Important Eclipse

FOR 1889.

Having made extensive alterations in their premises, and greatly increased their facilities for doing business, BEER BROS. expect to please their patrons better, do a larger business, and eclipse competitors, in Dry Goods, Millinery, Carpets, and all kinds of House Furnishings. You are invited to call and see their immense stock of New Goods.

EXPLANATION OF THE ARTICLES  CALENDAR

AND

Astronomical Notes for the Year 1889.

The left hand page of each month contains all the necessary data for Solar observations for Time and Latitude, these are:—The Equation of Time (Sun slow or fast of clock), being the difference between Apparent and Mean Time, which is given for the instant of Apparent Noon, and the Sun's Declination at Mean Noon, both Greenwich time; also the Sun's apparent semi-diameter to the nearest tenth of a second of arc for every day throughout the year.

The Sun's Declination at Greenwich Apparent Noon, if required, can be obtained from the above data by multiplying the hourly variation of Declination by the Equation of Time for the same day, reduced to the decimal of an hour, and applying the result in accordance with the conditions here given.

DECLINATION INCREASING.		DECLINATION DECREASING.	
Sun slow of clock Add	Sun fast of clock Subtract	Sun slow of clock Subtract	Sun fast of clock Add

Example of process.—Required the Sun's Declination at Apparent Noon, Greenwich time, February 14th, 1889.

Equation of Time, Feb. 29th, 1889, =	14'	23.74"
Sun slow of clock	60	14.396
		.2399
Hourly variation of Declination		51.26
		14394
		4798
		2399
		11.995

Declination decreasing. Sun slow. Subtract	12.297274
Sun's Declination, Greenwich Mean Noon	12° 50' 37.7"
Apparent Noon =	12° 50' 25.4"

GLOVES.—To clean. The best way to clean any color of kid gloves, is to pour a little benzine into a basin and wash the gloves in it, rubbing and squeezing them until clean. If much soiled, they must be washed through clean benzine, and rinsed in a fresh supply. Hang up in the air to dry. Beware of fire when using benzine.

W. W. WELLNER, Watchmaker and Jeweler, Charlottetown.

Fine Dress Suits, warranted, at B. S. DAVIES & CO.'S

You will be best suited at MARK WRIGHT & CO'S

From the Sun's Apparent Semi-diameter (given in the last column of the same page) may be found the Sun's Horizontal Parallax—which equals the earth's semi-diameter as it would appear at the distance of the Sun's centre—by dividing it by the constant quantity 107.44, which is the ratio that the Sun's actual diameter bears to that of the earth. Thus, for July 1st, when the Sun is in apogee, its semi-diameter is $15' 45.9'' = 945.9$, giving $\frac{945.9}{107.44} = 8.804$ for the Sun's Horizontal Parallax. So, also, on December 31st, when the Sun is in perigee, and the semi-diameter is $16' 18.2''$ we get $\frac{978.2}{107.44} = 9.108$ for Horizontal Parallax at that date.

Parallax in altitude is found by multiplying the Horizontal Parallax, as above found, by the natural cosine of the Sun's apparent altitude at the time of observation. For example, the Horizontal Parallax being 8.804 and the observed altitude 50° , we find $8.804 \times .643$ (nat. cos. alt.) = 5.659 Parallax in altitude.

On the right hand page of each month are given the Changes of the Moon, the time of its Rising, Southing and Setting, and of High Water at Charlottetown to the nearest minute of Local Mean Time.

The bearing of the Moon at times of change, its Perigee and Apogee, and its crossing the Equinoctial and reaching its greatest North and South Declination, are given for aiding or testing weather forecasts. It being generally found that these Lunar Equinoctials are accompanied by atmospheric disturbances the more marked the nearer their times agree with those of the Moon's Changes and Perigee—** or *** are added where two or three of these influences concur within the space of 48 hours.

ECLIPSES.

During the year there will be five Eclipses, namely: three of the Sun and two of the Moon; but of these only one of the Lunar Eclipses will be visible.

MARK WRIGHT & CO. have the old established House.

SAMPLES MAILED TO THE TRADE ON APPLICATION.

ANTS, RED.—Sprigs of winter-green or ground ivy will drive away red ants. Branches of wormwood will serve the same purpose for black ants. The insects may be kept out of sugar barrels by drawing a wide chalk mark around the top, near the edge.

A little quicklime placed in the infested places will drive away any kind of ants. Insect powder, which can be bought at any drug store, sprinkled around the infested place will keep away all kinds of insects.

