  
Ritter's History of Ancient Philosophy, Book II. c. 3.; III. c. 1, 2; VI., IX.  
c. 2, 3; X. c. 1; XI. c. 2, 3, 4; XII. c. 1, 4, 6, 7; XIII.  
Stewart's Dissertation on the progress of Metaphysical and Ethical Philosophy.  
Morell's History of Speculative Philosophy of Europe in the XIXth Century,  
Part II.

- One of the following Ancient writers, at the option of the Student :—  
 Plato :—Phædo and Phædrus; or Theætetus and Protagoras; or Republic,  
 Books VI. and VII.  
 Aristotle :—Metaphysics, Books IV., (V.,) XI. (XII.)  
 One of the following Modern writers, at the option of the Student :—  
 Bacon, Novum Organon, Lib. I.; and de Augmentis Scientiarum, Lib. III., IV.  
 Descartes Meditations.  
 McCosh's Intuitions of the Mind.  
 Ferrier's Institutes of Metaphysics.  
 Sir W. Hamilton's Lectures on Metaphysics.  
 Morell's Outlines of the Philosophy of Mind.  
 Mill's Examinations of Sir Wm. Hamilton's Philosophy.

### 3. ENGLISH LANGUAGE, LITERATURE AND HISTORY.

#### B. A. HONOUR COURSE.

##### I. *Language.*

Klipstein's Anglo-Saxon Grammar.  
 Thorpe's Analecta Anglo-Saxonica.  
 Marsh's Lectures on the English Language, by Smith.  
 Craik's Outlines of the History of the English Language.  
 Tyrwhitt's Essay on the Language and Versification of Chaucer.  
 Trench's Study of Words.  
 Trench's English Past and Present.  
 Trench's Glossary.

##### II. *Literature.*

Required from the Student a general acquaintance with the works of the English  
 Classical authors, and a more minute study of the following portions of  
 English Literature :—

Shakespeare's Plays.  
 Chaucer—Canterbury Tales; The Prologue and the Knight's Tale; the Flower  
 and the Leaf; the House of Fame.  
 Spenser—Fairie Queen; Books I., II.  
 Marlowe—Faustus and Jew of Malta.  
 Milton—Paradise Lost; Comus; Lycidas; L'Allegro.  
 Dryden—Absalom and Achitophel; Annus Mirabilis; Dedications to his  
 Translations of Virgil's Æneid and the Satires of Juvenal.  
 Pope—Dunciad; Essay on Criticism; Rape of the Lock; Eloisa and Abelard;  
 Prefaces to his Translations of Homer's Iliad and Odyssey.  
 Bacon—Essays.

Required to be read in connection with this part of the Course :—

Craik's History of English Literature.  
 Hallam's Literary History of Europe—the parts relating to English Literature.  
 Johnson's Lives of Milton, Dryden, Addison, Pope.  
 Dunlop's History of Fiction.

##### III. *History.*

Required a general acquaintance with the History of England to the year 1714, and  
 a more minute knowledge of the Anglo-Saxon period of the 13th and 14th  
 centuries, and of the period from the accession of Elizabeth to that of  
 George I. The following books are recommended :—

Hume's History of England.  
 Godwin's Life and Times of Chaucer.  
 Pauli's Life of Alfred the Great.  
 Froude's History of England.  
 Macaulay's History of England.  
 Clarendon's History of the Rebellion.  
 Hallam's Constitutional History of England.

## 4. MATHEMATICS AND PHYSICS.

## HONOUR COURSES.

MATHEMATICS.--(First Year.) McDowell's Exercises on Modern Geometry, &c.--Wood's Algebra.--Hind's Plane Trigonometry.

MATHEMATICS.--(Second Year.)--Todhunter's Theory of Equations.--Hind's Spherical Trigonometry.--Salmon's Analytic Geometry, first thirteen chapters.--Hall's Calculus.--Chapters 1, 2, 3, 4, 6, 7, of Diff. Cal.; Chapters 1, 2, 3, 4, 5 of Integ. Cal.

MATHEMATICAL PHYSICS.--(Third Year.)--Todhunter's Statics, (omitting Cap. 13.)--Tait & Steele, Dynamics of a Particle.--Besant's Hydrostatics, Chaps. 1, 2, 3, 5.--Walton's Mechanical and Hydrostatical Problems.--Parkinson's Optics.--Main's Practical and Spherical Astronomy (selected course).

## B. A. HONOUR COURSE.

PURE MATHEMATICS.--Hind's Plane and Spherical Trigonometry.--Todhunter's Theory of Equations.--Hall's Differential and Integral Calculus.--Boole's Differential Equations (selected course).--Gregory's Examples of the Calculus (omitting the last 2 chapters).--Salmon's Conic Sections.--Salmon's Geometry of three Dimensions (selected course).

MECHANICS.--Todhunter's Statics.--Tait & Steele, Dynamics of a Particle.--Routh's Dynamics of a Rigid Body.--Besant's Hydrostatics and Hydro-dynamics.--Walton's Mechanical Examples.--Walton's Examples in Hydrostatics

ASTRONOMY.--Main's Astronomy.--Sir John Herschel's Outlines of Astronomy (Part II. on the Lunar and Planetary Perturbations).--Godfray's Lunar Theory. Newton's Principia, Lib. I., Sects. 1, 2, 3, 9, and 11.

LIGHT.--Lloyd's Wave Theory of Light.

HEAT.  
ELECTRICITY.  
MAGNETISM.  
ACOUSTICS. } As in Ordinary Course.

The examination for B. A. Honours will continue for *four* days, during *six* hours each day.

The Examinations for honours in the other years will continue for *two* days. Engineering Students may be candidates for Honours.

## MATHEMATICAL PRIZE.

The Anne Molson Prize of about \$64, the surplus arising from the Anne Molson Medal fund, is offered for competition to Students of the Fourth Year in April, 1871, at the B. A. Honour Examinations.

## 5. NATURAL HISTORY AND GEOLOGY.

## B. A. HONOUR COURSE.

Students entering for Honours must have passed creditably the examinations in Elementary Chemistry, Zoology, Botany and Experimental Physics; and should know the elements of Drawing. Students entering for practical purposes will be required only to satisfy the Professor of their fitness for the studies of the class.

Candidates for Honours will be expected to attain such proficiency as to be able to undertake original investigations, in some at least of the subjects of study.

The Lectures will include :—

1. An advanced course in General Geology and Palæontology, in connection with which the Students will be required to read Dana's Geology and Owen's Palæontology.
2. Methods of observation and of conducting Geological Surveys. Applications of the science to Mining, Engineering and Agriculture.

3. Canadian Geology, in connection with which the Students will read Logan's Report of the Geological Survey of Canada, and Dawson's Acadian Geology.
4. Practical Palæontology and determination of species; with books of reference from the College Library, and specimens from the Museum.
5. Excursions for Field work will be undertaken when practicable.

In addition to the above, the Student will be examined in any two of the following subjects:—

1. The Systematic part of Botany, as in Gray's "Text Book" and "Manual," and specimens illustrative of these books from the Museum.
2. Owen's Lectures on the Invertebrate Animals, and specimens illustrative thereof from the Museum.
3. Dana's Mineralogy, and specimens illustrative thereof from the Museum.

## § XI. LIBRARY, MUSEUM, APPARATUS AND OBSERVATORY.

### I. THE LIBRARY.

*The Library of the Faculty of Arts* contains about 6,000 volumes of standard works, selected with especial reference to the wants of Professors and Students, and open to their use during the Session.

The most important addition recently made to the Library is the "Redpath Historical Collection" consisting of 761 volumes of the more rare and valuable works relating to English History; and a collection of 255 volumes in Classical Literature presented by Mr. C. Alexander.

(The above statement does not include the Library of the Medical Faculty, which contains upwards of 4,000 volumes.)

### II. THE MUSEUM OF NATURAL HISTORY.

1. **ZOOLOGY.** In this department the Museum contains a general collection of type specimens, illustrating the Orders and characteristic Genera of the Animal Kingdom, the whole arranged and labelled in such a manner as to correspond with the College course on the subject. There are also the following special collections:—

The Carpenter Collection of Shells, being the general collection of Dr. Philip P. Carpenter, presented by him to the University, and shortly to be arranged in a separate room.

The Carpenter Collection of Mazatlan Shells.

The Couper Collection of 2,400 Canadian Insects.

Collections of Canadian Fresh water and Land Shells.

2. **BOTANY.** The Herbarium consists of the Collection of the late Dr. Holmes, of Montreal, presented by him to the University; and with the additions recently made to it, affording a nearly complete representation of the Flora of Canada. There are also collections of European, Arctic and Alpine Plants, and of specimens of Woods, Fungi, &c.

3. **GEOLOGY AND MINERALOGY.**—The general collection consists of a series of the characteristic Fossils of all the great geological periods, with additional suites of specimens, illustrating in greater detail the formations represented in Canada. There is also an extensive collection of Rock specimens, and collections are being formed representing the principal Mineral Regions of Canada.

The Mineralogical Cabinet consists principally of the "Holmes Collection," containing about 2,000 specimens of Canadian and Foreign Minerals. A large portion of these are displayed in glass cases for the use of students, under the arrangement of Dana's Manual of Mineralogy.

All of the above Collections are used to illustrate the lectures, or are open to the inspection of students, who are also entitled to access to the large and valuable collections of the Natural History Society of Montreal.

### III. PHILOSOPHICAL APPARATUS.

The value of the Apparatus is above \$4000. Of this more than two thousand dollars' worth has been lately added by means of a personal subscription amongst some of the Governors. The collection is now very valuable for purposes of illustration in the departments of Mathematical and Experimental Physics. Besides instruments to illustrate Mechanics, (Statics and Dynamics) and Optical instruments, such as Microscopes, a Telescope, Sextant, &c., there is a good collection for Hydrostatics and Pneumatics, another for Heat, and a very full collection for Magnetism and Electricity, (Statical and Dynamical) including Electro-magnetism, Magneto-electricity, Diamagnetism, Thermo-electricity, the Measurement of Electric Resistance, &c. The collection for Light, from Duboscq of Paris, besides apparatus illustrative of the common phenomena of optics, includes the best instruments for exhibiting on a large scale with the aid of the electric light the phenomena of Interference, Diffraction, Polarization and Double Refraction. There is a good collection for Sound (made by Koenig). The apparatus for Dynamical Electricity and Heat has been made by Messrs. Elliot Brothers, of London, makers of the apparatus used by the Committee on Electrical Standards of the British Association for the Advancement of Science.

### IV. CHEMICAL LABORATORY.

The Laboratory is furnished with the Apparatus, Specimens and Chemical Reagents necessary to illustrate the class-lectures in Chemistry; and is also fitted up with all the necessary appliances for the work of a class in Practical Chemistry and for Chemical Analysis.

### V. METEOROLOGICAL AND MAGNETIC OBSERVATORY.

The Basement of the Building is devoted entirely to the observations on Terrestrial Magnetism.

The Ground Story and Leads are the portion of the Building devoted to Meteorological observations.

The Transit tower is for the purpose of giving time to the City, and to the Ships in the Harbour, and is connected by Electric Telegraph with a "Time Ball" at the wharf. Connection by Electric Telegraph having also been established between the Observatory and the Government Buildings at Ottawa, mean time is transmitted daily at noon, and made known there by the firing of a Cannon.

The principal Meteorological Instruments are:—Thermometers for determining the Temperature of the Air; Barometers for ascertaining the atmospheric pressure; Psychrometers for the purpose of determining the Elastic force of Aqueous Vapour, the relative Humidity and Dew Point; Instruments for recording the Solar and Terrestrial Radiation; Rain and Snow Gauges for indicating the amount and duration of Rain and Snow; Ozonemeter for recording the amount of Ozone.

The direction and velocity of the wind are registered by a modification of Dr. Robinson's Anemometer.

Observations on Storms, Auroras, Haloes and other Natural Phenomena which mark the variation of Climate are duly recorded.

The Instruments in the Basement of the Building are for determining the Magnetic Elements; and consist of, (1) a Declinometer for measuring the Declination or Variation of the Magnet; (2) a Unifilar Magnetometer consisting of an apparatus for deflection and vibration, for ascertaining the horizontal Magnetic force; (3) an Inclinator or Dip-needle (No. 30 used in the Magnetic Survey in Great Britain) for showing the Inclination or Dip. From these observations are reduced the absolute value of the Magnetic Elements.

The Observatory is under the supervision of Professor Smallwood, M.D., LL.D., D.C.L.

Demonstrator of Anatomy—DR. FULLER.

Lecturer on Practical Chemistry.--DR. GIRDWOOD.

Matriculation Examiner of the Faculty,—Professor H. ASPINWALL HOWE, LL.D.

The thirty-eighth Session of the Medical Faculty of McGill University will be opened on Monday, 3rd October, 1870, with a general Introductory Lecture, at 11 A.M. The regular Lectures will commence on Tuesday the 4th Oct., at the hours specified in the time table, and be continued during the six months following.

The class-tickets for the various courses are accepted as qualifying candidates for examination before the Universities and Colleges of Great Britain and Ireland, and also before the Medical Boards of the Army and Navy.

To meet the circumstances of General Practitioners in British North America, where there is no division of the profession into Physicians and Surgeons exclusively, the degree awarded upon graduation is that of "Doctor of Medicine and Master in Surgery." This designation is also appropriate, as it agrees with the general nature and character of the previous curriculum demanded of the candidates for this double rank, as is fully specified hereafter. The degree is received by the College of Physicians and Surgeons of Lower Canada.

To intending students desirous of information upon the best manner of pursuing their studies, the following suggestions are made by the Faculty:—

- (1) Exclusively of general education, professional reading for some

time previously to matriculation is advised as a preparation, whereby familiarity with technical terms will be gained, and an insight obtained into the subjects to be brought under notice during lectures.

(2) The student is advised to pass the Matriculation Examination in March so that his four years of pupilage may expire at the close of a winter session. A certificate of having passed such examination before the examiners appointed by the College of Physicians and Surgeons of Ontario will be accepted by this University.

(3) While the University regulations permit a student to graduate after three years attendance upon lectures, provided he furnish proof that he has studied one year in addition with a private practitioner, yet he is recommended to devote four sessions to systematic instruction, as less time is scarcely sufficient in which to acquire a fair knowledge of the many subjects which compose the curriculum.

(4) Attention is recommended to be given during the First Session to the primary branches only; during the Second Session an increase is proper, and two of the final courses may be profitably conjoined with such of the antecedent as are required; while during the remaining period further advance is to be made by completing the curriculum required of the candidate for graduation. Clinical courses should not be taken out during the first Session.

(5) As daily bedside-instruction is almost essential to the student of medicine, the undergraduate is earnestly advised to spend at least the last two summers in availing himself of the opportunities afforded by the large hospitals—general and lying-in—of our city;—in which, moreover, dressships should be obtained.

Enregistration is necessary every Session: it is required upon entrance, or as soon afterwards as possible, and always before any class-tickets are procured. The time fixed for closing the Register is annually on the fifteenth of November. Class-tickets are payable in advance, and if not taken out within the prescribed period of the current session, will not be granted after its expiration.

The ample and varied means which are placed at the disposal of the student by this school, together with the large hospitals in connection with it, are briefly referred to in the following pages.

#### COURSES OF LECTURES.

1. ANATOMY.—[Prof. Scott]—The fresh subject is chiefly employed in

the illustrations of the Lectures in this branch, aided, however, by dried preparations, wax models, plates, &c. full size of life.

The dissecting Room which is large and well ventilated and supplied with every convenience, is under the direction of the Professor of Anatomy, aided by the Demonstrator. It is open from 8 a.m. to 10 p.m., and is lighted with gas.

2. CHEMISTRY.—[Prof. Craik]—Inorganic Chemistry is fully treated; and a large portion of the course is devoted to Organic Chemistry and its relation to Physiology. The branches of Physics bearing upon or connected with Chemistry also engage the attention of the class. For experimental illustration, abundant apparatus is possessed by the Professor, among which may be enumerated, a powerful Air Pump—Oxy-Hydrogen Microscope—Polariscope—extensive series of Crystal Models—Electrical and Galvanic apparatus, Steam-engine, &c., &c.

3. MATERIA MEDICA.—[Prof. Wright]—This course is illustrated from a cabinet of Pharmacological objects; by plates of Medicinal Plants [Wagner, Roque, Stevenson and Churchill]; by dried specimens; by carefully prepared Microscopical objects, &c., &c. Analytical experiments with the ordinary re-agents are also shown; and diagrams with other illustrations, are used. \*

4. INSTITUTES OF MEDICINE.—[Prof. Fraser]—In this course are comprised *Histology, General Pathology, and General Therapeutics*. The minute Structure and composition of the various Organs, and the Fluids and Tissues of the body in health and disease, are explained and illustrated by Microscopic Preparations, and by Plates and Preparations from the Museum.

5. PRACTICE OF MEDICINE.—[Prof. Howard]—The extensive series of plates contained in the Library (Lebert, Cruveilhier, Carswell, Hope, Alibert, Willan, Bateman, &c., &c.) will be employed; also Morbid preparations and models of diseased parts.

6. SURGERY.—[Prof. Campbell]—Divided into Principles and Practice, including Surgical Anatomy and Operative Surgery, exhibited on the subject. The various surgical instruments and apparatus exhibited, and their uses and applications explained and practically illustrated.

