OGILVIE'S

BOOK FOR A COOK

A selection of recipes and other things
adapted to the needs of the average
housekeeper, some entirely
new, all have been
thoroughly tested

OGILVIE
MONTREAL, CANADA
1911

Entered according to Act of Parliament of Canada, in the year one thousand nine hundred and nine, by *The Ogilvie Flour Mills Company, Limited* of Montreal, at the Department of Agriculture, Ottawa.

INTRODUCTION

"The way to man's heart
through his stomach."

THE OGILVIE FLOUR MILLS CO., LTD., after a careful study of the needs of the home-bakers, decided to make a flour particularly suited to their requirements. The results was ROYAL HOUSEHOLD, so named because it is used by the Royal family.

This flour is carefully milled from the very choicest wheat grown in Canada, and each day's milling is subjected to a practical baking test before it is allowed to be given out to the consumer.

Every pound of it is guaranteed, and is especially adapted for either bread or pastry.

The recipes herein presented have been TRIED, TESTED and PROVED. They are not offered as a general cook book, nor as a guide to experts, but simply as a help to the average housekeeper in the hope that it will make easier her search after a variety of good things without calling too much upon her means.

If good results are possible, why poor?
I would help others out of a fellow feeling.
—Burton

FAILURE and disappointment often confront the young and inexperienced housekeeper (and sometimes the experienced one as well) through the misunderstanding or omission of some little detail in preparation. The following recipes have been thoroughly tested, wherever possible the exact amount of ingredients to be used is given, and we know them to be absolutely correct, yet to any user of this book who has failed to obtain satisfactory results or who is in need of still more explicit directions, we will gladly furnish the services of an expert woman, as a correspondent, who will answer all questions, and give any suggestions possible.

In writing, please note carefully the following directions:

- 1.—Do not forget to give name and Post Office Address.
- 2.—Address all communications to The Ogilvie Flour Mills Co., Ltd., Baking Dept., Montreal, P.Q.
- 3.—Name the recipe or recipes for which you wish help, and tell fully the character of the result you obtained.

NOTE.—We cannot be responsible for recipes, if other flour than Ogilvie's Royal Household is used.

What it is

Good yeast consists of thousands of tiny plants or germs, and is one of the simplest forms of vegetable life, belonging to the same family as mould and mildew. It is an almost transparent cell, round or oval, filled with sap.

Its Growth.

The growth, which is more frequently spoken of as "fermentation" consists of the reproduction again and again of these little one-celled organisms. This goes on very quickly under proper conditions. One plant buds out from the other sometimes in the form of a chain, or two buds may come from one cell, and in this way the yeast plant multiplies.

Its Care.

While these little yeast cells are tenacious of life they are killed by exposure to extremes of either heat or cold, such as boiling water, or frost, but will keep for many days in a dry, cool place. The best collection of yeast cells massed together in dormant state is the ordinary yeast cake either dry or compressed.

Dried Yeast.

The dried yeast is the best form in which yeast can be obtained for the use of those who live in the country, or in places where it may be necessary to keep the yeast for some length of time. Being dry the cakes cannot decay, but if kept too long the yeast will lose its vitality.

Compressed Yeast.

The compressed moist yeast keeps, as a rule, only for a few days. In towns it is usually distributed by the manufacturers every two or three days. When fresh it should have a pleasant wine like smell and crisp feeling. If dark and mouldy it is old. If it breaks like putty it is weak.

Its Relation to Bread Making.

For rapid growth it requires a moderately warm moist, sweet, soil such as dough. Sugar hastens the growth, while salt retards it. During its growth it changes some of the starch of the flour into sugar, on which it feeds, at the same time giving off alcohol, and a gas known as Carbon dioxide.

This, in its efforts to escape, expands the elastic gluten (which is a large constituent of flour) and lifts up the dough, or in other words it is "raised".

When the bread is placed in the oven, the heat expands the gas. This is what causes the loaf to "raise" in the oven. Finally the alcohol and gas are driven off, the cell-walls are fixed, and then, sweet bread is produced.

NOTES ON YEAST

Use less yeast in summer than in winter.

Dried yeast works slowly and is always better set with a sponge over night. Dried yeast will not work at all unless kept warm. Compressed yeast is very rapid and does not require so much warmth, $\frac{1}{2}$ cake Compressed yeast is equal to 1 cake dry yeast or $\frac{3}{4}$ cup home-made yeast.