IV. A partial Eclipse of the Moon, July 12th, 1889, Greenwich Mean Time of Opposition, 8h. 49m. 40.5 sec.; Eclipse ended before Moon rises at Charlottetown.

V. A total Eclipse of the Sun, December 22nd, 1889, Greenwich Mean Time of Conjunction, oh. 52m. 31.2 sec., p. m., visible partially to South America and Africa, the central line of totality passing along the north coast line of South America across Africa from $10^{\circ} 9'$ on the west coast to 5° north on the east coast.

PLANETS.

MERCURY.—Mercury will be at his greatest elongation to the east of the Sun as an Evening Star, and to the west as a Morning Star, as follows: January 30th, $18^{\circ} 20'$ E.; March 12th, $27^{\circ} 35'$ W.; May 24th, $22^{\circ} 44'$ E.; July 12th, $20^{\circ} 37'$ W.; September 20th, $26^{\circ} 12'$ E.; October 31st, $18^{\circ} 36'$ W. These are the times most favorable for obtaining sight of this Planet, particularly when the Declination of Mercury is more northerly than that of the Sun, which will be the case during the first half of the year. Between the above dates he will be in conjunction with the Sun. Inferior or nearer than the Sun, on February 14th, June 18th and October 15th. Superior or beyond the Sun, April 24th, August 7th and December 7th.

VENUS.—Her apparent motion will be direct from the beginning of the year till April 9th, then retrograde till May 20th, after which direct to the end of the year. She will be an Evening Star previous to her inferior conjunction with the Sun, April 30th, re-appearing as a Morning Star till the end of the year. About March 25th she will be at her greatest brilliancy, sufficient to cast a distinct shadow.

MARS will commence the year as an Evening Star, coming to conjunction with the Sun June 17th, afterwards re-appearing as a Morning Star his motion will be direct throughout the year. In the latter part of September he will be in close companionship with Saturn and Venus, coming in conjunction with the former about 4 o'clock in the morning of the

20th, so near as to appear as one star, and with Venus October 1st, before sunrise, being less than a Moon's diameter to the north.

JUPITER will commence the year as a Morning Star, with direct motion till April 24th, then retrograde till August 24th, afterwards direct to the end of the year. He will be in opposition to the Sun June 24th, coming to the meridian at midnight, and being at his greatest apparent magnitude. He will be occulted by the Moon 11 times during the year; but only once under circumstances favorable to observation here, namely, September 3rd, 6 minutes past 10.

SATURN will be retrograde from the beginning of the year till April 14th, then direct till December 15th, coming in opposition to the Sun February 5th, and in conjunction August 16th. Besides his conjunction with Mars, he will be in conjunction with Venus about 4 o'clock in the morning of the 25th September. He will be three times occulted by the Moon, only twice observable at Charlottetown, viz: February 14th, 8h. 23m., p. m., and March 14th, 1h. 47m., a. m.

URANUS will commence the year with direct motion till January 25th, retrograde till June 25th, afterwards direct to the end of the year. In opposition to the Sun April 9th; in conjunction, October 15th.

NEPTUNE retrograde till February 10th, direct till September 6th, and retrograde to the end of the year. In conjunction with the Sun May 22nd; in opposition, November 24th.

OCCULTATIONS.

In the course of the year there will be fifteen occultations of Planets by the Moon, namely, of Venus, one, July 23rd; Jupiter, eleven, February 24th, March 23rd, April 20th, May 17th, June 13th, July 11th, August 7th, September 3rd, September 30th, October 28th, November 25th; and of Saturn, three, February 14th, March 13th, April 10th.

THE WEATHER.

MOON.	TIME OF CHANGE.				IN SUMMER.	IN WINTER.
First Quarter, Last Quarter,	Between midnight and 3 in the morning				Fair	Hard frost, with N. or W.
	do.	2 and 4	do.	do.	Cold, with showers	Snowy and stormy [wind
	do.	4 and 6	do.	do.	Rain	Rain or snow
	do.	6 and 8	do.	do.	Wind and rain	Stormy
New Moon, or Full Moon, — happens—	do.	8 and 10	do.	do.	Changeable	Rain, with E. or S. wind
	do.	10 and 12	do.	do.	Frequent showers	Snow, with N.-E. or W. wind
	do.	12 noon and 2	do.	do.	Very rainy	Cold, with high winds
	do.	2 and 4	do.	do.	Changeable	Snow or rain
Full Moon, — happens—	do.	4 and 6	do.	do.	Fair	Fair and mild
	do.	6 and 8	do.	do.	Fair, with wind N. or W., Rainy, if S. or E.	Fair and frosty
	do.	8 and 10	do.	do.	do. do.	do. do.
	do.	10 and 12	do.	do.	Fair	do. do.