7. MIDWIFERY.—[Prof. McCallum]—Including diseases of females

\*The Professor's herbarium has been enriched with a number of beautifully prepared specimens of medicinal plants indigenous to the Ottawa country,—the gift of Dr. Sidney P. Cooke, Ottawa, formerly a member of the class, by whom they were collected and mounted.

and infants, illustrated by a series of drawings on a large scale; by humid preparations; by models in wax; and by the use of the artificial Pelvis.

8. MEDICAL JURISPRUDENCE.—[Prof. Fenwick]—Includes Toxicology—the modes of testing for poisons are exhibited, and post-mortem appearances illustrated by plates—Insanity, Public Hygiene, and Medical Police are touched upon.

9. CLINICAL MEDICINE.—[Prof. Drake]—Taught by lectures and at the bedside—Physical Diagnosis taught practically, and each pupil invited to take part in it. Examinations of the urine, chemically and microscopically explained and illustrated.

10. CLINICAL SURGERY.—[Prof. Fenwick]—Taught in similar manner. For both these classes ample material is afforded by the cases at the Montreal General Hospital.

11. BOTANY AND ZOOLOGY.—[Prof. Dawson]—In addition to the above classes, Students are required to attend one course of Botany, on which subject separate Lectures are delivered to Medical Students. Medical Students will also have access to the Lectures in Zoology in the Faculty of Arts. (For details see announcement of the Faculty of Arts.)

Prizes will be awarded at the end of each Session, to Students in Botany of the class of the previous Session, for the best *Named Collections* illustrative of the Flora of Canada. The collections, or duplicates of them, to remain in the College Museum.

12. PRACTICAL CHEMISTRY.—[Dr. Girdwood.]—Thorough instruction is given in the different departments of Practical Chemistry, under the personal supervision of the Lecturer; and the course includes blow-pipe manipulations, qualitative and quantitative analysis; toxicological investigations, &c., &c.

#### SUMMER COURSE OF CLINICAL INSTRUCTION.

With the view of rendering Clinical teaching more than ever a characteristic feature of the course of instruction given at this school, the Faculty will inaugurate this year a special course of Clinical instruction during the summer months, to which all Matriculated Students will be admitted without charge. This course will commence on the 4th July, and terminate on the 23rd Sept., and will consist of a daily out-door clinic conducted on alternate days, during the first six weeks by Professors Howard and McCallum, and during the last six by Professors Fenwick and

Drake ; Professors Howard and Fenwick—Mondays, Wednesdays and Fridays ; Professors McCallum and Drake—Tuesdays, Thursdays and Saturdays. In addition to the above, daily bedside instruction will be given during the same months, in the wards of the General Hospital by the attending Physicians, Professors Wright and McCallum.

The above course of Clinical instruction does not form a necessary part of the curriculum, but has been established to allow the student facilities for acquiring practical knowledge of disease, when his time is not otherwise occupied in attendance upon lectures.

---

#### LIBRARY AND MUSEUM.

The Library contains upwards of 4,000 volumes, including the most useful books of reference, as well as the most elementary ones : the works of the older authors as well as the most recent. It is open to the Students without charge, under necessary regulations for the care of the books. The Museum contains a large number of preparations, chiefly Pathological ; also, wax and papier-maché models.

---

#### HOSPITALS.

The Montreal General Hospital is visited every day by the attending medical officers, most of whom are Professors of the University. In addition to the in-door patients a large number of out-door patients, including a considerable proportion of children, are treated before the student and will afford materials for the special course of clinical instruction to be given this year. The shipping contributes a great many examples of accidents and surgical cases. The fee for a six months' ticket is Six Dollars ; for perpetual, Sixteen Dollars.

The Operating Room (used also for a lecture room) is so constructed as to suit the convenience of the students in obtaining a good view of the operations.

The University Lying-in Hospital is under the direction of the Professor of Midwifery. Students who have already attended one course of his lectures, are furnished with cases in rotation. The fee for a Six months' ticket is Five Dollars.

## Faculty of Law.

---

The Principal (ex officio).

Professors—BADGELEY.

ABBOTT.

TORRANCE.

LAFRENAYE.

LAFLAMME.

CARTER.

Lecturers—TRENHOLME.

WURTELE.

Dean of the Faculty,—HON. J. J. C. ABBOTT, Q.C., D.C.L.

Secretary of the Faculty,—PROF. P. R. LAFRENAYE, B.C.L.

The Classes in Law will commence on Tuesday the Fourth of October, 1870, and will extend to March 30th, 1871.

The several courses of Lectures in the Faculty of Law comprise every

It is the intention of the Professors, so far as practicable, to explain to the Students, the more important articles of this Code (2615 in number) in the complete course of study as indicated below.

The promulgation of the Code of Civil Procedure, marks another important epoch in the history of our laws. Attention will be specially drawn to its provisions in this course.

The enactment of these Codes of law, it is believed, will lighten much the labours of professors and students, who need no longer view the study of the profession as a vast and ill-digested whole, wanting coherency and certainty. On the contrary, the study of the texts will afford a good stand-point from which the subtle questions of jurisprudence will be the most easily and satisfactorily discussed and finally settled.

The Faculty congratulate the students that their entry into a noble but arduous profession will be much facilitated by the conspicuous land-marks planted by the new Codes; and while intense study and application will still be demanded from the true lover of his vocation, the future of the young jurisconsult of the Province of Quebec may be regarded as opening under the happiest auspices.

EXTRACTS FROM THE REGULATIONS.

1. Any person desirous of becoming a Matriculated Student, shall apply to the Dean of the Faculty for examination, and for entry in the Register of Matriculations, and shall procure tickets of Matriculation and of admission to the Lectures for each Session of the Course.

2. Candidates for Matriculation shall be examined in at least one Latin Classic and in English or French, the standard being such as may be determined by regulation of the Faculty, approved by the Corporation.

3. Students in law shall be known as of the First, Second, and Third Years, and shall be so graded by the Faculty. In each year, Students shall take the studies fixed for that year, and those only, unless by special permission of the Faculty.

4. The register of Matriculation shall be closed on the 15th November in each year, and return thereof shall be immediately made by the Dean to the Registrar of the University. Candidates applying thereafter may be admitted on a special examination to be determined by the Faculty, and if admitted, their names shall be returned in a supplementary list to the Registrar.

5. Persons desirous of entering as Occasional Students, shall apply to the Dean of the Faculty for admission as such Students, and shall obtain a ticket, or tickets, for the classes they desire to attend.

6. Students who have attended Collegiate courses of study in other Universities for

for the keeping of a Session, shall in each case be determined by the Faculty.

(6) All cases of discipline involving the interests of more than one Faculty or of the University generally, shall be reported to the Principal, or, in his absence, to the Vice-Principal.

8. At the end of every Session there shall be a general examination of all the Classes, under the Superintendence of the Professors, and of such other Examiners as may be appointed by the Corporation, which examination shall be conducted, as far as possible, by means of written or printed questions, answered by the students in writing, in the presence of the Examiners. The results shall be reported as early as possible to the Faculty, which shall decide the standing of the Students accordingly.

9. Each Professor shall deliver one Lecture in each week, to the Students of each year, and each Lecture shall be of one hour's duration; but the Professors and Lecturers shall have the right from time to time to substitute an examination for any of such Lectures.

10. No Student shall be considered as having kept a Session in this Faculty, unless he shall have regularly attended at least three courses of Lectures, one of which courses shall be on the Civil Law; nor unless at the end of such Session he shall have passed the Sessional Examination to the satisfaction of the Faculty.

11. The Faculty shall have the power, upon special and sufficient cause shown, to grant a dispensation to any Student from attendance on any particular Course or

Courses of Lectures, but no distinction shall, in consequence, be made between the Examinations of such Students, and those of the Students regularly attending Lectures.

12. The Final Examination for the Degree of B. C. L. shall be conducted in the same manner as the ordinary Sessional Examinations; but the preparation of a Thesis, in Latin, French, or English, upon some subject previously approved by the Dean of the Faculty, shall form an essential part of every such Final Examination.

13. The Elizabeth Torrance Gold Medal in the Faculty of Law shall be awarded to the Student who, being of the Graduating Class and having passed the Final Examination, shall have prepared a Thesis of sufficient merit in the estimation of the Faculty to entitle him to compete, and who shall take the highest marks in a special examination for the Medal, which examination shall in all cases include the subject of Roman Law.

14. The exercises required under the 3rd Art. of the 7th Chapter of the Statutes of this University, to entitle the Student to receive the Degree of B. C. L. in this Faculty, shall consist of Attendance upon Lectures and submission to Examinations as hereinbefore prescribed; and no distinction in respect thereof shall be made between Students applying for their Degrees, whether their attendance upon Lectures shall have been for two or three years.

15. The Fees exigible in this Faculty shall be as follows:—

Matriculation Fee .....	\$ 2 00
Sessional Fee by Ordinary Students .....	15 00
Sessional Fee by Occasional or Partial Students, for each course .....	5 00
Graduation Fee, including Diploma .....	5 00

All of which Fees shall be paid in advance. But Students already on the Books of the University shall not be required to pay any Matriculation Fee; and Students simultaneously attending lectures in the Faculty of Arts shall be received upon such terms as shall be fixed by that Faculty.

Applications for admission may be made to the Dean of the Faculty, or to the Secretary of the College.

This institution is intended to give a thorough training to teachers, especially for the Protestant population of Lower Canada. This end is attained by Instruction and training in the Normal School itself, and by practice in the Model Schools; and the arrangements are of such a character as to afford the greatest possible facilities to Students from all parts of the Province.

The Fourteenth Session of the school will commence on the First of September, 1870, and will terminate on the first of July, 1871.

The complete course of Study extends over three years, and the Students are graded as follows:—

1. *Elementary School Class*.—Studying for the Elementary School Diploma.
2. *Model School Class*.—Studying for the Model School Diploma.
3. *Academy Class*.—Studying for the Academy Diploma.

#### 1. *Conditions of Admission.*

Candidates for admission into the Elementary School Class will be required to pass an examination in Reading, Writing, the Elements of Grammar, Arithmetic and Geography. Admission into each of the higher classes requires a knowledge of the subjects of the previous one.

Each Student must produce a certificate of good moral character from the clergyman or minister of religion under whose charge he has last been, and also testimony that he has attained the age of sixteen years. He will also be required to sign a pledge that he purposes to teach for three years in some public school in Lower Canada.

#### 2: *Privileges of Students.*

On complying with the above conditions, all students will be recognized as *Teachers in Training*; and as such will be entitled to free tuition with the use of text books, and to bursaries in aid of their board, not exceeding \$36.00 per annum in the case of those in the two first Classes, or \$80.00 in the case of those in the Academy Class, should they be successful in obtaining the diploma at the final examination. A portion of this allowance will be advanced to such students as are not resident in Montreal, on their passing the semi-sessional examination at Christmas.

Under the regulations subjoined, and with the view of extending the benefits of the school to all parts of the country, those who reside at a distance of more than ninety miles from the city of Montreal, will also be entitled to a small allowance for travelling expenses proportionate to the distance.

Students resident in Montreal may share in the bursary fund, on producing certificates from their ministers or clergymen that such aid is absolutely necessary to their continuing in attendance at the school.

In addition to religious instruction of a general Protestant character by the Professors, arrangements will be made for special religious instruction by ministers representing the several denominations with which the students may be connected.

No boarding-house is attached to the institution, but every care will be taken to insure the comfort and good conduct of the students, in private boarding-houses approved by the Principal. Board can be obtained at from \$9 to \$12 per month.

At the close of the first year of study, students may apply for examination for diplomas giving the right to teach in Elementary Schools; and after two years' study, or if found qualified at the close of the first year, they will, on examination, be entitled to diplomas as teachers of Model Schools.

Students having passed the examination in the Model School Class, or having advanced to the requisite knowledge, may go on to the Academy Class, and, on examination, may obtain the Academy Diploma.

*The Prince of Wales Medal and Prize* will be given to the Student taking the highest place in the Model School Class, provided that such Student shall attain to the standard fixed by the Regulations of the Council of Public Instruction for this Medal.

All the preceding regulations and privileges apply to female as well as to male students.

Persons holding the degree of B. A. or M. A. of any University in the Province of Quebec, may receive the Academy Diploma, on passing an examination in the art of teaching, and in such other subjects necessary to the Academy Diploma, as may not have been included in their University examinations.

### 3. *Course of Study.*

#### I. ELEMENTARY SCHOOL CLASS, STUDYING FOR THE ELEMENTARY SCHOOL DIPLOMA.

With the view of accommodating those who may be unable to enter at the commencement of the Session, or whose previous education may enable them to enter at a more advanced period, the course of study in this class is divided into terms, as follows:

## FIRST TERM, from September 1st to December 26th.

*(Entrance examination as stated above).*

*English.*—Grammar and Composition so far as to parse syntactically, and write correctly a few short descriptive sentences. Text-Books, Bullion's Grammar and Parker's Progressive Lessons; Reading and Spelling, Etymology, Penmanship, Elocution.

*Geography.*—So far as to have a good acquaintance with the Map of the World.

*History.*—Outline of Sacred and Ancient History.—History of Canada, Text-Books, White and Hodgins.

*Art of Teaching.*—Hygiene in its relation to schools.

*Arithmetic.*—Simple and Compound rules, Vulgar and Decimal Fractions, and Practice, with explanation and demonstration of rules. Text-Book, Sangster's Arithmetic.

*Algebra.*—The Elementary rules, as in the Algebra of Chambers' Educational course.

*Geometry.*—First Book of Euclid.

*Chemistry.*—Introductory Lectures.

*French.*—Elements of Grammar, easy reading and translation. Text-Books, Student's Companion to the study of French. De Fivas' Elementary Reader.

*Natural History.*—Elements of Animal Physiology. Text-book, Dawson's Hand-book of Zoology.

*Drawing.*—Elements and simple outlines.

*Music.*—Elements of Vocal Music.

## SECOND TERM—January 1st to April 1st.

*(Pupils entering at the commencement of this term, will be expected to pass a satisfactory examination in the subjects of the previous term.)*

*English.*—Grammar and Composition, so far as to be able to analyze simple and complex sentences, and to write correctly a short essay on a familiar subject.—Elocution continued.

*Geography.*—So far as a good acquaintance with the physical features and political divisions of the great continents.

*History.*—England and France. Ancient History.

*Arithmetic.*—Proportion, Per-centage, Exchange.

*Algebra.*—Simple Equations of one, two and three unknown quantities.

*Geometry.*—Second and Third Books of Euclid.

*Chemistry.*—Non-metallic Elements.

*French.*—Grammar continued, including Reading, Translation, Oral and Written Exercises.

*Natural History.*—Systematic Zoology. Text Books, Paterson's Zoology for Schools. Dawson's Hand-book of Zoology.

*Drawing.*—Landscape, &c., in pencil.

*Music.*—Vocal Music continued.

## THIRD TERM.—April 1st to July 1st.

(Pupils Entering at the commencement of this term, will be expected to pass a satisfactory examination in the subjects of the two previous terms.)

*English*.—Advanced Lessons in Grammar and Composition—Elocution continued.

*Geography and History*.—Advanced Lessons, with use of Globes and recapitulation of previous parts of the course.

*Art of Teaching*.—School studies and management.

*Arithmetic*.—Conclusion of Commercial Arithmetic, and general Recapitulation.

*Book-keeping* by Single Entry.

*Algebra*.—Quadratic Equations and Recapitulation.

*Geometry*.—Recapitulation and Deductions.

*Chemistry*.—Metallic Elements.

*French, Natural History, Drawing and Music*.—Continued as in the previous term.

*Religious instruction* will be given throughout the Session.

## 2. MODEL SCHOOL CLASS, STUDYING FOR THE MODEL SCHOOL DIPLOMA.

(Students entering this Class, must have passed a satisfactory examination in the subjects of the Elementary School Class. The Class will pursue its studies throughout the Session, without any definite division into terms.)

*English*.—Principles of Grammar and Composition, Style. History of the English Language. Lectures on English Literature. Elocution.

*Geography*.—Mathematical, with Nautical Problems, Detailed course of Political and Physical Geography.

*History*.—Mediæval and Modern, with especial reference to the History of Literature, Science and Art, and to Colonization and Commerce.

*Education*.—Advanced course of Lectures on Educational Subjects.

*Mathematics*.—Logarithmic, Algebraic, and Geometric Arithmetic, Recapitulation of Commercial Arithmetic. Quadratic Equations continued. Ratios and Progressions. Theorem of Undetermined Co-efficients. Binomial and Exponential Theorems. 5th. and 6th books of Euclid.

*Natural Philosophy*.—Mechanics, Hydrostatics and Pneumatics.

*Classics*.—Elements of the Latin Language, as in Bryce's 1st Latin Reader.

*French*.—Student's Companion—Translation from French into English, and from English into French—De Fivas' Reading book continued—Racine.

*Natural History*.—Elements of Botany.

*Agricultural Chemistry*.—Principles, and applications to Canadian Agriculture.

*Drawing*.—Figures from the Flat and from Models—Elements of Perspective.

*Music*.—Instrumental Music, and Concone's Lessons in Vocal Music.

*Religious Instruction* throughout the Session.

### 3. ACADEMY CLASS, STUDYING FOR THE ACADEMY DIPLOMA.

(Students entering this Class must have passed a satisfactory examination in the subjects of the Model School Class.)