Be sure that yeast or yeast cakes are fresh.

NOTES ON BREADMAKING.

It is better to use a pail to mix bread in than the ordinary bread pan, as there is less surface exposed and easier to wrap up, and can readily be placed in a dish of warm water to aid rising. Best length of time for sponge to rise is nine or ten hours. If you take it early in the morning, set earlier in the evening and vice versa.

Always make a sponge when dry yeast cakes are used. With home-made or Compressed yeast it may be made into a dough at once.

A sponge should always rise at least twice its size or until it begins to fall.

Dough should always double itself and should increase twice its size when placed in the pans.

Do not work dough too much as it is better to underwork than to overwork.

Do not let it rise too much in dough or it will be slow in pans.

Do not have oven too hot as bread should not brown the first ten minutes, and only gradually after that.

Do not cover when taken out of oven, but allow to cool quickly.

Do not make loaves too large.

(See Page 8)

ROYAL HOUSEHOLD requires less work than ordinary hard wheat flours.

Don't knead it too much

It goes together quickly and easily, requiring only two or three minutes beating in the sponge or batter and a few minutes kneading in the dough until it becomes smooth and elastic.

It DOES NOT require a second kneading after it has risen in the bowl or pail, simply close the hand and punch down thoroughly.

"With Bread
all griefs are less."

Good bread is the great need of both rich and poor.

It has been man's chief food for thousands of years.

Compared with wheat flour, all other materials are insignificant.

More good nourishment can be purchased for less money than in any other food.

ROYAL HOUSEHOLD excels all others in this respect and should always be used with these recipes.

In the process of bread making, the management and control of the yeast and its fermentation is usually the least understood part of the operation; and it is owing to mistakes in its treatment that the greater number of failures in bread-making are due.

No manipulation of the flour or dough will compensate for weak or badly prepared yeast.

The other factors of uncertainty in bread-making consist chiefly of insufficient care in kneading and the difference in the quality of flours.

Flour taken from a cold place should be warmed before using to about 75 or 80 degrees.

Have water and milk same temperature. If milk is used it should be scalded and allowed to cool.

Mix thoroughly, but do not overwork. Make small loaves and bake well.

HOUSEHOLD WHITE BREAD

Materials.

- 2 cups (1 pint) milk.
- 2 cups (1 pint) water (or 4 cups if milk is left out.)
- 1 teaspoon butter or lard.
- 3 tablespoons sugar.
- 1 tablespoon salt.
- 2 cakes Compressed yeast.
- 3 quarts (more or less) Ogilvie's Royal Household.

Preparation.

Scald the milk and water, and while scalding hot pour the liquid over the butter, sugar and salt. Dissolve the yeast in $\frac{1}{4}$ cup lukewarm water. When the milk and water have cooled to lukewarm, beat into five cups of sifted flour with a wooden spoon, add the dissolved yeast and beat well for two or three minutes. Then stir and knead in flour until the dough is sufficiently stiff to be turned from the mixing bowl to the moulding board in a mass. The quantity of flour to be added may be more or less than the five cups, depending on the temperature and dryness of the flour. Knead the dough until it becomes smooth and elastic and ceases to stick to the fingers or moulding board, adding if necessary a little flour from time to time. Then put in a well greased earthen bowl, brush lightly with butter, cover with a bread towel and set to rise in a moderately warm place until light or increased twice its size. This will require about two hours. As soon as bread is light, punch down and set for another rising until light which will require about one hour. As soon as it is light, form gently into loaves or rolls, place in greased bread pans, brush with melted butter and let stand for one and a half hour, or until very light, then bake in a moderate oven for, depending on size of loaf, forty to sixty minutes. This quantity makes five small loaves. (See page 8).

NOTE.—Be careful not to use too much flour. Make the dough as soft as can be handled.

N.B.—Our "Meota" (whole wheat) flour makes excellent bread with this recipe.

POTATO YEAST No. 1.

Materials.

- 8 large potatoes.
- 4 tablespoons Ogilvie's Household.
- 4 tablespoons salt.
- 4 tablespoons granulated sugar.
- 4 cups (1 quart) boiling water.
- 16 cups (4 quarts) cold water.
- 2 cakes of Dry Yeast or 1 cake of compressed.

Preparation.