REMARKS.—1. The nearer the Moon's changes to midnight, the fairer the weather will be during the next seven days; the nearer to mid-day, the rougher and more stormy. The former time occupies from 10 P. M. to 2 A. M.; the latter from 10 A. M. to 2 P. M.

2. The phases happening from 4 to 10 P. M., may be followed by fair weather, but this chiefly depends upon the direction of the wind.

3. If a storm arises from the East, on or immediately preceding the Spring Equinox, or a week after, the following Spring or Summer will be wet four times out of five; if from the West, North or South-west, the Spring and Summer will be dry five times out of six.

Town Clerk—James Gourlie.

Stipendiary Magistrate—Neil McQuarrie.

Small Debt Court held before Stipendiary Magistrate first Monday in every month. Jurisdiction over \$80.00.

Waltham Watches, all grades, at WELLNER'S.

Leave your orders at B. S. DAVIES & CO.'S

WONDERFUL INFORMATION.

FACTS WORTH KNOWING.

- There are 2,754 languages.
- America was discovered in 1492.
- A square mile contains 640 acres.
- Envelopes were first used in 1839.
- Telescopes were invented in 1590.
- A barrel of rice weighs 600 pounds.
- A barrel of flour weighs 196 pounds.
- A barrel of pork weighs 200 pounds.
- A firkin of butter weighs 56 pounds.
- The first steel pen was made in 1830.
- A span is ten and seven-eighth inches.
- A hand (horse measure) is four inches.
- Watches were first constructed in 1476.
- The first iron steamship was built in 1830.
- The first lucifer match was made in 1829.
- Gold was discovered in California in 1848.
- The first horse railroad was built in 1826-27.
- The average human life is thirty-one years.
- Coaches were first used in England in 1569.
- Modern needles first came into use in 1545.
- Space has a temperature of 200 degrees below zero.
- Kerosene was first used for lighting purposes in 1826.
- The first newspaper was published in England in 1588.
- The first newspaper advertisement appeared in 1652.
- Robert Bonner refused \$100,000.00 for the famous trotter Maud S.
- Until 1776, cotton-spinning was performed by the hand-spinning wheel.
- Measure 209 feet on each side, and you will have a square acre within an inch.
- The first sewing machine was patented by Elias Howe, jr., in 1846.
- The first steam engine on this continent was brought from England in 1753.
- The first knives were used in England, and the first wheeled carriages in France in 1559.
- The national colors of the United States were adopted by Congress in 1777.

The sun is 92,500,000 miles from the earth. The latter receives only one two-billionth of the solar heat.

The nearest fixed star is 16,000,000,000 miles distant, and takes three years for light to reach the earth.

Gold-plated Bar Pins, very nice and cheap, at W. W. WELLNER'S.

E. S. DAVIES CO. keep a first class Clothing House.

Here are some figures and rules very handy to know and have at hand, in the mind, or on paper:

A rod is $16\frac{1}{2}$ feet, or $5\frac{1}{2}$ yards.

A mile is 320 rods.

A mile is 1,760 yards.

A mile is 5,280 feet.

A square foot is 144 square inches.

A square yard contains 9 square feet.

A square rod is $272\frac{1}{4}$ square feet.

An acre contains 43,560 square feet.

An acre contains 4,840 square yards.

An acre contains 160 square rods.

A section, or square mile contains 640 acres.

A quarter section contains 160 acres.

An acre is 8 rods wide by 20 rods long.

An acre is 10 rods wide by 16 rods long.

An acre is about $208\frac{3}{4}$ feet square.

A solid foot contains 1,728 solid inches.

A pint (of water) weighs one pound.

A solid foot of water weighs $62\frac{1}{2}$ pounds.

A gallon (of water) holds 231 solid inches.

A gallon of milk weighs 8 pounds and 10 ounces.

A pint (of water) holds $28\frac{7}{8}$ solid inches (28.875).

A barrel ($31\frac{1}{2}$ gallons) holds $4\frac{7}{8}$ solid feet (4.211).

A solid foot contains nearly $7\frac{1}{2}$ solid pints (7.48).

A bushel (struck) contains 2,150 solid inches.

A bushel (heaping) contains $1\frac{1}{4}$ struck bushels.