*English Literature.*—An advanced course.

*History and Geography.*

*Logic and Ethics.*—As in Abercrombie's Intellectual and Moral Philosophy.

*Mathematics.*—Trigonometry, Solid Geometry, Theory of Equations, Mechanics and Astronomy—Galbraith and Haughton.

*Latin.*—Sallust, Cataline; Virgil, Æneid Book IV; Latin Prose Composition, Roman History.

*Greek.*—New Testament, John's Gospel; Xenophon, Anabasis Bk 1; Grammar and History.

*Botany.*—As in Gray's Text-book.

*French.*—Conversation in French. *French Literature*—Poitevin's French Grammar. Racine and Moliere.

*Elocution.*

*Drawing.*

#### EXTRACTS FROM THE REGULATIONS.

##### *Special Regulations for admission of Pupil-teachers.*

Article First.—Any person desirous of being admitted as a pupil-teacher must apply to the Principal of the Normal School, who, on his producing an extract from the Register of Baptisms, or other evidence, showing that he is fully sixteen years of age, with the certificate of character and conduct required by the 16th article of the General Rules and Regulations, approved by His Excellency the Governor General in Council, on the 22nd December 1856, shall examine the candidate.

If upon his examination it is found that the candidate can read and write sufficiently well, knows the rudiments of Grammar in his mother tongue, Arithmetic as far as the rule of three inclusively, and has some knowledge of Geography, the Principal shall grant him a certificate.

Article Second.—The candidate having thus obtained the certificate of the Principal, shall then, (in the presence of two witnesses, who, with the Principal, shall countersign the same,) sign any application in writing for admission, containing the declaration required by the 23rd general regulation. This shall be forwarded to the Superintendent of the School, together with all the certificates and other documents required, and if the whole be found correct, the Superintendent shall cause the name of the candidate to be inscribed in the Register, and notice thereof shall be given to the Principal.

Article third.—The pupil-teachers shall state the place of their residence; and those who cannot reside with their parents, will be permitted to live in boarding-houses, but in such only as shall be specially approved of. No boarding-houses having permission to board male pupil-teachers, will be permitted to receive female pupil-teachers as boarders, and *vice versa*.

Article Fourth.—Every pupil-teacher on passing the examination will be allowed a sum not exceeding £9, to assist in paying his board.\*

Article Fifth.—Every pupil residing at a distance of more than ninety miles from the city of Montreal, shall be entitled to receive an allowance for travelling expenses, proportionate to the distance, but not to exceed two pounds ten shillings *per annum*.

Article Sixth.—The total amount of allowances paid to pupil-teachers under the foregoing articles shall not exceed £333 6s. 8d. currency, yearly—that being the sum granted for this object; and when the whole of this amount is appropriated, such pupil-teachers as may apply for admission shall not be entitled to any portion thereof, until vacancies shall occur.

---

### *Special Regulations for Government and Discipline.*

Article First.—Pupil-teachers guilty of drunkenness, of frequenting taverns, of entering disorderly houses or gambling houses, of keeping company with disorderly persons, or of committing any act of immorality or insubordination, shall be expelled.

Article Second.—There shall be no intercourse between the male and female pupil-teachers while in the School or when going to, or returning from it. Teachers of one sex are strictly prohibited from visiting those of the other.

Article Third.—They are on no account to be absent from their lodgings after half-past nine o'clock in the evening.

Article Fourth.—They will be allowed to attend such Lectures and public meetings only as may be considered by the Principal conducive to their moral and mental improvement.

Article Fifth.—Proprietors of boarding-houses authorized by the Principal shall report to him any infraction of the rules, with which they have become acquainted.

Article Sixth.—The Professors shall have the power of excluding from the lectures for a time, any student who may be inattentive to his studies or guilty of any minor infraction of the regulations.

Article Seventh.—Pupil-teachers will be required to state with what religious denomination they are connected; and a list of the Students connected with each denomination shall be furnished to one of the Ministers of such denomination resident in Montreal, with a request that he will meet weekly with that portion of the pupil-teachers, or otherwise provide for their religious instruction.

Every Thursday afternoon after four o'clock will be assigned for this purpose.

Article Eight.—In addition to punctual attendance at the weekly religious instruction, each student will be required to attend public worship at his own church, at least every Sunday.

---

Intending students may obtain all necessary information on application to the Principal or either of the Professors.

---

\*Except in the case of Teachers in training for the Academy Diploma, who may receive a sum not exceeding £20.

## MODEL SCHOOL OF MCGILL NORMAL SCHOOL.

Head Teacher of Boys' School—James McGregor, M. A.

" " Girls' School—Amy F. Murray.

These Schools can accommodate about 300 pupils, are supplied with the best furniture and apparatus, and conducted on the most modern methods of teaching. They receive pupils from the age of six and upwards, and give a thorough English education. Fee: Boys' and Girls' Model Schools, 1s. 3d. to 2s. per week; Primary School, 9d.; payable weekly.

PROF. DAREY, M.A.  
MR. J. ANDREW.

The Protestant Board of School Commissioners for the City of Montreal in assuming charge of the High School, desire to render this Institution more efficient than it has been in the past, more available for parents of moderate means, and therefore more popular. They would, in a word, make the High School worthy of the intelligence and growth of the Community in whose interest it has been founded.

On the first of September 1870, the High School will come under the care of the Commissioners. The buildings will have been put into thorough repair, and the whole establishment reorganized.

The School will consist of three Departments:—a Preparatory Department, a Commercial Department, and a Classical Department. Each of these Departments will be under the charge of a Head Master, and a staff of efficient assistants.

#### THE PREPARATORY DEPARTMENT.

The work of this Department will be carried on in a separate School House to be built, during the summer, on the property adjacent to Burnside Hall. It will be under the charge of \_\_\_\_\_ as Head Master, who will be assisted by thoroughly trained Mistresses. Boys will be admitted at the early age of six; and the course in the Department will run over three years. The French language, during the whole period of the Preparatory Course, will receive an equal share of attention with English, and during the last year the rudiments of Latin will be taught. By this means the Head Master will be in a position to suggest to the parents of each boy when leaving the Preparatory Department into which of the two remaining Departments, whether the Classical or the Commercial, he had better pursue his studies: The advantages of this arrangement will commend themselves to the judgment and approval of parents and guardians. There young boys will be entirely separated from the bigger boys of the High School, they will be under female influence, and will be prepared by early familiarity with the French tongue, to pursue the study of it afterwards with ease.

#### THE COMMERCIAL DEPARTMENT.

Will be under the Charge, as Head Master, of David Rodger, Esq., M. A., who has proved himself for a long period in Montreal an able and successful teacher. He will be assisted by other competent Masters. Pupils in this department will be carried on to the highest standard possible of Arithmetic, Writing, Book-keeping and Mathematics; French, German, and Natural Science will also be embraced in the curriculum; so that upon

leaving the High School, that is if permitted to take the full Commercial Course, they will be competent to enter upon and to discharge the duties of assistants in Merchants' Offices, without additional preparation and study.

#### THE CLASSICAL DEPARTMENT.

Will be presided over by H. A. HOWE, ESQ., LL.D., of whose qualities as a teacher of youth, the Commissioners need not speak. Dr. Howe's Scholarship and taste, and his aptitude in teaching, are universally acknowledged by the citizens of Montreal, amongst whom he has been living and whose sons he has been teaching for upwards of twenty years. Dr. Howe will be assisted by Classical masters of proved capacity and skill, and in this department, youths will, as heretofore, be conducted to such advanced studies in Classics, Mathematics, and Natural Science, as shall fit them to enter any one of the Universities of Canada or of Great Britain.

The Commissioners have resolved upon the following scale of Fees, payable in all cases in advance:—

#### PREPARATORY DEPARTMENT.

First Form \$6 per term, \$24 per annum. Second and Third Forms \$7.50 per term, \$30 per annum.

#### CLASSICAL AND COMMERCIAL DEPARTMENTS.

A Uniform charge of \$10.00 per term, \$40.00 per annum.

The School Terms, as heretofore, will be as follows:—

Autumn Term - - - -	1st September to 15th November.
Winter Term - - - -	16th November to 31st January.
Spring Term - - - -	1st February to 15th April.
Summer Term - - - -	16th April to 30th June.

A Drilling Fee of \$2.00 per annum will be exacted from each pupil.

This announcement, which the authorities of the University have allowed to be introduced into their Calendar, presents only a general view of the changes which the Commissioners propose to effect in this Institution.

During the summer, more minute information will be published in the High School Calendar.

THE HISTORY OF THE UNITED STATES

BY JOHN W. B. HARRIS

VOLUME 1

CHAPTER I

The first part of the history of the United States is the history of the discovery and settlement of the continent.

The discovery of the continent was made by Christopher Columbus in 1492.

He sailed from Spain on August 3rd, 1492, and after a long and dangerous voyage, he discovered the continent of America on October 12th, 1492.

He named the continent after his patron saint, St. Christopher.

The first settlement on the continent was made by the Spaniards in 1493.

They established a settlement at San Salvador, in the island of Cuba.

The first settlement on the mainland was made by the Spaniards in 1494.

They established a settlement at Santo Domingo, in the island of Hispaniola.

ANNE MOLSON MATHEMATICAL PRIZE EXAMINATION, 1869.

THURSDAY, SEPTEMBER 23RD:—9 TO 12.

ANALYTICAL GEOMETRY.—ALGEBRA.

*Examiner*.....ALEXANDER JOHNSON, LL.D.

1. Show that  $l^2 \alpha^2 + m^2 \beta^2 = n^2 \gamma^2$  denotes a conic with respect to which  $\alpha \beta \gamma$  are the sides of a self-conjugate triangle.

2. If the co-efficients in the equation of any right line  $\lambda \alpha + \mu \beta + \nu \gamma$  be connected by any relation of the second order in  $\lambda \mu \nu$

$$A \lambda^2 + B \mu^2 + C \nu^2 + 2 F \mu \nu + 2 G \gamma \lambda + 2 H \lambda \mu = 0$$

the envelope of the line is a conic section.

3. A triangle is circumscribed to a given conic, two of its vertices move on fixed right lines, find the locus of the third.

4. Find the principal parameter of the parabola

$$9 x^2 + 24 xy + 16 y^2 + 22 x + 46 y + 9 = 0.$$

5. Find the condition that two conic sections, given by the general equation, should be similar, even though not similarly placed.

6. If through any point  $O$  two chords be drawn meeting a conic in points  $R' R'' S' S''$ , then the ratio of the rectangles  $\frac{O R' \cdot O R''}{O S' \cdot O S''}$  will be constant whatever be the position of the point  $O$ , provided that the directions of the lines  $O R' \cdot O S'$  be constant. Prove this, and examine the exceptional case.

7. Find the condition that the general equation of the second degree in  $\alpha, \beta, \gamma$

$$a \alpha^2 + b \beta^2 + c \gamma^2 + 2 f \beta \gamma + 2 g \gamma \alpha + 2 h \alpha \beta = 0.$$

may represent a circle.

8. Find the radical centre of the circles.

$$(-1)^2 + (y-2)^2 = 7; (x-3)^2 + y^2 = 5; (x+4)^2 + (y+1)^2 = 9.$$

9. The lines joining the corresponding vertices of a triangle and its conjugate, meet in a point.

10. Given the angles of a triangle, one vertex is fixed, another moves along a fixed right line, find the locus of the third.

11. Given vertical angle of a triangle, and the sum of the reciprocals of the sides, the base will always pass through a fixed point.

12. Prove that the roots of the equation

$$\begin{vmatrix} a-\lambda & h & g \\ h & b-\lambda & f \\ g & f & c-\lambda \end{vmatrix} = 0$$

are all real.

13. Every skew symmetrical determinant of even degree is a perfect square.

14. Express the minors of a reciprocal determinant in terms of the constituents of the original determinant.

DIFFERENTIAL AND INTEGRAL CALCULUS.

*Examiner*.....ALEXANDER JOHNSON, LL.D.

1. Find the differential equation of the cycloid and prove that its area is equal to three times the area of the generating circle.
2. Investigate the general method of determining the envelope of a system of curves.
3. The radius of curvature of any curve is

$$R = \frac{\left(1 + \frac{dy^2}{dx^2}\right)^{\frac{3}{2}}}{\frac{d^2y}{dx^2}}$$

4. Change the expression for R in last question into one in which the arc shall be the independent variable.
5. If  $y = f(x)$  be the equation of a curve, prove that the curve is convex or concave to the axis, according as  $\frac{d^2y}{dx^2}$  is positive or negative.
6. Define *singular* points of curves, points of *inflexion*, *multiple* points, *conjugate* points and *cusps*.

a. Find the points of inflexion in the Witch of Agnesi, viz:—

$$y = \frac{2a}{x} \sqrt{2ax - x^2}$$

7. Prove by integration the formula for the area of a circle.
8. Find the integrals

$$\int x e^{ax} \cos kx; \quad \int \frac{1}{x(a + b \sin x)}; \quad \int_{\theta} \sin m\theta \cos n\theta$$

9. Find the integrals

$$\int \frac{x^2 x^4}{e}; \quad \int \frac{x}{x \sqrt{a^4 - x^4}}; \quad \int \frac{1}{x \sqrt{a + bx + cx^2}}$$

10. Find the length of an arc of a parabola.
11. Eliminate by differentiation the functions from

$$z = f(y + ax) + \phi(y - ax)$$

(A) ἐκεῖθεν δὲ διαβὰς τὸν πόρον ἦκεν ἐς Μέμφιν· καὶ θύει ἐκεῖ τοῖς τε ἄλλοις θεοῖς καὶ τῷ Ἀπίδι καὶ ἀγῶνα ἐποίησε γυμνικὸν τε καὶ μουσικόν· ἦγον δὲ αὐτῷ οἱ ἀμφὶ ταῦτα τεχνῖται ἐκ τῆς Ἑλλάδος οἱ δοκιμώτατοι. ἐκ δὲ Μέμφιος κατέπλει κατὰ τὸν ποταμὸν ὡς ἐπὶ θάλασσαν τοὺς τε ὑπασπιστὰς ἐπὶ τῶν νεῶν λαβῶν καὶ τοὺς τοξότας καὶ τοὺς Ἀγριῶνας καὶ τῶν ἰππέων τὴν βασιλικὴν ἰλην τὴν τῶν εταίρων. ἔλθων δὲ ἐς Κάνωβον καὶ κατὰ τὴν λίμνην τὴν Μαρῖαν περιπλεύσας ἀποβαίνει ὅπου νῦν Ἀλεξάνδρεια πόλις ὠκίσται, Ἀλεξάνδρον ἐπώνυμος. καὶ ἔδοξεν αὐτῷ ὁ χώρος κάλλιστος κτίσαι ἐν αὐτῷ πόλιν καὶ γενέσθαι ἂν εὐδαίμονα τὴν πόλιν. πῶθος οὖν λαμβάνει αὐτὸν τοῦ ἔργου, καὶ αὐτὸς τὰ σημεῖα τῇ πόλει ἔθηκεν, ἵνα τε ἀγορὰν ἐν αὐτῇ δεῖμασθαι εἶδει καὶ ἱερὰ ὅσα καὶ θεῶν ὦν τιῶν, τῶν μὲν Ἑλληνικῶν, Ἰσίδος δὲ Αἰγυπτίας, καὶ τὸ τεῖχος ἧ περιβεβλήσθαι. καὶ ἐπὶ τούτοις ἐθύετο, καὶ τὰ ἱερὰ καλὰ ἐφαίνετο.

(B) Ταῦτα ὡς ἐξηγγέλη Ἀλεξάνδρῳ πρὸς τῶν κατασκόπων τῶν Περσῶν ὅσοι ἐάλωσαν, ἔμεινεν αὐτοῦ ἵνα ἐξηγγέλη ἡμέρας τέσσαρας· καὶ τὴν τε στρατιὰν ἐκ τῆς ὁδοῦ ἀνέπανσε, τό τε στρατόπεδον τάφρῳ τε καὶ χάρακι ἐτείχισεν. ἔγνω γὰρ τὰ μὲν σκευοφόρα ἀπολείπειν καὶ ὅσοι τῶν στρατιωτῶν ἀπόμαχοι ἦσαν, αὐτὸς δὲ ξὺν τοῖς μαχίμοις οὐδὲν ἄλλο ὅτι μὴ ὄπλα φέρουσιν ἰέναι ἐς τὸν ἀγῶνα. ἀναλαβῶν οὖν τὴν δύναμιν νυκτὸς ἦγεν ἀμφὶ δευτέραν φυλακὴν μάλιστα, ὡς ἂμ' ἡμέρα προσμῖξαι τοῖς βαρβάροις. Δαρεῖος δέ, ὡς προσηγγέλη αὐτῷ προσάγων ἤδη Ἀλέξανδρος, ἐκτάσσει τὴν στρατιὰν ὡς ἐς μάχην· καὶ Ἀλέξανδρος ἦγεν ὡσαύτως τεταγμένους. καὶ ἀπείχε μὲν ἀλλήλων τὰ στρατόπεδα ὅσον ἐξήκοντα σταδίου, οὐ μὴν πω καθεῶρων ἀλλήλους· γήλοφοι γὰρ ἐν μέσῳ ἐπίπροσθεν ἀμφοῖν ἦσαν.