Peel and boil the potatoes, mash in water boiled in, and, while boiling pour this over the flour, salt and sugar. To this add the boiling water, mix well then add the cold water. Dissolve the yeast in $\frac{1}{2}$ cup lukewarm water and mix with the above. Let this mixture remain in a warm place about eighteen hours, when it is ready for use, keep in a cool place and use as required.

NOTE.—1 Dry Yeast cake and $\frac{1}{4}$ cup of sugar dissolved in 3 cups potato water makes an excellent yeast. Pour the water off the boiling potatoes at noon, cool until lukewarm, add the yeast and sugar, let stand until next morning.

POTATO BREAD No. 1.

Materials.

- 4 cups (1 quart) Potato yeast.
- 1 tablespoon salt.
- 1 tablespoon brown sugar.
- 1 tablespoon butter.
- 3 quarts (more or less) Ogilvie's Royal Household.

Preparation.

Set the yeast liquid on the stove and stir until about blood heat (98 degrees Fahrenheit), then add the salt, sugar and butter, mix in sufficient of the flour (previously warmed) to make a batter. This will require three to four cups. Cover and set to rise. When light and frothy add the balance of the flour or until the dough ceases to stick to the hands or moulding board, kneading only until smooth and elastic. This makes five small loaves.

Let rise again until double the original size of dough, when it may be moulded gently into loaves, placed in greased bread pans and brushed with melted butter. Let it stand in a warm place covered with a clean cloth, until it has again doubled its bulk, then bake it in a moderate oven for about sixty minutes.

N. B.—Our "Meota" (whole wheat) flour makes excellent bread with this recipe. (See page 8).

POTATO YEAST No. 2.

Materials for Yeast.

- 6 large potatoes.
- $\frac{1}{2}$ cup sugar.
- 2 tablespoons salt.
- 1 cup lukewarm water.
- 1 cake Compressed or two cakes dried yeast.

Preparation.

Peel and grate the potatoes into a porcelain or earthen dish, containing the sugar, and salt. Pour

on boiling water until it becomes thick, then let cool until lukewarm. Dissolve the yeast in the lukewarm water and add to the above. Let stand in a warm place for 24 hours when it is ready for use.

POTATO BREAD No. 2.

Materials for Bread.

- 8 cups (sifted) Ogilvie's Royal Household.
- 2 cups water (or 4 cups if milk is left out.)
- 2 cups milk.
- 1 tablespoon sugar.
- 1 tablespoon salt.
- 1 tablespoon butter or lard.
- 1 cup of above yeast.

Preparation.

Scald the milk and water, and when cooled to lukewarm add the yeast, salt, sugar and butter and follow the directions given under Potato Bread No 1.

NOTE.—4 cups of No 1 or 1 cup of No. 2 Potato yeast equals 2 cakes Compressed.

PLAIN BREAD.

Materials.

- 3 quarts (more or less) Ogilvie's Royal Household.
- 1 tablespoon salt.
- 4 cups lukewarm water.
- 1 Dry yeast cake.

Preparation.

Let yeast cake dissolve in $\frac{1}{4}$ cup lukewarm water for about 10 minutes. Put salt into mixing pan. Add water and enough flour to make a stiff batter (about the consistency of pan-cake mixture). Add yeast and beat two or three minutes; put in warm place to rise over night; in the morning sponge should be twice its size. Add enough flour to make a dough stiff enough not to stick to hands or board; after flour is all mixed in, turn mass out on bread board and knead two or three minutes; let rise again about two and a half times its size, then mould lightly into pans, cover well and let rise $2\frac{1}{2}$ times its size. Bake in a moderate oven until loaf is nicely browned and feels light when taken out of pan (See page 8).

BOSTON BROWN BREAD.

Materials.

- 2 cups Ogilvie's Golden Meal.
- 1 pint hot water.
- 2 cups "Meota" flour.
- 1 cup molasses.
- 1 teaspoon salt.
- $\frac{1}{2}$ cake Compressed yeast.
- $\frac{1}{2}$ cup lukewarm water.
- 1 teaspoon soda.

Preparation.

Scald the cornmeal with the pint of hot water then mix in the two cups of entire flour, molasses and salt, adding the yeast, dissolved in $\frac{1}{4}$ cup lukewarm water. Lastly add the soda, also dissolved in $\frac{1}{4}$ cup lukewarm water. Pour this batter in greased moulds, filling each a little over half, and let them rise until they are nearly full.