A struck bushel contains about $1\frac{1}{4}$ solid feet.

THE SEVEN WONDERS OF THE ANCIENT WORLD.

1st. *The Pyramids.* There are several groups of pyramids, but those best known are the group of nine at Ghezeh or Jeeseh. This group is divided into three groups of three pyramids each, and the first group contains the largest and most remarkable of the pyramids, that of Cheops, which is almost 2,000 feet in height. The age of these monuments is variously calculated; according to some chronologies, these monumental piles existed from 2,000 to 6,000 years B. C.

2nd. *The Pharos.* This historic beacon which has given a name to similar modern structures, was built by Sostratus

Cnidius on the island of Pharos, near Alexandria. Its height was 450 feet, and it could be seen at a distance of 100 miles.

3rd. *The Hanging Gardens of Babylon.* These gardens which were a part of the glory of that great city of Babylon, were built on an artificial foundation of pillars, and formed a series of terraces which reached to a height of 300 feet, and covered four acres. They were built by Nebuchadnezzar for Amytas, who wearied of the flat plain of Babylon and pined for the hills of her native Media.

4th. *The Temple of Diana at Ephesus.* This is among the best known of all the wonders of the ancient world, on account of the scenes in the apostolic church in which the worship of the world-renowned Temple of the Queen of Heaven played so great a part. The site of the temple was long lost, but discovered in 1872 by Mr. Wood.

5th. *The Phidian Jupiter.* This wonderful statue of gold and ivory was the work of the greatest sculptor the world has ever seen—the immortal Phidias. The statue was of colossal size, and for 800 years the glory of Greece. It was destroyed by fire in the year A. D. 475.

6th. *The Mausoleum of Artemisia.* This was the magnificent tomb which was erected in Halicarnassis to Mausolus of Caria by Artemisia. No trace of it remains to-day, except some portions preserved in the British Museum.

7th. *The Colossus of Rhodes.* This largest of statues was molded by Charis. It was of brass, and 126 feet in height. It has been wrongly supposed to have been set astride of the mouth of the port from which it takes its name.

The bargains at the Diamond Bookstore might here be enumerated as the eighth wonder of the world.

ANTIDOTES FOR POISON.

When poison has been swallowed, give at once two tablespoonfuls of sweet oil, followed by a glass of milk, or the whites of two or three eggs.

Promptly give an emetic—the simplest is two tablespoonfuls of ground mustard in a pint of warm water. Drink milk after the stomach is relieved.

MARK WRIGHT & CO. have the old established House.

If poisoned with carbolic acid, give flour and water before and after the emetic.

If a strong caustic or alkali has been swallowed, give vinegar and water, or lemon juice and water. Follow with the emetic.

If an over-dose of laudanum, opium, or morphine, has been taken, give strong coffee, then the mustard emetic, and don't let the patient go to sleep for some hours. Exercise him to help work off the poison and to prevent sleep. Let two persons take him one by each arm, and walk or drag him about.

WHAT ROYALTY COSTS ENGLAND.

As a sample of what royalty costs the people of Great Britain alone, Whittaker gives the following annuities to the royal family:

Her Majesty—

Privy Purse	£ 60,000
Salaries of household	131,260
Expenses of household	172,500
Royal bounty, etc.	13,500
Unappropriated	8,540
	£385,800
Prince of Wales	40,000
Princess of Wales	10,000
Prince Albert Victor	10,000
Crown Princess of Prussia	8,000
Duke of Edinburgh	25,000
Princess Christian Schleswig-Holstein	6,000
Princess Louise (Marchioness of Lorne)	6,000
Duke of Connaught	25,000
Duke of Albany*	25,000
Duke of Cambridge	6,000
Duchess of Mecklenburg-Strelitz	3,000
Duke of Cumberland	12,000
Duchess of Teck	5,000
	£566,800
Total	

* The Duke of Albany is dead, but annuities are paid to his widow and children.

UNLUCKY DAYS.

The unlucky days in each month are: January 1 and 7, February and March 3 and 4, April 10 and 11, May 3 and 7, June 10 and 15, July 10 and 13, August 1 and 2, September and October 3 and 10, November 3 and 5, December 7 and 10.

THE WONDERFUL CITIES OF THE WORLD.

The World's Largest Cities.—The following information is often inquired for, and as it may be useful in many cases for reference, we have compiled a table of the largest cities in the world, with their populations, as stated by the latest authorities. In the absence of any official census, the Chinese cities have simply to be estimated, and of course must be accepted as an approximation only. We have not given any city whose population is below 500,000, though there are many we could enumerate which closely approach that figure.