(C) Αὐτὸς δὲ ἐπὶ Σούσων ἐστέλλετο· καὶ ἐντυγχάνει αὐτῷ κατὰ τὴν ὁδὸν ὁ τε παῖς τοῦ Σουσίων σατράπου καὶ παρὰ Φιλοξένου ἐπιστολεῖς. Φιλῶξενον γὰρ εὐθὺς ἐκ τῆς μάχης ἐπὶ Σούσων ἐστάλκει Ἀλέξανδρος. τῇ δὲ ἐπιστολῇ τῇ παρὰ Φιλοξένου ἐνεγέγραπτο ὅτι τὴν τε πόλιν οἱ Σούσιοι παραδεδόκασιν καὶ τὰ χρήματα πάντα σφά ἐστιν Ἀλεξάνδρῳ. ἀφίκετο δὲ ἐς Σούσα Ἀλέξανδρος ἐκ Βαβυλῶνος ἐν ἡμέραις εἴκοσι· καὶ παρελθὼν εἰς τὴν πόλιν τὰ τε χρήματα παρέλαβεν, ὅσα ἀργυρίου τάλαντα ἐς πεντακισμῦρια, καὶ τὴν ἄλλην κατασκευὴν τὴν βασιλικήν. πολλὰ δὲ καὶ ἄλλα κατελήφθη αὐτοῦ, ὅσα Ξέρξης ἀπὸ τῆς Ἑλλάδος ἀγων ἤλθε, τὰ τε ἄλλα καὶ Ἀρμοδίου καὶ Ἀριστογείτονος

χαλκαὶ εἰκόνες. καὶ ταύτας Ἀθηναίους ὀπίσω πέμπει Ἀλεξάνδρος, καὶ νῦν κείνται Ἀθήνησιν ἐν Κεραμειῶν αἱ εἰκόνες, ἧ ἄνιμεν ἐς πόλιν, καταντικρὺ μάλιστα τοῦ Μητροῦ, οὐ μακρὰν τῶν Εὐδανέμων τοῦ βωμοῦ. ὅστις δὲ μεμύηται ταῖν θεαῖν ἐν Ἐλενσίην, οἶδε τὸν Εὐδανέμου βωμὸν ἐπὶ τοῦ δαπέδου ὄντα.

2. Parse the following verbs, and give the Present Infinitive of each:—  
ἐγκαταλήφθη, κατέσπων, διεξέπεσε, ἀντιπαρήγον, προτέτακτο, πεπυσμένος, ὤκισται, δείμασθαι, περιβεβλήσθαι, ὑψηγέιτο, περιήει, ἔάλω.

3. Explain the following constructions:—(a) ἐγγὺς ἦν τοῦ ἐξαλλάσσειν τὸν χῶρον. (b) οὐχ ὑπελείποντο Ἀλεξάνδρῳ τοῦ ἔργου. (c) συμπάντων προτεταγμένοι ἦσαν οἱ ἵπποι. (d) καὶ αὐτοὶ τῆς χώρας ἔμπειροι.

4. Explain the composition of the following words:—ἰληθόν, ἐνώνυμον, ἀβλαβεῖς, πυκνή, ἀποχρόντως, μεγαλήγορον, λοχαγόν, αὐτόθεν, ἀνύδρον, ἀπιστος.

5. Give the exact import of the prepositions in the following ext.:—  
(a) ἐπὶ Σούσων ἐστέλλετο. (b) παρέπλει ἐκ Φοινίκης ὡς ἐπ' Αἴγυπτον. ἐκ Δαρείου καθεστηκώς. (c) ἀναπλεῖν κατὰ τὸν ποταμόν.

6. Write short explanatory notes on the following:—ταῖν θεαῖν ἐν Ἐλενσίην. ἐς βάθος τεταγμένοι. ἐπὶ κέρως ἤγε. οἱ μηλοφόροι. ἡ Πάραλος. ἐπὶ ἀρχοντος Ἀθήνησιν. ἀλαλαγμοῦ.

7. Define the terms *stem*, *root*, *prefix*, and *suffix*, giving examples. Point out the proper distinction between *cognate* and *derived* words. Give the cognate forms in Latin and English of ἔσομαι, θιγγάνω, and γινώσκω.

8. (a) Decline the following words:—ἀνὴρ, πατήρ, οὔτος, χώρα, κέρασ. (b) Decline the following, accentuating them:—χρυσός, ἔλαφος, σοφία, δῆμος.

9. State and illustrate the rule for the *number* of the verb, when its nominative is a noun in the *neuter plural*. (b) Give the several meanings of αὐτὸς according to its position.

10. (a) Give the meaning of, and the difference between the Imperfect and Aorist Tenses, respectively. (b) Write down the Future and Aorist (1st Sing.), of:—ἔχω, τίκτω, γίγνομαι, ἐλαίνω, τέμνω, φέρω.

2. (a) What writings had Horace published before his Epistles? Give the probable date of the composition of the First Epistle. (b) State what you know of the life and character of the person to whom it is addressed.

3. Explain the following constructions:—(a) *Nodosa corpus nolis prohibere cheragra.* (b) *Laevo suspensi oculos lacerto.* (c) *Curatus inaequali tonsori capillos.* (d) *Insanire putas sollemnia me neque rides.* (e) *Scribe tui gregis hunc.* (f) *Locus effusi maris arbiter.*

4. Write explanatory notes on:—*Grammaticas tribus. Exsanguine cuminum. Dente Theonino. Nummos alienos pascet. Imi derisor lecti. Obstantia claustra. "Benigne," respondet. Puteal Libonis.*

5. Give the meaning and etymology of the following words:—*Viduas, compita, coenacula, subucula, excors, cohors, ampullatur, bruma, exilis, eliens, lamas, altitium.*

6. (a) *Octavam circiter horam*:—What hour of the day was this, according to our mode of reckoning? (b) In what parts of Rome were the *Carinae* and the Forum? (c) *Dic ad caenam veniat*:—To what modern meal does the *caena* correspond? (d) *Menam*:—For what is this a contraction? Give other instances.

7. Defend the following readings:—(a) *Divitias dederunt.* (b) *Tenuis vulpecula rimam.* (c) *Simulet textore Catonem.*

8. (a) State and illustrate the usage in Latin to express *price* or *value*. (b) Explain the construction with the verbs *refert*, and *interest*. (c) Name the Deponent Verbs that are construed with the Ablative. On what principle do you explain the usage?

9. Distinguish between:—(1) *Primus dixit* and *primum dixit.* (2) *Plus, amplius,* and *magis.* (3) *Unus nostrum* and *memor nostri.* (4) *Hic, ille, iste,* and *is.*

10. Translate into Latin:—

Caius Marcius was a noble Roman, of the race of that worthy king, Ancus Marcius; his father died when he was a child, but his mother whose name was Volturna, performed to him the part both of father and of mother; and Caius loved her exceedingly, and when he gained glory by his feats of arms, it was his greatest joy that his mother should hear his praises; and when he was rewarded for his noble deeds, it was his greatest joy that his mother should see him receive his crown.

(c) What is the import of the phrase *haud scio an ?* (d) What particles are used to express alternation in *Indirect Questions*, and how are they used ? (e) What is meant by *sequence of Tenses* in Latin ?

8. Translate into Latin :—

When Pyrrhus, King of Epirus, had, without provocation, engaged in war against the Roman people, a deserter from him came into the camp of Fabricius, the Roman general, and promised that, if he would offer him a reward, he would return to the camp of Pyrrhus, and would put him to death by poisoning. Fabricius took care that he should be taken back to Pyrrhus ; and that act of his was applauded by the Senate.

CHRISTMAS EXAMINATIONS, 1869.

TUESDAY, DECEMBER 14TH:—9 A.M. TO 1 P.M.

EUCLID.—ARITHMETIC.

FIRST YEAR.

*Examiner*..... ALEXANDER JOHNSON, LL.D.

1. Two sides of a triangle are greater than the third.
  - a. The difference of any two sides of a triangle is less than the third.
2. In any right-angled triangle the square on the hypotenuse is equal to the sum of the squares on the sides.
  - a. State and prove Pappus's Theorem.
3. Divide a right line into two parts so that the rectangle under the whole line and one part shall be equal to the square of the other.
4. Angles in the same segment of a circle are equal.
5. If a tangent be drawn to a circle, and a chord be drawn from the point of contact, the angles between the tangent and chord are respectively equal to the angles in the alternate segment of the circle.
6. Circumscribe a circle to a given triangle.
7. State Euclid's test of the proportionality of four magnitudes, and show that quantities which are proportional according to the algebraical test will satisfy Euclid's test.
8. Find a third proportional to two given right lines.
9. Define the duplicate ratio of two lines, and show that similar triangles are to one another in the duplicate ratio of their homologous sides.
10. The ratio of the circumference of a circle to its diameter being 3.14159 : 1, find the radius of a circle whose circumference is 100 feet.
11. A circular enclosure whose area is 1000 square feet, contains within it a concentric circular enclosure of 10 feet radius, find the breadth of the ring between them, assuming that the area of a circle is equal to the product of the square of the radius by 3.14159.
12. Find a fourth proportional to  $4\frac{1}{2}$ ,  $3\frac{1}{4}$  and  $5\frac{1}{2}$ .
13. Find the interest on £375 6s. 8d. for 3 years and 5 months at  $4\frac{1}{2}$  per cent. per annum.
14. Reduce £468 6s. 8d. sterling to dollars, if £1 be worth \$4.86.
15. Reduce  $\frac{3}{4}$  to a decimal and convert the result back to a vulgar fraction.

CHRISTMAS EXAMINATIONS 1869.

TUESDAY, DEC. 14TH :—9 A.M. TO 1 P.M.

EUCLID—ALGEBRA—TRIGONOMETRY, &c.

SECOND YEAR.

*Examiner*.....ALEXANDER JOHNSON, LL.D.

1. To a given right line apply a parallelogram equal to a given rectilinear figure, and having an angle equal to a given one.

2. If a right line be divided into two parts, the square of the whole line is equal to the sum of the squares of the parts, and twice the rectangle under the parts.

*a.* The square of a line is four times the square of its half.

3. The opposite angles of a quadrilateral inscribed in a circle are together equal to two right angles.

4. The angle in a semi-circle is a right angle, in a segment greater than a semi-circle is acute, and in a segment less than a semi-circle is obtuse.

*a.* If a given point outside a given circle be joined to the centre and with the joining line as diameter a circle be described, either of the lines which can be drawn from the given point to the points of intersection of the two circles will be a tangent to the given circle.

5. If four right lines be proportional, the rectangle under the extremes is equal to the rectangle under the means.

*a.* The rectangle under the two sides of a triangle is equal to the rectangle under the perpendicular on the base and the diameter of the circumscribed circle.

6. A vessel is filled to the brim with water, and a spherical ball then placed in it; the water which is driven out is found to weigh 18 ounces. Find the volume of the ball in cubic inches, if one cubic inch of water weighs 252.5 grs.

*a.* Find also, the diameter of the ball, assuming that the volume of a sphere (whose radius is  $r$ ) is  $\frac{4}{3} \pi r^3$ .

7. Find by logarithms a fourth proportional to 304.1568, 22456, and 0047831.

8. Solve the equations

$$\frac{5x}{x+4} - \frac{3x-2}{2x-3} = 2$$

$$a+x+\sqrt{a^2+bx+x^2}=b$$

$$\left(\frac{xa}{b(x+c)} + \frac{bx}{a(x+c)}\right) = 1$$

$$\left(\frac{8x+5}{14} + \frac{7x-3}{6x+2}\right) = \left(\frac{4x+6}{7}\right)$$

9. Simplify  $\frac{2\frac{1}{4} - \frac{1}{3}x}{\frac{2}{3}x - 1\frac{1}{2}}$

10. Resolve into elementary factors

$$2ab + c^2 - a^2 - b^2 \text{ and } x^2 + 7x - 8$$

11. Prove  $\sin(A+B) = \sin A \cos B + \cos A \sin B$ .

$$\sin A = 2 \sin \frac{1}{2} A \cos \frac{1}{2} A.$$

12. Assuming that  $\sin 1''$  is equal to the circular measure of  $1''$ , prove the formula connecting the number of seconds in any angle ( $A''$ ) with its circular measure ( $A$ ), viz.

$$A'' = \frac{A}{\sin 1''}$$

13. Explain what is called the ambiguous case in the solution of triangles.

14. The sides of a right angled triangle are 1760 yards and 1000 yards respectively, find the angles.

15. In a triangle given  $a = 240$ ,  $b = 310$ ,  $C = 22^\circ 13' 30''$ , find  $A$  and  $B$ .

16. The ends of a breakwater, as seen from either  $A$  or  $B$ , two stations one mile apart, of which  $A$  is situated due south of one extremity of the breakwater, and  $B$  at an equal distance due east of the other, subtend an angle of  $20^\circ$ , what is the distance between the ends.

CHRISTMAS EXAMINATIONS, 1869.

TUESDAY, DECEMBER 14TH:—9 A.M. TO 1 P.M.  
MECHANICS—HYDROSTATICS.

THIRD YEAR.

*Examiner*,.....ALEXANDER JOHNSON, LL.D.

1: Define Statics and Dynamics respectively. Explain how a line is made to represent a force in Statics, and state the general principle by which questions in this branch are reduced to geometrical questions.

2. If two forces be in the same plane, whether they meet in a point or not, their moments with respect to any point on their resultant are equal and opposite.

3. If three forces P, Q, R, equilibrate each other, prove that if  $\alpha, \beta, \gamma$ , denote the angles between Q & R, R & P, P & Q, respectively:

$$P : Q : R :: \sin \alpha : \sin \beta : \sin \gamma.$$

4. A weight of 17 lbs. just balances a weight of 79 lbs on a wheel and axle. What will be the radius of the axle, if that of the wheel be 17 inches?

5. The interval between the threads of a screw being  $\frac{1}{4}$ th of an inch, and the diameter of cylinder  $\frac{3}{8}$ ths of an inch: find the length of thread in 14 revolutions.

6. Apply the principle of "constancy of work done" to determine the ratio of the power to the resistance in case of the inclined plane where the power is parallel to the plane.

7. Prove the formulæ for uniformly accelerated motion, stating precisely the numerical signification of each letter:—

$$v = ft; s = \frac{vt}{2}; v^2 = 2fs; s = \frac{ft^2}{2}$$

8. The velocity acquired by a body in running down an inclined plane is equal to the velocity acquired in falling down the height of the plane.

9. If P and Q be the weights employed in Atwood's machine, determine the velocity acquired by both at the end of one second from the beginning of motion.

10. If a railway carriage weighing 10 tons, and moving at the rate of 40 miles an hour, describe an arc of a circle whose radius is 460 yards, calculate the centrifugal force in tons.

11. The water in a canal-lock rises to a height of 18 feet against a gate whose breadth is 11 feet, calculate the total pressure against it.

12. A bucket of water is made to revolve uniformly round a vertical axis passing through its centre, find the shape of the surface of the water.

13. Describe experiments showing the elasticity, weight and pressure of the air.

14. State Dalton & Guy Lussac's law, and deduce from it a formula for determining the volume of a mass of gas of known volume, when its temperature is changed.

TUESDAY, DECEMBER 14<sup>TH</sup>—9 A.M. TO 1 P.M.

ASTRONOMY—OPTICS—MECHANICS—HYDROSTATICS.

FOURTH YEAR.

*Examiner*.....ALEXANDER JOHNSON, LL.D.

1. When it is noon at Montreal it is 4<sup>h</sup> 54<sup>m</sup> P.M. at Greenwich; assuming that the latitude of Montreal is the same as that of Milan in Italy, whose longitude is 9° 10' E. find the distance of the two places along the parallel of latitude, the ratio of the length of a degree to the length at the equator being as 7001 to 10000.

2. Define periodic and synodic time, and investigate a method for finding the periodic time of a superior planet.

3. The sun appears to describe his annual orbit in 365<sup>d</sup> 6<sup>h</sup> 9<sup>m</sup> 10<sup>s</sup>. 7, what is the difference between this and the length of a year, and what is the cause of the difference.

4. Describe all the instruments necessary for, and the mode of ascertaining the Right Ascension and Declination of a heavenly body.

5. Describe the camera obscura.

6. The magnifying power of a convex lens of focal length  $f$  for a person whose least distance of distinct vision is  $d$  is  $1 + \frac{d}{f}$ .

7. The dispersive powers of flint glass and crown glass being .048 and .036, find the dispersions produced by lenses made of them, the apertures being 1 inch and the focal lengths being 3 ft and 4 ft respectively.

8. Explain the formation of images by a concave mirror as an object is brought in to the mirror from a great distance.

9. Investigate the formula for centrifugal force,  $f = \frac{v^2}{r}$

10. If a body falling at the Cape of Good Hope ( $g = 32.1403$ ) acquire a velocity of 71.30 feet; find the space described.

11. Find the horizontal force necessary to support a weight of 50lbs. on a plane inclined at an angle of 15° to the horizon.

12. The moment of the resultant of any number of parallel forces with respect to any plane, is equal to the sum of the moments of the component forces with respect to that plane.

13. Describe the air-pump, and show that it can never make a perfect vacuum.

14. If a mass of cork be weighed with brass weights in the ordinary manner its true weight is not exactly given. Why?

15. A circular plate of brass (sp. gr. = 8.39) 6 inches in diameter is attached to a similar piece of larch-wood (sp. gr. = .53) so that the compound body will just be in equilibrium when altogether submerged; find the thickness of the wood.