Then put the moulds in a pot of boiling water. Boil three hours, take out and bake them for half an hour. This serves about eight people.

NOTE.—In boiling let the water come up to the moulds two-thirds of their height, and when it boils away add more boiling water.

CORN BREAD.

- 1 cup Ogilvie's Golden Cornmeal.
- 1 cup Ogilvie's Royal Household Flour.
- 4 teaspoons Baking Powder.
- $\frac{1}{4}$ cup sugar.
- $\frac{1}{2}$ teaspoon salt.
- 1 cup milk.
- 1 egg.
- 1 tablespoon butter.

Mix all the dry ingredients in a bowl sifting the flour and baking powder together. Beat the egg till very light, add it and the milk to the dry ingredients and lastly the butter which has been melted in the baking pan. Bake from 20 to 30 minutes, in a moderate oven.

N.B.—Sour milk may be used instead of sweet (1 cup) with $\frac{1}{2}$ teaspoon soda, omitting the baking powder. The egg may be omitted if desired, substituting $\frac{1}{4}$ cup of milk and adding a little more butter.

PARKER HOUSE ROLLS

Materials.

- 2 cups milk.
- 1 tablespoon sugar.
- 1 tablespoon salt.
- 3 tablespoons butter.
- 2 cakes Compressed yeast.
- $\frac{1}{2}$ cup lukewarm water.
- $1\frac{1}{2}$ quarts (more or less) Ogilvie's Royal Household.

Preparation.

Scald the milk and pour it over the sugar, salt and butter. Allow it to cool, and when it is lukewarm add the yeast, dissolved in the lukewarm water, then add three cups sifted flour. Beat hard, cover and let rise until it is a frothy mass. Then

add three cups more flour. Let rise again until it is twice its original bulk, place it on your kneading board. Knead lightly then roll it out one-half an inch thick.

With a biscuit cutter cut out the rolls. Brush each piece with butter, fold and press the edges together, and place them in a greased pan, one inch apart. Let them rise until very light. Bake in a hot oven twenty minutes. This makes from one and a half to two dozen according to size.

BAKING POWDER BISCUIT

Materials.

- 2 cups Ogilvie's Household.
- 4 teaspoons Baking Powder.
- 1 teaspoon salt.
- 1 tablespoon butter.
- 1 tablespoon lard.
- $\frac{1}{2}$ to $\frac{3}{4}$ cup water.

NOTE.—2 teaspoons of Cream of Tartar and 1 of soda may be used in place of Baking Powder.

Preparation.

Sift flour, salt and Baking Powder together. Rub in shortening with the tips of the fingers. Add the liquid, mixing with a knife until a very soft dough is obtained. Do not knead the dough but roll it out lightly and quickly about $\frac{1}{2}$ inch thick using as little flour as possible for dusting. Cut out and bake in a hot oven for 15 minutes.

Modifications.

The liquid may be all water or all milk or half milk or half water. The shortening may be all butter or all lard or a mixture of both.

CINNAMON OR FRUIT ROLLS.

Use same materials and prepare as for Baking Powder Biscuit.

Preparation.

Roll the sheet of dough into a square. Spread lightly with melted butter. Sprinkle with cinnamon and sugar or with dried fruit. Roll up like a jelly roll, cut off slices about $\frac{3}{4}$ inch thick and bake.

TWIN BISCUITS.

Use same materials and prepare as for Baking Powder Biscuits.

Preparation.

Roll the sheet of dough half as thick as for Baking Powder Biscuits.

Cut and put two together like a sandwich with a very little melted butter.

EGG BISCUITS.

Use same materials and prepare as for Baking Powder Biscuits, using 1 egg and less liquid.

TEA ROLLS.

Materials.

- 2 cups milk.
- $\frac{1}{2}$ cup sugar.

- 1 cake Compressed yeast.
- $\frac{1}{4}$ cup luke warm water.
- 2 eggs.
- 1 teaspoon ground cinnamon.

Preparation.

Scald the milk and pour it over the sugar, butter and salt. When it has cooled to lukewarm, beat into it three cups of flour, sifted three times. Then add the yeast, dissolved in the lukewarm water. Cover and let rise until a frothy mass. Add the eggs (well beaten) the balance of the flour, and the cinnamon, and knead the dough two or three minutes.

