NEWFOUNDLAND-EAST COAST

CATALINA HARBOUR

SURVEYED BY CAPTAIN ORLEBAR R.N.

Assisted by Com^d J. Hancock, Mess^{rs} Carey, Des Brisay & Hyndman, R.N.

1862.

Green I. Lighthouse. Lat. 48° 30' 15" N. Long. 53° 2' 40" W. of Greenwich.

H.W.E. & C.VIIth Oth Springs rise 6 Neaps 4 feet.

cr. coral, gr. gravel, m. mud, r. rock, s. sand.

Figures on the land show the heights in feet above the Sea.

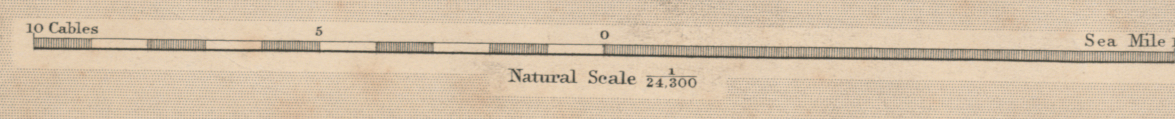

Magnetic Variation in 1863, increasing 1 annually

SOUNDINGS IN FATHOMS

All Bearings are Magnetic

Remarks
The entrance to Catalina Harbour is pointed out by the L^t Ho. on Green I. In front of the harbour lie the E^{ast} and Brandies Shoals on which the sea breaks heavily during Easterly gales, rendering the approach at such times, difficult and hazardous.

Directions
Run in with Burnt I^{land} in one with Episcopal Ch^{urch} N.W. 1/4 N. until abreast the L^t Ho. then steer N.N.W. to round Burnt I^{land} taking care to have the low grassy Manual I^{land} partly open of Goodland I^{land} so as to avoid Charlton I^{land} and keeping midway between Goodland I^{land} & the S. shore, on a W.N. 1/4 W. course stand up, and anchor in the S.W. arm in about 4 fms. mud the E.C. Ch. bearing about W.N.W. Some small hills up the S.W. arm after heavy gales, but not so as to endanger vessels.
Vessels drawing 9 feet will find excellent anchorage in the N.E. arm. The fishermen are trustworthy Pilots, and are nearly always to be met with off the harbour in the daytime.

London. Published at the Admiralty, Sep^r 1st 1863, under the Superintendence of R. Adm^l Washington; F.R.S. Hydrographer Corrections March 1865.
Sold by J.D. Potter, Agent for the Admiralty Charts, 21, Princes St. King Street Tower Hill.