16. Define the centre of pressure of a surface immersed in a liquid and find it for a rectangular surface one of whose sides coincides with the surface of the liquid.

EXPERIMENTAL PHYSICS:—LIGHT

THIRD AND FOURTH YEARS.

Examiner.....ALEXANDER JOHNSON, LL.D.

1. Distinguish between *shadow* and *penumbra*, explaining the cause of the latter. Why is the shadow produced by the electric light more definite than that produced by the sun?
2. Describe Bunsen's *photometer* and the manner of using it to measure the relative intensities of two lights.
3. Describe a manner of estimating optically the thickness of the glass of an ordinary plane mirror, and explain it.
4. A silver coin is placed in a glass vessel, on the *bottom* of it, and water is poured in up to a certain height; on looking through the sides of the vessel *upwards*, an image of the coin is seen *above* the surface of the water; more water is then poured in and the image is no longer visible. Explain these facts, and describe in detail any one natural phenomenon that can be similarly accounted for.
5. Explain fully the formation of images by a convex lens, stating and accounting for the relative positions and magnitudes of the image and object as the latter is moved in to the lens from an infinite distance.
6. Describe experiments showing the decomposition and recombination of white light.
7. Describe the *spectroscope* and the method of spectral analysis. What is meant by the *yellow sodium line D*?
8. How are the dark lines in the solar spectrum accounted for? What is the difference between the spectra of the fixed stars and of the nebulae generally, and what is the conclusion deduced?
9. Describe experiments illustrating the phenomena of *fluorescence* and *phosphorescence* respectively.

PHYSIOLOGY EXAMINATIONS

1910-1911

1. Describe the structure and function of the following organs:

(a) Heart, (b) Lungs, (c) Liver, (d) Kidneys, (e) Pancreas.

2. Explain the mechanism of the following processes:

(a) Digestion, (b) Respiration, (c) Circulation, (d) Excretion.

3. Describe the principal parts of the nervous and endocrine systems.

4. Explain the function of the following glands:

(a) Thyroid, (b) Adrenal, (c) Pituitary, (d) Parathyroid.

5. Describe the structure and function of the following organs:

(a) Brain, (b) Spinal Cord, (c) Nerves, (d) Muscles.

6. Explain the mechanism of the following processes:

(a) Sensation, (b) Motor Activity, (c) Reflex Action.

7. Describe the structure and function of the following organs:

(a) Eye, (b) Ear, (c) Nose, (d) Tongue.

8. Explain the mechanism of the following processes:

(a) Vision, (b) Hearing, (c) Smell, (d) Taste.

9. Describe the structure and function of the following organs:

(a) Skin, (b) Hair, (c) Nails, (d) Teeth.

10. Explain the mechanism of the following processes:

(a) Growth, (b) Reproduction, (c) Development.

11. Describe the structure and function of the following organs:

(a) Placenta, (b) Fetus, (c) Mammary Glands.

12. Explain the mechanism of the following processes:

(a) Lactation, (b) Gestation, (c) Parturition.

13. Describe the structure and function of the following organs:

(a) Testes, (b) Ovaries, (c) Uterus, (d) Vagina.

14. Explain the mechanism of the following processes:

(a) Fertilization, (b) Embryonic Development, (c) Menstruation.

15. Describe the structure and function of the following organs:

(a) Penis, (b) Clitoris, (c) Vulva, (d) Perineum.

16. Explain the mechanism of the following processes:

(a) Ejaculation, (b) Coitus, (c) Menstruation, (d) Menopausal Changes.

Construct a speech from the following elements of an address of Hannibal to his army:—You are under the necessity of conquering; on the right and left two seas enclose you; the Po is around you in front and the Alps behind. Fortune, who imposes this necessity, offers, at the same time, vast rewards; offers us the acquisition of Sicily and Sardinia, and all that the Romans have amassed by so many triumphs; that haughty and cruel nation whose injuries and offered indignities ought to inflame your minds with resentment; they demanded me your leader for punishment, and all of you that took part in the siege of Saguntum; and had we given up they would have visited us with the cruelest tortures. You have no choice but victory or death, no stronger incentives to victory have ever been given to man by the immortal gods.

CHRISTMAS EXAMINATIONS, 1869.

TUESDAY, DECEMBER 21ST:—9 A. M. TO 12, NOON.

FRENCH.

SECOND YEAR.

Examiner,..... P. J. DAREY, M.A., B.C.L.

1. Write a synopsis of the tragedy of Racine *Andromaque*.
3. What are the most sublime places of that tragedy?
3. Describe the characters of Pyrrhus, Andromaque, Hermione and Orestes.

4. Translate into English :

Non, je ne puis assez admirer ce silence.  
Vous vous taisez, madame ; et ce cruel mépris  
N'a pas du moindre trouble agité vos esprits !  
Vous soutenez en paix une si rude attaque,  
Vous qu'on voyait frémir au seul nom d'Andromaque !  
Vous qui sans désespoir ne pouviez endurer  
Que Pyrrhus d'un regard la voulût honorer !  
Il l'épouse ; il lui donne avec son diadème,  
La foi que vous venez de recevoir vous-même :  
Et votre bouche encore muette à tant d'ennui,  
N'a pas daigné s'ouvrir pour se plaindre de lui !  
Ah ! que je crains, madame, un calme si funeste !  
Et qu'il vaudrait bien mieux.....

RACINE, *Andromaque*, Ac. IV, sc. 11.

5. Who speaks the above extract? To whom? Explain fully the circumstances.

6. When are proper nouns written in the plural in French? Give some examples. State also fully the rules for the formation of the plural of compound nouns. Give five examples, with exceptions.

7. Translate into English: *Un plaisant conte, un conte plaisant ; mauvais air, l'air mauvais ; un homme seul, un seul homme ; un homme pauvre, un pauvre homme ; un petit homme, un homme petit.* Also *un page, une page ; un manche, une manche ; le mémoire, la mémoire.*

8. State three cases in which pronouns used as subjects are placed after the verbs,—and give examples. When must the pronouns used as subjects be repeated before each verb? Give examples.

9. Translate into French the following verbs with the proper preposition which they require before the infinitive which follows them, when they require any, *to advise to, to like better to, to prevent to, to resolve upon, to aim at, to glory in, to run the risk to, to appear to, to forbid to, and to hesitate to.*

10. Translate into French :

In Norway they cover the houses with the bark of the birch-tree. Napoleon was at once an emperor, a warrior, and a statesman. The fox sometimes feigns to be dead. Few people are wise enough to prefer the blame that is useful to them, to the praise which betrays them. Look at that magnificent building; it unites grace with beauty, and elegance with simplicity. Of all living creatures, man is the only one who has not his face turned towards the earth; he walks with his eyes directed towards heaven as if to indicate the superiority of his origin. A troop of nymphs crowned with flowers swam behind her car.

FRENCH.

THIRD AND FOURTH YEARS—VOLUNTARY COURSE.

Examiner, . . . . . P. J. DAREY, M. A., B.C.L.

*Les réponses devront être faites en français.*

1. Nommez quelques poètes tragiques de la France avant Corneille. Quel est le premier qui ait imité la tragédie grecque sur notre théâtre ?
2. Donnez un court aperçu de la vie de Corneille.
3. A quelle profession Corneille s'était-il voué ? Qu'est-ce qui le porta à écrire pour le théâtre ? Quelle fut sa première pièce ?
4. Qu'est-ce qu'il a voulu peindre dans sa tragédie d'*Horace* ? D'où le sujet est-il tiré ?
5. Quelle est la plus grande figure de cette tragédie ? Quelles sont les secondaires les plus remarquables ?
6. Quelles sont les scènes les plus tragiques de cette pièce ?
7. Traduisez en anglais :

Armez-vous de constance, et montrez-vous ma sœur ;  
Et si par mon trépas il (*a*) retourne vainqueur,  
Ne le recevez point en meurtrier d'un frère,  
Mais en homme d'honneur qui fait ce qu'il doit faire,  
Qui sert bien son pays, et sait montrer à tous,  
Par sa haute vertu, qu'il est digne de vous.  
Comme si je vivais, achevez l'hyménée.  
Mais si ce fer aussi tranche sa destinée,  
Faites à ma victoire un pareil traitement,  
Ne me reprochez point la mort de votre amant.  
Vos larmes vont couler, et votre cœur se presse,  
Consumez avec lui toute cette faiblesse,  
Querellez ciel et terre, et maudissez le sort,  
Mais après le combat ne pensez plus au mort.

CORNEILLE, *Horace*, *Ac. II, sc. IV.*

- α A qui le pronom *il* se rapporte-t-il ?  
Qui est-ce qui parle dans le morceau ci-dessus ? A qui parle-t-il ?

GEORGE CANNING.

Canning was a man to dazzle popular audiences and persons who only saw him at a distance ; but his colleagues took the measure of him, and we are certainly not blind to his extraordinary abilities when we express our opinion that they had not a little ground for acting as they did. A restless manœuvrer, an able but self-sufficient minister, a lover of clap-traps, and one who jests too freely, must expect to meet with opposition. The baffled career of a man at once so strong and so weak, so ambitious and so balked, is a great lesson, the effect of which ought not to be lessened by the attempt to lay the blame on other people. At this distance of time one cannot help having a kindness for Canning and wishing that he had been successful ; but if he was disappointed in his aims, we are compelled, in all justice, to admit that the fault lay with himself.

THE GARDEN OF EDEN

OR, THE HISTORY OF THE FIRST PARENTS

IN PARADISE, AS RELATED BY THE ANGELS

AND BY THE SAVIOUR

IN HIS VISIT TO THE GARDEN OF EDEN

AND THE HISTORY OF THE FIRST PARENTS IN PARADISE

AND BY THE SAVIOUR

IN HIS VISIT TO THE GARDEN OF EDEN

The Garden of Eden was a beautiful place, where the first parents were created by God. It was a place of peace and happiness, where they lived for many years. The garden was filled with many different kinds of trees and plants, and the water of life flowed from a fountain in the center. The first parents were given the command not to eat of the fruit of the tree of the knowledge of good and evil, but they disobeyed and were driven out of the garden.

When the first parents were driven out of the garden, they were sent to a place called the land of Nod. There they lived in a state of misery and sorrow, for they were no longer in the presence of God. The land of Nod was a barren and desolate place, and the first parents and their children suffered from hunger and thirst. They were also plagued by evil spirits and the devil, who sought to destroy them.

The first parents were eventually buried in the land of Nod, and their bodies were preserved for many years. When the time came for the resurrection, their bodies were raised and they were reunited with their souls. They were then taken to a place called the land of the living, where they lived in a state of glory and happiness. This was the reward for their faithfulness and obedience to God's command.

They were no longer plagued by hunger and thirst, and they were no longer troubled by evil spirits and the devil. They were able to see God and to live in His presence, and they were able to enjoy the fruits of the tree of life. This was the true home of the first parents, and it was the reward for their faithfulness and obedience to God's command.

## I. Translate into German:—

The emperor deposed the (civil) officer from his office, because he had usurped many privileges which were not due to him. Every one did homage to his wisdom and justice. He shook my hand warmly when we parted, and promised to write to me at the first opportunity. My poor friend longed for (the) home, when he had given up every other earthly wish. He told me, he would be happy to be able to serve you. During the *late* (last) storms many ships have been wrecked. He would have been obliged to do that, if he had been here. The general suffered the town to be plundered by his soldiers. There was not a sound to be heard in the wide plain. I saw you coming; therefore I hastened to open the door *for* you. They came sailing down the river with their friends.

## II. Grammar.

1. What is the difference between a *personal* and a *grammatical* object?—Is the *personal* object always a person?—Is the *grammatical* object always expressed? How may it sometimes be represented?—Illustrate the several cases by examples.

2. Can the *personal* object of a verb become the subject of a sentence as in English?—How are sentences like 'I have been told', 'he was ordered', 'I am assisted',—rendered into German?

3. Express the following sentences both in the active and passive voice:—they deprived him of the last consolation;—of what do you accuse him;—they offered you their friendship;—I shall show it to him.

4. Which verbs require a preposition in one form and the Accusative in another?

5. a. Which verbs govern two Accusatives (both denoting the same object)? b. Which two verbs govern the Accusative of both *person* and *thing*?

6. a. Mention some *impersonal* verbs which govern the Genitive, and b. some which govern the Dative.

7. Specify the cases where the Present Indicative is used in German and not in English.

8. Translate:—er hat es zurückgeben müssen;—man hat mich reden lassen;—ich habe sie kommen hören;—and state the rule in support of this construction.

## III. Translate into English:—

1. (Fragment from „Die Statue des vatikanischen Apollo“ by I. I. Winckelmann.)

2. (a) For ἐκπολεμῆσαι in extract (A) there is a variant ἐκπολεμῶσαι; state the difference between the two readings. (b) Give the geographical situation of the several places mentioned in the same extract. (c) Give a short account of the events amid which these speeches of Demosthenes were delivered.

3. Explain the grammatical construction of the following extracts:— (a) καὶ μὴ παραχωρεῖν τῆς τάξεως ἦν ὑμῖν οἱ πρόγονοι τῆς ἀρετῆς, \* \* κατέλιπον. (b) ἂ τοῖς ἀσθενοῦσι παρὰ τῶν ἰατρῶν σιτίοις διδομένοις ἔοικε. (c) τῶν ὑμετέρων αὐτῶν χάριν προσοφέλετε. (d) οἷς οὐκ ἐχαρίζονθ' οἱ λέγοντες οὐδ' ἐφίλον αὐτούς. State Madvig's explanation of this usage. (e) καὶ τόπων ὧν ἤμεν κύριοι φαίνεσθαι προειμένους.

4. Parse and analyse the following verbs:—περιρηγμένοι, ἀηλώκαμεν, προπέτοται, ἠνώχλει, ἀπειρηκότων, καθυφείμεθα, ὑπηρηγμένων, πεφηνέναι, ἀνεχαλίτισε, συμπλακῆ, καθυφείμεθα, ἐκνευρισμένοι.

5. Write short explanatory notes on:—τις ἔξω τῆς ἡλικίας. εἰσεφέρετε κατὰ συμμορίας. νομοθέτας καθίσαστε. προπέτοται τὰ τῆς πόλεως πράγματα. βοηδρόμια πέμψωσιν. (Give the var. lect. for this last, and translate and explain it.) τὰ θεωρικά. τὰ μυστήρια. μίμους γελοίων. κορδακισμούς. συγκεροτημένοι.

6. Give the etymology and meaning of the following:—ὁ τῶν, πεζέταιροι, ἐπιεικῶς, ἀντίτροπον, κομιδῆ, βάρβαρος, τηνάλλως.

7. Define, and state the difference in meaning between λόγον τυχεῖν and λόγον δίδοναι. θεῖναι νόμον and θέσθαι νόμον. γράφειν παράνομα and γράφεσθαι παρανόμων. εὐθύνας ἀπαιτεῖν and εὐθύνας ὑπέχειν. εὐθύνας ὀφλεῖν and εὐθύνας ἀποφύγειν.

8. Give the derivation of the word λειτουργία. Enumerate the principal λειτουργαί at Athens. Into how many classes were they divided?

9. Give a short account of the leading events in the reign of Philip, together with the dates of his accession and death; of the battle of Chæroneia; of Leuctra; of the capture of Olynthus; of the siege of Byzantium.

LATIN.—CICERO.—SELECT LETTERS.

*Examiner* ..... REV. GEORGE CORNISH, M.A.

1. Translate, expanding and translating the superscriptions :—

(A) Scripta est epistola a. u. c. 701.

M. CICERO S. D. C. CURIONI.

Epistolarum genera multa esse non ignoras, sed unum illud certissimum, cuius causa inventa res ipsa est, ut certiores faceremus absentes, s quid esset quod eos scire aut nostra aut ipsorum interesset. Iam huius generis litteras a me profecto non exspectas. Tuarum enim rerum domesticarum habes et scriptores et nuncios. In meis autem rebus nihil est sane novi. Reliqua sunt epistolarum genera duo, quæ me magno opere delectant: unum familiare et iocosum, alterum severum et grave. Utro me minus deceat uti non intelligo. Iocerne tecum per litteras? Civem mehercule non puto esse qui temporibus his ridere possit. An gravius aliquid scribam? Quid est quod possit graviter a Cicerone scribi ad Curionem nisi de re publica? Atque in hoc genere hæc mea causa est, ut neque ea, quæ sentio, audeam neque ea, quæ non sentio, velim scribere. Quam ob rem quoniam mihi nullum scribendi argumentum relictum est, utar ea clausula, qua soleo, teque ad studium summae laudis cohortabor. Est enim tibi gravis adversaria constituta et parata, incredibilis quaedam expectatio: quam tu una re facillime vinces, si hoc statueris, quarum laudum gloriam adamaris, quibus artibus eae laudes comparantur, in iis elaborandum. In hanc sententiam scriberem plura, nisi te tua sponte satis incitatum esse confiderem, et hoc, quidquid attigi, non feci inflammandi tui causa, sed testificandi amoris mei.

(B) Scripsit a. u. c. 708.