Place in a buttered bowl. Let rise until twice the original size. Form into small rolls, place in a buttered pan, and let rise until very light. Brush the top with melted butter, bake in a hot oven twenty minutes. This makes about two dozen small rolls.

If desired a well-beaten egg may be added at the last, when it will be necessary to use a little more flour. The cakes will be more tender without the egg. These cakes may be made with sweet milk, substituting four (4) level teaspoons of Baking Powder for the soda. This quantity will serve four or five people.

- $\frac{1}{2}$ teaspoon salt.
- About 1 cup milk.
- 2 cups Ogilvie's Royal Household.

The millionaire cannot buy better flour than "ROYAL HOUSEHOLD" nor even the poorest family use a flour that is more economical.

What Flour Granulation Means in Bread-Making

Flour is composed of myriads of tiny granules.

The small ones absorb yeast, "rise" and "ripen" before the large ones; the result is bread of coarse, poor texture.

ROYAL HOUSEHOLD Flour is perfectly milled, all the flour granules are uniform in size, the sponge rises uniformly, the bread is even in texture, perfect in flavour, good-looking, appetising bread, easily digested.

COOKIES DOUGHNUTS ETC.

a good end."

JOHN HEYWOOD.—1565

Materials.

- 2 eggs.
- 1 heaping cup sugar.
- 1 teaspoon soda.
- 1 cup milk.
- 1 teaspoon melted butter.

Preparation.

Beat the eggs and sugar together. Dissolve soda in the milk, add the melted butter and mix with above. Sift flour and cream of tartar together twice, beat well and add nutmeg, roll out, cut with doughnut cutter and fry in hot lard.

Care must be taken not to make dough too stiff and it may require slightly more or less flour than the amount given above. Three level teaspoon of baking powder may be used instead of cream of tartar and soda. This makes about two and a half dozen.

- 1 cup brown sugar.
- $\frac{1}{2}$ cup butter.
- 1 egg.
- $\frac{1}{2}$ teaspoon soda.
- 2 tablespoons sour milk.
- $1\frac{1}{2}$ cup Ogilvie's Royal Household.

Preparation.

Cream the butter and sugar together. Add the well beaten eggs, then the milk gradually and flavor to taste. Sift baking powder and flour together and add gradually to the above until the dough can be handled, when no more flour should be worked in. This may require slightly more or less than the two cups. Roll out thin, cut with a cookie cutter and bake in a quick oven.

N.B.—Any cookie mixture is improved by setting in a cool place to chill, before rolling it out.

MOLASSES COOKIES.

- 1 egg.
- $\frac{1}{2}$ cup milk.
- 1 cup molasses.
- 2 teaspoons soda.
- 4 cups (more or less) Ogilvie's Royal Household.
- 4 teaspoon ground ginger.

Preparation.

Stir together the butter, sugar, egg, and molasses, dissolve soda in the milk and add with the flour, and ginger mixed together. Make moderately stiff dough, roll out not too thin and bake in a moderate oven.

- Milk of one cocoanut.
- Same amount of water.
- 3/4 cups powdered sugar.
- 3 eggs (whites).

Preparation.

Dissolve two and one half cups of the sugar in the milk and water, boil until it syrups. Have ready the beaten whites with the balance of sugar, whipped in and add the grated cocoanut little by little beating the boiled syrup all the time. Drop in table-spoonfuls on buttered paper and bake in a slow oven.

When cool add the unbeaten eggs one at a time, beating till thoroughly mixed. Drop on buttered pan pieces the size of a walnut three inches a part.

Bake in a moderate oven about 30 minutes, having the oven rather hot at first, and then reducing the heat. When baked, let them dry out in the oven with the door open for about 10 minutes. This will prevent them falling. When thoroughly cold, cut open with scissors and fill with whipped cream or mock cream. This makes 1½ dozen.

MOCK CREAM

Materials.

- 1 cup sugar.
- ½ cup Ogilvie's Royal Household.
- Pinch of salt.
- 2 eggs.
- 2 cups scalded milk.
- Flavour with lemon or vanilla extract.

“Well begun is half done.” Make sure you have “ROYAL HOUSEHOLD” for the baking, and there’s no doubt about the lightness and deliciousness of the bread and pastry.

By special appointment to His Majesty the King.

What is meant by "Protein" in flour?

"Protein in food is the food element that makes bones, muscle and brain.

Pure flour contains more protein, in most useful form, than any other food; but the flour must be pure.