ORIGIN OF THE DOLLAR.

Previous to July 6, 1785, the English pound was in use. On that date the Continental Congress established the dollar, although the exact weight was not fixed until August 8, 1786, when it was made to equal about that of the old Spanish dollar. The dollar did not originate with the Spanish, but was first coined at Joachimsthal, a mining town in Bohemia.

BUSINESS LAWS.

A note given by a minor is void.

A note drawn on Sunday is void.

It is a fraud to conceal a fraud.

Ignorance of the law excuses no one.

Notes bear interest only when so stated.

The acts of one partner bind all the others.

The law compels no one to do impossibilities.

An agreement without consideration is void.

A personal right of action dies with the person.

Contracts made on Sunday can not be enforced.

A contract made with a minor or lunatic is void.

A receipt for money paid is not legally conclusive.

Agents are responsible to their principals for errors.

Signatures made with a lead pencil are good in law.

Altering a note in any manner by the holder makes it void.

It is not legally necessary to say on a note "for value received."

A note obtained by fraud, or from a person in a state of intoxication, can not be collected.

If a note is lost or stolen, it does not release the maker; he must pay it.

Each individual in a partnership is responsible for the whole amount of the debts of the firm.

An indorser of a note is exempt from liability, if not served with notice of its dishonor within twenty-four hours of its non-payment.

Notes falling due Sunday, or on a legal holiday, must be paid on the day previous.

An indorser has a right of action against all whose names were previously on a note indorsed by him.

If the time of payment of a note is not inserted, it is held to be payable on demand.

A draft becomes an acceptance when the party upon whom it is drawn writes "accepted" across its face, and signs his name.

An acceptance is negotiable the same as a note, and is subject to the same laws.

POSTAGE STAMPS first came into use in England in the year 1840; in the United States, in 1847.

TO ASCERTAIN THE WEIGHT OF CATTLE.

Measure the girt close behind the shoulder, and the length from the fore part of the shoulder-blade along the back to the bone at the tail which is in a vertical line with the buttock, both in feet. Multiply the square of the girt, expressed in feet, by five times the length, and divide the product by 21; the quotient is the weight, nearly, of the four quarters, in imperial stones of 14 lbs., avoirdupois. For example, if the girt be 6 feet, and the length $5\frac{1}{4}$ feet, we shall have $6 \times 6 = 36$, and $5\frac{1}{4} \times 5 = 26\frac{1}{4}$; then $36 \times 26\frac{1}{4} = 945$, and this, divided by 21, gives 45 stones exactly. It is to be observed, however, that in very fat cattle the four quarters will be about one-twentieth more, while in those in a very lean state they will be one-twentieth less than the weight obtained by the rule.

TUNNELS OF THE WORLD.

Mount St. Gothard, 48,840 feet long (the longest in the world); Mount Cenis, 39,840 feet long; Hoosac, 25,080 feet long; Nochistongo, 21,659 feet long; Sutro, 21,120 feet long; Riquivel, 18,623 feet long; Nerthe, 15,153 feet long; Blaizy, 13,455 feet long; Thames and Medway, 11,880 feet long.

INTERESTING BIBLE FACTS.

These were compiled by a convict sentenced to life confinement for murder.

The Bible contains 3,566,480 letters, 773,765 words, 31,173 verses, 1,139 chapters, and 66 books. The shortest verse is the 35th verse of the 11th chapter of St. John. The word *and* occurs 46,277 times. The word *Lord* occurs 1,855 times. The word *Reverend* occurs but once. The 21st verse of the 7th chapter of Ezra contains all the letters of the alphabet except J. The longest verse is the 9th verse of the 8th chapter of Esther. There are no words or names of more than six syllables.

A HORSE will live 25 days without solid food, merely drinking water; 17 days without either eating or drinking; and only 5 days when eating solid food without drinking.

ALWAYS ON HAND—

A LARGE ASSORTMENT OF THE BEST GOODS
IN THE MARKET.

 We guarantee to give you better value than any other house in the trade, for CASH.

WASHING FLUID.—1 can of the best concentrated lye, 5 cents' worth of salts of tartar, 10 cents' worth of ammonia dissolved in 1 gallon of water. Put in a jug, and cork tightly. To use it, wash the clothes through one suds first; then put nearly a quarter of a teacupful of the mixture to a boiler full of clothes. Boil thoroughly 20 minutes; then remove, and rinse the clothes in two waters.