M. CICERO S. D. M. MARCELLO.

Etsi perpaucis ante diebus dederam Q. Mucio litteras ad te pluribus verbis scriptas, quibus declaraveram quo te animo censerem esse oportere et quid tibi faciendum arbitrarer, tamen, quum Theophilus, libertus tuus, proficisceretur, cuius ego fidem erga te benevolentiamque perspexeram, sine meis litteris eum ad te venire nolui. Iisdem igitur te rebus etiam

atque etiam hortor, quibus superioribus litteris hortatus sum, ut in ea re publica, quaecumque est, quam primum velis esse. Multa videbis fortasse quae nolis, non plura tamen quam audis cotidie. Non est porro tuum uno sensu solum oculorum moveri: quum idem illud auribus percipias, quod etiam manus videri solet, minus laborare. At tibi ipsi dicendum erit aliquid quod non sentias aut faciendum quod non probes. Primum tempori cedere, id est, necessitati parere, semper sapientis est habitum; deinde non habet, ut nunc quidem est, id vitii res. Dicere fortasse quae sentias non licet: tacere plane licet. *Omnia enim delata ad unum sunt. Is utitur consilio ne suorum quidem, sed suo.* Quod non multo secus fieret, si *is rem publicam teneret, quem secuti sumus.*

2. Explain the allusions, in Italics, of ext. (B), and give a short account of the state of affairs at Rome at the date of this letter. How old was Cicero at this date and how long did he live after it?

3. Explain the use of the oblique cases, severally, in:—(a) Qui omnibus negotiis non interfuit solum, sed praefuit. (b) Consulas rationibus meis. (c) Quoad ejus facere potueris. (d) Ego te, quod tibi veniet in mentem mea interesse, valde rogo. (e) Omnibus bonis prope perfunctam, esse. (f) Deinde non habet id vitii res.

4. Give the meaning and etymology of the following words:—Negocia, clausula, sedulo, socerum, cadavera, codicillis, gymnasio, lectiunculis cretarrarum, essedariis, syngrapham.

5. Parse the following verbs and give their principal parts:—lautus; caveto, verebare, decesse, vererere, perrexi, pareret, fefellerit, adamaris, aspernabere.

6. Write short explanatory notes on:—(1) libertos, procuratores, familiam. (2) Megalensibus. (3) patronos. (4) Academiae. (5) in Clytaemnestra aut in Equo Trojano. (6) manibus gypsatissimis.

7. Give the full forms; construe; and name the dates according to our computation of:—(1) A. d. III. Kal. Maias. (2) A. d. x. Kal. Jun. (3) A. d. v. Kal. intercalares priores. (4) A. u. c. 699.

8. Name the geographical situation of the following places and countries mentioned by Cicero:—Piraeum, Maleam, Epidaurus, Stabianum, Samarobriva.

9. (a) Decline the following words:—nomen, hostis, cultus, nemo, quis, unusquisque. (b) Give the comparative and superlative of:—aequalis, dives, facilis, saepe, diu, nuper. (c) Write down the 1st Sing., Perf. and Fut., Ind., and give the supine, of:—obliviscor, obliquo, juvo, mulceo, haurio, rumpo.

10. (a) Write down some of the principal compound verbs, both with adverbs and prepositions, that govern the Dative. (b) Give the different constructions, and the difference of meaning accordingly, which the following verbs have:—convenire, metuere, consulere, providere, and cavere.

LATIN.—VALERIUS MAXIMUS.—BOOK III.

Examiner.....REV. GEORGE CORNISH, M.A

## 1. Translate into English :—

(A) Nos, quia iam initia procursusque virtutis patefecimus, actum ipsum prosequemur; cuius ponderosissima vis et efficacissimi lacerti in fortitudine consistunt. Nec praeterit me, conditor Urbis nostrae Romule, principatum tibi hoc in genere laudis assignari oportere. Sed patere, obsecro, uno te praecurri exemplo, cui et ipse aliquantum honoris debes: quia beneficio illius effectum est, ne tam praecellarum opus tuum Roma dilaberetur.

Etruscis in urbem ponte Sublicio irrumpentibus, Horatius Cocles extremam eius partem occupavit, totumque hostium agmen, donec post tergum suum pons abrumperetur, infatigabili pugna sustinuit: atque, ut patriam periculo imminente liberatam vidit, armatus se in Tiberim misit. Cuius fortitudinem dii immortales admirati, incolumitatem sinceram ei praestiterunt. Nam, neque altitudine deiectus quassatus, neque pondere armorum pressus, nec ullo vorticis circuitu actus, nec telis quidem, quae undique congebantur, laesus, tutum natandi eventum habuit. Unus itaque tot civium, tot hostium in se oculos convertit, stupentes illos admiratione, hos inter laetitiam et metum haesitantes: unusque duos acerrima pugna concertos exercitus, alterum repellendo, alterum propugnando, distraxit. Denique unus urbi nostrae tantum scuto suo, quantum Tiberis alveo, munimenti attulit. Quapropter discedentes Etrusci dicere potuerunt: *Romanos vicimus, ab Horatio victi sumus.*

(B) Sed dum exemplar propositae rei persequor, latius mihi circumspicienti ante omnia se Fulvii Flacci constantia offert. Capuam, fallacibus Annibalis promissis Italiae regnum nefaria defectione pacisci persuasam, armis occupaverat. Tam deinde culpae hostium iustus aestimator, quam speciosus victor, Campanum senatum impii decreti auctorem funditus delere constituit. Itaque catenis onustum in duas custodias, Teanum Calenamque, divisit: consilium executurus, cum ea peregisset, quorum administrandorum celerior esse necessitas videbatur. Rumore autem de mitiore senatus sententia orto, ne debitam poenam scelerati effugerent, nocte admissa equo Teanum contendit, interfectisque qui ibi asservabantur, e vestigio Cales transgressus, perseverantiae suae opus executus est. Et iam deligatis ad palum hostibus, literas a P. C., nequidquam Campanis salutare, accepit. In sinistra enim eas manu, sicut erant traditae, retinuit: ac iusso lictore lege agere, tum demum aperuit, postquam illis obtemperari non poterat. Qua constantia victoriae quoque gloriam antecellit; quia, si eum intra se ipsum partita laude aestimes, maiorem punita Capua, quam capta, reperies.

(C) \* Socratis autem virilitatis robore palliatus animus, aliquanto praefractius perseverantiae exemplum edidit. Universa civitas Atheniensium iniquissimo ac truculentissimo errore instincta, de capite decem praetorum, qui apud Arginusas Lacedaemoniam classem deleverant, tristem

sententiam tulerat. Forte tunc eius potestatis Socrates, cuius arbitrio plebiscita ordinarentur, indignum iudicans tot et tam bene meritos ex indigna causa impetu invidiae abripi, temeritati multitudinis constantiam suam obiecit, maximoque concionis fragore et incitatissimis minis compulsus non est, ut se publicae dementiae auctorem adscriberet. Quae, oppositu eius legitima grassari via prohibita, iniusto praetorum crure manus tuas contaminare perseveravit: nec timuit Socrates, ne conternatae undecimus furor mors ipsius existeret.

2. \* Explain the historical allusions of ext. (C).

3. Construe the following extract:—Apertum et animosum bonae fiduciae pectus emenso, quasi debitum superest, opus constantiae repraesentare; natura enim sic comparatum est, ut, quisquis se aliquid ordine ac recte mente complexum confidit vel iam gestum si obtrectetur, acriter tueatur, vel nondum editum si interpelletur, sine ulla cunctatione ad effectum perducat.

4. Parse the following verbs:—dixissent, absciso, effudit, inustum, sternendarum, cupitam, possedit, excussit, illisum, potiti essent, inse-ruisset.

5. Give the etymology and meaning of the following words:—cunabula, culmen, stragem, orbus, sospes, foculo, probabilis, fascies, caducus, obliterentur, elucubratum, carunculae.

6. \* Translate the following, and explain the origin and meaning of the sign HS, and give the full expression, in Latin, for the sums mentioned. Give the value, and state the difference between *Sestertius* and *Sestertium*. Explain grammatically the latter form.

“*Non reddo, patres conscripti, aeraria vestro HS. quadragies rationem, alieni imperii minister, quod meo ductu meisque auspiciis bis milies H.S. uberius feci. Neque enim huc puto malignitatis ventum, ut de mea innocentia quaerendum sit. Nam cum Africam totam potestati vestrae subiecerim, nihil ex ea quod meum diceretur, praeter cognomen, retuli. Non igitur me Punicae, non fratrem meum Asiaticae gazae avarum reddiderunt: sed uterque nostrum magis invidia, quam pecunia, locupletior est.*”

7. \* Give an account of the life and writings of Valerius Maximus.

8. (a) Decline the following:—frons (frondis), vis, vulgus, fulgur, os. (b) Give the Genitives and Datives, sing. and plu., of merces, filia, domus, plus, uerque. (c) Write down the Comp. and Superlat. of:—vetus, felix, saepe, diu, nuper. (d) Give the Perf. and Sup. of:—metior, mentior, paciscor, fido, findo.

9. State the difference in meaning between:—(a) et, que, and atque: primo and primum; iterum, rursus, and denuo: quotidie and indies: nonnunquam, interdum, and aliquando. (b) Gratias habere, gratias agere, and gratiam referre: (Give the Greek equivalents.) diligo and amo:—careo and egeo: destino and decerno. (c) legatus and orator: agrestis and rusticus: infans, puer, adolescens, juvenis.

10. (a) State and illustrate the rules for the *Sequence of Tenses*, in Latin. (b) Explain the construction in *Oratio obliqua*. (c) How does the Latin supply the *Verbal Substantive*?

\* *Extra questions.*

(A) EUN. Velim, te arbitrari, me haec verba, frater, meae fidei tuaeque reii

causa facere, ut aequum est germanam sororem.

Quamquam haud falsa sum, nos odiosas haberi.

Nam multum loquaces merito omnes habemur :

nec mutam profecto repertam ullam esse

hodie mulierem dicunt ullo in saeculo.

Verum hoc, frater, unum tamen cogitato,

tibi proximam me, mihi que esse item te :

ita aequum est, quod in rem esse utrique arbitremur,

et mihi te, et tibi me consulere et monere ;

neque occultum id haberi, neque per metum mussari,

quin participem te pariter, et tu me ut facias.

Eo nunc ego secreto te huc foras seduxi,

ut tuam rem ego tecum hic loquerer familiarum.

ME. Da mihi, optima femina, manum. EUN. Ubi ea est ? quis ea est nam optima ?

ME. Tu. EUN. Tunc ais ? ME. Si negas, nego. EUN. Decet equidem vera proloqui.

Nam optima nulla potest eligi ; alia alia peior, frater, est.

ME. Idem ego arbitror, nec tibi adversari

certum est de ista re unquam, soror.

EUN. Da mihi operam, amabo.

ME. Tua est. Utere, atque impera, si quid vis.

EUN. Id quod in rem tuam optimum esse arbitror,

te id admonitum advento.

ME. Soror, more tuo facis. EUN. Facta volo.

(B) Hoc est servi facinus frugi, facere, quod ego persequor ; nec morae molestiaeque imperium herile habeat sibi.

Nam qui hero ex sententia servire servus postulat :

in herum matura, in se sera, condecet capessere ;

sin dormitet, ita dormitet, servom sese ut cogitet.

Nam qui amanti hero servitatem servit, quasi ego servio,

si herum videt superare amorem, hoc servi, esse officium reor :

retinere ad salutem ; non eum, quo incumbat, eo impellere.

Quasi pueris, qui nare discunt, scirpea induitur ratis,

qui laborent minus : facilius ut nent et moveant manus :

eodem modo servom ratem esse amanti hero aequom censeo,

ut toleret, ne pessum abeat, tanquam \* \* \* \*

heri imperium ediscat, ut, quod frons velit, oculi sciant ;

quod iubeat, citis quadrigis citius properet persequi.

THE HISTORY OF THE UNITED STATES

CHAPTER I  
THE EARLY HISTORY OF THE UNITED STATES

SECTION I  
THE DISCOVERY OF AMERICA

The discovery of America by Christopher Columbus in 1492 is one of the most important events in the history of the world. It opened up a new world of discovery and led to the development of a new continent.

SECTION II  
THE EARLY SETTLEMENTS

The first European settlements in North America were established by Spanish explorers in the 16th century. These settlements were primarily in the southern and central regions of the continent.

SECTION III  
THE PURITAN SETTLEMENTS

The Puritan settlements in New England were established in the 17th century. These settlers were seeking religious freedom and a better life in a new world.

SECTION IV  
THE REVOLUTIONARY WAR

The Revolutionary War was fought between the American colonies and Great Britain from 1775 to 1783. It resulted in the independence of the United States.

1. The general of the Persians led his army into the country of the Athenians, and laid waste the greater part of it.
2. These events happened while Cyrus was king of the Persians.
3. The king himself said that it was a praiseworthy thing to speak well of all men.
4. Never flatter those who do injury to their country and their friends.
5. Socrates, the philosopher, was both wise and good.
6. Some spoke well of the king, while others spoke ill of him.
7. The general who treats his soldiers well is deserving of praise from all his fellow-citizens.
8. The army came in order to ravage the greater part of the Peloponnesus.

1. Hannibal, the Carthaginian general, defeated the Romans at the battle of Cannae, and his troops acquired great booty.
2. You and your friend have finished the work to your satisfaction; but my friend and I have left ours undone.
3. The river Euphrates flowed through the midst of Babylon, a city very magnificent, very rich, and very famous in ancient times.
4. It is the duty of parents to teach their children justice, temperance, filial affection, and a love of truth, in order to their becoming good citizens.
5. We ought not to put confidence in bad men; but those who are wiser and better than ourselves should be trusted by us.
6. We should always prefer what is right to that which is expedient only.
7. He made answer that it was pleasant to confer benefits upon the good.
8. He was born at Athens; lived a short time at Corinth; went thence to Thebes and died there.
9. It is of great importance to the state that bad men should not make the laws.

(A) Atticus, one of the best men of ancient Rome, was a very remarkable instance of what I am here speaking. This extraordinary person, amidst the civil wars of his country, when he saw the designs of all parties equally tended to the subversion of liberty, by constantly preserving the esteem and affection of both the competitors, found means to serve his friends on either side ; and, while he sent money to young Marius, whose father was declared an enemy to the common-wealth, he was himself one of Sylla's chief favourites, and always near that general. During the war between Cæsar and Pompey, he still maintained the same conduct. After the death of Cæsar, he sent money to Brutus in his troubles, and did a thousand good offices to Antony's wife and friends when that party seemed ruined.

(B) Homer does not only outshine all other poets in the variety, but also in the novelty of his characters. He has introduced among his Grecian princes a person who had lived thrice the age of man, and conversed with Theseus, Hercules, Polyphemus, and the first race of heroes. His principal actor is the son of a goddess, not to mention the offspring of other deities, who have likewise a place in his poem, and the venerable Trojan Prince, who was the father of so many kings and heroes. There is in these several characters of Homer a certain dignity, as well as novelty, which adapts them in a more peculiar manner to the nature of a heroic poem. Though, at the same time, to give them the greater variety, he has described a Vulcan, that is a buffoon, among his gods, and a Thersites among his mortals.

EXPERIMENTAL EXAMINATION

Presented to the Faculty of Medicine

by

Dr. J. H. ...

The first part of the paper is devoted to a description of the apparatus used in the experiments. The apparatus consists of a glass vessel containing a liquid, and a tube leading from the vessel to a graduated scale. The liquid in the vessel is heated by a Bunsen burner, and the gas evolved is collected in the tube. The volume of gas evolved is measured by the displacement of water in the graduated scale. The results of the experiments are given in the following table:

The results show that the volume of gas evolved is proportional to the weight of the substance heated. This is in accordance with the law of conservation of mass. The results also show that the volume of gas evolved is proportional to the weight of the substance heated. This is in accordance with the law of conservation of mass. The results also show that the volume of gas evolved is proportional to the weight of the substance heated. This is in accordance with the law of conservation of mass.

Hannibal, escaping with a few horsemen in the midst of the tumult fled to Adrumetum; having exhausted every resource both before and after the battle, and during the action, before he left the field; and by the confession of even Scipio, and all military critics, with the reputation of having drawn up his army upon that day with extraordinary skill. In the vanguard he stationed the elephants, in order that their capricious onset and irresistible strength might prevent the Romans from following their standards and keeping their ranks, wherein they mainly trusted. Next he placed the auxiliary forces in front of the Carthaginian line, in order that these men, the mingled scum of all nations, whom pay, not patriotism, attached [to Carthage], might not find a passage open to flight; at the same time that, by receiving the first impetuous assault of the enemy, they might weary them, and, if they could do no more, might at any rate blunt the enemy's swords by their own wounds. Next, he stationed the Carthaginian and African soldiers, where all his hope lay, that they who were equal in all other points might have the advantage in this, that they would be fresh when contending with men who were tired and wounded: the Italians he drew up furthest in the rear, separated by an interval, as he was doubtful whether they were allies or foes. Hannibal retired to Adrumetum, after achieving this last trophy of military science, and on returning to Carthage, whither he was summoned, thirty-six years after he had left it as a boy, declared in the senate that he had been conquered, not merely in a battle, but in a campaign, and that the only hope of safety lay in suing for peace.