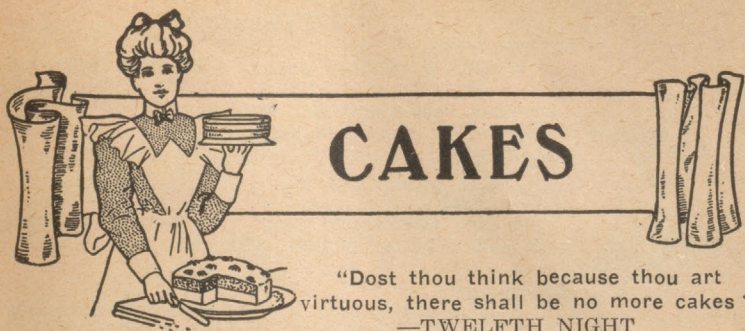

ROYAL HOUSEHOLD Flour is milled to make it the purest in the world; therefore it contains most protein, is most nourishing, is most economical to use.

It pays the housewife to insist upon getting "Royal Household" guaranteed flour, instead of taking a poorer flour which the grocer may be interested in selling.

"Dost thou think because thou art virtuous, there shall be no more cakes ?

—TWELFTH NIGHT

Cake-making requires more judgment than any other department of cooking. Nevertheless it is one of the most frequently tried by the beginner.

There are two classes of cakes; those with butter and those without it. The former embraces pound, cup, and fruit cake; to the latter belongs sponge, sunshine, and angel-cake.

Always mix cake in an earthen bowl. The baking of cake requires more care than the mixing. Divide the baking time into quarters; during the first it should begin to rise, the second it should finish rising and begin to brown, in the third it should continue to brown, and during the fourth and last it should finish browning and leave the sides of the pan.

Bake cake with nothing else in the oven and keep it as near the oven centre as possible. Remove the cake from the tin as soon as it leaves the oven, and place it on a sieve or a napkin covered board.

CAKE FILLINGS AND FROSTING

BOILED ICINGS

Materials.

2 cups sugar.
2/3 cup water.
Stiffly beaten whites of two eggs.
Flavoring to taste.

Preparation.

Boil the sugar and water without stirring until it forms a thick syrup, while boiling pour it slowly into the beaten eggs, beating the mixture rapidly all the time, until of right consistency to spread. Then add flavoring and spread on the cake.

ICING (uncooked).

Orange Icing.

2 cups pulverized sugar, moistened with juice of one orange and $\frac{1}{2}$ lemon. Add two tablespoons of melted butter and mix until smooth; when ready to spread on cake add some of the grated rind of the orange and sprinkle remainder on top of cake.

Coffee Icing.

The digestibility of pies has been called into question, but, when properly made, pies are as easily digested as anything else.

Until quite recently it has been taken for granted, by the majority of people, that it was impossible to make good pastry out of Manitoba wheat flour without using a large amount of shortening.

They have thought it necessary to keep two kinds of flour, one for bread, and the other for pastry. This idea is erroneous.

ROYAL HOUSEHOLD makes the most delicious pastry when same amount of shortening is used as with ordinary pastry flour. Try it with the following recipes.

Paste for pies should be kept cold, rolled quite thin and a little larger than the tin to allow for shrinkage. Allow more paste for the upper than the under crust, and be sure to perforate the former. Always brush around the edge of the undercrust with cold water and press the upper one down on it. When baking a juicy fruit pie make an incision in the centre and place a small funnel-shaped piece of paper into it.

This will keep the juice from escaping at the sides of the pie. Never grease a pie tin. Properly made pastry will grease its own tin.

PLAIN PASTRY.

- 4 cups (sifted) Ogilvie's Royal Household.
- 1 cup ice cold water.
- $\frac{3}{4}$ cup butter.
- $\frac{3}{4}$ cup lard.
- 1 teaspoon salt.

Preparation.

Mix salt with flour. With two knives cut in shortening, or rub in well with fingers. Add water little by little, stirring it in with a knife. Keep all materials and utensils as cold as possible during the whole process and work quickly. This is important. Roll out fold from the ends towards the centre making three layers. This may be used

at once, but is improved by putting in a cold place for several hours or over night and may be kept for three or four days. Do not let it freeze.

Be careful not to make paste too stiff. Just so it can be handled without sticking, is the proper consistency. Use more ice cold water if necessary

PUFF PASTE.

Materials.

4 cups (1 pound) Ogilvie's Royal Household
2 cups (1 pound) butter.
1 cup ice cold water.

Preparation.

Wash the butter thoroughly or until free from salt. Put both flour and butter in a cold place. Keep all utensils ice cold while working the dough. This is important. Mix about one-fourth of the butter into the flour adding enough ice cold water to make a nice paste. Roll out about one-fourth inch thick, spread more butter on with a knife and fold from ends towards centre making three layers. Repeat this until all the butter is worked in or at least three or four times to obtain the best results. The paste should be put in a cold place for several hours. over night is better but do not allow it to freeze. If outside temperature is not sufficient cold, fold paste in a towel, put in a small pan and place between two other pans of crushed ice. If paste is to be kept for several days, wrap in a napkin, put in tin pail and cover tightly, then put in a cold place. If in ice box. do not allow pail to come in direct contact with ice.

Be careful not to make paste too stiff. Just so it can be handled without sticking, is the proper consistency. Use more ice cold water if necessary. Bake in a moderately hot oven.

MEATS AND FOWLS

"They that have no other
meat,
Bread and butter are glad
to eat."

Next to bread, meat forms the principal food on our tables.

Always remember that the cheaper parts of a first class animal may be prepared to furnish far better dishes than the high priced portions of an inferior animal; in other words, a stew from the forequarter of a first-class animal will be better than a roast from the loin of an inferior animal, and it will be cheaper.

If meat is tough, soak in vinegar and water for six or seven hours in proportion of one and one-half pints of vinegar to six quarts of water.

Always cut across the grain of the muscle.

Never wash fresh meat before roasting. Scrape if necessary to clean it. If it has been wet, wipe thoroughly dry before cooking.

Do not put meat directly on ice, place in a vessel.

"The chief pleasure in eating does not consist in costly seasoning or exquisite flavour, but in yourself."—Horace.

The use of the chafing dish is, contrary to general opinion, far older than our present civilization. It reaches in some form back into the times of the ancient Greeks and Romans.

As used at present, alcohol is the fuel for the lamp attached to it, and a tray is desirable to protect tablecloth and table from alcohol and fire. The cap covering the opening through which the lamp is filled, should be kept in place after filling it. Otherwise controlling the flame is hardly possible.

A chafing-dish needs to be watched carefully from a chair with a high seat to make its use comfortable. For the benefit of the comparatively few who can and care to indulge in its use, the following recipes are presented.

Stuck fast paste is made by beating 1/2 teacupful of flour in 1 cold water to the consistency of pudding batter

The big, snowy loaves of bread that. "ROYAL HOUSEHOLD" Flour turns out, with their brown, crisp, crackling crust, are but a hint of the deliciously light, flakey pastry you can make with it.

add 1 teaspooonful powdered Alum, 1 teaspooonful of size 7 of sugar, put on fire & stir until it boils, Boil 5 minute. When cool add 10 drops of oil of cloves. This will make a hint of paste, keep well corked

USEFUL HINTS

CHINA CEMENT.

Broken china may be mended by making a light paste out of the white of an egg and flour, cleaning the broken edges from dust, and spreading with the paste and holding the parts while wet, wiping off all that oozes out. It must be held or fastened in position until dry.

RUST STAINS ON WHITE GOODS.

Lemon juice and salt will remove rust stains from linen or muslin without effecting the goods. Let the sun shine on the goods after having moistened the spots with the mixture—two or three applications may be necessary.

GRASS STAINS ON CLOTHING.

Should be saturated with alcohol for a little time, then wash in clear water.

REMOVING STARCH FROM IRONS.

Should starch cling to your iron while using it, sprinkle some salt on a piece of brown paper and rub the iron on it.

TO SOFTEN BOOTS AND SHOES.

Rub your boots and shoes well with castor oil and let them stand twelve hours. This will keep them from cracking and make them yielding and soft.

KEROSENE OIL.

Coal oil will help the housekeeper out of many difficulties. A spoonful of Kerosene added to a kettle of very hot water will make windows, looking-glasses and picture glasses bright and clear. Use a small clean cloth, wring it dry and rub it over the glass after wiping down the frame work with an oiled cloth. Then proceed to the next window and treat it similarly on both sides. After that go back to the first one and wipe it dry with a large clean cloth. No real polishing is required and the windows or glass will look clean and shiny.