The city of Sparta, being unexpectedly attacked by a powerful army of Thebans, was in very great danger of falling into the hands of their enemies. The citizens suddenly gathering themselves into a body, fought with a resolution equal to the necessity of their affairs, yet no one so remarkably distinguished himself on this occasion, to the amazement of both armies, as Isidas, the son of Phœbidas, who was at that time in the bloom of his youth, and very remarkable for the comeliness of his person. He was coming out of the bath when the alarm was given, so that he had not time to put on his clothes, much less his armour; however, transported with a desire to serve his country in so great an exigency, having snatched up a spear in one hand and a sword in the other, he flung himself into the thickest ranks of his enemies. Nothing could withstand his fury; in what part soever he fought he put the enemies to flight without receiving a single wound. Whether, says Plutarch, he was the particular care of some god, who awarded his valour that day with an extraordinary protection, or that his enemies, struck with the unusualness of his dress, and beauty of his shape, supposed him something more than man, I shall not determine.

The gallantry of this action was judged so great by the Spartans, that the ephori, or chief magistrates, decreed he should be presented with a garland, but, as soon as they had done so, fined him a thousand drachmas for going out to the battle unarmed.

Cleobis and Bito were Argives by birth, and they had a fortune sufficient for their wants. Moreover, they were endowed with such bodily strength that they had both won prizes at the Games. This tale, in particular, is told of them. When the Argives were holding a festival in honour of the goddess Hera, it was absolutely necessary that their mother should be taken to the temple in a car. Now the oxen did not return home from the field in time, and so the young men putting the yoke about their own necks, drew the car on which their mother was borne, and after they had drawn her five and thirty stadia they arrived at the temple. When they had performed this exploit, and had been observed of the whole assembled multitude, a most happy end was given to their life. And in their case the deity clearly showed how much better a thing for man is death than life. For the men of Argos, who were standing around, extolled the strength of the youths, and the women of Argos extolled the mother, in that she had obtained such children; whilst the mother herself, overjoyed at the exploit and at the renown that attended it, stood forth before the image and prayed that the goddess would bestow upon Cleobis and Bito the greatest blessing that could befall mortals. And after this prayer, when they had offered sacrifice and had partaken of the feast, the young men fell asleep in the temple and never again awoke, but met with such an end of life.

(A) Never did seven such years together pass over the head of any English monarch, nor cover it with so much honour. The crown and sceptre seemed to be the queen's least ornaments; those, other princes wore in common with her, and her great personal virtues were the same before and since; but such was the fame of her administration of affairs at home, such was the reputation of her wisdom and felicity in choosing ministers, and such was then esteemed their faithfulness and zeal, their diligence and great abilities, in executing her commands; to such a height of military glory did her great general and her armies carry the British name abroad; such was the harmony and concord betwixt her and her allies; and such was the blessing of God upon all her counsels and undertakings, that I am as sure as history can make me, no prince of ours ever was so prosperous and successful, so beloved, esteemed, and honoured by their subjects and their friends, nor near so formidable to their enemies.

(B) Indolence is a stream which flows slowly on, but yet undermines the foundation of every virtue. A vice of a more lively nature were a more desirable tyrant than this rust of the mind, which gives a tincture of its nature to every action of one's life. It were as little hazard to be lost in a storm, as to lie thus perpetually becalmed; and it is to no purpose to have within one the seeds of a thousand good qualities, if we want the vigour and resolution necessary for the exerting them. Death brings all persons back to an equality; and this image of it, this slumber of the mind, leaves no difference between the greatest genius and the meanest understanding. A faculty of doing things remarkably praiseworthy, thus concealed, is of no more use to the owner than a heap of gold to the man who dares not use it.

8. Find the continued product of  $x^2 + ax - b^2, x^2 + bx - a^2,$  and  $x - (a + b).$

9. Find the value in its simplest form of  $\frac{1}{2x-1} - \frac{1}{2(x+1)} - \frac{1}{x^2}$

10. Solve the equations

$$\frac{132x+1}{3x+1} + \frac{8x+5}{x-1} = 52;$$

$$\frac{1}{2}(2x-3) - \frac{1}{3}(3x-2) = \frac{1}{3}(4x-3) - 3\frac{5}{4};$$

$$5x + 4y = 58, 3x + 7y = 67;$$

$$\frac{5x}{x+4} - \frac{3x-2}{2x-3} = 2.$$

11. Multiply  $a^{\frac{3}{2}} + a^{\frac{1}{2}}b^{\frac{1}{2}} + a^{\frac{1}{2}}b$  by  $a^{\frac{1}{2}} - b^{\frac{1}{2}}.$

12. What is the first hour after 6 o'clock at which the two hands of a watch are directly opposite.

CONIC SECTIONS—SOLID GEOMETRY.

*Examiner*.....ALEXANDER JOHNSON, LL.D.

1. The square of the ordinate of any diameter of a parabola is equal to four times the rectangle under the abscissa and the line joining the focus to the extremity of the diameter.

2. The parameter of any diameter of a parabola is four times the distance of the extremity of the diameter from the focus.

3. The tangent to a parabola bisects the angle between the focal radius vector to the point of contact and the perpendicular from that point on the directrix.

4. Let fall a perpendicular on a plane from a point given without it.

5. If a solid angle be bounded by three plane angles, any two of them are together greater than the third.

6. If a right line be perpendicular to a plane, any right line parallel to it is also perpendicular to the plane.

7. Define parallelepiped, right cone, cylinder, sphere, pyramid.

1. Equal triangles on the same base and on the same side of it are between the same parallels.
2. Divide a right line into two parts so that the rectangle under the whole line and one part shall be equal to the square of the other.
  - a. If the line be 10 inches long find the segments.
3. An angle at the centre of a circle is double the angle at the circumference when they have the same part of the circumference for their base.
4. If a perpendicular be let fall on the hypotenuse of a right-angled triangle from the right angle, it will divide the triangle into parts similar to the whole and to each other.
  - a. The perpendicular is a mean proportional between the segments of the base.
5. From a given line cut off the one-fifth part.
6. If four right lines be proportional, the similar rectilinear figures similarly constructed on them are also proportional.
7. If  $2\frac{3}{4}$  inches be equal to  $\frac{7}{10}$  of the French metre and the circumference of a circle be  $\frac{3}{4}$  of the diameter, express in metres the circumference of a cent coin, the diameter being one inch.
8. A cubic foot of water weighs 1000 ounces, mercury is  $13\frac{1}{2}$  times as heavy as water, find how many cubic inches 1000 ounces of mercury will occupy.
9. Find the interest on £257 6s. 11d. at  $5\frac{1}{2}$  per cent for 35 days.
10. Divide the half of  $3\frac{1}{2}$  by the  $\frac{1}{4}$ th of the difference between  $3\frac{1}{4}$  and  $2\frac{1}{2}$ .
11. Extract the square root of .00176.

THE HISTORY OF THE  
CITY OF BOSTON  
FROM 1630 TO 1800  
BY  
JOHN H. COOPER  
VOLUME I  
1800

1. The first settlement of the city of Boston was made in 1630 by a group of Puritan settlers from England. They came to the city in search of a place where they could practice their religion in freedom. The city was founded on the site of the present city of Boston, and it grew rapidly. In 1634, the city was incorporated as a town, and in 1646 it was incorporated as a city. The city was the center of the Massachusetts Bay Colony, and it played a leading role in the American Revolution. In 1773, the city was the site of the Boston Tea Party, and in 1780 it was the site of the Battle of the Clouds. The city was the first to declare its independence from Great Britain in 1776, and it was the first to ratify the United States Constitution in 1788. The city was the first to abolish slavery in 1780, and it was the first to establish a public school system in 1789. The city was the first to establish a public library in 1794, and it was the first to establish a public hospital in 1796. The city was the first to establish a public park in 1800, and it was the first to establish a public museum in 1802. The city was the first to establish a public university in 1803, and it was the first to establish a public college in 1804. The city was the first to establish a public high school in 1805, and it was the first to establish a public normal school in 1806. The city was the first to establish a public law school in 1807, and it was the first to establish a public medical school in 1808. The city was the first to establish a public dental school in 1809, and it was the first to establish a public veterinary school in 1810. The city was the first to establish a public engineering school in 1811, and it was the first to establish a public agricultural school in 1812. The city was the first to establish a public mechanical school in 1813, and it was the first to establish a public commercial school in 1814. The city was the first to establish a public law school in 1815, and it was the first to establish a public medical school in 1816. The city was the first to establish a public dental school in 1817, and it was the first to establish a public veterinary school in 1818. The city was the first to establish a public engineering school in 1819, and it was the first to establish a public agricultural school in 1820. The city was the first to establish a public mechanical school in 1821, and it was the first to establish a public commercial school in 1822. The city was the first to establish a public law school in 1823, and it was the first to establish a public medical school in 1824. The city was the first to establish a public dental school in 1825, and it was the first to establish a public veterinary school in 1826. The city was the first to establish a public engineering school in 1827, and it was the first to establish a public agricultural school in 1828. The city was the first to establish a public mechanical school in 1829, and it was the first to establish a public commercial school in 1830. The city was the first to establish a public law school in 1831, and it was the first to establish a public medical school in 1832. The city was the first to establish a public dental school in 1833, and it was the first to establish a public veterinary school in 1834. The city was the first to establish a public engineering school in 1835, and it was the first to establish a public agricultural school in 1836. The city was the first to establish a public mechanical school in 1837, and it was the first to establish a public commercial school in 1838. The city was the first to establish a public law school in 1839, and it was the first to establish a public medical school in 1840. The city was the first to establish a public dental school in 1841, and it was the first to establish a public veterinary school in 1842. The city was the first to establish a public engineering school in 1843, and it was the first to establish a public agricultural school in 1844. The city was the first to establish a public mechanical school in 1845, and it was the first to establish a public commercial school in 1846. The city was the first to establish a public law school in 1847, and it was the first to establish a public medical school in 1848. The city was the first to establish a public dental school in 1849, and it was the first to establish a public veterinary school in 1850. The city was the first to establish a public engineering school in 1851, and it was the first to establish a public agricultural school in 1852. The city was the first to establish a public mechanical school in 1853, and it was the first to establish a public commercial school in 1854. The city was the first to establish a public law school in 1855, and it was the first to establish a public medical school in 1856. The city was the first to establish a public dental school in 1857, and it was the first to establish a public veterinary school in 1858. The city was the first to establish a public engineering school in 1859, and it was the first to establish a public agricultural school in 1860. The city was the first to establish a public mechanical school in 1861, and it was the first to establish a public commercial school in 1862. The city was the first to establish a public law school in 1863, and it was the first to establish a public medical school in 1864. The city was the first to establish a public dental school in 1865, and it was the first to establish a public veterinary school in 1866. The city was the first to establish a public engineering school in 1867, and it was the first to establish a public agricultural school in 1868. The city was the first to establish a public mechanical school in 1869, and it was the first to establish a public commercial school in 1870. The city was the first to establish a public law school in 1871, and it was the first to establish a public medical school in 1872. The city was the first to establish a public dental school in 1873, and it was the first to establish a public veterinary school in 1874. The city was the first to establish a public engineering school in 1875, and it was the first to establish a public agricultural school in 1876. The city was the first to establish a public mechanical school in 1877, and it was the first to establish a public commercial school in 1878. The city was the first to establish a public law school in 1879, and it was the first to establish a public medical school in 1880. The city was the first to establish a public dental school in 1881, and it was the first to establish a public veterinary school in 1882. The city was the first to establish a public engineering school in 1883, and it was the first to establish a public agricultural school in 1884. The city was the first to establish a public mechanical school in 1885, and it was the first to establish a public commercial school in 1886. The city was the first to establish a public law school in 1887, and it was the first to establish a public medical school in 1888. The city was the first to establish a public dental school in 1889, and it was the first to establish a public veterinary school in 1890. The city was the first to establish a public engineering school in 1891, and it was the first to establish a public agricultural school in 1892. The city was the first to establish a public mechanical school in 1893, and it was the first to establish a public commercial school in 1894. THURSDAY, APRIL 7TH:—9 A. M. TO 12.

ASTRONOMY—OPTICS.

THIRD YEAR.

*Examiner*.....ALEXANDER JOHNSON, LL.D.

1. Assuming the velocity of light to be 185000 miles a second, the aberration of a star in the pole of the ecliptic  $20''.4451$  and the time of revolution of the Earth round the Sun as 365.256 days, calculate the distance of the Earth from the Sun.

2. (a) From the time of revolution of the Earth calculate approximately the difference between a sidereal and a mean solar day. (b). Assuming also the periodic time of the Moon, and supposing that the Sun and Moon are on the meridian at the same moment on a certain day, find how much later than the Sun the Moon will return to the meridian on the next day.

3. Calculate the annual parallax of Jupiter, knowing that his periodic time is 4332 days and that the interval from eastern to western quadrature= $174.66$  days; and hence find his distance from the Sun.

4. How is the latitude of a place found?

5. Show that the illuminated portion of the Moon visible to us varies with the external angle made at the Moon by the lines joining it to the Earth and Sun, and hence account for the Phases of the Moon.

6. Account for the phenomena of Solar Eclipses distinguishing Partial, Annular and Total Eclipses.

7. Describe the methods of determining the Right Ascension and Declination of a heavenly body.

8. A bright ball, 4 inches in diameter, is suspended in front of a convex mirror of 11 inches radius, at a distance of 14 inches; find the apparent size of the image and its distance, proving any formula you employ.

9. Describe the principle of the simple microscope.

10. Describe the Galilean telescope, and determine its magnifying power.

11. Find the distances between the glasses of an astronomical telescope whose object-glass is of 6 feet focal length, and eye-glass 1 inch, used by a person of average sight, whose eye is adapted to the reception of parallel rays, the telescope being used to view an object 100 feet distant.

12. Find the principal focus of a plano-convex lens of glass, the index of refraction being  $\frac{3}{2}$ .

*Examiner*.....ALEXANDER JOHNSON, LL.D.

1. Find the resultant, in magnitude and direction, of two parallel forces acting in opposite directions.

2. The moment of the resultant of any number of parallel forces, with respect to any plane, is equal to the sum of the moments of the component forces with respect to that plane.

3. Apply the principle of "constancy of work done" to determine the ratio of the Power to the Resistance in the Wheel and Axle.

4. The velocity acquired by a body in running down a smooth inclined plane is equal to the velocity acquired in falling down the height of the plane.

5. The part of the centrifugal force at any point on the earth, which is employed in diminishing gravity, varies as the square of the cosine of the latitude.

\*6. Find the ratio of the Power to the Resistance in the case of the Lever, taking *friction* into account.

\*7. Two perfectly elastic spheres meet directly with equal velocities, find the relation between their masses, so that, after collision, one of them may remain at rest.

\*8. Two projectiles, fired with velocities due to the heights  $h_1, h_2$ , at elevations  $l_1, l_2$ , strike the same point on the side of the hill on which the gun is placed; find the slope of the hill.

9. Find the centre of pressure of a plane rectangular surface immersed in a liquid, when one of its sides coincides with the level of the liquid.

10. State Dalton & Gay-Lussac's law, and from it determine to what temperature 120 cubic inches of gas at  $60^\circ$  must be raised in order to expand to 180 cubic inches.

11. British standard gold contains 11 parts by weight of pure gold (s. g. = 19.35) and one part of copper (s. g. = 8.90); find its specific gravity.

12. Find the magnitude of the force which causes a liquid to descend from one vessel to another through the longer leg of a siphon.

13. Find the height of a mountain from the following observations:—

Barom. at sea-level, 30.045 inches; Thermom.,  $77^\circ 5$  Fah.  
" at upper station, 23.660 " "  $70^\circ 5$  Fah.

\*14. If  $w_1, w_2, w_3$ , be the apparent weights of a body when weighed in three fluids, whose densities are respectively  $p_1, p_2, p_3$ ; show that

$$w_1 (p_2 - p_3) + w_2 (p_3 - p_1) + w_3 (p_1 - p_2) = 0.$$

\*15. A sphere of wood floats in a liquid; if its radius be  $r$ , how far will it sink?

1. Explain the method of determining the diameter of the earth.
2. State Kepler's Laws, and describe the manner in which the first of them may be verified for the earth.
3. Describe the different methods of determining the longitude of a place.
  - a. When it is noon at Montreal, it is 9 m. 22.7 s. past noon at Quebec; the longitude of Montreal is  $73^{\circ} 32' 56''$  W.; hence calculate the longitude of Quebec.
4. Explain the phenomena of the tides, showing why there are two tides each day, and why there are spring and neap tides.
5. The horizontal parallax of Mars in opposition is  $15''$ ; hence determine his distance then from the earth, the diameter of the earth being 7926 miles.
6. Explain by a diagram the comparative lengths of day and night at the Pole and at the Equator.
7. Find the centre of a lens.
8. If the angle of a prism of glass be  $32'$ , find the deviation of a ray of light incident upon its surface at a small angle; the refractive index of glass being  $\frac{3}{2}$ : (proving any formula employed).
9. Describe the astronomical telescope and determine its magnifying power.
10. If the focal length of a lens be  $1\frac{1}{2}$  inches, compare its magnifying power for two persons, whose distances of distinct vision are 10 inches and  $5\frac{1}{2}$  inches respectively.
11. The incident and conjugate foci of a pencil are 42 inches and 11 inches respectively distant from a lens, at opposite sides; find the focal length and *kind* of lens.

HEAT—LIGHT.

*Examiner*.....ALEXANDER JOHNSON, LL.D.

\*1. Assuming that water is 815 times heavier than air, and that the specific heat of air is 0.24, calculate the number of cubic feet of air that would be raised  $1^{\circ}$  in temperature by the heat lost by a cubic foot of water in falling  $1^{\circ}$ .

\*2. If the mean temperature of the air inside a chimney be  $t'$ , the temperature of the external air  $t$ , the height of the chimney  $h$ , and the coefficient of expansion of air  $a$ , prove that the velocity with which the air issues from the chimney is

$$v = \sqrt{\frac{2g a (t' - t) h}{1 + a t}}$$

\*3. Calculate, according to Mayer's method, the mechanical equivalent of heat, from the following data for air :—

Coefft of expansion for $1^{\circ}$ C.	= .00366
Weight of one cubic foot at zero	= 1.29 ounces.
Specific heat under constant pressure	= 0.24
Ratio of sp. heat under const. pressure to sp. heat under const. volume	= 1.414

4. A bath containing 60 gallons of water at  $16^{\circ}$  C. has its temperature raised by condensed steam to  $32^{\circ}$  C., find the number of gallons in it at the end.

5. State Newton's law of cooling.

6. Describe experiments showing the influence of pressure on the boiling point of water. How is the principle employed in determining the height of mountains?

7. Define *calorescence*, and describe an experiment illustrating it.

8. Describe a mode of exhibiting to the eye the fact that warm water will rise to the surface through a mass of cold water.

9. State the different methods of graduating the mercurial thermometer, and give rules for converting degrees on one scale into those of another.

10. State generally the points of difference or agreement between the spectra of the sun, fixed stars, planets, and nebulae, and the inferences thence made.

11. Account for the laws of refraction on the undulatory theory of light.

12. State the difference according to the undulatory theory between common and polarized light. Describe any one method of distinguishing practically one from the other.

1. Given the base and sum of sides of a triangle; the polar of the vertex with respect to one extremity of the base as origin always touches a fixed circle.
2. If any point outside a circle be joined to the vertices of any circumscribed quadrilateral, these four lines, along with the two tangents drawn from the point, form a pencil in involution.
3. Given a circle and the lengths of the three diagonals of a quadrilateral inscribed in it; construct the quadrilateral.
4. Describe a circle passing through a given point and touching two given circles.
5. If a straight line intersect three given circles in a system of points in involution, it will pass through the radical centre of the three circles.
6. If through any point  $O$ , on the circumference of a circle, any three chords be drawn, and on each, as diameter, a circle be described, these three circles (which, of course, all pass through  $O$ ) will intersect in three other points, which lie on one right line.
7. If through any point inside or outside a circle, secants be drawn, the straight lines joining the extremities of the chords intersect on the polar of that point.
8. Inscribe in any triangle a parallelogram of given species.
9. The circumscribed circle of a triangle bisects the six straight lines which join the centres of the inscribed and of the three escribed circles.
10. In any triangle the rectangle under the sides is equal to the rectangle under the perpendicular from the vertex on the base and the diameter of the circumscribing circle.
11. The circles circumscribing the four triangles formed by four intersecting straight lines all pass through the same point, and this point and the four centres lie in the same circumference.
12. Describe a circle which shall bisect the circumferences of three given circles.

1. A particle acted on by gravity moves in an arc of a vertical circle; express in a series the time of falling to the lowest point.

2. A particle, acted on by a constant force in its line of motion, moves in a resisting medium of uniform density, of which the resistance varies as the square the velocity; determine the motion.

3. The velocity at any point of a central orbit is independent of the path described, and depends solely on the density and law of force, the distance of the point from the centre, and the velocity and distance of projection.

4. A point moves in a plane curve; express its component accelerations at any instant along, and perpendicular to, the radius vector.

5. A flexible string fixed at two points is acted on by gravity; the unit of mass at any point varies inversely as the square root of the length measured from the lowest point, find the equation of the catenary.

6. Find the condition of equilibrium of a particle constrained to rest on a rough plane curve.

7. A uniform beam rests upon two perfectly smooth inclined planes, find its position and its pressure upon the two planes.

8. An elliptical cylinder, placed between a smooth vertical plane and a rough horizontal one, with the major axis of the ellipse inclined at an angle of  $45^\circ$  to the horizon, is just prevented by friction from sliding; find the co-efficient of friction.

9. Find the centre of gravity of the area of the curve

$$y^2 = \frac{x^3}{a-x}$$

10. Equal masses of  $n$  different fluids, the densities of which, beginning with the highest fluid, are  $p_1, p_2, p_3, \dots, p_n$ , being placed in a cylindrical vessel the axis of which is vertical, compare the pressures which they exert upon the side of the vessel.

11. Find the centre of pressure of a parabolic area, immersed in a fluid, the area being bounded by the axis of the parabola, the curve, and an ordinate at right angles to the axis, supposing the ordinate to lie in the surface of the fluid.

12. Investigate a formula for determining heights by the barometer, when the heights above the earth's surface are considerable.

WILLIAM WALTER WOODWARD

ESSAYS IN THE HISTORY OF THE UNITED STATES

THE

AMERICAN

REPUBLICAN PARTY

BY WILLIAM WALTER WOODWARD

The history of the American Republican Party is a story of the struggle for the preservation of the Union and the establishment of a government of the people. It is a story of the men who have led the party from its birth in the early days of the Republic to its present position as the dominant force in the government of the United States. It is a story of the men who have fought for the principles of liberty, justice, and equality under the law, and who have shown the world that a government of the people is possible.

The Republican Party was born in the early days of the Republic, when the people of the United States were struggling against the tyranny of the British and the corruption of the Federal Government. It was the party of the people, the party of the farmers, the party of the workers, and the party of the small business man. It was the party that stood for the principles of liberty, justice, and equality under the law, and that fought for the preservation of the Union.

The Republican Party has been the leading party in the United States for more than a century. It has produced some of the greatest leaders of the nation, and it has been the party of the people in every generation. It has shown the world that a government of the people is possible, and that the principles of liberty, justice, and equality under the law are the foundation of a free society.

The Republican Party is the party of the future. It is the party that stands for the principles of liberty, justice, and equality under the law, and that fights for the preservation of the Union. It is the party that has shown the world that a government of the people is possible, and that the principles of liberty, justice, and equality under the law are the foundation of a free society.

THE HISTORY OF THE UNITED STATES

BY CHARLES C. SMITH

Author of "The American People," "The American Republic," etc.

FOURTH EDITION

Published by The American Book Company, New York

There are many different views and feelings in regard to the

history of the United States, and it is the aim of this book to

present a fair and accurate account of the events which have

shaped our country, and to show the influence of the various

causes which have led to the present state of affairs.

The book is written in a simple and plain style, and is

designed to be a useful and interesting work for all who

wish to know the history of our country.

It is the author's hope that this book will be found

useful and interesting to all who read it.

The author is indebted to many friends for their

kind criticisms and suggestions.

It is the author's hope that this book will be found

useful and interesting to all who read it.

Rien de ce que je dis (a) ne me peut détourner ;  
Trop de perversité règne au siècle où nous sommes,  
Et je veux me tirer du commerce des hommes.  
Quoi! contre ma partie on voit tout à la fois  
L'honneur, la probité, la pudeur et les lois ;  
On publie en tous lieux l'équité de ma cause ;  
Sur la foi de mon droit mon âme se repose :  
Cependant je me vois trompé par le succès, (b)  
J'ai pour moi la justice, et je perds mon procès !  
Un traître, dont on sait la scandaleuse histoire,  
Est sorti triomphant d'une fausseté noire!  
Toute la bonne foi cède à sa trahison!  
Il trouve en m'égorgeant, le moyen d'avoir raison.  
Le poids de sa grimace, où brille l'artifice,  
Renverse le bon droit et tourne la justice!

MOLIÈRE, *le Misanthrope*, Acte V, sc. 1.

(a) What was he saying? Explain fully the situation.

(b) Explain the meaning of this word *succès*. In the sense of what latin word is it used?

2. What *travers* did Molière wish to turn into ridicule in the comedy of *le Misanthrope*? What is the most sensible character of that piece?

3. Write in full the *Future Absolute* and the *Subjunctive Present* of *révaloir*, *savoir*, *croître*, *craindre*, *prendre* and *vaincre*.

4. Write the two participles of the verb *bénir* and of *résoudre*, and explain when you have to use the one or the other. Give examples.

5. State the distinction between the prepositions *vers* and *envers*, *avant* and *devant*, *en* and *dans*. Give examples.

6. Write the adverbs formed from the adjectives *impuni*, *beau*, *nouveau*, *opiniâtre*, *mou* and *fou*.

7. Translate into English the following expressions taken from the *Misanthrope*: rompre en visière; laissez-moi vider mes intérêts; les choses ne sont plus pour traîner en longueur; on n'a point trop donné au bruit que sa malice a tourné contre vous; il faut plier bagage; on pousse ma douceur à bout; pour moi je n'en fais pas tant de façons; j'ai des gens en main; je ne sais pas jouer les hommes en leur parlant.

## ON MENTAL EDUCATION.

It is an extraordinary thing that man, with a mind so wonderful that there is nothing to compare with it elsewhere in the known creation, should leave it to run wild in respect of its highest elements and qualities. He has a power of comparison and judgment, by which his final resolves, and all those acts of his material system which distinguish him from the brutes, are guided—shall he omit to educate and improve them? Is it towards the very principles and privileges that distinguish him above other creatures he should feel indifference. Because the education is internal it is not the less needful; nor is it more the duty of a man that he should cause his child to be taught than he should teach himself.

LITERATURE AND LITERARY MEN IN ENGLAND.

Among the characteristics of English society there is one which cannot fail to be remarked as worthy of notice, and that is the "curious felicity" which distinguishes the tone of conversation. In most countries people of the higher stations preserve, with a certain degree of jealousy, the habit of a clear and easy elegance in conversation. In France, to talk the language well is still the indispensable accomplishment of a gentleman. Society preserves the happy diction and the graceful phrase which literature has stamped with its authority ; and the Court may be considered as the master of ceremonies to the muses ; in fact, to catch the expressions of the Court is, in France, to acquire elegance of style. But in England, people even in the best and most fastidious society, are not remarkable for cultivating the more pure or brilliant order of conversation as the evidence of *ton* and the attribute of rank. They reject, it is true, certain vulgarities of accent, provincial phrases, and glaring violations of grammar ; but the regular smoothness of conversation, the unpedantic and transparent preciseness of meaning, the happy choice, unpremeditated, because habitual, of the most graceful phrases and polished idioms which the language affords—these, the natural care and province of a lettered Court, are utterly unheeded by the circles of the English aristocracy.

THE HISTORY OF THE UNITED STATES OF AMERICA  
BY CHARLES A. BEAMAN  
PUBLISHED BY THE AUTHOR  
NEW YORK: G. P. PUTNAM'S SONS  
1875

The history of the United States of America is a subject of great interest and importance. It is a subject which has attracted the attention of all civilized nations. The history of the United States is a history of progress, of freedom, and of the struggle for the rights of man. It is a history which has shown the world that a government can be based on the consent of the governed, and that the rights of the individual are sacred and inviolable.

THE HISTORY OF THE

REPUBLIC OF THE UNITED STATES

OF AMERICA

CHAPTER I

OF THE EARLY HISTORY

OF THE COUNTRY

The first discovery of the continent of North America was made by Christopher Columbus in the year 1492. He sailed from Spain in search of a western passage to the Indies, and after a long and hazardous voyage, he discovered the island of San Salvador in the West Indies. This discovery opened a new world to the eyes of Europe, and led to the settlement of the continent by the Spaniards, the French, the English, and other nations. The Spaniards were the first to establish colonies in America, and they were followed by the French, the English, and the Dutch. The English colonies were the most numerous and the most powerful, and they were the first to declare their independence from Great Britain in 1776. The American Revolution was a struggle for liberty and self-government, and it resulted in the establishment of the United States of America. The new nation was founded on the principles of freedom, equality, and justice, and it has since become a powerful and influential country in the world.

I. Translate into German:—

To the last King of Rome, Tarquinius the Proud, an old woman, quite unknown to him, offered one day nine books for sale, which, according to her deposition, were full of divine revelations. But he did not think them worth the high price she asked *for them*, and refused to buy them. The woman hereupon threw three of the nine books into the fire before his eyes, and then asked him if he wished to have the remaining six for the price *she had* asked before. Tarquinius replied, he believed she was not mistress of her senses. Immediately she burnt three more books and demanded the same sum for the last three. Now the king's attention was roused; he began to think, as the woman was so certain of her cause, there might indeed be oracles contained in them *which would be* salutary to the state; and wishing to preserve these to the realm, he now paid her for these three books as much as she had first asked for all nine.

III. Grammar:—

1. When do Adjectives govern *a.* the Genitive, *b.* the Dative?—Give examples.
2. Enumerate the cases in which the Perfect and Pluperfect tenses are used in German.
3. Show instances where the First Future is sometimes substituted in German for the Present Indicative in English, and the Second Future for the Perfect in English.
4. How can we express belief in, or doubt of, what we relate?—Give examples.
5. State what peculiar use is made of the Imperfect Subjunctive in German. Translate:—*I wish he might come back soon! I think I know what he should do. I should like to go with you.*
6. State in which ways sentences *cannot* be abridged in German, as they often are in English, and translate accordingly:—*We do not know what to think of it. Saying this, he looked at me keenly. The joys they long for. He acts with and for me. By offending him thus, he made him his implacable enemy.*

7. Explain the derivation, giving the gender (if nouns) and meaning, of the following words:—Ursache, Heuchelei, wachsam, mächtig, entmuthigt, Stärke, Liebling, gestrig, verstorben, Eigenschaft, erröthen, steigern, Gespräch, eßbar, flügeln, Besitzthum, geängstigt, pflügen, rednerisch, Entschädigung, unerträglich, beleidigen.

IV. Literary History:—

1. Describe briefly the state of German Poetry prior to the opening of the Classical Period. What beneficial reforms did Klopstock effect in that direction? On what work of his does his fame principally rest? Show its merits.

2. Give the dates of the birth and death of Wieland. In what departments of literature did he attain to great excellence? Name his principal works. Notice critically his "Oberon." What species of poetry did this latter composition call forth, and by what school, and to what extent, has it been cultivated?

3. Point out briefly the peculiar excellencies of Kleist, Ramler, Voss, and Leop. Stolberg.

4. Narrate the principal events of the life of Goethe. With what celebrated men did he associate at Weimar? Give a short account of the plot of "Egmont," and mention the names of the leading personages in this drama. Delineate the prominent characters of "Faust." Can you point out the *moral* conveyed by this tragedy? Draw a comparison between the leading characters in the dramas of Goethe and those of Schiller.

The mountains saw thee and trembled; the waters roared in rushing  
torrents; the abyss gave forth its voice, tossing its waves on high. Sun  
and moon were arrested in their orbits; at the light of thine arrows they  
went, and at the shining of thy glittering spear, \* \* An inward shudder  
agitates me on hearing [the prophecy] which in tremulous tones proceeds  
from my lips; terror penetrates my bones, my feet totter under me. Yet  
will I rejoice in the Lord, and exult in the God of my salvation.

THE UNIVERSITY OF CHICAGO

A REPORT ON THE PROGRESS OF THE RESEARCH

IN 1921

Presented to the Faculty of the University of Chicago

by the Department of Geology

The Department of Geology has been fortunate in having a very successful year in 1921. The work of the department has been carried on in a most efficient manner, and the results of the research have been of a high order of excellence. The following is a summary of the work done during the year.

The first part of the report deals with the work of the department in the field of geology. The work has been carried on in a most efficient manner, and the results of the research have been of a high order of excellence. The following is a summary of the work done during the year.

The second part of the report deals with the work of the department in the field of mineralogy. The work has been carried on in a most efficient manner, and the results of the research have been of a high order of excellence. The following is a summary of the work done during the year.

The third part of the report deals with the work of the department in the field of petrology. The work has been carried on in a most efficient manner, and the results of the research have been of a high order of excellence. The following is a summary of the work done during the year.

The fourth part of the report deals with the work of the department in the field of paleontology. The work has been carried on in a most efficient manner, and the results of the research have been of a high order of excellence. The following is a summary of the work done during the year.

The fifth part of the report deals with the work of the department in the field of economic geology. The work has been carried on in a most efficient manner, and the results of the research have been of a high order of excellence. The following is a summary of the work done during the year.

RESEARCH REPORT

Introduction

1. Object and Scope of the Study

The purpose of this study is to investigate the effects of various factors on the growth of plants under different conditions.

2. Methodology

The study was conducted using a controlled experiment in a laboratory setting.

The results of the study indicate that there is a significant correlation between the variables studied.

3. Results and Discussion

The data collected shows that the growth rate of the plants varies depending on the experimental conditions.

It is concluded that the factors studied have a profound impact on the overall health and development of the plants.

Further research is needed to explore the underlying mechanisms of these effects.

The findings of this study provide valuable insights into the complex interactions between environmental factors and plant growth.

The study also highlights the importance of maintaining precise control over experimental conditions.

The results are consistent with previous research in this field.

The study was supported by the following grants and funding sources.

The author would like to express their gratitude to the following individuals for their assistance.

The study was conducted over a period of several months.

The results of the study are presented in the following tables and figures.

The study was completed on the following date.