Kerosene will clean your hands better than anything else after blacking a range or stove. Pour a little in the water, wash your hands in it, then plenty of soap, and using a stiff nail brush. Finish by rubbing the hands with lemon and glycerine.

When your kitchen sink is rusty rub it over with kerosene.

Squeaky shoes are cured by dipping the soles in kerosene. Use enough to reach the top of the soles without reaching the upper leather.

The white spots appearing in the spring on the lining of your refrigerator will disappear if you rub the zinc with kerosene. Leave the refrigerator open several hours, then wash with water, soap and some ammonia. The refrigerator will then be clean and sweet, all spots will have disappeared.

TO DESTROY INSECTS.

Insects may be destroyed with hot alum. Put in hot water and let boil until the alum is dissolved. Apply hot with a brush and all creeping things are instantly destroyed without danger to human life or injury to property.

TO GET RID OF RATS.

To get clear of rats, besides using traps, cats, or dogs, try chloride of lime. It is said they never come where that is placed.

TO FLAVOR SOUPS.

Turnip peel washed clean and tied in a knot imparts a flavor to soups. Celery leaves and ends serve the same purpose.

INK SPOTS ON FINGERS.

Ink is removed from the fingers in a very simple manner. Wet the fingers and then rub the phosphorus end of a match until the spot has disappeared.

RELEASING ICE CREAM OR JELLY FROM MOULDS.

Fold a hot cloth around the mould and jelly or ices will leave without sticking.

CLEANING PAINT.

Put two ounces of soda in a quart of hot water, and wash with it, rinsing the paint off with pure water.

“ROYAL HOUSEHOLD” is two flours in one. It makes just as fine pastry as it does bread—and the best of both.

POTATO AND ONION LUNCHEON DISH.

(By Mrs. Aylmer Macpherson.)

Cut peeled potatoes into small balls with a cutter, and peel small white onions, similar in size, allowing 2 cupfuls of each. Cook the onions till almost done, add the potato balls and 1 teaspoon of salt, and cook until both are tender. Drain, saving the water for soup. Place the vegetables in a shallow, buttered baking dish, and pour over them 1 cup of well-seasoned, white sauce. Sprinkle over the top 1-4 cup grated cheese and brown slightly in a hot oven.

Dear Katherine Kent,—For three years our household goods have been packed. Now that I am unpacking I find that some of the pillow cases, napkins, etc., have yellowed. Can you tell me how to make javelle water, or some bleaching liquid which will take out stains as well as whiten? "Mrs. D."

To make javelle water, dissolve a pound of salsoda in one quart of water. Dissolve a half-pound of chloride of lime in two quarts of cold water. Let this mixture settle and then pour off the clear liquid. Mix this with the dissolved soda and bottle. Keep in a dark place or it loses its strength. When using dilute with its own volume of cold water. Rinse article in clear water, then in water having a little ammonia added. Spread articles on grass, or leave hanging on line, in the sun.

"Marion."—Your long list of questions takes our breath away: (1) The old paper must be removed. The paperhanger usually does this. (2) Plain papers are used as much as ever. (3) The ivory and amber would harmonize. (4) A grandfather's clock would not be out of place in your hall. (5) The lace overdrape is too elaborate. Simplicity is the order of the day. (6) A glazed paper (washable) in green and white, or blue and grey, would be suitable for bathroom, and for the floor linoleum in the same col-

oring. (7) See article in Home-maker later on. (8) No, do not put ferns on the mantel; do not put much of anything—a brass vase, a pair of old-fashioned candlesticks will be sufficient. (9) The bride's blouse may be of the same shade as her suit, or it may be cream or white, or any of the new colors. (10) What to have for breakfast when week-end guests are present? About the same as on other days, to wit, cereal, bacon, toast, marmalade, coffee. For a change serve jam or sauce instead of marmalade, eggs instead of bacon, and biscuits or pancakes instead of toast.

Young Matron—To make the small mould salads dissolve one package of any of the prepared gelatins of lemon flavor in a pint of water. When cool add two cups shredded cabbage, one cup celery and a little pimento. Put in individual moulds and set away until firm and serve on crisp lettuce leaves with mayonnaise.

Dear Katherine Kent,—I spread my housecleaning over the year, doing just what I can extra, when it is convenient. I think this is by far the best way.

I want to thank the contributor who advised putting cake in oven before lighting gas. I tried it with splendid results. I thought I knew
